Introduction

The Longitudinal Ageing Study in India (LASI) is a nationally and state representative longitudinal study of ageing and health. LASI is a national landmark, the largest in the world and, only of its kind in India. Its main goal is to provide valid, reliable and continuous scientific data on the health, social, mental and economic well-being of India's older adult (aged 45 and above) population. These data will help to monitor existing programmes and inform new national health and ageing policies. LASI is undertaken as a globally harmonized study carried out in more than 44 developed and developing countries worldwide; and the survey schedules, protocols and methodologies are harmonized across these countries. These are part of the Health and Retirement Study (HRS) family of longitudinal ageing and retirement surveys. Therefore, LASI data will also serve as an important public resource for national policy making and worldwide comparative research on ageing.

LASI is undertaken under the aegis of the Ministry of Health and Family Welfare (MoHFW), Government of India. The International Institute for Population Sciences (IIPS), Mumbai is the nodal institution for implementing LASI in collaboration with the Harvard T.H.Chan School of Public Health (HSPH) and the University of Southern California (USC).

A. LASI Objectives and Coverage:

The LASI wave-1 survey (2017-18) covers all 30 states and 6 Union Territories of India with a panel sample size of 72,250 older adults aged 45 years and above and their spouses regardless of age. LASI collects data on four major subject domains:

- 1. Health: Disease Burden & Risk Factors (Reported and Measured)
- 2. Health Care and Health Care Financing
- 3. Social: Family, Social Network and Social Welfare Programmes for the Elderly
- 4. Economic: Income, Wealth, Expenditure, Employment, Retirement and Pension

The long-term goal of LASI is to continue for the next 25 years, with respondents surveyed every two years.

LASI Survey Instruments:

The LASI survey instrument comprises three schedules:

- **1. Household Survey Schedule:** Administered to one per household, collects information from interviewing one or more adult member of household. Includes the following modules: Household Roster, Housing and Environment, Household Consumption, Household Assets and Debts, Household Income and Household Health Insurance.
- 2. Individual Survey Schedule: Administered to each respondent aged 45 years and above and their spouses (regardless of age) in the sampled households. Includes the following modules: Demographics, Work, Retirement and Pension, Health (Chronic Diseases and Health Conditions), Functional Health, Family Medical History, Mental Health (Cognition and Depression), Health Behavior and Food Security, Health Care Access and Utilization, Health Care Financing, Family and Social Network, Social Welfare Programmes and Experimental Modules on Time Use, Expectations, Social Connectedness and Vignettes.

In addition, LASI includes an individual module on measured biomarkers:

- Anthropometric Measurements: Height, Weight, Waist Circumference and Hip Circumference.
- **Functional Health Markers:** Blood Pressure and Pulse Rate, Lung Function Test (Spirometry) and Vision Test (Near and Distance Vision Impairment).

- **Performance Based Markers:** Grip Strength, Timed-Walk and Balance Tests.
- Collection of Dried Blood Spot (DBS) samples: To be tested for variety of molecular biomarkers.
- **3.** In addition, a Community Survey Schedule is administered at the community level (villages in rural areas and census enumeration blocks in urban areas) and is answered by several key informants. The community schedule includes the following sections: Population Characteristics, Infrastructure and Common Resource, Accessibility and Availability of Health Care Services and coverage of Health and Social Welfare Programmes.

Fact sheet of Key Indicators for the Union Territory of Andaman & Nicobar Islands

This fact sheet provides information on key indicators (weighted) for the union territory of Andaman & Nicobar Islands. The fieldwork for Andaman & Nicobar Islands was conducted from **July through December 2018**. Table-1 provides information about the number of households and individuals interviewed.

Table 1 Number of households and individuals interviewed for the Union Territory of Andaman & Nicobar Islands, LASI Wave 1, 2017-18

Sr. No.	C	overage	Rural	Urban	Male	Female	Total
1.	Household roster completed		660	430	na	na	1090
2.	Households interviewed (with age-eligible individuals) #		451	274	na	na	725
2	Individuals	45-59 years and their spouses irrespective of age	474	247	290	431	721
3.	interviewed	60 years and above	330	193	276	247	523
		All ages	804	440	566	678	1244

na "not applicable"

[#] LASI age-eligible households are those with at least one individual in aged 45 years and above; age-eligible individuals are persons aged 45 years and above and their spouses (regardless of age) in the LASI sampled households.

Andaman & Nicobar-Key Indicators

13	60 + population	28.1	27.9	27.9
Hou	sehold-Level Key Indicators ³	Rural	Urban	Total
	Housing and Environment			
14	Households with improved sanitation (%) ⁴	85.2	99.1	90.6
15	Households practicing open defecation (%) ⁵	14.8	0.9	9.4
16	Households with water facility inside dwelling/own yard (%)	70.9	99.3	81.9
17	Households with improved drinking water source (%) ⁶	91.1	99.9	94.5
18	Households with electricity (%)	83.6	99.2	89.6
	Households using clean cooking fuel (%) ⁷	48.2	91.4	64.9
19	Households using clean cooking fuel (70)	40.2	71.4	
19 20	Households exposed to indoor pollution (%) ⁸	14.7	4.0	10.5
20	Households exposed to indoor pollution (%) ⁸	14.7	4.0	10.5
20	Households exposed to indoor pollution (%) ⁸ Households with <i>pucca</i> house (%) ⁹	14.7	4.0	10.5
20 21	Households exposed to indoor pollution (%) ⁸ Households with <i>pucca</i> house (%) ⁹ Household Consumption	14.7 26.4	4.0 84.7	10.5 53.2

¹ Based on all households including LASI age-eligible and non-age-eligible households.

 $^{^{\}rm 2}$ Death rate is calculated based on deaths in the last two calendar years.

³ Based on LASI age-eligible households only.

⁴ Improved sanitation includes flush or pour flush toilet (which is flushed to piped sewer system/septic tank/ pit latrine), pit latrine, twin pit, composting toilet

⁵ Open defecation refers to the practice whereby people go out in fields, bushes, forests, open bodies of water, or other open spaces rather than using the toilet to defecate. This information was collected from eligible household respondent.

⁶ Improved drinking water source includes water from pipe, public tap/standpipe, tube well or bore well, dug well, spring water and rain water.

⁷ Clean cooking fuel includes LPG, Biogas and Electricity.

⁸ Indoor pollution refers to households using solid and unclean fuel (for cooking or any other purpose) inside the household and cooking in traditional *chullah/stove* or open fire without any ventilation. Unclean fuel refers to use of kerosene, charcoal, coal, crop residue, wood/shrub and dung cake.

⁹ Pucca house refers to a house whose roof, wall and floor is made up of pucca (concrete) material.

¹⁰ MPCE is defined as total monthly household consumption expenditure divided by household size. Includes household's per capita spending on food and non food items including spending on health, education, utilities etc.

Hou	sehold-Level Key Indicators ³	Rural	Urban	Total
	Household Assets and Debts			
25	Households owning current residence (%)	88.4	76.7	83.9
26	Households owning television, refrigerator, mobile phone and any motorized vehicle (%) ¹¹	18.4	40.6	27.0
27	Households who had taken any loan (%)	4.6	14.2	8.3
	Household Income

	Per Capita Annual Household Income by Source (in INR) ¹³			
29	Mean income from agricultural and allied activities	7140	747	4764
30	Mean income from non-agricultural business or self-employed activities	3151	39718	16660
31	Mean income from wages/salaries ¹⁴	22248	82603	44765
32	Mean income from pension ¹⁵	5471	17980	10089
33	Mean income from government/public transfers ¹⁶	1686	2997	2173
	Household Insurance			
34	Households covered by any health insurance (%) ¹⁷	[0.3]	2.7	1.2
35	Households covered by Rashtriya Swasthya Bima Yojana (RSBY) & allied schemes (%) ¹⁸	-	-	-
36	Households covered by Central Government Health Scheme (CGHS)/Employee State Insurance Scheme (ESIS) (%)	[0.3]	[2.1]	1.0
37	Households covered by medical reimbursement/health insurance from an employer (%)	-	[0.1]	-
38	Households covered by privately purchased commercial health insurance (%)	-	[0.6]	[0.2]

-

[&]quot;[]" based on fewer than 5 unweighted cases in the numerator or 25 unweighted cases in the denominator, "-" indicates less number of cases/ no cases.

11 Any one or more motorized vehicle includes car, motor cycle, moped and scooter.

¹² Per Capita Annual Household Income refers to total household income divided by household size. It includes income from all members of the household and from all sources such as agricultural work, non-agricultural work, self-employment, remittances/gifts, wages/salaries from employment, pension income and public/private transfers.

¹³ Based on income reported from household by that particular source.

¹⁴ Wage/salary work refers to income from full-time, part-time, side-jobs odd jobs or other wages or salaries.

¹⁵ Work related pension refers to income from central/state government pension, employer funded pension, privately purchased commercial pension and other state pension schemes.

¹⁶ Government/public transfers includes agriculture subsidies, non-agricultural government subsidies (LPG subsidy, scholarship for education, subsidy for building toilets, subsidy for setting up small scale industries, subsidy for solar panels, etc.), housing assistance, unemployment allowance, Janani Suraksha Yojana (JSY)/any other maternity compensation, compensation under any other health benefits program (other than JSY), Compensation for illness or accident, emergency or disaster relief (flood, earthquake, drought, etc.), debt waiver, compensation for re-settlement (due to slums, dams, road, etc.), assistance for self-employment (like Swarna Jayanti Gram Swarozgar Yojana/ National Rural Livelihood Mission), social security pension schemes (like Indira Gandhi National Old Age Pension Scheme, Indira Gandhi National Widow Pension Scheme, Indira Gandhi National Disability Pension Scheme) and other government transfers.

¹⁷ Includes different types of health insurance/benefits such as CGHS, ESIS, RSBY, other central/state government health insurance schemes or medical reimbursement from employer etc.

¹⁸ Allied schemes refers to state specific schemes which are based on Rashtriya Swasthya Bima Yojana (RSBY) model.

⁴⁰ Currently consuming tobacco refers to consumption of any smokeless tobacco product such as chewing tobacco, *gutka* or *pan masala* etc.

^{*} Including spouse irrespective of age, na "not applicable", "[]" based on fewer than 5 unweighted cases in the numerator or 25 unweighted cases in the

³⁷ Among those who are aware of concessions given by the government for elderly.

³⁸ The "Maintenance and Welfare of Parents and Senior Citizens Act" mandates legal obligation on children to financially maintain their parents/provide monthly allowances.

³⁹ Currently smoking tobacco refers to smoking any tobacco product such as cigarette, *bidi*, cigar, *hookah* and *cheroot* etc.

⁴¹ Heavy episodic drinking refers to those who reported consumption of at least 60 grams or more (10 grams = 1 standard drink) of pure alcohol on at least one occasion in the past 30 days.

⁴² Those who are either engaged in moderate physical activity (at least 150 minutes throughout the week) or vigorous physical activity (at least 75 minutes throughout the week) or an equivalent combination of moderate- and vigorous-intensity activity.

⁴³ Refers to yoga/meditation/asanas/pranayama etc. practicing daily or more than once a week.

⁴⁴ For all chronic conditions, the reference period is *ever diagnosed* and diagnosed by MBBS, BDS and AYUSH health professionals.

⁴⁵ Poor Self Rated Health (SRH) includes both poor and very poor self-assessed health status.

⁴⁶ Cardiovascular diseases include hypertension, heart disease and stroke (any one or more).

⁴⁷ Chronic lung diseases include chronic obstructive pulmonary disease (COPD), asthma and chronic bronchitis (any one or more).

⁴⁸ Bone /joint diseases include arthritis, rheumatism and osteoporosis (any one or more).

* Including spouse irrespective of age, "[]" based on fewer than 5 unweighted cases in the numerator or 25 unweighted cases in the denominator, "-"

indicates less number of cases/ no cases.

49 Any neurological/psychiatric problem includes depression, alzheimer's disease, dementia or psychiatric problem or neurological problem (any one or

⁵⁰ Psychiatric problems include unipolar or bipolar disorder, schizophrenia etc. (any one or more).

⁵¹ Neurological problems include neuropathy, convulsion, migraine, Parkinson's etc. (any one or more).

⁵² Includes oral cancer, breast cancer, cervical cancer, lung cancer or cancer/malignant tumors originating in any other organs/ body parts (any one or more).

⁵³ Urogenital conditions include chronic renal failure, incontinence, kidney stone and Benign Prostate Hypertrophy-BPH (only among males) (any one or more)

⁵⁴ Eye or vision related conditions or problems include presbyopia, glaucoma, cataract, myopia, hypermetropia, other eyes problems such as conjunctivitis, eye injury, red eye etc. (any one or more).

⁵⁵ Refractive error includes presbyopia, myopia and hypermetropia with or without astigmatism.

⁵⁶ Common oral health problems include painful teeth, ulcer lasting more than two weeks, bleeding gums, swelling gums, loose teeth, dental cavity/dental caries & soreness or cracks in the corner of the mouth in past 12 months (any one or more).

⁵⁷ Periodontal diseases include bleeding gums, swelling gums or ulcers lasting more than two weeks (any one or more).

⁵⁸ Injury include injuries sustained due to any traffic accident, violence, animal attack or fall in the past 2 years (any one or more).

⁵⁹ Reference period for natural and man-made disaster is past 5 years.

⁶⁰ Health problems due to natural and man-made disaster refers to permanent physical disability, psychological and mental health problems or chronic illness (any one or more).

* Including spouse irrespective of age, na "not applicable", "[]" based on fewer than 5 unweighted cases in the numerator or 25 unweighted cases in the denominator, "-" indicates less number of cases/ no cases.

⁶¹ For prevalence of endemic diseases in India, the reference period is past 2 years (any one or more).

⁶² Any vector-borne disease includes malaria, dengue or chikungunya (any one or more).

⁶³ Any water-borne disease includes diarrhoea/gastroenteritis, typhoid, jaundice or hepatitis (any one or more).

⁶⁴ For symptom based prevalence of health conditions, the reference period is past 2 years.

⁶⁵ Angina pectoris refers to, "a chest pain or discomfort with all the following symptoms: (a) the pain must include either the sternum (any level) or the left arm and left anterior chest (defined as the anterior chest wall between the levels of clavicle and lower end of sternum), (b) pain must be provoked by either hurrying or walking uphill (or by walking on the level, for those who never attempt more), (c) when pain occurs on walking it must make the person either stop or slacken pace, (d) pain must disappear on a majority of occasions in 10 min or less from the time when the person stands still.

⁶⁶ Sleep problems refer to difficulty in falling asleep or staying asleep throughout the night and also feeling unrested during the day (any one or more).

⁶⁷ Reproductive health problems include hot flashes, irregular vaginal discharge, uterine prolapse, fibroids, cysts and vaginal dryness in the past 2 years (any one or more).

⁶⁸ The reference period for Pap Smear and Mammography is past 2 years.

⁶⁹ Biological family members include -father, mother, brother, sister, children and grandchildren.

⁷⁰ Refers to functional limitations lasting more than 3 months.

⁷¹ Activities of Daily Living (ADL) includes dressing, putting on *chappals* or shoes, walking across a room, bathing, eating difficulties, getting in or out of bed (any one or more).

* Including spouse irrespective of age, "[]" based on fewer than 5 unweighted cases in the numerator or 25 unweighted cases in the denominator.

⁷³ Helper refers to any person/s assisting respondent in any ADL/IADL limitations.

⁷² Instrumental Activities of Daily Living (IADL) includes preparing a hot meal, shopping for groceries, making telephone calls, taking medications, doing work around the house or garden, managing money (paying bills and keeping track of expenses) and getting around or finding address in unfamiliar place (any one or more).

⁷⁴ Aids or supportive devices include spectacles and dentures and devices to help you in moving or sitting (such as, walker, walking sticks, wheel chair, adjustable showers stools/commodes, back/neck collar, orthosis/prosthesis).

⁷⁵ Among those respondents who reported using any aid or supportive device(s) to assist them in the activities of daily living.

⁷⁶ Immediate word recall refers to total number of words recalled from the given list of 10 words immediately.

⁷⁷ Delayed word recall refers to total number of words recalled from the same given list of 10 words after some delay.

⁷⁸ Based on Composite International Diagnostic Interview-Short Form (CIDI-SF); respondent who reported that they felt sad, blue or depressed for two-weeks period during last 12 months for all the day long or most of the day.

⁷⁹ Prevalence of measured hypertension refers to those measured with systolic blood pressure of ≥ 140 mmHg or diastolic blood pressure of ≥ 90 mmHg or both

⁸⁰ Prevalence of undiagnosed hypertension refers to those undiagnosed by a health professional but whose measured systolic blood pressure was ≥ 140 mmHg or diastolic blood pressure was ≥ 90 mmHg or both.

⁸¹ Untreated hypertension refers to those who reported that they have been diagnosed with hypertension by a health professional and currently measured with hypertension but currently not taking treatment

⁸² Undertreated hypertension refers to those who reported that they have been diagnosed with hypertension by a health professional and currently measured with hypertension but currently taking treatment.

⁸³ Adequately treated hypertension refers to those reported that they have been diagnosed by health professional and currently taking treatment and whose measured systolic blood pressure was < 140 mmHg and diastolic blood pressure was < 90 mmHg.</p>

⁸⁴ Low vision refers to either low near vision or low distant vision in the better eye with best correction available with the respondent.

⁸⁵ Low near vision refers to near vision equal to or poorer than 20/80 and equal to or better than 20/400 in the better eye with best correction available with respondent.

* Including spouse irrespective of age, "[]" based on fewer than 5 unweighted cases in the numerator or 25 unweighted cases in the denominator.

⁹⁰ WHO criteria of classification of waist- hip ratio (WHR)

Male	Female	Risk level
< 0.90	< 0.85	Low
≥0.90	≥0.85	High

⁹¹ Grip strength measures bodily muscle strength and is an overall marker of health among elderly population. Mean grip strength is an average of two readings for dominant hand.

⁸⁶ Low distance vision refers to distance vision equal to or poorer than 20/80 and equal to or better than 20/200 in the better eye with best correction available with respondent.

⁸⁷ Blindness refers to those with vision less than 20/200 in distance or could not count finger or perceive light.

⁸⁸ Body Mass Index (BMI) refers to weight in kilograms divided by height in meter square (kg/m²). BMI levels have been classified according to WHO classifications: underweight ≤ 18.4; normal=18.5 to 24.9; overweight=25.0 to 29.9; obese ≥30.0

⁸⁹ Metabolic complications: critical limit classification for high risk waist circumference for male is ≥102 cm and for female is ≥ 88cm.

⁹² Includes health post/sub centers, primary health center/urban health center, community health center, district/sub-district hospital, government/tertiary hospital or government AYUSH hospital.

⁹³ Includes private hospital/nursing home, private clinic (OPD based services), NGO/Charity/Trust/Church-run hospital/Private AYUSH hospital. It also includes health care services availed partially from either private or government or NGO.

⁹⁴ Among those who sought out-patient care in the past 12 months and this includes modern allopathic medicines, AYUSH medicines, traditional herbs or medicine, excluding any health supplements.

⁹⁵ The expenditure on last in-patient visit includes consultation charges, medicine charges, test/investigation charge, nursing home charges, surgery and related charges, transportation charges and any other charges.

ANDHRA PRADESH

Introduction

The Longitudinal Ageing Study in India (LASI) is a nationally and state representative longitudinal study of ageing and health. LASI is a national landmark, the largest in the world and, only of its kind in India. Its main goal is to provide valid, reliable and continuous scientific data on the health, social, mental and economic well-being of India's older adult (aged 45 and above) population. These data will help to monitor existing programmes and inform new national health and ageing policies. LASI is undertaken as a globally harmonized study carried out in more than 44 developed and developing countries worldwide; and the survey schedules, protocols and methodologies are harmonized across these countries. These are part of the Health and Retirement Study (HRS) family of longitudinal ageing and retirement surveys. Therefore, LASI data will also serve as an important public resource for national policy making and worldwide comparative research on ageing.

LASI is undertaken under the aegis of the Ministry of Health and Family Welfare (MoHFW), Government of India. The International Institute for Population Sciences (IIPS), Mumbai is the nodal institution for implementing LASI in collaboration with the Harvard T. H. Chan School of Public Health (HSPH) and the University of Southern California (USC).

A. LASI Objectives and Coverage:

The LASI wave-1 survey (2017-18) covers all 30 states and 6 Union Territories of India with a panel sample size of 72,250 older adults aged 45 years and above and their spouses regardless of age. LASI collects data on four major subject domains:

- 1. Health: Disease Burden & Risk Factors (Reported and Measured)
- 2. Health Care and Health Care Financing
- 3. Social: Family, Social Network and Social Welfare Programmes for the Elderly
- 4. Economic: Income, Wealth, Expenditure, Employment, Retirement and Pension

The long-term goal of LASI is to continue for the next 25 years, with respondents surveyed every two years.

LASI Survey Instruments:

The LASI survey instrument comprises three schedules:

- **1. Household Survey Schedule:** Administered to one per household, collects information from interviewing one or more adult member of household. Includes the following modules: Household Roster, Housing and Environment, Household Consumption, Household Assets and Debts, Household Income and Household Health Insurance.
- 2. Individual Survey Schedule: Administered to each respondent aged 45 years and above and their spouses (regardless of age) in the sampled households. Includes the following modules: Demographics, Work, Retirement and Pension, Health (Chronic Diseases and Health Conditions), Functional Health, Family Medical History, Mental Health (Cognition and Depression), Health Behavior and Food Security, Health Care Access and Utilization, Health Care Financing, Family and Social Network, Social Welfare Programmes and Experimental Modules on Time Use, Expectations, Social Connectedness and Vignettes.

In addition, LASI includes an individual module on measured biomarkers:

- Anthropometric Measurements: Height, Weight, Waist Circumference and Hip Circumference.
- Functional Health Markers: Blood Pressure and Pulse Rate, Lung Function Test (Spirometry) and Vision Test (Near and Distance Vision Impairment).

- **Performance Based Markers:** Grip Strength, Timed-Walk and Balance Tests.
- Collection of Dried Blood Spot (DBS) samples: To be tested for variety of molecular biomarkers.
- **3.** In addition, a Community Survey Schedule is administered at the community level (villages in rural areas and census enumeration blocks in urban areas) and is answered by several key informants. The community schedule includes the following sections: Population Characteristics, Infrastructure and Common Resource, Accessibility and Availability of Health Care Services and coverage of Health and Social Welfare Programmes.

Fact Sheet of Key Indicators for the State of Andhra Pradesh

This fact sheet provides information on key indicators (weighted) for the state of Andhra Pradesh. The fieldwork for Andhra Pradesh was conducted from **July 2018 through February 2019**. Table-1 provides information about the number of households and individuals interviewed.

Table 1 Number of Households and Individuals interviewed for the state of Andhra Pradesh, LASI Wave 1, 2018-19

Sr. No.	Coverage		Rural	Urban	Male	Female	Total		
1.	Household roster completed		Household roster completed		1596	666	na	na	2262
2.	Households interviewed (with age-eligible individuals) #		1107	404	na	na	1511		
3.	Individuals	45-59 years and their spouses irrespective of age	1126	448	569	1005	1574		
3.	Interviewed	60 years and above	830	275	551	554	1105		
		All ages	1956	723	1120	1559	2679		

na "not applicable"

[#] LASI age-eligible households are those with at least one individual in aged 45 years and above; age-eligible individuals are persons aged 45 years and above and their spouses (regardless of age) in the LASI sampled households.

Andhra Pradesh - Key Indicators

Hou	sehold-Level Key Indicators	LASI-Wave 1, 2018-19				
Hou	sehold Population Profile ¹	Rural	Urban	Total

	Household Consumption					
22	Household Monthly Per Capita Consumption Expenditure (MPCE) in INR ¹⁰	3254	4084	3517		
23	Household Per Capita Food Expenditure as a share of MPCE (%)	53.1	44.5	50.0		
24	Household Per Capita Health Expenditure as a share of MPCE (%)	14.0	12.6	13.5		

 $^{^{\}rm 1}$ Based on all households including LASI age-eligible and non-age-eligible households.

² Death rate is calculated based on deaths in the last two calendar years.

³ Based on LASI age-eligible households only.

⁴ Improved sanitation includes flush or pour flush toilet (which is flushed to piped sewer system/septic tank/ pit latrine), pit latrine, twin pit, composting toilet.

⁵ Open defecation refers to the practice whereby people go out in fields, bushes, forests, open bodies of water, or other open spaces rather than using the toilet to defecate. This information was collected from eligible household respondent.

⁶ Improved drinking water source includes water from pipe, public tap/standpipe, tube well or bore well, dug well, spring water and rain water.

⁷ Clean cooking fuel includes LPG, Biogas and Electricity.

⁸ Indoor pollution refers to households using solid and unclean fuel (for cooking or any other purpose) inside the household and cooking in traditional *chullah/stove* or open fire without any ventilation. Unclean fuel refers to use of kerosene, charcoal, coal, crop residue, wood/shrub and dung cake.

⁹ Pucca house refers to a house whose roof, wall and floor is made up of pucca (concrete) material.

¹⁰ MPCE is defined as total monthly household consumption expenditure divided by household size. Includes household's per capita spending on food and non-food items including spending on health, education, utilities etc.

Hou	ısehold-Level Key Indicators ³	Rural	Urban	Total
	Household Assets and Debts			
25	Households owning current residence (%)	92.1	58.0	81.4

	Per Capita Annual Household Income by Source (in INR) ¹³			
29	Mean income from agricultural and allied activities	18199	2993	13373
30	Mean income from non-agricultural business or self-employed activities	3468	13014	6502
31	Mean income from wages/salaries ¹⁴	23631	40548	28999
32	Mean income from pension ¹⁵	1246	9866	3984
33	Mean income from government/public transfers ¹⁶	2596	1790	2341
	Household Insurance			
34	Households covered by any health insurance (%) ¹⁷	44.3	36.3	41.8
35	Households covered by Rashtriya Swasthya Bima Yojana (RSBY) & allied schemes (%) ¹⁸	43.7	29.9	39.4
36	Households covered by Central Government Health Scheme (CGHS)/Employee State Insurance Scheme (ESIS) (%)	1.2	5.7	2.6
37	Households covered by medical reimbursement/health insurance from an employer (%)	[0.1]	[2.1]	0.7
38	Households covered by privately purchased commercial health insurance (%)	[0.2]	[1.1]	0.5

Any one or more motorized vehicle includes car, motor cycle, moped and scooter.

¹⁴ Wage/salary work refers to income from full-time, part-time, side-jobs odd jobs or other wages or salaries.

[&]quot;[]" based on fewer than 5 unweighted cases in the numerator or 25 unweighted cases in the denominator.

¹² Per Capita Annual Household Income refers to total household income divided by household size. It includes income from all members of the household and from all sources such as agricultural work, non-agricultural work, self-employment, remittances/gifts, wages/salaries from employment, pension income and public/private transfers.

¹³ Based on income reported from household by that particular source.

¹⁵ Work related pension refers to income from central/state government pension, employer funded pension, privately purchased commercial pension and other state pension schemes.

¹⁶ Government/public transfers includes agriculture subsidies, non-agricultural government subsidies (LPG subsidy, scholarship for education, subsidy for building toilets, subsidy for setting up small scale industries, subsidy for solar panels, etc.), housing assistance, unemployment allowance, Janani Suraksha Yojana (JSY)/any other maternity compensation, compensation under any other health benefits program (other than JSY), Compensation for illness or accident, emergency or disaster relief (flood, earthquake, drought, etc.), debt waiver, compensation for re-settlement (due to slums, dams, road, etc.), assistance for self-employment (like Swarna Jayanti Gram Swarozgar Yojana/ National Rural Livelihood Mission), social security pension schemes (like Indira Gandhi National Old Age Pension Scheme, Indira Gandhi National Disability Pension Scheme) and other government transfers.

¹⁷ Includes different types of health insurance/benefits such as CGHS, ESIS, RSBY, other central/state government health insurance schemes or medical reimbursement from employer etc.

¹⁸ Allied schemes refers to state specific schemes which are based on Rashtriya Swasthya Bima Yojana (RSBY) model.

* Including spouse irrespective of age, "[]" based on fewer than 5 unweighted cases in the numerator or 25 unweighted cases in the denominator.

⁴⁹ Any neurological/psychiatric problem includes depression, alzheimer's disease, dementia or psychiatric problem or neurological problem (any one or more).

⁵⁰ Psychiatric problems include unipolar or bipolar disorder, schizophrenia etc. (any one or more).

⁵¹ Neurological problems include neuropathy, convulsion, migraine, Parkinson's etc. (any one or more).

⁵² Includes oral cancer, breast cancer, cervical cancer, lung cancer or cancer/malignant tumors originating in any other organs/ body parts (any one or more).

⁵³ Urogenital conditions include chronic renal failure, incontinence, kidney stone and Benign Prostate Hypertrophy-BPH (only among males) (any one or more)

⁵⁴ Eye or vision related conditions or problems include presbyopia, glaucoma, cataract, myopia, hypermetropia, other eyes problems such as conjunctivitis, eye injury, red eye etc. (any one or more).

⁵⁵ Refractive error includes presbyopia, myopia and hypermetropia with or without astigmatism.

⁵⁶ Common oral health problems include painful teeth, ulcer lasting more than two weeks, bleeding gums, swelling gums, loose teeth, dental cavity/dental caries & soreness or cracks in the corner of the mouth in past 12 months (any one or more).

⁵⁷ Periodontal diseases include bleeding gums, swelling gums or ulcers lasting more than two weeks (any one or more).

⁵⁸ Injury include injuries sustained due to any traffic accident, violence, animal attack or fall in the past 2 years (any one or more).

⁵⁹ Reference period for natural and man-made disaster is past 5 years.

⁶⁰ Health problems due to natural and man-made disaster refers to permanent physical disability, psychological and mental health problems or chronic illness (any one or more).

^{*} Including spouse irrespective of age, na "not applicable", "[]" based on fewer than 5 unweighted cases in the numerator or 25 unweighted cases in the denominator, "-" indicates less number of cases/ no cases.

⁶¹ For prevalence of endemic diseases in India, the reference period is past 2 years (any one or more).

⁶² Any vector-borne disease includes malaria, dengue or chikungunya (any one or more).

⁶³ Any water-borne disease includes diarrhoea/gastroenteritis, typhoid, jaundice or hepatitis (any one or more).

 $^{^{64}}$ For symptom based prevalence of health conditions, the reference period is past 2 years.

⁶⁵ Angina pectoris refers to, "a chest pain or discomfort with all the following symptoms: (a) the pain must include either the sternum (any level) or the left arm and left anterior chest (defined as the anterior chest wall between the levels of clavicle and lower end of sternum), (b) pain must be provoked by either hurrying or walking uphill (or by walking on the level, for those who never attempt more), (c) when pain occurs on walking it must make the person either stop or slacken pace, (d) pain must disappear on a majority of occasions in 10 min or less from the time when the person stands still.

⁶⁶ Sleep problems refer to difficulty in falling asleep or staying asleep throughout the night and also feeling unrested during the day (any one or more).

⁶⁷ Reproductive health problems include hot flashes, irregular vaginal discharge, uterine prolapse, fibroids, cysts and vaginal dryness in the past 2 years (any one or more).

⁶⁸ The reference period for Pap Smear and Mammography is past 2 years.

⁶⁹ Biological family members include -father, mother, brother, sister, children and grandchildren.

⁷⁰ Refers to the functional limitation lasting more than 3 months.

⁷¹ Activities of Daily Living (ADL) includes dressing, putting on *chappals* or shoes, walking across a room, bathing, eating difficulties, getting in or out of bed (any one or more).

⁷² Instrumental Activities of Daily Living (IADL) includes preparing a hot meal, shopping for groceries, making telephone calls, taking medications, doing work around the house or garden, managing money (paying bills and keeping track of expenses) and getting around or finding address in unfamiliar place (any one or more).

* Including spouse irrespective of age, "[]" based on fewer than 5 unweighted cases in the numerator or 25 unweighted cases in the denominator.

⁷³ Helper refers to any person/s assisting respondent in any ADL/IADL limitations.

Aids or supportive devices include spectacles and dentures and devices to help you in moving or sitting (such as, walker, walking sticks, wheel chair, adjustable showers stools/commodes, back/neck collar, orthosis/prosthesis).

⁷⁵ Among those respondents who reported using any aid or supportive device(s) to assist them in the activities of daily living.

⁷⁶ Immediate word recall refers to total number of words recalled from the given list of 10 words immediately.

⁷⁷ Delayed word recall refers to total number of words recalled from the same given list of 10 words after some delay.

⁷⁸ Based on Composite International Diagnostic Interview-Short Form (CIDI-SF); respondent who reported that they felt sad, blue or depressed for two-weeks period during last 12 months for all the day long or most of the day.

⁸⁰ Prevalence of undiagnosed hypertension refers to those undiagnosed by a health professional but whose measured systolic blood pressure was ≥ 140 mmHg or diastolic blood pressure was ≥ 90 mmHg or both.

⁸¹ Untreated hypertension refers to those who reported that they have been diagnosed with hypertension by a health professional and currently measured with hypertension but currently not taking treatment

⁸² Undertreated hypertension refers to those who reported that they have been diagnosed with hypertension by a health professional and currently measured with hypertension but currently taking treatment.

⁸³ Adequately treated hypertension refers to those reported that they have been diagnosed by health professional and currently taking treatment and whose measured systolic blood pressure was < 140 mmHg and diastolic blood pressure was < 90 mmHg.</p>

⁸⁴ Low vision refers to either low near vision or low distant vision in the better eye with best correction available with the respondent.

⁸⁵ Low near vision refers to near vision equal to or poorer than 20/80 and equal to or better than 20/400 in the better eye with best correction available with respondent.

⁸⁶ Low distance vision refers to distance vision equal to or poorer than 20/80 and equal to or better than 20/200 in the better eye with best correction available with respondent.

⁸⁷ Blindness refers to those with vision less than 20/200 in distance or could not count finger or perceive light.

ARUNACHAL PRADESH

Introduction

The Longitudinal Ageing Study in India (LASI) is a nationally and state representative longitudinal study of ageing and health. LASI is a national landmark, the largest in the world and, only of its kind in India. Its main goal is to provide valid, reliable and continuous scientific data on the health, social, mental and economic well-being of India's older adult (aged 45 and above) population. These data will help to monitor existing programmes and inform new national health and ageing policies. LASI is undertaken as a globally harmonized study carried out in more than 44 developed and developing countries worldwide; and the survey schedules, protocols and methodologies are harmonized across these countries. These are part of the Health and Retirement Study (HRS) family of longitudinal ageing and retirement surveys. Therefore, LASI data will also serve as an important public resource for national policy making and worldwide comparative research on ageing.

LASI is undertaken under the aegis of the Ministry of Health and Family Welfare (MoHFW), Government of India. The International Institute for Population Sciences (IIPS), Mumbai is the nodal institution for implementing LASI in collaboration with the Harvard T. H. Chan School of Public Health (HSPH) and the University of Southern California (USC).

A. LASI Objectives and Coverage:

The LASI wave-1 survey (2017-18) covers all 30 states and 6 Union Territories of India with a panel sample size of 72,250 older adults aged 45 years and above and their spouses regardless of age. LASI collects data on four major subject domains:

- 1. Health: Disease Burden & Risk Factors (Reported and Measured)
- 2. Health Care and Health Care Financing
- 3. Social: Family, Social Network and Social Welfare Programmes for the Elderly
- 4. Economic: Income, Wealth, Expenditure, Employment, Retirement and Pension

The long-term goal of LASI is to continue for the next 25 years, with respondents surveyed every two years.

LASI Survey Instruments:

The LASI survey instrument comprises three schedules:

- **1. Household Survey Schedule**: Administered to one per household, collects information from interviewing one or more adult member of household. Includes the following modules: Household Roster, Housing and Environment, Household Consumption, Household Assets and Debts, Household Income and Household Health Insurance.
- 2. Individual Survey Schedule: Administered to each respondent aged 45 years and above and their spouses (regardless of age) in the sampled households. Includes the following modules: Demographics, Work, Retirement and Pension, Health (Chronic Diseases and Health Conditions), Functional Health, Family Medical History, Mental Health (Cognition and Depression), Health Behavior and Food Security, Health Care Access and Utilization, Health Care Financing, Family and Social Network, Social Welfare Programmes and Experimental Modules on Time Use, Expectations, Social Connectedness and Vignettes.

In addition, LASI includes an individual module on measured biomarkers:

- Anthropometric Measurements: Height, Weight, Waist Circumference and Hip Circumference.
- **Functional Health Markers**: Blood Pressure and Pulse Rate, Lung Function Test (Spirometry) and Vision Test (Near and Distance Vision Impairment).

- **Performance Based Markers:** Grip Strength, Timed-Walk and Balance Tests.
- Collection of Dried Blood Spot (DBS) samples: To be tested for variety of molecular biomarkers.
- **3.** In addition, a Community Survey Schedule is administered at the community level (villages in rural areas and census enumeration blocks in urban areas) and is answered by several key informants. The community schedule includes the following sections: Population Characteristics, Infrastructure and Common Resource, Accessibility and Availability of Health Care Services and coverage of Health and Social Welfare Programmes.

Fact Sheet of Key Indicators for the State of Arunachal Pradesh

This fact sheet provides information on key indicators (weighted) for the state of Arunachal Pradesh. The fieldwork for Arunachal Pradesh was conducted from **April through September 2018**. Table-1 provides information about the number of households and individuals interviewed.

Table 1 Number of Households and Individuals interviewed for the state of Arunachal Pradesh, LASI Wave 1, 2017-18

¹ Based on all households including LASI age-eligible and non-age-eligible households.

 $^{^{\}rm 2}$ Death rate is calculated based on deaths in the last two calendar years.

³ Based on LASI age-eligible households only.

⁴ Improved sanitation includes flush or pour flush toilet (which is flushed to piped sewer system/septic tank/ pit latrine), pit latrine, twin pit, composting toilet

⁵ Open defecation refers to the practice whereby people go out in fields, bushes, forests, open bodies of water, or other open spaces rather than using the toilet to defecate. This information was collected from eligible household respondent.

⁶ Improved drinking water source includes water from pipe, public tap/standpipe, tube well or bore well, dug well, spring water and rain water.

⁷ Clean cooking fuel includes LPG, Biogas and Electricity.

⁸ Indoor pollution refers to households using solid and unclean fuel (for cooking or any other purpose) inside the household and cooking in traditional *chullah/stove* or open fire without any ventilation. Unclean fuel refers to use of kerosene, charcoal, coal, crop residue, wood/shrub and dung cake.

⁹ Pucca house refers to a house whose roof, wall and floor is made up of pucca (concrete) material.

¹⁰ MPCE is defined as total monthly household consumption expenditure divided by household size. Includes household's per capita spending on food and non-food items including spending on health, education, utilities etc.

Hou	sehold-Level Key Indicators ³	Rural	Urban	Total
	Household Assets and Debts			
25	Households owning current residence (%)	85.7	26.8	73.3

37	Households covered by medical reimbursement/health insurance from an employer (%)	[0.8]	[0.6]	[0.8]
38	Households covered by privately purchased commercial health insurance (%)	[0.4]	[1.4]	[0.6]

[&]quot;[]" based on fewer than 5 unweighted cases in the numerator or 25 unweighted cases in the denominator, "-" indicates less number of cases/ no cases.

11 Any one or more motorized vehicle includes car, motor cycle, moped and scooter.

¹² Per Capita Annual Household Income refers to total household income divided by household size. It includes income from all members of the household and from all sources such as agricultural work, non-agricultural work, self-employment, remittances/gifts, wages/salaries from employment, pension income and public/private transfers.

¹³ Based on income reported from household by that particular source.

¹⁴ Wage/salary work refers to income from full-time, part-time, side-jobs odd jobs or other wages or salaries.

¹⁵ Work related pension refers to income from central/state government pension, employer funded pension, privately purchased commercial pension and other state pension schemes.

¹⁶ Government/public transfers includes agriculture subsidies, non-agricultural government subsidies (LPG subsidy, scholarship for education, subsidy for building toilets, subsidy for setting up small scale industries, subsidy for solar panels, etc.), housing assistance, unemployment allowance, Janani Suraksha Yojana (JSY)/any other maternity compensation, compensation under any other health benefits program (other than JSY), Compensation for illness or accident, emergency or disaster relief (flood, earthquake, drought, etc.), debt waiver, compensation for re-settlement (due to slums, dams, road, etc.), assistance for self-employment (like Swarna Jayanti Gram Swarozgar Yojana/ National Rural Livelihood Mission), social security pension schemes (like Indira Gandhi National Old Age Pension Scheme, Indira Gandhi National Widow Pension Scheme, Indira Gandhi National Disability Pension Scheme) and other government transfers.

¹⁷ Includes different types of health insurance/benefits such as CGHS, ESIS, RSBY, other central/state government health insurance schemes or medical reimbursement from employer etc.

¹⁸ Allied schemes refer to state specific schemes which are based on Rashtriya Swasthya Bima Yojana (RSBY) model.

_

^{*} Including spouse irrespective of age, "[]" based on fewer than 5 unweighted cases in the numerator or 25 unweighted cases in the denominator,

[&]quot;-" indicates less number of cases/ no cases.

⁴⁹ Any neurological/psychiatric problem includes depression, alzheimer's disease, dementia or psychiatric problem or neurological problem (any one or more).

⁵⁰ Psychiatric problems include unipolar or bipolar disorder, schizophrenia etc. (any one or more).

⁵¹ Neurological problems include neuropathy, convulsion, migraine, Parkinson's etc. (any one or more).

⁵² Includes oral cancer, breast cancer, cervical cancer, lung cancer or cancer/malignant tumors originating in any other organs/ body parts (any one or more).

⁵³ Urogenital conditions include chronic renal failure, incontinence, kidney stone and Benign Prostate Hypertrophy-BPH (only among males) (any one or more).

⁵⁴ Eye or vision related conditions or problems include presbyopia, glaucoma, cataract, myopia, hypermetropia, other eyes problems such as conjunctivitis, eye injury, red eye etc. (any one or more).

⁵⁵ Refractive error includes presbyopia, myopia and hypermetropia with or without astigmatism.

⁵⁶ Common oral health problems include painful teeth, ulcer lasting more than two weeks, bleeding gums, swelling gums, loose teeth, dental cavity/dental caries & soreness or cracks in the corner of the mouth in past 12 months (any one or more).

⁵⁷ Periodontal diseases include bleeding gums, swelling gums or ulcers lasting more than two weeks (any one or more).

⁵⁸ Injury include injuries sustained due to any traffic accident, violence, animal attack or fall in the past 2 years (any one or more).

⁵⁹ Reference period for natural and man-made disaster is past 5 years.

⁶⁰ Health problems due to natural and man-made disaster refers to permanent physical disability, psychological and mental health problems or chronic illness (any one or more).

⁶¹ For prevalence of endemic diseases in India, the reference period is past 2 years (any one or more).

⁶² Any vector-borne disease includes malaria, dengue or chikungunya (any one or more).

⁶³ Any water-borne disease includes diarrhoea/gastroenteritis, typhoid, jaundice or hepatitis (any one or more).

⁶⁴ For symptom based prevalence of health conditions, the reference period is past 2 years.

⁶⁵ Angina pectoris refers to, "a chest pain or discomfort with all the following symptoms: (a) the pain must include either the sternum (any level) or the left arm and left anterior chest (defined as the anterior chest wall between the levels of clavicle and lower end of sternum), (b) pain must be provoked by either hurrying or walking uphill (or by walking on the level, for those who never attempt more), (c) when pain occurs on walking it must make the person either stop or slacken pace, (d) pain must disappear on a majority of occasions in 10 min or less from the time when the person stands still.

⁶⁶ Sleep problems refer to difficulty in falling asleep or staying asleep throughout the night and also feeling unrested during the day (any one or more).

⁶⁷ Reproductive health problems include hot flashes, irregular vaginal discharge, uterine prolapse, fibroids, cysts and vaginal dryness in the past 2 years (any one or more).

⁶⁸ The reference period for Pap Smear and Mammography is past 2 years.

⁶⁹ Biological family members include -father, mother, brother, sister, children and grandchildren.

⁷⁰ Refers to functional limitations lasting more than 3 months.

⁷¹ Activities of Daily Living (ADL) includes dressing, putting on *chappals* or shoes, walking across a room, bathing, eating difficulties, getting in or out of bed (any one or more).

⁷² Instrumental Activities of Daily Living (IADL) includes preparing a hot meal, shopping for groceries, making telephone calls, taking medications, doing work around the house or garden, managing money (paying bills and keeping track of expenses) and getting around or finding address in unfamiliar place (any one or more).

⁷³ Helper refers to any person/s assisting respondent in any ADL/IADL limitations.

⁷⁴ Aids or supportive devices include spectacles and dentures and devices to help you in moving or sitting (such as, walker, walking sticks, wheel chair, adjustable showers stools/commodes, back/neck collar, orthosis/prosthesis).

⁷⁵ Among those respondents who reported using any aid or supportive device(s) to assist them in the activities of daily living.

⁷⁶ Immediate word recall refers to total number of words recalled from the given list of 10 words immediately.

⁷⁷ Delayed word recall refers to total number of words recalled from the same given list of 10 words after some delay.

⁷⁸ Based on Composite International Diagnostic Interview-Short Form (CIDI-SF); respondent who reported that they felt sad, blue or depressed for two-weeks period during last 12 months for all the day long or most of the day.

⁷⁹ Prevalence of measured hypertension refers to those measured with systolic blood pressure of \geq 140 mmHg or diastolic blood pressure of \geq 90 mmHg or both.

 $^{^{80}}$ Prevalence of undiagnosed hypertension refers to those undiagnosed by a health professional but whose measured systolic blood pressure was ≥ 140 mmHg or diastolic blood pressure was ≥ 90 mmHg or both.

⁸¹ Untreated hypertension refers to those who reported that they have been diagnosed with hypertension by a health professional and currently measured with hypertension but currently not taking treatment

⁸² Undertreated hypertension refers to those who reported that they have been diagnosed with hypertension by a health professional and currently measured with hypertension but currently taking treatment.

⁸³ Adequately treated hypertension refers to those reported that they have been diagnosed by health professional and currently taking treatment and whose measured systolic blood pressure was < 140 mmHg and diastolic blood pressure was < 90 mmHg.</p>

⁸⁴ Low vision refers to either low near vision or low distant vision in the better eye with best correction available with the respondent.

⁸⁵ Low near vision refers to near vision equal to or poorer than 20/80 and equal to or better than 20/400 in the better eye with best correction available with respondent.

⁸⁶ Low distance vision refers to distance vision equal to or poorer than 20/80 and equal to or better than 20/200 in the better eye with best correction available with respondent.

⁸⁷ Blindness refers to those with vision less than 20/200 in distance or could not count finger or perceive light.

ASSAM

Introduction

The Longitudinal Ageing Study in India (LASI) is a nationally and state representative longitudinal study of ageing and health. LASI is a national landmark, the largest in the world and, only of its kind in India. Its main goal is to provide valid, reliable and continuous scientific data on the health, social, mental and economic well-being of India's older adult (aged 45 and above) population. These data will help to monitor existing programmes and inform new national health and ageing policies. LASI is undertaken as a globally harmonized study carried out in more than 44 developed and developing countries worldwide; and the survey schedules, protocols and methodologies are harmonized across these countries. These are part of the Health and Retirement Study (HRS) family of longitudinal ageing and retirement surveys. Therefore, LASI data will also serve as an important public resource for national policy making and worldwide comparative research on ageing.

LASI is undertaken under the aegis of the Ministry of Health and Family Welfare (MoHFW), Government of India. The International Institute for Population Sciences (IIPS), Mumbai is the nodal institution for implementing LASI in collaboration with the Harvard T.H.Chan School of Public Health (HSPH) and the University of Southern California (USC).

A. LASI Objectives and Coverage:

The LASI wave-1 survey (2017-18) covers all 30 states and 6 Union Territories of India with a panel sample size of 72,250 older adults aged 45 years and above and their spouses regardless of age. LASI collects data on four major subject domains:

- 1. Health: Disease Burden & Risk Factors (Reported and Measured)
- 2. Health Care and Health Care Financing
- 3. Social: Family, Social Network and Social Welfare Programmes for the Elderly
- 4. Economic: Income, Wealth, Expenditure, Employment, Retirement and Pension

The long-term goal of LASI is to continue for the next 25 years, with respondents surveyed every two years. The second wave of LASI is planned to be conducted in 2019-20.

LASI Survey Instruments:

The LASI survey instrument comprises three schedules:

- **1. Household Survey Schedule**: Administered to one per household, collects information from interviewing one or more adult member of household. Includes the following modules: Household Roster, Housing and Environment, Household Consumption, Household Assets and Debts, Household Income and Household Health Insurance.
- 2. Individual Survey Schedule: Administered to each respondent aged 45 years and above and their spouses (regardless of age) in the sampled households. Includes the following modules: Demographics, Work, Retirement and Pension, Health (Chronic Diseases and Health Conditions), Functional Health, Family Medical History, Mental Health (Cognition and Depression), Health Behavior and Food Security, Health Care Access and Utilization, Health Care Financing, Family and Social Network, Social Welfare Programmes and Experimental Modules on Time Use, Expectations, Social Connectedness and Vignettes.

In addition, LASI includes an individual module on measured biomarkers:

- Anthropometric Measurements: Height, Weight, Waist Circumference and Hip Circumference.
- Functional Health Markers: Blood Pressure and Pulse Rate, Lung Function Test (Spirometry) and Vision Test (Near and Distance Vision Impairment).

- **Performance Based Markers:** Grip Strength, Timed-Walk and Balance Tests.
- Collection of Dried Blood Spot (DBS) samples: To be tested for variety of molecular biomarkers.
- **3. In addition, a Community Survey Schedule** is administered at the community level (villages in rural areas and census enumeration blocks in urban areas) and is answered by several key informants. The community schedule includes the following sections: Population Characteristics, Infrastructure and Common Resource, Accessibility and Availability of Health Care Services and coverage of Health and Social Welfare Programmes.

Fact Sheet of Key Indicators for the State of Assam

This fact sheet provides information on key indicators (weighted) for the state of Assam. The fieldwork for Assam was conducted from **June 2018 through January 2019**. Table-1 provides information about the number of households and individuals interviewed.

Table 1 Number of Households and Individuals interviewed for the state of Assam, LASI Wave 1, 2018-19

Sr. No.	Coverage	Coverage		Urban	Male	Female	Total		
1.	Household roster completed		Household roster completed		1973	307	na	na	2280
2.	Households interviewed (with age-eligible individuals) #		1322	189	na	na	1511		
2	Individuals	45-59 years and their spouses irrespective of age	1360	190	585	965	1550		
3.	Interviewed	60 years and above	698	118	388	428	816		
		All ages	2058	308	973	1393	2366		

na "not applicable"

[#] LASI age-eligible households are those with at least one individual in aged 45 years and above; age-eligible individuals are persons aged 45 years and above and their spouses (regardless of age) in the LASI sampled households.

[&]quot;-" indicates less number of cases/ no cases.

¹ Based on all households including LASI age-eligible and non-age-eligible households.

² Death rate is calculated based on deaths in the last two calendar years.

³ Based on LASI age-eligible households only.

⁴ Improved sanitation includes flush or pour flush toilet (which is flushed to piped sewer system/septic tank/ pit latrine), pit latrine, twin pit, composting toilet.

⁵ Open defecation refers to the practice whereby people go out in fields, bushes, forests, open bodies of water, or other open spaces rather than using the toilet to defecate. This information was collected from eligible household respondent.

⁶ Improved drinking water source includes water from pipe, public tap/standpipe, tube well or bore well, dug well, spring water and rain water.

⁷ Clean cooking fuel includes LPG, Biogas and Electricity.

⁸ Indoor pollution refers to households using solid and unclean fuel (for cooking or any other purpose) inside the household and cooking in traditional *chullah/stove* or open fire without any ventilation. Unclean fuel refers to use of kerosene, charcoal, coal, crop residue, wood/shrub and dung cake.

⁹ Pucca house refers to a house whose roof, wall and floor is made up of pucca (concrete) material.

¹⁰ MPCE is defined as total monthly household consumption expenditure divided by household size. Includes household's per capita spending on food and non-food items including spending on health, education, utilities etc.

¹⁴ Wage/salary work refers to income from full-time, part-time, side-jobs odd jobs or other wages or salaries.

[&]quot;[]" based on fewer than 5 unweighted cases in the numerator or 25 unweighted cases in the denominator.

11 Any one or more motorized vehicle includes car, motor cycle, moped and scooter.

¹² Per Capita Annual Household Income refers to total household income divided by household size. It includes income from all members of the household and from all sources such as agricultural work, non-agricultural work, self-employment, remittances/gifts, wages/salaries from employment, pension income and public/private transfers.

¹³ Based on income reported from household by that particular source.

¹⁵ Work related pension refers to income from central/state government pension, employer funded pension, privately purchased commercial pension and other state pension schemes.

¹⁶ Government/public transfers includes agriculture subsidies, non-agricultural government subsidies (LPG subsidy, scholarship for education, subsidy for building toilets, subsidy for setting up small scale industries, subsidy for solar panels, etc.), housing assistance, unemployment allowance, Janani Suraksha Yojana (JSY)/any other maternity compensation, compensation under any other health benefits program (other than JSY), Compensation for illness or accident, emergency or disaster relief (flood, earthquake, drought, etc.), debt waiver, compensation for re-settlement (due to slums, dams, road, etc.), assistance for self-employment (like Swarna Jayanti Gram Swarozgar Yojana/ National Rural Livelihood Mission), social security pension schemes (like Indira Gandhi National Old Age Pension Scheme, Indira Gandhi National Widow Pension Scheme, Indira Gandhi National Disability Pension Scheme) and other government transfers.

¹⁷ Includes different types of health insurance/benefits such as CGHS, ESIS, RSBY, other central/state government health insurance schemes or medical reimbursement from employer etc.

¹⁸ Allied schemes refers to state specific schemes which are based on Rashtriya Swasthya Bima Yojana (RSBY) model.

* Including spouse irrespective of age, na "not applicable", "[]" based on fewer than 5 unweighted cases in the numerator or 25 unweighted cases in the denominator, "-" indicate less number of cases/ no cases.

⁶¹ For prevalence of endemic diseases in India, the reference period is past 2 years (any one or more).

⁶² Any vector-borne disease includes malaria, dengue or chikungunya (any one or more).

⁶³ Any water-borne disease includes diarrhoea/gastroenteritis, typhoid, jaundice or hepatitis (any one or more).

⁶⁴ For symptom based prevalence of health conditions, the reference period is past 2 years.

⁶⁵ Angina pectoris refers to, "a chest pain or discomfort with all the following symptoms: (a) the pain must include either the sternum (any level) or the left arm and left anterior chest (defined as the anterior chest wall between the levels of clavicle and lower end of sternum), (b) pain must be provoked by either hurrying or walking uphill (or by walking on the level, for those who never attempt more), (c) when pain occurs on walking it must make the person either stop or slacken pace, (d) pain must disappear on a majority of occasions in 10 min or less from the time when the person stands still.

⁶⁶ Sleep problems refer to difficulty in falling asleep or staying asleep throughout the night and also feeling unrested during the day (any one or more).

⁶⁷ Reproductive health problems include hot flashes, irregular vaginal discharge, uterine prolapse, fibroids, cysts and vaginal dryness in the past 12 months (any one or more).

⁶⁸ The reference period for Pap Smear and Mammography is past 2 years.

⁶⁹ Biological family members include -father, mother, brother, sister, children and grandchildren.

⁷⁰ Refers to functional limitations lasting more than 3 months.

⁷¹ Activities of Daily Living (ADL) includes dressing, putting on *chappals* or shoes, walking across a room, bathing, eating difficulties, getting in or out of bed (any one or more).

⁷² Instrumental Activities of Daily Living (IADL) includes preparing a hot meal, shopping for groceries, making telephone calls, taking medications, doing work around the house or garden, managing money (paying bills and keeping track of expenses) and getting around or finding address in unfamiliar place (any one or more).

			Age		Sex		Residence

^{*} Including spouse irrespective of age, "[]" based on fewer than 5 unweighted cases in the numerator or 25 unweighted cases in the denominator, "-" indicates less number of cases/ no cases.

⁷³ Helper refers to any person/s assisting respondent in any ADL/IADL limitations.

⁸⁴ Low vision refers to either low near vision or low distant vision in the better eye with best correction available with the respondent.

⁷⁴ Aids or supportive devices include spectacles and dentures and devices to help you in moving or sitting (such as, walker, walking sticks, wheel chair, adjustable showers stools/commodes, back/neck collar, orthosis/prosthesis).

⁷⁵ Among those respondents who reported using any aid or supportive device(s) to assist them in the activities of daily living.

⁷⁶ Immediate word recall refers to total number of words recalled from the given list of 10 words immediately.

⁷⁷ Delayed word recall refers to total number of words recalled from the same given list of 10 words after some delay.

⁷⁸ Based on Composite International Diagnostic Interview-Short Form (CIDI-SF); respondent who reported that they felt sad, blue or depressed for two-weeks period during last 12 months for all the day long or most of the day.

⁷⁹ Prevalence of measured hypertension refers to those measured with systolic blood pressure of ≥ 140 mmHg or diastolic blood pressure of ≥ 90 mmHg or both

⁸⁰ Prevalence of undiagnosed hypertension refers to those undiagnosed by a health professional but whose measured systolic blood pressure was ≥ 140 mmHg or diastolic blood pressure was ≥ 90 mmHg or both.

⁸¹ Untreated hypertension refers to those who reported that they have been diagnosed with hypertension by a health professional and currently measured with hypertension but currently not taking treatment

⁸² Undertreated hypertension refers to those who reported that they have been diagnosed with hypertension by a health professional and currently measured with hypertension but currently taking treatment.

⁸³ Adequately treated hypertension refers to those reported that they have been diagnosed by health professional and currently taking treatment and whose measured systolic blood pressure was < 140 mmHg and diastolic blood pressure was < 90 mmHg.</p>

⁸⁵ Low near vision refers to near vision equal to or poorer than 20/80 and equal to or better than 20/400 in the better eye with best correction available with respondent.

⁸⁶ Low distance vision refers to distance vision equal to or poorer than 20/80 and equal to or better than 20/200 in the better eye with best correction available with respondent.

⁸⁷ Blindness refers to those with vision less than 20/200 in distance or could not count finger or perceive light.

90 WHO criteria of classification of waist- hip ratio (WHR)

Male	Female	Risk level
< 0.90	< 0.85	Low
≥0.90	≥0.85	High

⁹¹ Grip strength measures bodily muscle strength and is an overall marker of health among elderly population. Mean grip strength is an average of two readings for dominant hand.

⁸⁸ Body Mass Index (BMI) refers to weight in kilograms divided by height in meter square (kg/m²). BMI levels have been classified according to WHO classifications: underweight ≤ 18.4; normal=18.5 to 24.9; overweight=25.0 to 29.9; obese ≥30.0

⁸⁹ Metabolic complications: critical limit classification for high risk waist circumference for male is ≥102 cm and for female is ≥88cm.

⁹² Includes health post/sub centers, primary health center/urban health center, community health center, district/sub-district hospital, government/tertiary hospital or government AYUSH hospital.

⁹³ Includes private hospital/nursing home, private clinic (OPD based services), NGO/Charity/Trust/Church-run hospital/Private AYUSH hospital. It also includes health care services availed partially from either private or government or NGO.

⁹⁴ Among those who sought out-patient care in the past 12 months and this includes modern allopathic medicines, AYUSH medicines, traditional herbs or medicine, excluding any health supplements.

⁹⁵ The expenditure on last in-patient visit includes consultation charges, medicine charges, test/investigation charge, nursing home charges, surgery and related charges, transportation charges and any other charges.

⁹⁶ Income includes personal income as well as income from any of the household members.

BIHAR

Introduction

The Longitudinal Ageing Study in India (LASI) is a nationally and state representative longitudinal study of ageing and health. LASI is a national landmark, the largest in the world and, only of its kind in India. Its main goal is to provide valid, reliable and continuous scientific data on the health, social, mental and economic well-being of India's older adult (aged 45 and above) population. These data will help to monitor existing programmes and inform new national health and ageing policies. LASI is undertaken as a globally harmonized study carried out in more than 44 developed and developing countries worldwide; and the survey schedules, protocols and methodologies are harmonized across these countries. These are part of the Health and Retirement Study (HRS) family of longitudinal ageing and retirement surveys. Therefore, LASI data will also serve as an important public resource for national policy making and worldwide comparative research on ageing.

LASI is undertaken under the aegis of the Ministry of Health and Family Welfare (MoHFW), Government of India. The International Institute for Population Sciences (IIPS), Mumbai is the nodal institution for implementing LASI in collaboration with the Harvard T.H.Chan School of Public Health (HSPH) and the University of Southern California (USC).

A. LASI Objectives and Coverage:

The LASI wave-1 survey (2017-18) covers all 30 states and 6 Union Territories of India with a panel sample size of 72,250 older adults aged 45 years and above and their spouses regardless of age. LASI collects data on four major subject domains:

- 1. Health: Disease Burden & Risk Factors (Reported and Measured)
- 2. Health Care and Health Care Financing
- 3. Social: Family, Social Network and Social Welfare Programmes for the Elderly
- 4. Economic: Income, Wealth, Expenditure, Employment, Retirement and Pension

The long-term goal of LASI is to continue for the next 25 years, with respondents surveyed every two years.

LASI Survey Instruments:

The LASI survey instrument comprises three schedules:

- 1. Household Survey Schedule: Administered to one per household, collects information from interviewing one or more adult member of household. Includes the following modules: Household Roster, Housing and Environment, Household Consumption, Household Assets and Debts, Household Income and Household Health Insurance.
- 2. Individual Survey Schedule: Administered to each respondent aged 45 years and above and their spouses (regardless of age) in the sampled households. Includes the following modules: Demographics, Work, Retirement and Pension, Health (Chronic Diseases and Health Conditions), Functional Health, Family Medical History, Mental Health (Cognition and Depression), Health Behavior and Food Security, Health Care Access and Utilization, Health Care Financing, Family and Social Network, Social Welfare Programmes and Experimental Modules on Time Use, Expectations, Social Connectedness and Vignettes.

In addition, LASI includes an individual module on measured biomarkers:

- Anthropometric Measurements: Height, Weight, Waist Circumference and Hip Circumference.
- Functional Health Markers: Blood Pressure and Pulse Rate, Lung Function Test (Spirometry) and Vision Test (Near and Distance Vision Impairment).

- **Performance Based Markers:** Grip Strength, Timed-Walk and Balance Tests.
- Collection of Dried Blood Spot (DBS) samples: To be tested for variety of molecular biomarkers.
- **3.** In addition, a Community Survey Schedule is administered at the community level (villages in rural areas and census enumeration blocks in urban areas) and is answered by several key informants. The community schedule includes the following sections: Population Characteristics, Infrastructure and Common Resource, Accessibility and Availability of Health Care Services and coverage of Health and Social Welfare Programmes.

Fact Sheet of Key Indicators for the State of Bihar

This fact sheet provides information on key indicators (weighted) for the state of Bihar. The fieldwork for Bihar was conducted from **May through September 2017**. Table-1 provides information about the number of households and individuals interviewed.

Table 1 Number of Households and Individuals interviewed for the state of Bihar, LASI Wave 1, 2017-18

Sr. No.	Coverage		Rural	Urban	Male	Female	Total
1.	Household ro	ousehold roster completed		386	na	na	3336

23	Household Per Capita Food Expenditure as a share of MPCE (%)	61.2	54.3	60.4
24	Household Per Capita Health Expenditure as a share of MPCE (%)	15.1	10.2	14.5
			· · · · · · · · · · · · · · · · · · ·	

¹ Based on all households including LASI age-eligible and non-age-eligible households.

² Death rate is calculated based on deaths in the last two calendar years.

³ Based on LASI age-eligible households only.

⁴ Improved sanitation includes flush or pour flush toilet (which is flushed to piped sewer system/septic tank/ pit latrine), pit latrine, twin pit, composting toilet.

⁵ Open defecation refers to the practice whereby people go out in fields, bushes, forests, open bodies of water, or other open spaces rather than using the toilet to defecate. This information was collected from eligible household respondent.

⁶ Improved drinking water source includes water from pipe, public tap/standpipe, tube well or bore well, dug well, spring water and rain water.

⁷ Clean cooking fuel includes LPG, Biogas and Electricity.

⁸ Indoor pollution refers to households using solid and unclean fuel (for cooking or any other purpose) inside the household and cooking in traditional *chullah/stove* or open fire without any ventilation. Unclean fuel refers to use of kerosene, charcoal, coal, crop residue, wood/shrub and dung cake.

⁹ Pucca house refers to a house whose roof, wall and floor is made up of pucca (concrete) material.

¹⁰ MPCE is defined as total monthly household consumption expenditure divided by household size. Includes household's per capita spending on food and non-food items including spending on health, education, utilities etc.

_

^{*} Including spouse irrespective of age, na "not applicable", "[]" based on fewer than 5 unweighted cases in the numerator or 25 unweighted cases in the denominator

⁶² Any vector-borne disease includes malaria, dengue or chikungunya (any one or more).

⁶³ Any water-borne disease includes diarrhoea/gastroenteritis, typhoid, jaundice or hepatitis (any one or more).

⁶⁴ For symptom based prevalence of health conditions, the reference period is past 2 years.

⁶⁵ Angina pectoris refers to, "a chest pain or discomfort with all the following symptoms: (a) the pain must include either the sternum (any level) or the left arm and left anterior chest (defined as the anterior chest wall between the levels of clavicle and lower end of sternum), (b) pain must be provoked by either hurrying or walking uphill (or by walking on the level, for those who never attempt more), (c) when pain occurs on walking it must make the person either stop or slacken pace, (d) pain must disappear on a majority of occasions in 10 min or less from the time when the person stands still.

⁶⁶ Sleep problems refer to difficulty in falling asleep or staying asleep throughout the night and also feeling unrested during the day (any one or more).

⁶⁷ Reproductive health problems include hot flashes, irregular vaginal discharge, uterine prolapse, fibroids, cysts and vaginal dryness in the past 12 months (any one or more).

 $^{^{68}}$ The reference period for Pap Smear and Mammography is past 2 years.

⁶⁹ Biological family members include -father, mother, brother, sister, children and grandchildren.

⁷⁰ Refers to functional limitations lasting more than 3 months.

⁷¹ Activities of Daily Living (ADL) includes dressing, putting on *chappals* or shoes, walking across a room, bathing, eating difficulties, getting in or out of bed (any one or more).

⁷² Instrumental Activities of Daily Living (IADL) includes preparing a hot meal, shopping for groceries, making telephone calls, taking medications, doing work around the house or garden, managing money (paying bills and keeping track of expenses) and getting around or finding address in unfamiliar place (any one or more).

⁷³ Helper refers to any person/s assisting respondent in any ADL/IADL limitations.

75 Among those respondents who reported using any aid or supportive device(s) to assist them in the activities of daily living.

⁷⁴ Aids or supportive devices include spectacles and dentures and devices to help you in moving or sitting (such as, walker, walking sticks, wheel chair, adjustable showers stools/commodes, back/neck collar, orthosis/prosthesis).

Immediate word recall refers to total number of words recalled from the given list of 10 words immediately.
 Delayed word recall refers to total number of words recalled from the same given list of 10 words after some delay.

⁷⁸ Based on Composite International Diagnostic Interview-Short Form (CIDI-SF); respondent who reported that they felt sad, blue or depressed for two-weeks period during last 12 months for all the day long or most of the day.

⁷⁹ Prevalence of measured hypertension refers to those measured with systolic blood pressure of ≥ 140 mmHg or diastolic blood pressure of ≥ 90 mmHg or both.

⁸⁰ Prevalence of undiagnosed hypertension refers to those undiagnosed by a health professional but whose measured systolic blood pressure was ≥ 140 mmHg or diastolic blood pressure was ≥ 90 mmHg or both.

⁸¹ Untreated hypertension refers to those who reported that they have been diagnosed with hypertension by a health professional and currently measured with hypertension but currently not taking treatment

⁸² Undertreated hypertension refers to those who reported that they have been diagnosed with hypertension by a health professional and currently measured with hypertension but currently taking treatment.

⁸³ Adequately treated hypertension refers to those reported that they have been diagnosed by health professional and currently taking treatment and whose measured systolic blood pressure was < 140 mmHg and diastolic blood pressure was < 90 mmHg.</p>

⁸⁴ Low vision refers to either low near vision or low distant vision in the better eye with best correction available with the respondent.

⁸⁵ Low near vision refers to near vision equal to or poorer than 20/80 and equal to or better than 20/400 in the better eye with best correction available with respondent.

⁸⁶ Low distance vision refers to distance vision equal to or poorer than 20/80 and equal to or better than 20/200 in the better eye with best correction available with respondent.

⁸⁷ Blindness refers to those with vision less than 20/200 in distance or could not count finger or perceive light.

⁸⁸ Body Mass Index (BMI) refers to weight in kilograms divided by height in meter square (kg/m²). BMI levels have been classified according to the WHO classifications: underweight ≤ 18.4; normal=18.5 to 24.9; overweight=25.0 to 29.9; obese ≥30.0

CHANDIGARH

Introduction

The Longitudinal Ageing Study in India (LASI) is a nationally and state representative longitudinal study of ageing and health. LASI is a national landmark, the largest in the world and, only of its kind in India. Its main goal is to provide valid, reliable and continuous scientific data on the health, social, mental and economic well-being of India's older adult (aged 45 and above) population. These data will help to monitor existing programmes and inform new national health and ageing policies. LASI is undertaken as a globally harmonized study carried out in more than 44 developed and developing countries worldwide; and the survey schedules, protocols and methodologies are harmonized across these countries. These are part of the Health and Retirement Study (HRS) family of longitudinal ageing and retirement surveys. Therefore, LASI data will also serve as an important public resource for national policy making and worldwide comparative research on ageing.

LASI is undertaken under the aegis of the Ministry of Health and Family Welfare (MoHFW), Government of India. The International Institute for Population Sciences (IIPS), Mumbai is the nodal institution for implementing LASI in collaboration with the Harvard T.H.Chan School of Public Health (HSPH) and the University of Southern California (USC).

A. LASI Objectives and Coverage:

The LASI wave-1 survey (2017-18) covers all 30 states and 6 Union Territories of India with a panel sample size of 72,250 older adults aged 45 years and above and their spouses regardless of age. LASI collects data on four major subject domains:

- 1. Health: Disease Burden & Risk Factors (Reported and Measured)
- 2. Health Care and Health Care Financing
- 3. Social: Family, Social Network and Social Welfare Programmes for the Elderly
- 4. Economic: Income, Wealth, Expenditure, Employment, Retirement and Pension

The long-term goal of LASI is to continue for the next 25 years, with respondents surveyed every two years.

LASI Survey Instruments:

The LASI survey instrument comprises three schedules:

- **1. Household Survey Schedule**: Administered to one per household, collects information from interviewing one or more adult member of household. Includes the following modules: Household Roster, Housing and Environment, Household Consumption, Household Assets and Debts, Household Income and Household Health Insurance.
- 2. Individual Survey Schedule: Administered to each respondent aged 45 years and above and their spouses (regardless of age) in the sampled households. Includes the following modules: Demographics, Work, Retirement and Pension, Health (Chronic Diseases and Health Conditions), Functional Health, Family Medical History, Mental Health (Cognition and Depression), Health Behavior and Food Security, Health Care Access and Utilization, Health Care Financing, Family and Social Network, Social Welfare Programmes and Experimental Modules on Time Use, Expectations, Social Connectedness and Vignettes.

In addition, LASI includes an individual module on measured biomarkers:

- Anthropometric Measurements: Height, Weight, Waist Circumference and Hip Circumference.
- **Functional Health Markers**: Blood Pressure and Pulse Rate, Lung Function Test (Spirometry) and Vision Test (Near and Distance Vision Impairment).

- **Performance Based Markers:** Grip Strength, Timed-Walk and Balance Tests.
- Collection of Dried Blood Spot (DBS) samples: To be tested for variety of molecular biomarkers.
- **3. In addition, a Community Survey Schedule** is administered at the community level (villages in rural areas and census enumeration blocks in urban areas) and is answered by several key informants. The community schedule includes the following sections: Population Characteristics, Infrastructure and Common Resource, Accessibility and Availability of Health Care Services and coverage of Health and Social Welfare Programmes.

Fact Sheet of Key Indicators for the Union Territory of Chandigarh

This fact sheet provides information on key indicators (weighted) for the union territory of Chandigarh. The fieldwork for Chandigarh was conducted from **May 2018 through February 2019**. Table-1 provides information about the number of households and individuals interviewed.

Table 1 Number of households and individuals interviewed for the union territory of Chandigarh, LASI Wave 1, 2017-18

Sr. No.	Coverage		Rural	Urban	Male	Female	Total
1.	Household roster completed		na	1064	na	na	1064
2.		Households interviewed (with age-eligible individuals)#		651	na	na	651
	Individuals Interviewed 45-59 years and their spouses irrespective of age 60 years and above	na	632	262	370	632	
3.		•	na	394	190	204	394
		All ages	na	1026	452	574	1026

na "not applicable"

[#] LASI age-eligible households are those with at least one individual in aged 45 years and above; age-eligible individuals are persons aged 45 years and above and their spouses (regardless of age) in the LASI sampled households.

19	Households using clean cooking fuel (%) ⁷			98.0
20	Households exposed to indoor pollution (%) ⁸			3.5
21	Households with <i>pucca</i> house (%) ⁹			90.1
	Household Consumption			
22	Household Monthly Per Capita Consumption Expenditure (MPCE) in INR ¹⁰			5691
23	Household Per Capita Food Expenditure as a share of MPCE (%)			46.7
24	Household Per Capita Health Expenditure as a share of MPCE (%)			9.5

Rural and Urban is not applicable for Chandigarh.

[&]quot;[]" based on fewer than 5 unweighted cases in the numerator or 25 unweighted cases in the denominator.

Based on all households including LASI age-eligible and non-age-eligible households.

 $^{^{\}rm 2}$ Death rate is calculated based on deaths in the last two calendar years.

³ Based on LASI age-eligible households only.

⁴ Improved sanitation includes flush or pour flush toilet (which is flushed to piped sewer system/septic tank/ pit latrine), pit latrine, twin pit, composting

⁵ Open defecation refers to the practice whereby people go out in fields, bushes, forests, open bodies of water, or other open spaces rather than using the toilet to defecate. This information was collected from eligible household respondent.

⁶ Improved drinking water source includes water from pipe, public tap/standpipe, tube well or bore well, dug well, spring water and rain water.

⁷ Clean cooking fuel includes LPG, Biogas and Electricity.

⁸ Indoor pollution refers to households using solid and unclean fuel (for cooking or any other purpose) inside the household and cooking in traditional chullah/stove or open fire without any ventilation. Unclean fuel refers to use of kerosene, charcoal, coal, crop residue, wood/shrub and dung cake.

⁹ Pucca house refers to a house whose roof, wall and floor is made up of pucca (concrete) material.

¹⁰ MPCE is defined as total monthly household consumption expenditure divided by household size. Includes household's per capita spending on food and non-food items including spending on health, education, utilities etc.

Ho	usehold-Level Key Indicators ³	Rural	Urban	Total
	Household Assets and Debts			
25	Households owning current residence (%)			75.8
26	Households owning television, refrigerator, mobile phone and any motorized vehicle (%) ¹¹			74.4
27	Households who had taken any loan (%)			13.7
	Household Income			
28	Per Capita Annual Household Income (in INR) ¹²			104387
	Per Capita Annual Household Income by Source (in INR) ¹³			
29	Mean income from agricultural and allied activities			2307
30	Mean income from non-agricultural business or self-employed activities			11276
31	Mean income from wages/salaries ¹⁴			63862
32	Mean income from pension ¹⁵			22363
33	Mean income from government/public transfers ¹⁶			1111
	Household Insurance			
34	Households covered by any health insurance (%) ¹⁷			21.1
35	Households covered by Rashtriya Swasthya Bima Yojana (RSBY) & allied schemes (%) ¹⁸			2.2
36	Households covered by Central Government Health Scheme (CGHS)/Employee State Insurance Scheme (ESIS) (%)			13.4
37	Households covered by medical reimbursement/health insurance from an employer (%)			2.0
38	Households covered by privately purchased commercial health insurance (%)			5.3

Rural and Urban is not applicable for Chandigarh.

Any one or more motorized vehicle includes car, motor cycle, moped and scooter.

¹² Per Capita Annual Household Income refers to total household income divided by household size. It includes income from all members of the household and from all sources such as agricultural work, non-agricultural work, self-employment, remittances/gifts, wages/salaries from employment, pension income and public/private transfers.

¹³ Based on income reported from household by that particular source.

¹⁴ Wage/salary work refers to income from full-time, part-time, side-jobs odd jobs or other wages or salaries.

¹⁵ Work related pension refers to income from central/state government pension, employer funded pension, privately purchased commercial pension and other state pension schemes.

¹⁶ Government/public transfers includes agriculture subsidies, non-agricultural government subsidies (LPG subsidy, scholarship for education, subsidy for building toilets, subsidy for setting up small scale industries, subsidy for solar panels, etc.), housing assistance, unemployment allowance, Janani Suraksha Yojana (JSY)/any other maternity compensation, compensation under any other health benefits program (other than JSY), Compensation for illness or accident, emergency or disaster relief (flood, earthquake, drought, etc.), debt waiver, compensation for re-settlement (due to slums, dams, road, etc.), assistance for self-employment (like Swarna Jayanti Gram Swarozgar Yojana/ National Rural Livelihood Mission), social security pension schemes (like Indira Gandhi National Old Age Pension Scheme, Indira Gandhi National Widow Pension Scheme, Indira Gandhi National Disability Pension Scheme) and other government transfers.

¹⁷ Includes different types of health insurance/benefits such as CGHS, ESIS, RSBY, other central/state government health insurance schemes or medical reimbursement from employer etc.

¹⁸ Allied schemes refers to state specific schemes which are based on Rashtriya Swasthya Bima Yojana (RSBY) model.

90 WHO criteria of classification of waist- hip ratio (WHR)

Male	Female	Risk level		
< 0.90	< 0.85	Low		
≥0.90	≥0.85	High		

⁹¹ Grip strength measures bodily muscle strength and is an overall marker of health among elderly population. Mean grip strength is an average of two readings for dominant hand.

⁸⁸ Body Mass Index (BMI) refers to weight in kilograms divided by height in meter square (kg/m²). BMI levels have been classified according to WHO classifications: underweight ≤ 18.4; normal=18.5 to 24.9; overweight=25.0 to 29.9; obese ≥30.0

⁸⁹ Metabolic complications: critical limit classification for high risk waist circumference for male is ≥102 cm and for female is ≥88cm.

⁹² Includes health post/sub centers, primary health center/urban health center, community health center, district/sub-district hospital, government/tertiary hospital or government AYUSH hospital.

⁹³ Includes private hospital/nursing home, private clinic (OPD based services), NGO/Charity/Trust/Church-run hospital/Private AYUSH hospital. It also includes health care services availed partially from either private or government or NGO.

⁹⁴ Among those who sought out-patient care in the past 12 months and this includes modern allopathic medicines, AYUSH medicines, traditional herbs or medicine, excluding any health supplements.

⁹⁵ The expenditure on last in-patient visit includes consultation charges, medicine charges, test/investigation charge, nursing home charges, surgery and related charges, transportation charges and any other charges.

⁹⁶ Income includes personal income as well as income from any of the household members.

CHHATTISGARH

Introduction

The Longitudinal Ageing Study in India (LASI) is a nationally and state representative longitudinal study of ageing and health. LASI is a national landmark, the largest in the world and, only of its kind in India. Its main goal is to provide valid, reliable and continuous scientific data on the health, social, mental and economic well-being of India's older adult (aged 45 and above) population. These data will help to monitor existing programmes and inform new national health and ageing policies. LASI is undertaken as a globally harmonized study carried out in more than 44 developed and developing countries worldwide; and the survey schedules, protocols and methodologies are harmonized across these countries. These are part of the Health and Retirement Study (HRS) family of longitudinal ageing and retirement surveys. Therefore, LASI data will also serve as an important public resource for national policy making and worldwide comparative research on ageing.

LASI is undertaken under the aegis of the Ministry of Health and Family Welfare (MoHFW), Government of India. The International Institute for Population Sciences (IIPS), Mumbai is the nodal institution for implementing LASI in collaboration with the Harvard T.H.Chan School of Public Health (HSPH) and the University of Southern California (USC).

A. LASI Objectives and Coverage:

The LASI wave-1 survey (2017-18) covers all 30 states and 6 Union Territories of India with a panel sample size of 72,250 older adults aged 45 years and above and their spouses regardless of age. LASI collects data on four major subject domains:

- 1. Health: Disease Burden & Risk Factors (Reported and Measured)
- 2. Health Care and Health Care Financing
- 3. Social: Family, Social Network and Social Welfare Programmes for the Elderly
- 4. Economic: Income, Wealth, Expenditure, Employment, Retirement and Pension

The long-term goal of LASI is to continue for the next 25 years, with respondents surveyed every two years.

LASI Survey Instruments:

The LASI survey instrument comprises three schedules:

- **1. Household Survey Schedule**: Administered to one per household, collects information from interviewing one or more adult member of household. Includes the following modules: Household Roster, Housing and Environment, Household Consumption, Household Assets and Debts, Household Income and Household Health Insurance.
- 2. Individual Survey Schedule: Administered to each respondent aged 45 years and above and their spouses (regardless of age) in the sampled households. Includes the following modules: Demographics, Work, Retirement and Pension, Health (Chronic Diseases and Health Conditions), Functional Health, Family Medical History, Mental Health (Cognition and Depression), Health Behavior and Food Security, Health Care Access and Utilization, Health Care Financing, Family and Social Network, Social Welfare Programmes and Experimental Modules on Time Use, Expectations, Social Connectedness and Vignettes.

In addition, LASI includes an individual module on measured biomarkers:

- Anthropometric Measurements: Height, Weight, Waist Circumference and Hip Circumference.
- Functional Health Markers: Blood Pressure and Pulse Rate, Lung Function Test (Spirometry) and Vision Test (Near and Distance Vision Impairment).

- **Performance Based Markers:** Grip Strength, Timed-Walk and Balance Tests.
- Collection of Dried Blood Spot (DBS) samples: To be tested for variety of molecular biomarkers.
- **3. In addition, a Community Survey Schedule** is administered at the community level (villages in rural areas and census enumeration blocks in urban areas) and is answered by several key informants. The community schedule includes the following sections: Population Characteristics, Infrastructure and Common Resource, Accessibility and Availability of Health Care Services and coverage of Health and Social Welfare Programmes.

Fact Sheet of Key Indicators for the State of Chhattisgarh

This fact sheet provides information on key indicators (weighted) for the state of Chhattisgarh. The fieldwork for Chhattisgarh was conducted from **April through August 2017**. Table-1 provides information about the number of households and individuals interviewed.

Table 1 Number of Households and Individuals interviewed for the state of Chhattisgarh, LASI Wave 1, 2017-18

Sr. No.	Coverage		Rural	Urban	Male	Female	Total
1.	Household roster completed		1506	437	na	na	1943
2.	Households interviewed (with age- eligible individuals) #		971	218	na	na	1189
	Individuals Interviewed	45-59 years and their spouses irrespective of age	1012	263	514	761	1275
3.		60 years and above	636	144	392	388	780
		All ages	1648	407	906	1149	2055

na "not applicable"

[#] LASI age-eligible households are those with at least one individual in aged 45 years and above; age-eligible individuals are persons aged 45 years and above and their spouses (regardless of age) in the LASI sampled households.

Chhattisgarh - Key Indicators

 $^{^{\}rm 1}$ Based on all households including LASI age-eligible and non-age-eligible households.

² Death rate is calculated based on deaths in the last two calendar years.

³ Based on LASI age-eligible households only.

⁴ Improved sanitation includes flush or pour flush toilet (which is flushed to piped sewer system/septic tank/ pit latrine), pit latrine, twin pit, composting toilet.

⁵ Open defecation refers to the practice whereby people go out in fields, bushes, forests, open bodies of water, or other open spaces rather than using the toilet to defecate. This information was collected from eligible household respondent.

⁶ Improved drinking water source includes water from pipe, public tap/standpipe, tube well or bore well, dug well, spring water and rain water.

⁷ Clean cooking fuel includes LPG, Biogas and Electricity.

⁸ Indoor pollution refers to households using solid and unclean fuel (for cooking or any other purpose) inside the household and cooking in traditional *chullah/stove* or open fire without any ventilation. Unclean fuel refers to use of kerosene, charcoal, coal, crop residue, wood/shrub and dung cake.

⁹ *Pucca* house refers to a house whose roof, wall and floor is made up of *pucca* (concrete) material.

¹⁰ MPCE is defined as total monthly household consumption expenditure divided by household size. Includes household's per capita spending on food and non-food items including spending on health, education, utilities etc.

Hou	usehold-Level Key Indicators ³	Rural	Urban	Total
	Household Assets and Debts			
25	Households owning current residence (%)	98.5	86.8	95.8
26	Households owning television, refrigerator, mobile phone and any motorized vehicle (%) ¹¹	6.3	40.9	14.3
27	Households who had taken any loan (%)	29.4	29.3	29.4
	Household Income			
28	Per Capita Annual Household Income (in INR) ¹²	37266	64501	43685
	Per Capita Annual Household Income by Source (in INR) ¹³			
29	Mean income from agricultural and allied activities	15826	842	12301
30	Mean income from non-agricultural business or self-employed activities	1538	12484	4115
31	Mean income from wages/salaries ¹⁴	8482	36322	15044
32	Mean income from pension ¹⁵	1249	7597	2742
33	Mean income from government/public transfers ¹⁶	1596	820	1413
	Household Insurance			
34	Households covered by any health insurance (%) ¹⁷	55.1	44.2	52.6
35	Households covered by Rashtriya Swasthya Bima Yojana (RSBY) & allied schemes (%) ¹⁸	53.1	32.2	48.3
36	Households covered by Central Government Health Scheme (CGHS)/Employee State Insurance Scheme (ESIS) (%)	2.5	8.4	3.8
37	Households covered by medical reimbursement/health insurance from an employer (%)	[0.1]	3.7	0.9
38	Households covered by privately purchased commercial health insurance (%)	0.5	[1.6]	0.7

Any one or more motorized vehicle includes car, motor cycle, moped and scooter.

¹⁴ Wage/salary work refers to income from full-time, part-time, side-jobs odd jobs or other wages or salaries.

[&]quot;[]" based on fewer than 5 unweighted cases in the numerator or 25 unweighted cases in the denominator.

¹² Per Capita Annual Household Income refers to total household income divided by household size. It includes income from all members of the household and from all sources such as agricultural work, non-agricultural work, self-employment, remittances/gifts, wages/salaries from employment, pension income and public/private transfers.

¹³ Based on income reported from household by that particular source.

Work related pension refers to income from central/state government pension, employer funded pension, privately purchased commercial pension and other state pension schemes.

¹⁶ Government/public transfers includes agriculture subsidies, non-agricultural government subsidies (LPG subsidy, scholarship for education, subsidy for building toilets, subsidy for setting up small scale industries, subsidy for solar panels, etc.), housing assistance, unemployment allowance, Janani Suraksha Yojana (JSY)/any other maternity compensation, compensation under any other health benefits program (other than JSY), Compensation for illness or accident, emergency or disaster relief (flood, earthquake, drought, etc.), debt waiver, compensation for re-settlement (due to slums, dams, road, etc.), assistance for self-employment (like Swarna Jayanti Gram Swarozgar Yojana/ National Rural Livelihood Mission), social security pension schemes (like Indira Gandhi National Old Age Pension Scheme, Indira Gandhi National Widow Pension Scheme, Indira Gandhi National Disability Pension Scheme) and other government transfers.

¹⁷ Includes different types of health insurance/benefits such as CGHS, ESIS, RSBY, other central/state government health insurance schemes or medical reimbursement from employer etc.

¹⁸ Allied schemes refer to state specific schemes which are based on Rashtriya Swasthya Bima Yojana (RSBY) model.

^{*} Including spouse irrespective of age, "[]" based on fewer than 5 unweighted cases in the numerator or 25 unweighted cases in the denominator.

Low vision refers to either low near vision or low distant vision in the better eye with best correction available with the respondent.
 Low near vision refers to near vision equal to or poorer than 20/80 and equal to or better than 20/400 in the better eye with best correction available with respondent.

⁸⁶ Low distance vision refers to distance vision equal to or poorer than 20/80 and equal to or better than 20/200 in the better eye with best correction available with respondent.

⁸⁷ Blindness refers to those with vision less than 20/200 in distance or could not count finger or perceive light.

⁸⁸ Body Mass Index (BMI) refers to weight in kilograms divided by height in meter square (kg/m²). BMI levels have been classified according to WHO classifications: underweight ≤ 18.4; normal=18.5 to 24.9; overweight=25.0 to 29.9; obese ≥30.0

⁸⁹ Metabolic complications: critical limit classification for high risk waist circumference for male is ≥102 cm and for female is ≥88cm.

⁹² Includes health post/sub centers, primary health center/urban health center, community health center, district/sub-district hospital, government/tertiary hospital or government AYUSH hospital.

⁹³ Includes private hospital/nursing home, private clinic (OPD based services), NGO/Charity/Trust/Church-run hospital/Private AYUSH hospital. It also includes health care services availed partially from either private or government or NGO.

⁹⁴ Among those who sought out-patient care in the past 12 months and this includes modern allopathic medicines, AYUSH medicines, traditional herbs or medicine, excluding any health supplements.

DADRA & NAGAR HAVELI

Introduction

The Longitudinal Ageing Study in India (LASI) is a nationally and state representative longitudinal study of ageing and health. LASI is a national landmark, the largest in the world and, only of its kind in India. Its main goal is to provide valid, reliable and continuous scientific data on the health, social, mental and economic well-being of India's older adult (aged 45 and above) population. These data will help to monitor existing programmes and inform new national health and ageing policies. LASI is undertaken as a globally harmonized study carried out in more than 44 developed and developing countries worldwide; and the survey schedules, protocols and methodologies are harmonized across these countries. These are part of the Health and Retirement Study (HRS) family of longitudinal ageing and retirement surveys. Therefore, LASI data will also serve as an important public resource for national policy making and worldwide comparative research on ageing.

LASI is undertaken under the aegis of the Ministry of Health and Family Welfare (MoHFW), Government of India. The International Institute for Population Sciences (IIPS), Mumbai is the nodal institution for implementing LASI in collaboration with the Harvard T.H.Chan School of Public Health (HSPH) and the University of Southern California (USC).

A. LASI Objectives and Coverage:

The LASI wave-1 survey (2017-18) covers all 30 states and 6 Union Territories of India with a panel sample size of 72,250 older adults aged 45 years and above and their spouses regardless of age. LASI collects data on four major subject domains:

- 1. Health: Disease Burden & Risk Factors (Reported and Measured)
- 2. Health Care and Health Care Financing
- 3. Social: Family, Social Network and Social Welfare Programmes for the Elderly
- 4. Economic: Income, Wealth, Expenditure, Employment, Retirement and Pension

The long-term goal of LASI is to continue for the next 25 years, with respondents surveyed every two years.

LASI Survey Instruments:

The LASI survey instrument comprises three schedules:

- **1. Household Survey Schedule**: Administered to one per household, collects information from interviewing one or more adult member of household. Includes the following modules: Household Roster, Housing and Environment, Household Consumption, Household Assets and Debts, Household Income and Household Health Insurance.
- 2. Individual Survey Schedule: Administered to each respondent aged 45 years and above and their spouses (regardless of age) in the sampled households. Includes the following modules: Demographics, Work, Retirement and Pension, Health (Chronic Diseases and Health Conditions), Functional Health, Family Medical History, Mental Health (Cognition and Depression), Health Behavior and Food Security, Health Care Access and Utilization, Health Care Financing, Family and Social Network, Social Welfare Programmes and Experimental Modules on Time Use, Expectations, Social Connectedness and Vignettes.

In addition, LASI includes an individual module on measured biomarkers:

- Anthropometric Measurements: Height, Weight, Waist Circumference and Hip Circumference.
- **Functional Health Markers**: Blood Pressure and Pulse Rate, Lung Function Test (Spirometry) and Vision Test (Near and Distance Vision Impairment).

- Performance Based Markers: Grip Strength, Timed-Walk and Balance Tests.
- Collection of Dried Blood Spot (DBS) samples: To be tested for variety of molecular biomarkers.
- **3.** In addition, a Community Survey Schedule is administered at the community level (villages in rural areas and census enumeration blocks in urban areas) and is answered by several key informants. The community schedule includes the following sections: Population Characteristics, Infrastructure and Common Resource, Accessibility and Availability of Health Care Services and coverage of Health and Social Welfare Programmes.

Fact Sheet of Key Indicators for the Union Territory of Dadra & Nagar Haveli

This fact sheet provides information on key indicators (weighted) for the union territory of Dadra & Nagar Haveli. The fieldwork for Dadra & Nagar Haveli was conducted from **April through July 2017**. Table-1 provides information about the number of households and individuals interviewed.

Table 1 Number of households and individuals interviewed for the union territory of Dadra & Nagar Haveli, LASI Wave 1, 2017-18

Sr. No.	Coverage		Rural	Urban	Male	Female	Total
1.	Household roster co	ompleted	632	629	na	na	1261
2.	Households interviewed (with age-eligible individuals)#		391	240	na	na	631
	T. P. 1. 1	45-59 years and their spouses irrespective of age	408	231	278	361	639
3.	Individuals Interviewed	60 years and above	300	151	197	254	451
	All ages		708	382	475	615	1090

na "not applicable"

[#] LASI age-eligible households are those with at least one individual in aged 45 years and above; age-eligible individuals are persons aged 45 years and above and their spouses (regardless of age) in the LASI sampled households.

	Household Consumption			
22	Household Monthly Per Capita Consumption Expenditure (MPCE) in INR ¹⁰	1991	3881	3080
23	Household Per Capita Food Expenditure as a share of MPCE (%)	60.6	45.3	49.5
24	Household Per Capita Health Expenditure as a share of MPCE (%)	4.4	6.6	6.0

 $^{^{\}rm 1}$ Based on all households including LASI age-eligible and non-age-eligible households.

 $^{^{\}rm 2}$ Death rate is calculated based on deaths in the last two calendar years.

³ Based on LASI age-eligible households only.

⁴ Improved sanitation includes flush or pour flush toilet (which is flushed to piped sewer system/septic tank/ pit latrine), pit latrine, twin pit, composting toilet

⁵ Open defecation refers to the practice whereby people go out in fields, bushes, forests, open bodies of water, or other open spaces rather than using the toilet to defecate. This information was collected from eligible household respondent.

⁶ Improved drinking water source includes water from pipe, public tap/standpipe, tube well or bore well, dug well, spring water and rain water.

⁷ Clean cooking fuel includes LPG, Biogas and Electricity.

⁸ Indoor pollution refers to households using solid and unclean fuel (for cooking or any other purpose) inside the household and cooking in traditional *chullah/stove* or open fire without any ventilation. Unclean fuel refers to use of kerosene, charcoal, coal, crop residue, wood/shrub and dung cake.

⁹ Pucca house refers to a house whose roof, wall and floor is made up of pucca (concrete) material.

¹⁰ MPCE is defined as total monthly household consumption expenditure divided by household size. Includes household's per capita spending on food and non-food items including spending on health, education, utilities etc.

Ho	usehold-Level Key Indicators ³	Rural	Urban	Total

37	Households covered by medical reimbursement/health insurance from an employer (%)	1.8	3.7	3.0
38	Households covered by privately purchased commercial health insurance (%)		5.0	3.1

_

[&]quot;-" indicates less number of cases/ no cases.

Any one or more motorized vehicle includes car, motor cycle, moped and scooter.

¹² Per Capita Annual Household Income refers to total household income divided by household size. It includes income from all members of the household and from all sources such as agricultural work, non-agricultural work, self-employment, remittances/gifts, wages/salaries from employment, pension income and public/private transfers.

¹³ Based on income reported from household by that particular source.

¹⁴ Wage/salary work refers to income from full-time, part-time, side-jobs odd jobs or other wages or salaries.

¹⁵ Work related pension refers to income from central/state government pension, employer funded pension, privately purchased commercial pension and other state pension schemes.

¹⁶ Government/public transfers includes agriculture subsidies, non-agricultural government subsidies (LPG subsidy, scholarship for education, subsidy for building toilets, subsidy for setting up small scale industries, subsidy for solar panels, etc.), housing assistance, unemployment allowance, Janani Suraksha Yojana (JSY)/any other maternity compensation, compensation under any other health benefits program (other than JSY), Compensation for illness or accident, emergency or disaster relief (flood, earthquake, drought, etc.), debt waiver, compensation for re-settlement (due to slums, dams, road, etc.), assistance for self-employment (like Swarna Jayanti Gram Swarozgar Yojana/ National Rural Livelihood Mission), social security pension schemes (like Indira Gandhi National Old Age Pension Scheme, Indira Gandhi National Disability Pension Scheme) and other government transfers.

¹⁷ Includes different types of health insurance/benefits such as CGHS, ESIS, RSBY, other central/state government health insurance schemes or medical reimbursement from employer etc.

¹⁸ Allied schemes refers to state specific schemes which are based on Rashtriya Swasthya Bima Yojana (RSBY) model.

⁴⁰ Currently consuming tobacco refers to consumption of any smokeless tobacco product such as chewing tobacco, gutka or pan masala etc.

^{*} Including spouse irrespective of age, na "not applicable", "[]" based on fewer than 5 unweighted cases in the numerator or 25 unweighted cases in the denominator, "-" indicates less number of cases/ no cases.

37 Among those who are aware of concessions given by the government for elderly.

³⁸ The "Maintenance and Welfare of Parents and Senior Citizens Act" mandates legal obligation on children to financially maintain their parents/provide monthly allowances.

³⁹ Currently smoking tobacco refers to smoking any tobacco product such as cigarette, bidi, cigar, hookah and cheroot etc.

⁴¹ Heavy episodic drinking refers to those who reported consumption of at least 60 grams or more (10 grams = 1 standard drink) of pure alcohol on at least one occasion in the past 30 days.

⁴² Those who are either engaged in moderate physical activity (at least 150 minutes throughout the week) or vigorous physical activity (at least 75 minutes throughout the week) or an equivalent combination of moderate- and vigorous-intensity activity.

⁴³ Refers to yoga/meditation/asanas/pranayama etc. practicing daily or more than once a week.

⁴⁴ For all chronic conditions, the reference period is *ever diagnosed* and diagnosed by MBBS, BDS and AYUSH health professionals.

⁴⁵ Poor Self Rated Health (SRH) includes both poor and very poor self-assessed health status.

⁴⁶ Cardiovascular diseases include hypertension, heart disease and stroke (any one or more).

⁴⁷ Chronic lung diseases include chronic obstructive pulmonary disease (COPD), asthma and chronic bronchitis (any one or more).

⁴⁸ Bone /joint diseases include arthritis, rheumatism and osteoporosis (any one or more).

^{*} Including spouse irrespective of age, "[]" based on fewer than 5 unweighted cases in the numerator or 25 unweighted cases in the denominator,

[&]quot;-" indicates less number of cases/ no cases.

⁴⁹ Any neurological/psychiatric problem includes depression, alzheimer's disease, dementia or psychiatric problem or neurological problem (any one or more).

⁵⁰ Psychiatric problems include unipolar or bipolar disorder, schizophrenia etc. (any one or more).

⁵¹ Neurological problems include neuropathy, convulsion, migraine, Parkinson's etc. (any one or more).

⁵² Includes oral cancer, breast cancer, cervical cancer, lung cancer or cancer/malignant tumors originating in any other organs/ body parts (any one or more).

⁵³ Urogenital conditions include chronic renal failure, incontinence, kidney stone and Benign Prostate Hypertrophy-BPH (only among males) (any one or more).

⁵⁴ Eye or vision related conditions or problems include presbyopia, glaucoma, cataract, myopia, hypermetropia, other eyes problems such as conjunctivitis, eye injury, red eye etc. (any one or more).

 $^{^{55}}$ Refractive error includes presbyopia, myopia and hypermetropia with or without astigmatism.

⁵⁶Common oral health problems include painful teeth, ulcer lasting more than two weeks, bleeding gums, swelling gums, loose teeth, dental cavity/dental caries & soreness or cracks in the corner of the mouth in past 12 months (any one or more).

⁵⁷Periodontal diseases include bleeding gums, swelling gums or ulcers lasting more than two weeks (any one or more).

⁵⁸ Injury include injuries sustained due to any traffic accident, violence, animal attack or fall in the past 2 years (any one or more).

⁵⁹ Reference period for natural and man-made disaster is past 5 years.

⁶⁰ Health problems due to natural and man-made disaster refers to permanent physical disability, psychological and mental health problems or chronic illness (any one or more).

^{*} Including spouse irrespective of age, na "not applicable", "[]" based on fewer than 5 unweighted cases in the numerator or 25 unweighted cases in the denominator, "-" indicates less number of cases/ no cases.

⁶¹ For prevalence of endemic diseases, the reference period is past 2 years (any one or more).

⁶² Any vector-borne disease includes malaria, dengue or chikungunya (any one or more).

⁶³ Any water-borne disease includes diarrhoea/gastroenteritis, typhoid, jaundice or hepatitis (any one or more).

⁶⁴ For symptom based prevalence of health conditions, the reference period is past 2 years.

⁶⁵ Angina pectoris refers to, "a chest pain or discomfort with all the following symptoms: (a) the pain must include either the sternum (any level) or the left arm and left anterior chest (defined as the anterior chest wall between the levels of clavicle and lower end of sternum), (b) pain must be provoked by either hurrying or walking uphill (or by walking on the level, for those who never attempt more), (c) when pain occurs on walking it must make the person either stop or slacken pace, (d) pain must disappear on a majority of occasions in 10 min or less from the time when the person stands still.

⁶⁶ Sleep problems refer to difficulty in falling asleep or staying asleep throughout the night and also feeling unrested during the day (any one or more).

⁶⁷ Reproductive health problems include hot flashes, irregular vaginal discharge, uterine prolapse, fibroids, cysts and vaginal dryness in the past 2 years

⁶⁸ The reference period for Pap Smear and Mammography is past 2 years.

⁶⁹ Biological family members include -father, mother, brother, sister, children and grandchildren.

⁷⁰ Refers to functional limitations lasting more than 3 months.

⁷¹ Activities of Daily Living (ADL) includes dressing, putting on *chappals* or shoes, walking across a room, bathing, eating difficulties, getting in or out of bed (any one or more).

* Including spouse irrespective of age, "[]" based on fewer than 5 unweighted cases in the numerator or 25 unweighted cases in the denominator, "-" indicates less number of cases/ no cases.

⁷³ Helper refers to any person/s assisting respondent in any ADL/IADL limitations.

⁸⁴ Low vision refers to either low near vision or low distant vision in the better eye with best correction available with the respondent.

⁷² Instrumental Activities of Daily Living (IADL) includes preparing a hot meal, shopping for groceries, making telephone calls, taking medications, doing work around the house or garden, managing money (paying bills and keeping track of expenses) and getting around or finding address in unfamiliar place (any one or more).

⁷⁴ Aids or supportive devices include spectacles and dentures and devices to help you in moving or sitting (such as, walker, walking sticks, wheel chair, adjustable showers stools/commodes, back/neck collar, orthosis/prosthesis).

⁷⁵ Among those respondents who reported using any aid or supportive device(s) to assist them in the activities of daily living.

⁷⁶ Immediate word recall refers to total number of words recalled from the given list of 10 words immediately.

⁷⁷ Delayed word recall refers to total number of words recalled from the same given list of 10 words after some delay.

⁷⁸ Based on Composite International Diagnostic Interview-Short Form (CIDI-SF); respondent who reported that they felt sad, blue or depressed for two-weeks period during last 12 months for all the day long or most of the.

⁷⁹ Prevalence of measured hypertension refers to those measured with systolic blood pressure of \geq 140 mmHg or diastolic blood pressure of \geq 90 mmHg or both.

⁸⁰ Prevalence of undiagnosed hypertension refers to those undiagnosed by a health professional but whose measured systolic blood pressure was ≥ 140 mmHg or diastolic blood pressure was ≥ 90 mmHg or both.

⁸¹ Untreated hypertension refers to those who reported that they have been diagnosed with hypertension by a health professional and currently measured with hypertension but currently not taking treatment

⁸² Undertreated hypertension refers to those who reported that they have been diagnosed with hypertension by a health professional and currently measured with hypertension but currently taking treatment.

⁸³ Adequately treated hypertension refers to those reported that they have been diagnosed by health professional and currently taking treatment and whose measured systolic blood pressure was < 140 mmHg and diastolic blood pressure was < 90 mmHg.</p>

⁸⁵ Low near vision refers to near vision equal to or poorer than 20/80 and equal to or better than 20/400 in the better eye with best correction available with respondent.

⁸⁷ Blindness refers to those with vision less than 20/200 in distance or could not count finger or perceive light.

 $^{^{90}}$ WHO criteria of classification of waist- hip ratio (WHR)

Male	Female	Risk level
< 0.90	< 0.85	Low
≥0.90	≥0.85	High

⁹¹ Grip strength measures bodily muscle strength and is an overall marker of health among elderly population. Mean grip strength is an average of two readings for dominant hand.

⁸⁶ Low distance vision refers to distance vision equal to or poorer than 20/80 and equal to or better than 20/200 in the better eye with best correction available with respondent.

⁸⁸ Body Mass Index (BMI) refers to weight in kilograms divided by height in meter square (kg/m²). BMI levels have been classified according to WHO classifications: underweight ≤ 18.4; normal=18.5 to 24.9; overweight=25.0 to 29.9; obese ≥30.0

 $^{^{89}}$ Metabolic complications: critical limit classification for high risk waist circumference for male is \geq 102 cm and for female is \geq 88cm.

⁹² Includes health post/sub centers, primary health center/urban health center, community health center, district/sub-district hospital, government/tertiary hospital or government AYUSH hospital.

⁹³ Includes private hospital/nursing home, private clinic (OPD based services), NGO/Charity/Trust/Church-run hospital/Private AYUSH hospital. It also includes health care services availed partially from either private or government or NGO.

⁹⁴ Among those who sought out-patient care in the past 12 months and this includes modern allopathic medicines, AYUSH medicines, traditional herbs or medicine, excluding any health supplements.

⁹⁵ The expenditure on last in-patient visit includes consultation charges, medicine charges, test/investigation charge, nursing home charges, surgery and related charges, transportation charges and any other charges.

DAMAN & DIU

Introduction

The Longitudinal Ageing Study in India (LASI) is a nationally and state representative longitudinal study of ageing and health. LASI is a national landmark, the largest in the world and, only of its kind in India. Its main goal is to provide valid, reliable and continuous scientific data on the health, social, mental and economic well-being of India's older adult (aged 45 and above) population. These data will help to monitor existing programmes and inform new national health and ageing policies. LASI is undertaken as a globally harmonized study carried out in more than 44 developed and developing countries worldwide; and the survey schedules, protocols and methodologies are harmonized across these countries. These are part of the Health and Retirement Study (HRS) family of longitudinal ageing and retirement surveys. Therefore, LASI data will also serve as an important public resource for national policy making and worldwide comparative research on ageing.

LASI is undertaken under the aegis of the Ministry of Health and Family Welfare (MoHFW), Government of India. The International Institute for Population Sciences (IIPS), Mumbai is the nodal institution for implementing LASI in collaboration with the Harvard T.H.Chan School of Public Health (HSPH) and the University of Southern California (USC).

A. LASI Objectives and Coverage:

The LASI wave-1 survey (2017-18) covers all 30 states and 6 Union Territories of India with a panel sample size of 72,250 older adults aged 45 years and above and their spouses regardless of age. LASI collects data on four major subject domains:

- 1. Health: Disease Burden & Risk Factors (Reported and Measured)
- 2. Health Care and Health Care Financing
- 3. Social: Family, Social Network and Social Welfare Programmes for the Elderly
- 4. Economic: Income, Wealth, Expenditure, Employment, Retirement and Pension

The long-term goal of LASI is to continue for the next 25 years, with respondents surveyed every two years.

LASI Survey Instruments:

The LASI survey instrument comprises three schedules:

- **1. Household Survey Schedule**: Administered to one per household, collects information from interviewing one or more adult member of household. Includes the following modules: Household Roster, Housing and Environment, Household Consumption, Household Assets and Debts, Household Income and Household Health Insurance.
- 2. Individual Survey Schedule: Administered to each respondent aged 45 years and above and their spouses (regardless of age) in the sampled households. Includes the following modules: Demographics, Work, Retirement and Pension, Health (Chronic Diseases and Health Conditions), Functional Health, Family Medical History, Mental Health (Cognition and Depression), Health Behavior and Food Security, Health Care Access and Utilization, Health Care Financing, Family and Social Network, Social Welfare Programmes and Experimental Modules on Time Use, Expectations, Social Connectedness and Vignettes.

In addition, LASI includes an individual module on measured biomarkers:

- Anthropometric Measurements: Height, Weight, Waist Circumference and Hip Circumference.
- **Functional Health Markers**: Blood Pressure and Pulse Rate, Lung Function Test (Spirometry) and Vision Test (Near and Distance Vision Impairment).

- **Performance Based Markers:** Grip Strength, Timed-Walk and Balance Tests.
- Collection of Dried Blood Spot (DBS) samples: To be tested for variety of molecular biomarkers.
- **3.** In addition, a Community Survey Schedule is administered at the community level (villages in rural areas and census enumeration blocks in urban areas) and is answered by several key informants. The community schedule includes the following sections: Population Characteristics, Infrastructure and Common Resource, Accessibility and Availability of Health Care Services and coverage of Health and Social Welfare Programmes.

Fact Sheet of Key Indicators for the Union Territory of Daman & Diu

This fact sheet provides information on key indicators (weighted) for the union territory of Daman & Diu. The fieldwork for Daman & Diu was conducted from **April through July 2017**. Table-1 provides information about the number of households and individuals interviewed.

Table 1 Number of households and individuals interviewed for the union territory of Daman & Diu, LASI Wave 1, 2017-18

Sr. No.	Coverage		Rural	Urban	Male	Female	Total
1.	Household roster completed		283	899	na	na	1182
2.	Households interviewed (with age-eligible individuals)#		210	367	na	na	577
3.	Individuals Interviewed	45-59 years and their spouses irrespective of age	195	362	226	331	557
		60 years and above	154	280	184	250	434
		All ages	349	642	410	581	991

na "not applicable"

[#] LASI age-eligible households are those with at least one individual in aged 45 years and above; age-eligible individuals are persons aged 45 years and above and their spouses (regardless of age) in the LASI sampled households.

20	Households exposed to indoor pollution (%) ⁸	4.4	2.4	2.6	
21	Households with <i>pucca</i> house (%) ⁹	78.8	82.9	82.4	
	Household Consumption				
22	Household Monthly Per Capita Consumption Expenditure (MPCE) in INR ¹⁰	3356	3523	3502	
23	Household Per Capita Food Expenditure as a share of MPCE (%)	67.0	63.9	64.2	
24	Household Per Capita Health Expenditure as a share of MPCE (%)	5.3	5.0	5.1	

 $^{^{\}rm 1}$ Based on all households including LASI age-eligible and non-age-eligible households.

 $^{^{\}rm 2}$ Death rate is calculated based on deaths in the last two calendar years.

³ Based on LASI age-eligible households only.

⁴ Improved sanitation includes flush or pour flush toilet (which is flushed to piped sewer system/septic tank/ pit latrine), pit latrine, twin pit, composting toilet.

⁵ Open defecation refers to the practice whereby people go out in fields, bushes, forests, open bodies of water, or other open spaces rather than using the toilet to defecate. This information was collected from eligible household respondent.

⁶ Improved drinking water source includes water from pipe, public tap/standpipe, tube well or bore well, dug well, spring water and rain water.

⁷ Clean cooking fuel includes LPG, Biogas and Electricity.

⁸ Indoor pollution refers to households using solid and unclean fuel (for cooking or any other purpose) inside the household and cooking in traditional *chullah/stove* or open fire without any ventilation. Unclean fuel refers to use of kerosene, charcoal, coal, crop residue, wood/shrub and dung cake.

⁹ Pucca house refers to a house whose roof, wall and floor is made up of pucca (concrete) material.

¹⁰ MPCE is defined as total monthly household consumption expenditure divided by household size. Includes household's per capita spending on food and non-food items including spending on health, education, utilities etc.

Ho	usehold-Level Key Indicators ³	Rural	Urban	Total

	Household Insurance			
34	Households covered by any health insurance (%) ¹⁷	11.2	19.8	18.9
35	Households covered by Rashtriya Swasthya Bima Yojana (RSBY) & allied schemes (%) ¹⁸	8.6	12.6	12.2
36	Households covered by Central Government Health Scheme (CGHS)/Employee State Insurance Scheme (ESIS) (%)	[2.1]	4.6	4.3
37	Households covered by medical reimbursement/health insurance from an employer (%)	[0.5]	[1.7]	1.5
38	Households covered by privately purchased commercial health insurance (%)	[0.7]	3.8	3.4

[&]quot;[]" based on fewer than 5 unweighted cases in the numerator or 25 unweighted cases in the denominator.

11 Any one or more motorized vehicle includes car, motor cycle, moped and scooter.

¹² Per Capita Annual Household Income refers to total household income divided by household size. It includes income from all members of the household and from all sources such as agricultural work, non-agricultural work, self-employment, remittances/gifts, wages/salaries from employment, pension income and public/private transfers.

¹³ Based on income reported from household by that particular source.

¹⁴ Wage/salary work refers to income from full-time, part-time, side-jobs odd jobs or other wages or salaries.

¹⁵ Work related pension refers to income from central/state government pension, employer funded pension, privately purchased commercial pension and other state pension schemes.

¹⁶ Government/public transfers includes agriculture subsidies, non-agricultural government subsidies (LPG subsidy, scholarship for education, subsidy for building toilets, subsidy for setting up small scale industries, subsidy for solar panels, etc.), housing assistance, unemployment allowance, Janani Suraksha Yojana (JSY)/any other maternity compensation, compensation under any other health benefits program (other than JSY), Compensation for illness or accident, emergency or disaster relief (flood, earthquake, drought, etc.), debt waiver, compensation for re-settlement (due to slums, dams, road, etc.), assistance for self-employment (like Swarna Jayanti Gram Swarozgar Yojana/ National Rural Livelihood Mission), social security pension schemes (like Indira Gandhi National Old Age Pension Scheme, Indira Gandhi National Widow Pension Scheme, Indira Gandhi National Disability Pension Scheme) and other government transfers.

¹⁷ Includes different types of health insurance/benefits such as CGHS, ESIS, RSBY, other central/state government health insurance schemes or medical reimbursement from employer etc.

¹⁸ Allied schemes refers to state specific schemes which are based on Rashtriya Swasthya Bima Yojana (RSBY) model.

_

⁴⁰ Currently consuming tobacco refers to consumption of any smokeless tobacco product such as chewing tobacco, gutka or pan masala etc.

^{*} Including spouse irrespective of age, na "not applicable", "[]" based on fewer than 5 unweighted cases in the numerator or 25 unweighted cases in the denominator, "-" indicates less number of cases/ no cases.

³⁷ Among those who are aware of concessions given by the government for elderly.

³⁸ The "Maintenance and Welfare of Parents and Senior Citizens Act" mandates legal obligation on children to financially maintain their parents/provide monthly allowances.

³⁹ Currently smoking tobacco refers to smoking any tobacco product such as cigarette, *bidi*, cigar, *hookah* and *cheroot* etc.

⁴¹ Heavy episodic drinking refers to those who reported consumption of at least 60 grams or more (10 grams = 1 standard drink) of pure alcohol on at least one occasion in the past 30 days.

⁴² Those who are either engaged in moderate physical activity (at least 150 minutes throughout the week) or vigorous physical activity (at least 75 minutes throughout the week) or an equivalent combination of moderate- and vigorous-intensity activity.

⁴³ Refers to yoga/meditation/asanas/pranayama etc. practicing daily or more than once a week.

⁴⁴ For all chronic conditions, the reference period is *ever diagnosed* and diagnosed by MBBS, BDS and AYUSH health professionals.

⁴⁵ Poor Self Rated Health (SRH) includes both poor and very poor self-assessed health status.

⁴⁶ Cardiovascular diseases include hypertension, heart disease and stroke (any one or more).

⁴⁷ Chronic lung diseases include chronic obstructive pulmonary disease (COPD), asthma and chronic bronchitis (any one or more).

⁴⁸ Bone /joint diseases include arthritis, rheumatism and osteoporosis (any one or more).

* Including spouse irrespective of age, "[]" based on fewer than 5 unweighted cases in the numerator or 25 unweighted cases in the denominator,

[&]quot;-" indicates less number of cases/ no cases. ⁴⁹ Any neurological/psychiatric problem includes depression, alzheimer's disease, dementia or psychiatric problem or neurological problem (any one or

more).

⁵⁰ Psychiatric problems include unipolar or bipolar disorder, schizophrenia etc. (any one or more).

⁵¹ Neurological problems include neuropathy, convulsion, migraine, Parkinson's etc. (any one or more).

⁵² Includes oral cancer, breast cancer, cervical cancer, lung cancer or cancer/malignant tumors originating in any other organs/ body parts (any one or more).

⁵³ Urogenital conditions include chronic renal failure, incontinence, kidney stone and Benign Prostate Hypertrophy-BPH (only among males) (any one or more).

⁵⁴ Eye or vision related conditions or problems include presbyopia, glaucoma, cataract, myopia, hypermetropia, other eyes problems such as conjunctivitis, eye injury, red eye etc. (any one or more).

⁵⁵ Refractive error includes presbyopia, myopia and hypermetropia with or without astigmatism.

⁵⁶ Common oral health problems include painful teeth, ulcer lasting more than two weeks, bleeding gums, swelling gums, loose teeth, dental cavity/dental caries & soreness or cracks in the corner of the mouth in past 12 months (any one or more).

⁵⁷ Periodontal diseases include bleeding gums, swelling gums or ulcers lasting more than two weeks (any one or more).

⁵⁸ Injury include injuries sustained due to any traffic accident, violence, animal attack or fall in the past 2 years (any one or more).

⁵⁹ Reference period for natural and man-made disaster is past 5 years.

⁶⁰ Health problems due to natural and man-made disaster refers to permanent physical disability, psychological and mental health problems or chronic illness (any one or more).

⁶¹ For prevalence of endemic diseases in India, the reference period is past 2 years (any one or more).

⁶² Any vector-borne disease includes malaria, dengue or chikungunya (any one or more).

⁶³ Any water-borne disease includes diarrhoea/gastroenteritis, typhoid, jaundice or hepatitis (any one or more).

 $^{^{64}}$ For symptom based prevalence of health conditions, the reference period is past 2 years.

⁶⁵ Angina pectoris refers to, "a chest pain or discomfort with all the following symptoms: (a) the pain must include either the sternum (any level) or the left arm and left anterior chest (defined as the anterior chest wall between the levels of clavicle and lower end of sternum), (b) pain must be provoked by either hurrying or walking uphill (or by walking on the level, for those who never attempt more), (c) when pain occurs on walking it must make the person either stop or slacken pace, (d) pain must disappear on a majority of occasions in 10 min or less from the time when the person stands still.

⁶⁶ Sleep problems refer to difficulty in falling asleep or staying asleep throughout the night and also feeling unrested during the day (any one or more).

⁶⁷ Reproductive health problems include hot flashes, irregular vaginal discharge, uterine prolapse, fibroids, cysts and vaginal dryness in the past 2 years (any one or more).

⁶⁸ The reference period for Pap Smear and Mammography is past 2 years.

⁶⁹ Biological family members include -father, mother, brother, sister, children and grandchildren.

⁷⁰ Refers to functional limitations lasting more than 3 months.

⁷¹ Activities of Daily Living (ADL) includes dressing, putting on *chappals* or shoes, walking across a room, bathing, eating difficulties, getting in or out of bed (any one or more).

⁷² Instrumental Activities of Daily Living (IADL) includes preparing a hot meal, shopping for groceries, making telephone calls, taking medications, doing work around the house or garden, managing money (paying bills and keeping track of expenses) and getting around or finding address in unfamiliar place (any one or more).

* Including spouse irrespective of age, "[]" based on fewer than 5 unweighted cases in the numerator or 25 unweighted cases in the denominator.

⁷³ Helper refers to any person/s assisting respondent in any ADL/IADL limitations.

⁷⁶ Immediate word recall refers to total number of words recalled from the given list of 10 words immediately.

⁸⁴ Low vision refers to either low near vision or low distant vision in the better eye with best correction available with the respondent.

Aids or supportive devices include spectacles and dentures and devices to help you in moving or sitting (such as, walker, walking sticks, wheel chair, adjustable showers stools/commodes, back/neck collar, orthosis/prosthesis).

⁷⁵ Among those respondents who reported using any aid or supportive device(s) to assist them in the activities of daily living.

 $^{^{77}}$ Delayed word recall refers to total number of words recalled from the same given list of 10 words after some delay.

⁷⁸ Based on Composite International Diagnostic Interview-Short Form (CIDI-SF); respondent who reported that they felt sad, blue or depressed for two-weeks period during last 12 months for all the day long or most of the day.

⁷⁹ Prevalence of measured hypertension refers to those measured with systolic blood pressure of ≥ 140 mmHg or diastolic blood pressure of ≥ 90 mmHg or both

⁸⁰ Prevalence of undiagnosed hypertension refers to those undiagnosed by a health professional but whose measured systolic blood pressure was ≥ 140 mmHg or diastolic blood pressure was ≥ 90 mmHg or both.

⁸¹ Untreated hypertension refers to those who reported that they have been diagnosed with hypertension by a health professional and currently measured with hypertension but currently not taking treatment

⁸² Undertreated hypertension refers to those who reported that they have been diagnosed with hypertension by a health professional and currently measured with hypertension but currently taking treatment.

⁸³ Adequately treated hypertension refers to those reported that they have been diagnosed by health professional and currently taking treatment and whose measured systolic blood pressure was < 140 mmHg and diastolic blood pressure was < 90 mmHg.</p>

⁸⁵ Low near vision refers to near vision equal to or poorer than 20/80 and equal to or better than 20/400 in the better eye with best correction available with respondent.

⁸⁶ Low distance vision refers to distance vision equal to or poorer than 20/80 and equal to or better than 20/200 in the better eye with best correction available with respondent.

⁸⁷ Blindness refers to those with vision less than 20/200 in distance or could not count finger or perceive light.

DELHI

Introduction

The Longitudinal Ageing Study in India (LASI) is a nationally and state representative longitudinal study of ageing and health. LASI is a national landmark, the largest in the world and, only of its kind in India. Its main goal is to provide valid, reliable and continuous scientific data on the health, social, mental and economic well-being of India's older adult (aged 45 and above) population. These data will help to monitor existing programmes and inform new national health and ageing policies. LASI is undertaken as a globally harmonized study carried out in more than 44 developed and developing countries worldwide; and the survey schedules, protocols and methodologies are harmonized across these countries. These are part of the Health and Retirement Study (HRS) family of longitudinal ageing and retirement surveys. Therefore, LASI data will also serve as an important public resource for national policy making and worldwide comparative research on ageing.

LASI is undertaken under the aegis of the Ministry of Health and Family Welfare (MoHFW), Government of India. The International Institute for Population Sciences (IIPS), Mumbai is the nodal institution for implementing LASI in collaboration with the Harvard T. H. Chan School of Public Health (HSPH) and the University of Southern California (USC).

A. LASI Objectives and Coverage:

The LASI wave-1 survey (2017-18) covers all 30 states and 6 Union Territories of India with a panel sample size of 72,250 older adults aged 45 years and above and their spouses regardless of age. LASI collects data on four major subject domains:

- 1. Health: Disease Burden & Risk Factors (Reported and Measured)
- 2. Health Care and Health Care Financing
- 3. Social: Family, Social Network and Social Welfare Programmes for the Elderly
- 4. Economic: Income, Wealth, Expenditure, Employment, Retirement and Pension

The long-term goal of LASI is to continue for the next 25 years, with respondents surveyed every two years.

LASI Survey Instruments:

The LASI survey instrument comprises three schedules:

- **1. Household Survey Schedule**: Administered to one per household, collects information from interviewing one or more adult member of household. Includes the following modules: Household Roster, Housing and Environment, Household Consumption, Household Assets and Debts, Household Income and Household Health Insurance.
- 2. Individual Survey Schedule: Administered to each respondent aged 45 years and above and their spouses (regardless of age) in the sampled households. Includes the following modules: Demographics, Work, Retirement and Pension, Health (Chronic Diseases and Health Conditions), Functional Health, Family Medical History, Mental Health (Cognition and Depression), Health Behavior and Food Security, Health Care Access and Utilization, Health Care Financing, Family and Social Network, Social Welfare Programmes and Experimental Modules on Time Use, Expectations, Social Connectedness and Vignettes.

In addition, LASI includes an individual module on measured biomarkers:

- Anthropometric Measurements: Height, Weight, Waist Circumference and Hip Circumference.
- **Functional Health Markers**: Blood Pressure and Pulse Rate, Lung Function Test (Spirometry) and Vision Test (Near and Distance Vision Impairment).

- Performance Based Markers: Grip Strength, Timed-Walk and Balance Tests.
- Collection of Dried Blood Spot (DBS) samples: To be tested for variety of molecular biomarkers.
- **3. In addition, a Community Survey Schedule** is administered at the community level (villages in rural areas and census enumeration blocks in urban areas) and is answered by several key informants. The community schedule includes the following sections: Population Characteristics, Infrastructure and Common Resource, Accessibility and Availability of Health Care Services and coverage of Health and Social Welfare Programmes.

Fact Sheet of Key Indicators for the State of Delhi

This fact sheet provides information on key indicators (weighted) for the state of Delhi. The fieldwork for Delhi was conducted from **April through August 2017**. Table-1 provides information about the number of households and individuals interviewed.

Table 1 Number of Households and Individuals interviewed for the state of Delhi, LASI Wave 1, 2017-18

Sr. No.	Coverage	Coverage		Urban	Male	Female	Total
1.	Household roster completed		na	na	na	na	1265
2.	Households interviewed (with age-eligible individuals) #		na	na	na	na	754
	Individuals	45-59 years and their spouses irrespective of age	na	na	348	476	824
3.	Interviewed	60 years and above	na	na	251	244	495
		All ages	na	na	599	720	1319

na "not applicable"

[#] LASI age-eligible households are those with at least one individual in aged 45 years and above; age-eligible individuals are persons aged 45 years and above and their spouses (regardless of age) in the LASI sampled households.

Rural and Urban is not applicable for Delhi.

¹ Based on all households including LASI age-eligible and non-age-eligible households.

² Death rate is calculated based on deaths in the last two calendar years.

 $^{^3}$ Based on LASI age-eligible households only.

⁴ Improved sanitation includes flush or pour flush toilet (which is flushed to piped sewer system/septic tank/ pit latrine), pit latrine, twin pit, composting toilet.

⁵ Open defecation refers to the practice whereby people go out in fields, bushes, forests, open bodies of water, or other open spaces rather than using the toilet to defecate. This information was collected from eligible household respondent.

⁶ Improved drinking water source includes water from pipe, public tap/standpipe, tube well or bore well, dug well, spring water and rain water.

⁷ Clean cooking fuel includes LPG, Biogas and Electricity.

⁸ Indoor pollution refers to households using solid and unclean fuel (for cooking or any other purpose) inside the household and cooking in traditional *chullah/stove* or open fire without any ventilation. Unclean fuel refers to use of kerosene, charcoal, coal, crop residue, wood/shrub and dung cake.

⁹ *Pucca* house refers to a house whose roof, wall and floor is made up of *pucca* (concrete) material.

¹⁰ MPCE is defined as total monthly household consumption expenditure divided by household size. Includes household's per capita spending on food and non-food items including spending on health, education, utilities etc.

Hou	sehold-Level Key Indicators ³	Rural	Urban	Total
	Household Assets and Debts			
25	Households owning current residence (%)			77.2

32	Mean income from pension ¹⁵			4663
33	Mean income from government/public transfers ¹⁶			849
	Household Insurance			
34	Households covered by any health insurance (%) ¹⁷			22.9
35	Households covered by Rashtriya Swasthya Bima Yojana (RSBY) & allied schemes (%) ¹⁸			[0.4]
36	Households covered by Central Government Health Scheme (CGHS)/Employee State Insurance Scheme (ESIS) (%)			14.8
37	Households covered by medical reimbursement/health insurance from an employer (%)			2.1
38	Households covered by privately purchased commercial health insurance (%)			7.2

Rural and Urban is not applicable for Delhi.

[&]quot;[]" based on fewer than 5 unweighted cases in the numerator or 25 unweighted cases in the denominator.

Any one or more motorized vehicle includes car, motor cycle, moped and scooter.

¹² Per Capita Annual Household Income refers to total household income divided by household size. It includes income from all members of the household and from all sources such as agricultural work, non-agricultural work, self-employment, remittances/gifts, wages/salaries from employment, pension income and public/private transfers.

¹³ Based on income reported from household by that particular source.

¹⁴ Wage/salary work refers to income from full-time, part-time, side-jobs odd jobs or other wages or salaries.

¹⁵ Work related pension refers to income from central/state government pension, employer funded pension, privately purchased commercial pension and other state pension schemes.

¹⁶ Government/public transfers includes agriculture subsidies, non-agricultural government subsidies (LPG subsidy, scholarship for education, subsidy for building toilets, subsidy for setting up small scale industries, subsidy for solar panels, etc.), housing assistance, unemployment allowance, Janani Suraksha Yojana (JSY)/any other maternity compensation, compensation under any other health benefits program (other than JSY), Compensation for illness or accident, emergency or disaster relief (flood, earthquake, drought, etc.), debt waiver, compensation for re-settlement (due to slums, dams, road, etc.), assistance for self-employment (like Swarna Jayanti Gram Swarozgar Yojana/ National Rural Livelihood Mission), social security pension schemes (like Indira Gandhi National Old Age Pension Scheme, Indira Gandhi National Disability Pension Scheme) and other government transfers.

¹⁷ Includes different types of health insurance/benefits such as CGHS, ESIS, RSBY, other central/state government health insurance schemes or medical reimbursement from employer etc.

¹⁸ Allied schemes refer to state specific schemes which are based on Rashtriya Swasthya Bima Yojana (RSBY) model.

^{*} Including spouse irrespective of age, Rural and Urban is not applicable for Delhi, "[]" based on fewer than 5 unweighted cases in the numerator or 25 unweighted cases in the denominator, "-" indicates less number of cases/ no cases.

⁴⁹ Any neurological/psychiatric problem includes depression, alzheimer's disease, dementia or psychiatric problem or neurological problem (any one or more)

⁵⁰ Psychiatric problems include unipolar or bipolar disorder, schizophrenia etc. (any one or more).

⁵¹ Neurological problems include neuropathy, convulsion, migraine, Parkinson's etc. (any one or more).

⁵² Includes oral cancer, breast cancer, cervical cancer, lung cancer or cancer/malignant tumors originating in any other organs/ body parts (any one or more).

⁵³ Urogenital conditions include chronic renal failure, incontinence, kidney stone and Benign Prostate Hypertrophy-BPH (only among males) (any one or more).

⁵⁴ Eye or vision related conditions or problems include presbyopia, glaucoma, cataract, myopia, hypermetropia, other eyes problems such as conjunctivitis, eye injury, red eye etc. (any one or more).

⁵⁵ Refractive error includes presbyopia, myopia and hypermetropia with or without astigmatism.

⁵⁶ Common oral health problems include painful teeth, ulcer lasting more than two weeks, bleeding gums, swelling gums, loose teeth, dental cavity/dental caries & soreness or cracks in the corner of the mouth in past 12 months (any one or more).

⁵⁷ Periodontal diseases include bleeding gums, swelling gums or ulcers lasting more than two weeks (any one or more).

⁵⁸ Injury include injuries sustained due to any traffic accident, violence, animal attack or fall in the past 2 years (any one or more).

⁵⁹ Reference period for natural and man-made disaster is past 5 years.

⁶⁰ Health problems due to natural and man-made disaster refers to permanent physical disability, psychological and mental health problems or chronic illness (any one or more).

⁷³ Helper refers to any person/s assisting respondent in any ADL/IADL limitations.

⁷⁶ Immediate word recall refers to total number of words recalled from the given list of 10 words immediately.

84 Low vision refers to either low near vision or low distant vision in the better eye with best correction available with the respondent.

⁷² Instrumental Activities of Daily Living (IADL) includes preparing a hot meal, shopping for groceries, making telephone calls, taking medications, doing work around the house or garden, managing money (paying bills and keeping track of expenses) and getting around or finding address in unfamiliar place (any one or more).

⁷⁴ Aids or supportive devices include spectacles and dentures and devices to help you in moving or sitting (such as, walker, walking sticks, wheel chair, adjustable showers stools/ commodes, back/neck collar, orthosis/prosthesis).

⁷⁵ Among those respondents who reported using any aid or supportive device(s) to assist them in the activities of daily living.

⁷⁷ Delayed word recall refers to total number of words recalled from the same given list of 10 words after some delay.

⁷⁸ Based on Composite International Diagnostic Interview-Short Form (CIDI-SF); respondent who reported that they felt sad, blue or depressed for two-weeks period during last 12 months for all the day long or most of the day.

⁷⁹ Prevalence of measured hypertension refers to those measured with systolic blood pressure of ≥ 140 mmHg or diastolic blood pressure of ≥ 90 mmHg or both.

⁸⁰ Prevalence of undiagnosed hypertension refers to those undiagnosed by a health professional but whose measured systolic blood pressure was ≥ 140 mmHg or diastolic blood pressure was ≥ 90 mmHg or both.

⁸¹ Untreated hypertension refers to those who reported that they have been diagnosed with hypertension by a health professional and currently measured with hypertension but currently not taking treatment.

⁸² Undertreated hypertension refers to those who reported that they have been diagnosed with hypertension by a health professional and currently measured with hypertension but currently taking treatment.

⁸³ Adequately treated hypertension refers to those reported that they have been diagnosed by health professional and currently taking treatment and whose measured systolic blood pressure was < 140 mmHg and diastolic blood pressure was < 90 mmHg.</p>

⁸⁵ Low near vision refers to near vision equal to or poorer than 20/80 and equal to or better than 20/400 in the better eye with best correction available with respondent.

⁸⁶ Low distance vision refers to distance vision equal to or poorer than 20/80 and equal to or better than 20/200 in the better eye with best correction available with respondent.

GOA

Introduction

The Longitudinal Ageing Study in India (LASI) is a nationally and state representative longitudinal study of ageing and health. LASI is a national landmark, the largest in the world and, only of its kind in India. Its main goal is to provide valid, reliable and continuous scientific data on the health, social, mental and economic well-being of India's older adult (aged 45 and above) population. These data will help to monitor existing programmes and inform new national health and ageing policies. LASI is undertaken as a globally harmonized study carried out in more than 44 developed and developing countries worldwide; and the survey schedules, protocols and methodologies are harmonized across these countries. These are part of the Health and Retirement Study (HRS) family of longitudinal ageing and retirement surveys. Therefore, LASI data will also serve as an important public resource for national policy making and worldwide comparative research on ageing.

LASI is undertaken under the aegis of the Ministry of Health and Family Welfare (MoHFW), Government of India. The International Institute for Population Sciences (IIPS), Mumbai is the nodal institution for implementing LASI in collaboration with the Harvard T.H.Chan School of Public Health (HSPH) and the University of Southern California (USC).

A. LASI Objectives and Coverage:

The LASI wave-1 survey (2017-18) covers all 30 states and 6 Union Territories of India with a panel sample size of 72,250 older adults aged 45 years and above and their spouses regardless of age. LASI collects data on four major subject domains:

- 1. Health: Disease Burden & Risk Factors (Reported and Measured)
- 2. Health Care and Health Care Financing
- 3. Social: Family, Social Network and Social Welfare Programmes for the Elderly
- 4. Economic: Income, Wealth, Expenditure, Employment, Retirement and Pension

The long-term goal of LASI is to continue for the next 25 years, with respondents surveyed every two years.

LASI Survey Instruments:

The LASI survey instrument comprises three schedules:

- **1. Household Survey Schedule**: Administered to one per household, collects information from interviewing one or more adult member of household. Includes the following modules: Household Roster, Housing and Environment, Household Consumption, Household Assets and Debts, Household Income and Household Health Insurance.
- 2. Individual Survey Schedule: Administered to each respondent aged 45 years and above and their spouses (regardless of age) in the sampled households. Includes the following modules: Demographics, Work, Retirement and Pension, Health (Chronic Diseases and Health Conditions), Functional Health, Family Medical History, Mental Health (Cognition and Depression), Health Behavior and Food Security, Health Care Access and Utilization, Health Care Financing, Family and Social Network, Social Welfare Programmes and Experimental Modules on Time Use, Expectations, Social Connectedness and Vignettes.

In addition, LASI includes an individual module on measured biomarkers:

- Anthropometric Measurements: Height, Weight, Waist Circumference and Hip Circumference.
- **Functional Health Markers**: Blood Pressure and Pulse Rate, Lung Function Test (Spirometry) and Vision Test (Near and Distance Vision Impairment).

- **Performance Based Markers:** Grip Strength, Timed-Walk and Balance Tests.
- Collection of Dried Blood Spot (DBS) samples: To be tested for variety of molecular biomarkers.
- **3.** In addition, a Community Survey Schedule is administered at the community level (villages in rural areas and census enumeration blocks in urban areas) and is answered by several key informants. The community schedule includes the following sections: Population Characteristics, Infrastructure and Common Resource, Accessibility and Availability of Health Care Services and coverage of Health and Social Welfare Programmes.

Fact Sheet of Key Indicators for the State of Goa

This fact sheet provides information on key indicators (weighted) for the state of Goa. The fieldwork for Goa was conducted from **May through August 2017**. Table-1 provides information about the number of households and individuals interviewed.

Table 1 Number of Households and Individuals interviewed for the state of Goa, LASI Wave 1, 2017-18

Sr. No.	Coverage		Rural	Urban	Male	Female	Total
1.	Household roster completed		468	699	na	na	1167
2.	Households interviewed (with age-eligible individuals) #		365	512	na	na	877
	Individuals Interviewed	45-59 years and their spouses irrespective of age	314	476	279	511	790
3.		60 years and above	246	391	289	348	637
		All ages	560	867	568	859	1427

na "not applicable"

[#] LASI age-eligible households are those with at least one individual in aged 45 years and above; age-eligible individuals are persons aged 45 years and above and their spouses (regardless of age) in the LASI sampled households.

23	Household Per Capita Food Expenditure as a share of MPCE (%)	46.4	49.3	48.3
24	Household Per Capita Health Expenditure as a share of MPCE (%)	10.5	8.1	9.0

 $^{^{\}rm I}$ Based on all households including LASI age-eligible and non-age-eligible households.

² Death rate is calculated based on deaths in the last two calendar years.

³ Based on LASI age-eligible households only.

⁴ Improved sanitation includes flush or pour flush toilet (which is flushed to piped sewer system/septic tank/ pit latrine), pit latrine, twin pit, composting toilet.

⁵ Open defecation refers to the practice whereby people go out in fields, bushes, forests, open bodies of water, or other open spaces rather than using the toilet to defecate. This information was collected from eligible household respondent.

⁶ Improved drinking water source includes water from pipe, public tap/standpipe, tube well or bore well, dug well, spring water and rain water.

⁷ Clean cooking fuel includes LPG, Biogas and Electricity.

⁸ Indoor pollution refers to households using solid and unclean fuel (for cooking or any other purpose) inside the household and cooking in traditional chullah/stove or open fire without any ventilation. Unclean fuel refers to use of kerosene, charcoal, coal, crop residue, wood/shrub and dung cake.

⁹ *Pucca* house refers to a house whose roof, wall and floor is made up of *pucca* (concrete) material.

¹⁰ MPCE is defined as total monthly household consumption expenditure divided by household size. Includes household's per capita spending on food and non-food items including spending on health, education, utilities etc.

Hot	usehold-Level Key Indicators ³	Rural	Urban	Total
	Household Assets and Debts

38	Households covered by privately purchased commercial health insurance (%)	[0.2]	2.1	1.4

Any one or more motorized vehicle includes car, motor cycle, moped and scooter.

¹⁴ Wage/salary work refers to income from full-time, part-time, side-jobs odd jobs or other wages or salaries.

[&]quot;[]" based on fewer than 5 unweighted cases in the numerator or 25 unweighted cases in the denominator.

¹² Per Capita Annual Household Income refers to total household income divided by household size. It includes income from all members of the household and from all sources such as agricultural work, non-agricultural work, self-employment, remittances/gifts, wages/salaries from employment, pension income and public/private transfers.

¹³ Based on income reported from household by that particular source.

¹⁵ Work related pension refers to income from central/state government pension, employer funded pension, privately purchased commercial pension and other state pension schemes.

Government/public transfers includes agriculture subsidies, non-agricultural government subsidies (LPG subsidy, scholarship for education, subsidy for building toilets, subsidy for setting up small scale industries, subsidy for solar panels, etc.), housing assistance, unemployment allowance, Janani Suraksha Yojana (JSY)/any other maternity compensation, compensation under any other health benefits program (other than JSY), Compensation for illness or accident, emergency or disaster relief (flood, earthquake, drought, etc.), debt waiver, compensation for re-settlement (due to slums, dams, road, etc.), assistance for self-employment (like Swarna Jayanti Gram Swarozgar Yojana/ National Rural Livelihood Mission), social security pension schemes (like Indira Gandhi National Old Age Pension Scheme, Indira Gandhi National Disability Pension Scheme) and other government transfers.

¹⁷ Includes different types of health insurance/benefits such as CGHS, ESIS, RSBY, other central/state government health insurance schemes or medical reimbursement from employer etc.

¹⁸ Allied schemes refers to state specific schemes which are based on Rashtriya Swasthya Bima Yojana (RSBY) model.

⁴⁰ Currently consuming tobacco refers to consumption of any smokeless tobacco product such as chewing tobacco, gutka or pan masala etc.

^{*} Including spouse irrespective of age, na "not applicable", "[]" based on fewer than 5 unweighted cases in the numerator or 25 unweighted cases in the denominator, "-" indicates less number of cases/ no cases.

³⁶ Refers to discounts or concessions received for elderly in train/bus/air travel, telecommunication, special interest rates on bank accounts or loans, income tax benefits or others.

³⁷ Among those who are aware of concessions given by the government for elderly.

³⁸ The "Maintenance and Welfare of Parents and Senior Citizens Act" mandates legal obligation on children to financially maintain their parents/provide monthly allowances.

³⁹ Currently smoking tobacco refers to smoking any tobacco product such as cigarette, *bidi*, cigar, *hookah* and *cheroot* etc.

⁴¹ Heavy episodic drinking refers to those who reported consumption of at least 60 grams or more (10 grams = 1 standard drink) of pure alcohol on at least one occasion in the past 30 days.

⁴² Those who are either engaged in moderate physical activity (at least 150 minutes throughout the week) or vigorous physical activity (at least 75 minutes throughout the week) or an equivalent combination of moderate- and vigorous-intensity activity.

⁴³ Refers to yoga/meditation/asanas/pranayama etc. practicing daily or more than once a week.

⁴⁴ For all chronic conditions, the reference period is *ever diagnosed* and diagnosed by MBBS, BDS and AYUSH health professionals.

⁴⁵ Poor Self Rated Health (SRH) includes both poor and very poor self-assessed health status.

⁴⁶ Cardiovascular diseases include hypertension, heart disease and stroke (any one or more).

⁴⁷ Chronic lung diseases include chronic obstructive pulmonary disease (COPD), asthma and chronic bronchitis (any one or more).

^{*} Including spouse irrespective of age, na "not applicable", "[]" based on fewer than 5 unweighted cases in the numerator or 25 unweighted cases in the denominator, "-" indicates less number of cases/ no cases.

⁵⁹ Reference period for natural and man-made disaster is past 5 years.

⁶⁰ Health problems due to natural and man-made disaster refers to permanent physical disability, psychological and mental health problems or chronic illness (any one or more).

⁶¹ For prevalence of endemic diseases in India, the reference period is past 2 years (any one or more).

⁶² Any vector-borne disease includes malaria, dengue or chikungunya (any one or more).

⁶³ Any water-borne disease includes diarrhoea/gastroenteritis, typhoid, jaundice or hepatitis (any one or more).

⁶⁴ For symptom based prevalence of health conditions, the reference period is past 2 years.

⁶⁵ Angina pectoris refers to, "a chest pain or discomfort with all the following symptoms: (a) the pain must include either the sternum (any level) or the left arm and left anterior chest (defined as the anterior chest wall between the levels of clavicle and lower end of sternum), (b) pain must be provoked by either hurrying or walking uphill (or by walking on the level, for those who never attempt more), (c) when pain occurs on walking it must make the person either stop or slacken pace, (d) pain must disappear on a majority of occasions in 10 min or less from the time when the person stands still.

⁶⁶ Sleep problems refer to difficulty in falling asleep or staying asleep throughout the night and also feeling unrested during the day (any one or more)

⁶⁷ Reproductive health problems include hot flashes, irregular vaginal discharge, uterine prolapse, fibroids, cysts and vaginal dryness in the past 2 years (any one or more).

⁶⁸ The reference period for Pap Smear and Mammography is past 2 years.

⁶⁹ Biological family members include -father, mother, brother, sister, children and grandchildren.

* Including spouse irrespective of age, "[]" based on fewer than 5 unweighted cases in the numerator or 25 unweighted cases in the denominator, "-" indicates less number of cases/ no cases.

⁷¹ Activities of Daily Living (ADL) includes dressing, putting on *chappals* or shoes, walking across a room, bathing, eating difficulties, getting in or out of bed (any one or more).

⁷³ Helper refers to any person/s assisting respondent in any ADL/IADL limitations.

⁷⁵ Among those respondents who reported using any aid or supportive device(s) to assist them in the activities of daily living.

81 Untreated hypertension refers to those who reported that they have been diagnosed with hypertension by a health professional and currently measured with hypertension but currently not taking treatment

⁷⁰ Refers to functional limitations lasting more than 3 months.

⁷² Instrumental Activities of Daily Living (IADL) includes preparing a hot meal, shopping for groceries, making telephone calls, taking medications, doing work around the house or garden, managing money (paying bills and keeping track of expenses) and getting around or finding address in unfamiliar place (any one or more).

⁷⁴ Aids or supportive devices include spectacles and dentures and devices to help you in moving or sitting (such as, walker, walking sticks, wheel chair, adjustable showers stools/commodes, back/neck collar, orthosis/prosthesis).

⁷⁶ Immediate word recall refers to total number of words recalled from the given list of 10 words immediately.

⁷⁸ Based on Composite International Diagnostic Interview-Short Form (CIDI-SF); respondent who reported that they felt sad, blue or depressed for two-weeks period during last 12 months for all the day long or most of the day.

⁷⁹ Prevalence of measured hypertension refers to those measured with systolic blood pressure of ≥ 140 mmHg or diastolic blood pressure of ≥ 90 mmHg or both

⁸⁰ Prevalence of undiagnosed hypertension refers to those undiagnosed by a health professional but whose measured systolic blood pressure was ≥ 140 mmHg or diastolic blood pressure was ≥ 90 mmHg or both.

⁸² Undertreated hypertension refers to those who reported that they have been diagnosed with hypertension by a health professional and currently measured with hypertension but currently taking treatment.

⁸³ Adequately treated hypertension refers to those reported that they have been diagnosed by health professional and currently taking treatment and whose measured systolic blood pressure was < 140 mmHg and diastolic blood pressure was < 90 mmHg.</p>

GUJARAT

Introduction

The Longitudinal Ageing Study in India (LASI) is a nationally and state representative longitudinal study of ageing and health. LASI is a national landmark, the largest in the world and, only of its kind in India. Its main goal is to provide valid, reliable and continuous scientific data on the health, social, mental and economic well-being of India's older adult (aged 45 and above) population. These data will help to monitor existing programmes and inform new national health and ageing policies. LASI is undertaken as a globally harmonized study carried out in more than 44 developed and developing countries worldwide; and the survey schedules, protocols and methodologies are harmonized across these countries. These are part of the Health and Retirement Study (HRS) family of longitudinal ageing and retirement surveys. Therefore, LASI data will also serve as an important public resource for national policy making and worldwide comparative research on ageing.

LASI is undertaken under the aegis of the Ministry of Health and Family Welfare (MoHFW), Government of India. The International Institute for Population Sciences (IIPS), Mumbai is the nodal institution for implementing LASI in collaboration with the Harvard T.H.Chan School of Public Health (HSPH) and the University of Southern California (USC).

A. LASI Objectives and Coverage:

The LASI wave-1 survey (2017-18) covers all 30 states and 6 Union Territories of India with a panel sample size of 72,250 older adults aged 45 years and above and their spouses regardless of age. LASI collects data on four major subject domains:

- 1. Health: Disease Burden & Risk Factors (Reported and Measured)
- 2. Health Care and Health Care Financing
- 3. Social: Family, Social Network and Social Welfare Programmes for the Elderly
- 4. Economic: Income, Wealth, Expenditure, Employment, Retirement and Pension

The long-term goal of LASI is to continue for the next 25 years, with respondents surveyed every two years.

LASI Survey Instruments:

The LASI survey instrument comprises three schedules:

- **1. Household Survey Schedule**: Administered to one per household, collects information from interviewing one or more adult member of household. Includes the following modules: Household Roster, Housing and Environment, Household Consumption, Household Assets and Debts, Household Income and Household Health Insurance.
- 2. Individual Survey Schedule: Administered to each respondent aged 45 years and above and their spouses (regardless of age) in the sampled households. Includes the following modules: Demographics, Work, Retirement and Pension, Health (Chronic Diseases and Health Conditions), Functional Health, Family Medical History, Mental Health (Cognition and Depression), Health Behavior and Food Security, Health Care Access and Utilization, Health Care Financing, Family and Social Network, Social Welfare Programmes and Experimental Modules on Time Use, Expectations, Social Connectedness and Vignettes.

In addition, LASI includes an individual module on measured biomarkers:

- Anthropometric Measurements: Height, Weight, Waist Circumference and Hip Circumference.
- **Functional Health Markers**: Blood Pressure and Pulse Rate, Lung Function Test (Spirometry) and Vision Test (Near and Distance Vision Impairment).

- **Performance Based Markers:** Grip Strength, Timed-Walk and Balance Tests.
- Collection of Dried Blood Spot (DBS) samples: To be tested for variety of molecular biomarkers.
- **3.** In addition, a Community Survey Schedule is administered at the community level (villages in rural areas and census enumeration blocks in urban areas) and is answered by several key informants. The community schedule includes the following sections: Population Characteristics, Infrastructure and Common Resource, Accessibility and Availability of Health Care Services and coverage of Health and Social Welfare Programmes.

Fact Sheet of Key Indicators for the State of Gujarat

This fact sheet provides information on key indicators (weighted) for the state of Gujarat. The fieldwork for Gujarat was conducted from **May through August 2017**. Table-1 provides information about the number of households and individuals interviewed.

Table 1 Number of households and individuals interviewed for the state of Gujarat, LASI Wave 1, 2017-18

Sr. No.	Coverage		Rural	Urban	Male	Female	Total
1.	Household roster completed		1212	930	na	na	2142
2.	Households interviewed (with age-eligible individuals) #		857	598	na	na	1455
	Individuals Interviewed	45-59 years and their spouses irrespective of age	826	524	535	815	1350
3.		60 years and above	578	413	454	537	991
		All ages	1404	937	989	1352	2341

na "not applicable"

[#] LASI age-eligible households are those with at least one individual in aged 45 years and above; age-eligible individuals are persons aged 45 years and above and their spouses (regardless of age) in the LASI sampled households.

Gujarat-Key Indicators

	Sex Ratio (Females per 1000 Males)							
10	All ages	996	950	977				
_11	60 + population	1258	1064	1169				
	Death Rate (per thousand population) ²							
12	All ages	9.5	6.5	8.1				
13	60 + population	51.0	31.2	41.1				
Hou	sehold-Level Key Indicators ³	Rural	Urban	Total				
	Housing and Environment							
14	Households with improved sanitation (%) ⁴	70.3	93.4	80.2				
15	Households practicing open defecation (%) ⁵	29.8	6.4	19.7				
16	Households with water facility inside dwelling/own yard (%)	74.0	79.6	76.4				
17	Households with improved drinking water source (%) ⁶	93.1	84.7	89.5				
18	Households with electricity (%)	94.8	97.8	96.1				
19	Households using clean cooking fuel (%) ⁷	31.6	84.7	54.5				
20	Households exposed to indoor pollution (%) ⁸	8.0	2.6	5.7				
21	Households with <i>pucca</i> house (%) ⁹	50.1	81.1	64.6				
	Household Consumption							
22	Household Monthly Per Capita Consumption Expenditure (MPCE) in INR ¹⁰	2720	3421	3011				
23	Household Per Capita Food Expenditure as a share of MPCE (%)	53.8	50.1	52.0				
24	Household Per Capita Health Expenditure as a share of MPCE (%)	9.3	9.6	9.5				

¹ Based on all households including LASI age-eligible and non-age-eligible households.

² Death rate is calculated based on deaths in the last two calendar years.

³ Based on LASI age-eligible households only.

⁴ Improved sanitation includes flush or pour flush toilet (which is flushed to piped sewer system/septic tank/ pit latrine), pit latrine, twin pit, composting toilet

⁵ Open defecation refers to the practice whereby people go out in fields, bushes, forests, open bodies of water, or other open spaces rather than using the toilet to defecate. This information was collected from eligible household respondent.

⁶ Improved drinking water source includes water from pipe, public tap/standpipe, tube well or bore well, dug well, spring water and rain water.

⁷ Clean cooking fuel includes LPG, Biogas and Electricity.

⁸ Indoor pollution refers to households using solid and unclean fuel (for cooking or any other purpose) inside the household and cooking in traditional *chullah/stove* or open fire without any ventilation. Unclean fuel refers to use of kerosene, charcoal, coal, crop residue, wood/shrub and dung cake.

 $^{^9}$ *Pucca* house refers to a house whose roof, wall and floor is made up of *pucca* (concrete) material.

¹⁰ MPCE is defined as total monthly household consumption expenditure divided by household size. Includes household's per capita spending on food and non-food items including spending on health, education, utilities etc.

Ho	usehold-Level Key Indicators ³	Rural	Urban	Total

35	Households covered by Rashtriya Swasthya Bima Yojana (RSBY) & allied schemes (%) ¹⁸	37.9	28.6	34.0
36	Households covered by Central Government Health Scheme (CGHS)/Employee State Insurance Scheme (ESIS) (%)	0.7	4.7	2.4
37	Households covered by medical reimbursement/health insurance from an employer (%)	1.4	3.6	2.3
38	Households covered by privately purchased commercial health insurance (%)	0.6	7.1	3.4

¹¹ Any one or more motorized vehicle includes car, motor cycle, moped and scooter.

¹² Per Capita Annual Household Income refers to total household income divided by household size. It includes income from all members of the household and from all sources such as agricultural work, non-agricultural work, self-employment, remittances/gifts, wages/salaries from employment, pension income and public/private transfers.

¹³ Based on income reported from household by that particular source.

¹⁴ Wage/salary work refers to income from full-time, part-time, side-jobs odd jobs or other wages or salaries.

¹⁵ Work related pension refers to income from central/state government pension, employer funded pension, privately purchased commercial pension and other state pension schemes.

¹⁶ Government/public transfers includes agriculture subsidies, non-agricultural government subsidies (LPG subsidy, scholarship for education, subsidy for building toilets, subsidy for setting up small scale industries, subsidy for solar panels, etc.), housing assistance, unemployment allowance, Janani Suraksha Yojana (JSY)/any other maternity compensation, compensation under any other health benefits program (other than JSY), Compensation for illness or accident, emergency or disaster relief (flood, earthquake, drought, etc.), debt waiver, compensation for re-settlement (due to slums, dams, road, etc.), assistance for self-employment (like Swarna Jayanti Gram Swarozgar Yojana/ National Rural Livelihood Mission), social security pension schemes (like Indira Gandhi National Old Age Pension Scheme, Indira Gandhi National Widow Pension Scheme, Indira Gandhi National Disability Pension Scheme) and other government transfers.

¹⁷ Includes different types of health insurance/benefits such as CGHS, ESIS, RSBY, other central/state government health insurance schemes or medical reimbursement from employer etc.

¹⁸ Allied schemes refers to state specific schemes which are based on Rashtriya Swasthya Bima Yojana (RSBY) model.

* Including spouse irrespective of age, "[]" based on fewer than 5 unweighted cases in the numerator or 25 unweighted cases in the denominator,

"-" indicates less number of cases/ no cases.

⁷³ Helper refers to any person/s assisting respondent in any ADL/IADL limitations.

75 Among those respondents who reported using any aid or supportive device(s) to assist them in the activities of daily living.

⁷⁷ Delayed word recall refers to total number of words recalled from the same given list of 10 words after some delay.

⁸⁴ Low vision refers to either low near vision or low distant vision in the better eye with best correction available with the respondent.

⁷² Instrumental Activities of Daily Living (IADL) includes preparing a hot meal, shopping for groceries, making telephone calls, taking medications, doing work around the house or garden, managing money (paying bills and keeping track of expenses) and getting around or finding address in unfamiliar place (any one or more).

⁷⁴ Aids or supportive devices include spectacles and dentures and devices to help you in moving or sitting (such as, walker, walking sticks, wheel chair, adjustable showers stools/commodes, back/neck collar, orthosis/prosthesis).

⁷⁶ Immediate word recall refers to total number of words recalled from the given list of 10 words immediately.

⁷⁸ Based on Composite International Diagnostic Interview-Short Form (CIDI-SF); respondent who reported that they felt sad, blue or depressed for two-weeks period during last 12 months for all the day long or most of the day.

⁷⁹ Prevalence of measured hypertension refers to those measured with systolic blood pressure of ≥ 140 mmHg or diastolic blood pressure of ≥ 90 mmHg or both.

⁸⁰ Prevalence of undiagnosed hypertension refers to those undiagnosed by a health professional but whose measured systolic blood pressure was ≥ 140 mmHg or diastolic blood pressure was ≥ 90 mmHg or both.

⁸¹ Untreated hypertension refers to those who reported that they have been diagnosed with hypertension by a health professional and currently measured with hypertension but currently not taking treatment.

⁸² Undertreated hypertension refers to those who reported that they have been diagnosed with hypertension by a health professional and currently measured with hypertension but currently taking treatment.

⁸³ Adequately treated hypertension refers to those reported that they have been diagnosed by health professional and currently taking treatment and whose measured systolic blood pressure was < 140 mmHg and diastolic blood pressure was < 90 mmHg.</p>

⁸⁵ Low near vision refers to near vision equal to or poorer than 20/80 and equal to or better than 20/400 in the better eye with best correction available with respondent.

⁸⁶ Low distance vision refers to distance vision equal to or poorer than 20/80 and equal to or better than 20/200 in the better eye with best correction available with respondent.

^{*} Including spouse irrespective of age.

⁸⁷ Blindness refers to those with vision less than 20/200 in distance or could not count finger or perceive light.

⁹⁰ WHO criteria of classification of waist- hip ratio (WHR)

o criteria or classii	ication of waist in	Tullo (WIIIC)
Male	Female	Risk level
< 0.90	< 0.85	Low
≥0.90	≥0.85	High

⁹¹ Grip strength measures bodily muscle strength and is an overall marker of health among elderly population. Mean grip strength is an average of two readings for dominant hand.

⁸⁸ Body Mass Index (BMI) refers to weight in kilograms divided by height in meter square (kg/m²). BMI levels have been classified according to WHO classifications: underweight ≤ 18.4; normal=18.5 to 24.9; overweight=25.0 to 29.9; obese ≥30.0

⁸⁹ Metabolic complications: critical limit classification for high risk waist circumference for male is ≥102 cm and for female is ≥88cm.

⁹² Includes health post/sub centers, primary health center/urban health center, community health center, district/sub-district hospital, government/tertiary hospital or government AYUSH hospital.

⁹³ Includes private hospital/nursing home, private clinic (OPD based services), NGO/Charity/Trust/Church-run hospital/Private AYUSH hospital. It also includes health care services availed partially from either private or government or NGO.

⁹⁴ Among those who sought out-patient care in the past 12 months and this includes modern allopathic medicines, AYUSH medicines, traditional herbs or medicine, excluding any health supplements.

⁹⁵ The expenditure on last in-patient visit includes consultation charges, medicine charges, test/investigation charge, nursing home charges, surgery and related charges, transportation charges and any other charges.

HARYANA

Introduction

The Longitudinal Ageing Study in India (LASI) is a nationally and state representative longitudinal study of ageing and health. LASI is a national landmark, the largest in the world and, only of its kind in India. Its main goal is to provide valid, reliable and continuous scientific data on the health, social, mental and economic well-being of India's older adult (aged 45 and above) population. These data will help to monitor existing programmes and inform new national health and ageing policies. LASI is undertaken as a globally harmonized study carried out in more than 44 developed and developing countries worldwide; and the survey schedules, protocols and methodologies are harmonized across these countries. These are part of the Health and Retirement Study (HRS) family of longitudinal ageing and retirement surveys. Therefore, LASI data will also serve as an important public resource for national policy making and worldwide comparative research on ageing.

LASI is undertaken under the aegis of the Ministry of Health and Family Welfare (MoHFW), Government of India. The International Institute for Population Sciences (IIPS), Mumbai is the nodal institution for implementing LASI in collaboration with the Harvard T. H. Chan School of Public Health (HSPH) and the University of Southern California (USC).

A. LASI Objectives and Coverage:

The LASI wave-1 survey (2017-18) covers all 30 states and 6 Union Territories of India with a panel sample size of 72,250 older adults aged 45 years and above and their spouses regardless of age. LASI collects data on four major subject domains:

- 1. Health: Disease Burden & Risk Factors (Reported and Measured)
- 2. Health Care and Health Care Financing
- 3. Social: Family, Social Network and Social Welfare Programmes for the Elderly
- 4. Economic: Income, Wealth, Expenditure, Employment, Retirement and Pension

The long-term goal of LASI is to continue for the next 25 years, with respondents surveyed every two years.

LASI Survey Instruments:

The LASI survey instrument comprises three schedules:

- **1. Household Survey Schedule**: Administered to one per household, collects information from interviewing one or more adult member of household. Includes the following modules: Household Roster, Housing and Environment, Household Consumption, Household Assets and Debts, Household Income and Household Health Insurance.
- 2. Individual Survey Schedule: Administered to each respondent aged 45 years and above and their spouses (regardless of age) in the sampled households. Includes the following modules: Demographics, Work, Retirement and Pension, Health (Chronic Diseases and Health Conditions), Functional Health, Family Medical History, Mental Health (Cognition and Depression), Health Behavior and Food Security, Health Care Access and Utilization, Health Care Financing, Family and Social Network, Social Welfare Programmes and Experimental Modules on Time Use, Expectations, Social Connectedness and Vignettes.

In addition, LASI includes an individual module on measured biomarkers:

- Anthropometric Measurements: Height, Weight, Waist Circumference and Hip Circumference.
- **Functional Health Markers**: Blood Pressure and Pulse Rate, Lung Function Test (Spirometry) and Vision Test (Near and Distance Vision Impairment).

- **Performance Based Markers:** Grip Strength, Timed-Walk and Balance Tests.
- Collection of Dried Blood Spot (DBS) samples: To be tested for variety of molecular biomarkers.
- **3.** In addition, a Community Survey Schedule is administered at the community level (villages in rural areas and census enumeration blocks in urban areas) and is answered by several key informants. The community schedule includes the following sections: Population Characteristics, Infrastructure and Common Resource, Accessibility and Availability of Health Care Services and coverage of Health and Social Welfare Programmes.

Fact Sheet of Key Indicators for the State of Haryana

This fact sheet provides information on key indicators (weighted) for the state of Haryana. The fieldwork for Haryana was conducted from **April through August 2017**. Table-1 provides information about the number of households and individuals interviewed.

Table 1 Number of Households and Individuals interviewed for the state of Haryana, LASI Wave 1, 2017-18

Sr. No.	Coverage		Rural	Urban	Male	Female	Total
1.	Household roster completed		1167	654	na	na	1821
2.	Households interviewed (with age-eligible individuals)#		833	418	na	na	1251
	Individuals Interviewed th irr 60	45-59 years and their spouses irrespective of age	684	366	429	621	1050

18	Households with electricity (%)	98.2	99.8	98.8
19	Households using clean cooking fuel (%) ⁷	30.0	89.1	52.5
20	Households exposed to indoor pollution (%) ⁸	40.4	5.9	27.3
21	Households with <i>pucca</i> house (%) ⁹	80.5	96.4	86.6
	Household Consumption			
22	Household Monthly Per Capita Consumption Expenditure (MPCE) in INR ¹⁰	2646	3501	2952
23	Household Per Capita Food Expenditure as a share of MPCE (%)	53.0	43.9	49.1
24	Household Per Capita Health Expenditure as a share of MPCE (%)	10.3	10.5	10.4

_

 $^{^{\}rm I}$ Based on all households including LASI age-eligible and non-age-eligible households.

² Death rate is calculated based on deaths in the last two calendar years.

³ Based on LASI age-eligible households only.

⁴ Improved sanitation includes flush or pour flush toilet (which is flushed to piped sewer system/septic tank/ pit latrine), pit latrine, twin pit, composting toilet.

⁵ Open defecation refers to the practice whereby people go out in fields, bushes, forests, open bodies of water, or other open spaces rather than using the toilet to defecate. This information was collected from eligible household respondent.

⁶ Improved drinking water source includes water from pipe, public tap/standpipe, tube well or bore well, dug well, spring water and rain water.

⁷ Clean cooking fuel includes LPG, Biogas and Electricity.

⁸ Indoor pollution refers to households using solid and unclean fuel (for cooking or any other purpose) inside the household and cooking in traditional *chullah/stove* or open fire without any ventilation. Unclean fuel refers to use of kerosene, charcoal, coal, crop residue, wood/shrub and dung cake.

⁹ Pucca house refers to a house whose roof, wall and floor is made up of pucca (concrete) material.

¹⁰ MPCE is defined as total monthly household consumption expenditure divided by household size. Includes household's per capita spending on food and non-food items including spending on health, education, utilities etc.

Ho	ısehold-Level Key Indicators ³	Rural	Urban	Total

36	Households covered by Central Government Health Scheme (CGHS)/Employee State Insurance Scheme (ESIS) (%)	6.1	8.0	6.8
37	Households covered by medical reimbursement/health insurance from an employer (%)	0.4	2.5	1.2
38	Households covered by privately purchased commercial health insurance (%)	[0.4]	4.8	2.1

_

Any one or more motorized vehicle includes car, motor cycle, moped and scooter.

[&]quot;[]" based on fewer than 5 unweighted cases in the numerator or 25 unweighted cases in the denominator.

¹² Per Capita Annual Household Income refers to total household income divided by household size. It includes income from all members of the household and from all sources such as agricultural work, non-agricultural work, self-employment, remittances/gifts, wages/salaries from employment, pension income and public/private transfers.

¹³ Based on income reported from household by that particular source.

¹⁴ Wage/salary work refers to income from full-time, part-time, side-jobs odd jobs or other wages or salaries.

¹⁵ Work related pension refers to income from central/state government pension, employer funded pension, privately purchased commercial pension and other state pension schemes.

¹⁶ Government/public transfers includes agriculture subsidies, non-agricultural government subsidies (LPG subsidy, scholarship for education, subsidy for building toilets, subsidy for setting up small scale industries, subsidy for solar panels, etc.), housing assistance, unemployment allowance, Janani Suraksha Yojana (JSY)/any other maternity compensation, compensation under any other health benefits program (other than JSY), Compensation for illness or accident, emergency or disaster relief (flood, earthquake, drought, etc.), debt waiver, compensation for re-settlement (due to slums, dams, road, etc.), assistance for self-employment (like Swarna Jayanti Gram Swarozgar Yojana/ National Rural Livelihood Mission), social security pension schemes (like Indira Gandhi National Old Age Pension Scheme, Indira Gandhi National Widow Pension Scheme, Indira Gandhi National Disability Pension Scheme) and other government transfers.

¹⁷ Includes different types of health insurance/benefits such as CGHS, ESIS, RSBY, other central/state government health insurance schemes or medical reimbursement from employer etc.

¹⁸ Allied schemes refers to state specific schemes which are based on Rashtriya Swasthya Bima Yojana (RSBY) model.

 $^{^{70}\,\}mbox{Refers}$ to functional limitations lasting more than 3 months.

⁷¹ Activities of Daily Living (ADL) includes dressing, putting on *chappals* or shoes, walking across a room, bathing, eating difficulties, getting in or out of bed (any one or more).

⁷² Instrumental Activities of Daily Living (IADL) includes preparing a hot meal, shopping for groceries, making telephone calls, taking medications, doing work around the house or garden, managing money (paying bills and keeping track of expenses) and getting around or finding address in unfamiliar place (any one or more).

⁷³ Helper refers to any person/s assisting respondent in any ADL/IADL limitations.

⁷⁴ Aids or supportive devices include spectacles and dentures and devices to help you in moving or sitting (such as, walker, walking sticks, wheel chair, adjustable showers stools/commodes, back/neck collar, orthosis/prosthesis).

⁷⁵ Among those respondents who reported using any aid or supportive device(s) to assist them in the activities of daily living.

⁷⁶ Immediate word recall refers to total number of words recalled from the given list of 10 words immediately.

 $^{^{77}}$ Delayed word recall refers to total number of words recalled from the same given list of 10 words after some delay.

⁷⁸ Based on Composite International Diagnostic Interview-Short Form (CIDI-SF); respondent who reported that they felt sad, blue or depressed for two-weeks period during last 12 months for all the day long or most of the day.

⁷⁹ Prevalence of measured hypertension refers to those measured with systolic blood pressure of ≥ 140 mmHg or diastolic blood pressure of ≥ 90 mmHg or both.

⁸⁰ Prevalence of undiagnosed hypertension refers to those undiagnosed by a health professional but whose measured systolic blood pressure was ≥ 140 mmHg or diastolic blood pressure was ≥ 90 mmHg or both.

⁸¹ Untreated hypertension refers to those who reported that they have been diagnosed with hypertension by a health professional and currently measured with hypertension but currently not taking treatment

Individual-Level Key Indicators		Age		Sex		Residence		
		45-59 years*	60 years & above	Male	Female	Rural	Urban	Total

174	Public facility (%) ⁹²	22.2	20.5	24.6	17.7	26.7	10.5	21.2
175	Private facility (%) ⁹³	72.4	77.1	70.8	79.7	70.5	84.0	75.1
176	Out-Patient Care in the Past 12 Mo. Sought out-patient care in the past 12 months (%)	56.7	57.4	53.9	59.1	53.8	62.6	57.0

* Including spouse irrespective of age, "[]" based on fewer than 5 unweighted cases in the numerator or 25 unweighted cases in the denominator,

Low vision refers to either low near vision or low distant vision in the better eye with best correction available with the respondent.

⁸⁷ Blindness refers to those with vision less than 20/200 in distance or could not count finger or perceive light.

90 WHO criteria of classification of waist- hip ratio (WHR)

Male	Female	Risk level
< 0.90	< 0.85	Low
≥0.90	≥0.85	High

⁹¹ Grip strength measures bodily muscle strength and is an overall marker of health among elderly population. Mean grip strength is an average of two readings for dominant hand.

[&]quot;-" indicates less number of cases/ no cases.

⁸² Undertreated hypertension refers to those who reported that they have been diagnosed with hypertension by a health professional and currently measured with hypertension but currently taking treatment.

⁸³ Adequately treated hypertension refers to those reported that they have been diagnosed by health professional and currently taking treatment and whose measured systolic blood pressure was < 140 mmHg and diastolic blood pressure was < 90 mmHg.</p>

⁸⁵ Low near vision refers to near vision equal to or poorer than 20/80 and equal to or better than 20/400 in the better eye with best correction available with respondent.

⁸⁶ Low distance vision refers to distance vision equal to or poorer than 20/80 and equal to or better than 20/200 in the better eye with best correction available with respondent.

⁸⁸ Body Mass Index (BMI) refers to weight in kilograms divided by height in meter square (kg/m²). BMI levels have been classified according to WHO classifications: underweight ≤ 18.4; normal=18.5 to 24.9; overweight=25.0 to 29.9; obese ≥30.0

 $^{^{89}}$ Metabolic complications: critical limit classification for high risk waist circumference for male is \geq 102 cm and for female is \geq 88cm.

⁹² Includes health post/sub centers, primary health center/urban health center, community health center, district/sub-district hospital, government/tertiary hospital or government AYUSH hospital.

⁹³ Includes private hospital/nursing home, private clinic (OPD based services), NGO/Charity/Trust/Church-run hospital/Private AYUSH hospital. It also includes health care services availed partially from either private or government or NGO.

HIMACHAL PRADESH

Introduction

The Longitudinal Ageing Study in India (LASI) is a nationally and state representative longitudinal study of ageing and health. LASI is a national landmark, the largest in the world and, only of its kind in India. Its main goal is to provide valid, reliable and continuous scientific data on the health, social, mental and economic well-being of India's older adult (aged 45 and above) population. These data will help to monitor existing programmes and inform new national health and ageing policies. LASI is undertaken as a globally harmonized study carried out in more than 44 developed and developing countries worldwide; and the survey schedules, protocols and methodologies are harmonized across these countries. These are part of the Health and Retirement Study (HRS) family of longitudinal ageing and retirement surveys. Therefore, LASI data will also serve as an important public resource for national policy making and worldwide comparative research on ageing.

LASI is undertaken under the aegis of the Ministry of Health and Family Welfare (MoHFW), Government of India. The International Institute for Population Sciences (IIPS), Mumbai is the nodal institution for implementing LASI in collaboration with the Harvard T.H.Chan School of Public Health (HSPH) and the University of Southern California (USC).

A. LASI Objectives and Coverage:

The LASI wave-1 survey (2017-18) covers all 30 states and 6 Union Territories of India with a panel sample size of 72,250 older adults aged 45 years and above and their spouses regardless of age. LASI collects data on four major subject domains:

- 1. Health: Disease Burden & Risk Factors (Reported and Measured)
- 2. Health Care and Health Care Financing
- 3. Social: Family, Social Network and Social Welfare Programmes for the Elderly
- 4. Economic: Income, Wealth, Expenditure, Employment, Retirement and Pension

The long-term goal of LASI is to continue for the next 25 years, with respondents surveyed every two years.

LASI Survey Instruments:

The LASI survey instrument comprises three schedules:

- 1. Household Survey Schedule: Administered to one per household, collects information from interviewing one or more adult member of household. Includes the following modules: Household Roster, Housing and Environment, Household Consumption, Household Assets and Debts, Household Income and Household Health Insurance.
- 2. Individual Survey Schedule: Administered to each respondent aged 45 years and above and their spouses (regardless of age) in the sampled households. Includes the following modules: Demographics, Work, Retirement and Pension, Health (Chronic Diseases and Health Conditions), Functional Health, Family Medical History, Mental Health (Cognition and Depression), Health Behavior and Food Security, Health Care Access and Utilization, Health Care Financing, Family and Social Network, Social Welfare Programmes and Experimental Modules on Time Use, Expectations, Social Connectedness and Vignettes.

In addition, LASI includes an individual module on measured biomarkers:

- Anthropometric Measurements: Height, Weight, Waist Circumference and Hip Circumference.
- **Functional Health Markers**: Blood Pressure and Pulse Rate, Lung Function Test (Spirometry) and Vision Test (Near and Distance Vision Impairment).

- **Performance Based Markers:** Grip Strength, Timed-Walk and Balance Tests.
- Collection of Dried Blood Spot (DBS) samples: To be tested for variety of molecular biomarkers.
- **3. In addition, a Community Survey Schedule** is administered at the community level (villages in rural areas and census enumeration blocks in urban areas) and is answered by several key informants. The community schedule includes the following sections: Population Characteristics, Infrastructure and Common Resource, Accessibility and Availability of Health Care Services and coverage of Health and Social Welfare Programmes.

Fact Sheet of Key Indicators for the State of Himachal Pradesh

This fact sheet provides information on key indicators (weighted) for the state of Himachal Pradesh. The fieldwork for Himachal Pradesh was conducted from **December 2017 through February 2018**. Table-1 provides information about the number of households and individuals interviewed.

Table 1 Number of Households and Individuals interviewed for the state of Himachal Pradesh, LASI Wave 1, 2017-18

Sr. No.	Coverage		Rural	Urban	Male	Female	Total
1.	Household ro	lousehold roster completed		177	na	na	1081
2.		Households interviewed (with age-eligible individuals)#		105	na	na	805
	Individuals	45-59 years and their spouses irrespective of age	661	106	258	509	767
3.	interviewed	60 years and above	562	59	304	317	621
		All ages	1223	165	562	826	1388

na "not applicable"

[#] LASI age-eligible households are those with at least one individual in aged 45 years and above; age-eligible individuals are persons aged 45 years and above and their spouses (regardless of age) in the LASI sampled households.

Himachal Pradesh-Key Indicators

Hou	sehold-Level Key Indicators	LASI-	Wave 1, 2	2017-18
Hou	sehold Population Profile ¹	Rural	Urban	Total
1	Mean Household Size	5.7	5.1	5.7
	Age Distribution in Years (%)			
2	0-14	20.9	21.0	20.9

14	Households with improved sanitation (%) ⁴	93.1	97.4	93.6
15	Households practicing open defecation (%) ⁵	6.9	2.6	6.4
16	Households with water facility inside dwelling/own yard (%)	83.8	89.2	84.4
17	Households with improved drinking water source (%) ⁶	97.3	100.0	97.6
18	Households with electricity (%)	99.8	99.1	99.7
19	Households using clean cooking fuel (%) ⁷	40.8	88.5	46.3
20	Households exposed to indoor pollution (%) ⁸	3.0	[1.1]	2.8
21	Households with <i>pucca</i> house (%) ⁹	80.3	97.5	82.4
	Household Consumption			
22	Household Monthly Per Capita Consumption Expenditure (MPCE) in INR ¹⁰	3824	4316	3880
23	Household Per Capita Food Expenditure as a share of MPCE (%)	47.1	40.7	46.3
24	Household Per Capita Health Expenditure as a share of MPCE (%)	14.2	15.9	14.4

[&]quot;[]" based on fewer than 5 unweighted cases in the numerator or 25 unweighted cases in the denominator.

Based on all households including LASI age-eligible and non-age-eligible households.

² Death rate is calculated based on deaths in the last two calendar years.

³ Based on LASI age-eligible households only.

⁴ Improved sanitation includes flush or pour flush toilet (which is flushed to piped sewer system/septic tank/ pit latrine), pit latrine, twin pit, composting toilet.

⁵ Open defecation refers to the practice whereby people go out in fields, bushes, forests, open bodies of water, or other open spaces rather than using the toilet to defecate. This information was collected from eligible household respondent.

⁶ Improved drinking water source includes water from pipe, public tap/standpipe, tube well or bore well, dug well, spring water and rain water.

⁷ Clean cooking fuel includes LPG, Biogas and Electricity.

⁸ Indoor pollution refers to households using solid and unclean fuel (for cooking or any other purpose) inside the household and cooking in traditional *chullah/stove* or open fire without any ventilation. Unclean fuel refers to use of kerosene, charcoal, coal, crop residue, wood/shrub and dung cake.

⁹ Pucca house refers to a house whose roof, wall and floor is made up of pucca (concrete) material.

¹⁰ MPCE is defined as total monthly household consumption expenditure divided by household size. Includes household's per capita spending on food and non-food items including spending on health, education, utilities etc.

Hot	ısehold-Level Key Indicators ³	Rural	Urban	Total
	Household Assets and Debts			
25	Households owning current residence (%)	92.0	78.2	90.4

	Per Capita Annual Household Income by Source (in INR) ¹³			
29	Mean income from agricultural and allied activities	20471	2945	18445
30	Mean income from non-agricultural business or self-employed activities	3237	10574	4083
31	Mean income from wages/salaries ¹⁴	23597	35666	24974
32	Mean income from pension ¹⁵	11911	16054	12385
33	Mean income from government/public transfers ¹⁶	1187	789	1141
	Household Insurance			
34	Households covered by any health insurance (%) ¹⁷	20.9	26.3	21.5
35	Households covered by Rashtriya Swasthya Bima Yojana (RSBY) & allied schemes (%) ¹⁸	10.5	6.4	10.0
36	Households covered by Central Government Health Scheme (CGHS)/Employee State Insurance Scheme (ESIS) (%)	6.7	12.9	7.4
37	Households covered by medical reimbursement/health insurance from an employer (%)	5.0	6.4	5.2
38	Households covered by privately purchased commercial health insurance (%)	[0.5]	[2.0]	[0.7]

[&]quot;[]" based on fewer than 5 unweighted cases in the numerator or 25 unweighted cases in the denominator.

11 Any one or more motorized vehicle includes car, motor cycle, moped and scooter.

¹² Per Capita Annual Household Income refers to total household income divided by household size. It includes income from all members of the household and from all sources such as agricultural work, non-agricultural work, self-employment, remittances/gifts, wages/salaries from employment, pension income and public/private transfers.

¹³ Based on income reported from household by that particular source.

¹⁴ Wage/salary work refers to income from full-time, part-time, side-jobs odd jobs or other wages or salaries.

¹⁵ Work related pension refers to income from central/state government pension, employer funded pension, privately purchased commercial pension and other state pension schemes.

¹⁶ Government/public transfers includes agriculture subsidies, non-agricultural government subsidies (LPG subsidy, scholarship for education, subsidy for building toilets, subsidy for setting up small scale industries, subsidy for solar panels, etc.), housing assistance, unemployment allowance, Janani Suraksha Yojana (JSY)/any other maternity compensation, compensation under any other health benefits program (other than JSY), Compensation for illness or accident, emergency or disaster relief (flood, earthquake, drought, etc.), debt waiver, compensation for re-settlement (due to slums, dams, road, etc.), assistance for self-employment (like Swarna Jayanti Gram Swarozgar Yojana/ National Rural Livelihood Mission), social security pension schemes (like Indira Gandhi National Old Age Pension Scheme, Indira Gandhi National Widow Pension Scheme, Indira Gandhi National Disability Pension Scheme) and other government transfers.

¹⁷ Includes different types of health insurance/benefits such as CGHS, ESIS, RSBY, other central/state government health insurance schemes or medical reimbursement from employer etc.

¹⁸ Allied schemes refers to state specific schemes which are based on Rashtriya Swasthya Bima Yojana (RSBY) model.

³⁷ Among those who are aware of concessions given by the government for elderly.

³⁹ Currently smoking tobacco refers to smoking any tobacco product such as cigarette, *bidi*, cigar, *hookah* and *cheroot* etc.

⁴⁰ Currently consuming tobacco refers to consumption of any smokeless tobacco product such as chewing tobacco, gutka or pan masala etc.

⁴³ Refers to yoga/meditation/asanas/pranayama etc. practicing daily or more than once a week.

^{*} Including spouse irrespective of age, na "not applicable", "[]" based on fewer than 5 unweighted cases in the numerator or 25 unweighted cases in the denominator, "-" indicates less number of cases/ no cases.

³⁶ Refers to discounts or concessions received for elderly in train/bus/air travel, telecommunication, special interest rates on bank accounts or loans, income tax benefits or others.

³⁸ The "Maintenance and Welfare of Parents and Senior Citizens Act" mandates legal obligation on children to financially maintain their parents/ provide monthly allowances.

⁴¹ Heavy episodic drinking refers to those who reported consumption of at least 60 grams or more (10 grams = 1 standard drink) of pure alcohol on at least one occasion in the past 30 days.

⁴² Those who are either engaged in moderate physical activity (at least 150 minutes throughout the week) or vigorous physical activity (at least 75 minutes throughout the week) or an equivalent combination of moderate- and vigorous-intensity activity.

⁴⁴ For all chronic conditions, the reference period is *ever diagnosed* and diagnosed by MBBS, BDS and AYUSH health professionals.

⁴⁵ Poor Self Rated Health (SRH) includes both poor and very poor self-assessed health status.

⁴⁶ Cardiovascular diseases include hypertension, heart disease and stroke (any one or more).

⁴⁷ Chronic lung diseases include chronic obstructive pulmonary disease (COPD), asthma and chronic bronchitis (any one or more).

 $^{\rm 59}$ Reference period for natural and man-made disaster is past 5 years.

⁶⁴ For symptom based prevalence of health conditions, the reference period is past 2 years.

^{*} Including spouse irrespective of age, na "not applicable", "[]" based on fewer than 5 unweighted cases in the numerator or 25 unweighted cases in the denominator, "-" indicates less number of cases/ no cases.

⁶⁰ Health problems due to natural and man-made disaster refers to permanent physical disability, psychological and mental health problems or chronic illness (any one or more).

⁶¹ For prevalence of endemic diseases in India, the reference period is past 2 years (any one or more).

⁶² Any vector-borne disease includes malaria, dengue or chikungunya (any one or more).

⁶³ Any water-borne disease includes diarrhoea/gastroenteritis, typhoid, jaundice or hepatitis (any one or more).

⁶⁵ Angina pectoris refers to, "a chest pain or discomfort with all the following symptoms: (a) the pain must include either the sternum (any level) or the left arm and left anterior chest (defined as the anterior chest wall between the levels of clavicle and lower end of sternum), (b) pain must be provoked by either hurrying or walking uphill (or by walking on the level, for those who never attempt more), (c) when pain occurs on walking it must make the person either stop or slacken pace, (d) pain must disappear on a majority of occasions in 10 min or less from the time when the person stands still.

⁶⁶ Sleep problems refer to difficulty in falling asleep or staying asleep throughout the night and also feeling unrested during the day (any one or more).

⁶⁷ Reproductive health problems include hot flashes, irregular vaginal discharge, uterine prolapse, fibroids, cysts and vaginal dryness in the past 12 months (any one or more).

 $^{^{68}}$ The reference period for Pap Smear and Mammography is past 2 years.

⁶⁹ Biological family members include -father, mother, brother, sister, children and grandchildren.

179	Private facility (%)	39.6	36.7	36.5	39.2	38.3	37.3	38.2

⁹⁰ WHO criteria of classification of waist- hip ratio (WHR)

Male	Female	Risk level
< 0.90	< 0.85	Low
≥0.90	≥0.85	High

⁹¹ Grip strength measures bodily muscle strength and is an overall marker of health among elderly population. Mean grip strength is an average of two readings for dominant hand.

^{*} Including spouse irrespective of age, "[]" based on fewer than 5 unweighted cases in the numerator or 25 unweighted cases in the denominator, "-" indicates less number of cases/ no cases.

⁸⁴ Low vision refers to either low near vision or low distant vision in the better eye with best correction available with the respondent.

⁸⁵ Low near vision refers to near vision equal to or poorer than 20/80 and equal to or better than 20/400 in the better eye with best correction available with respondent.

Name respondent.

86 Low distance vision refers to distance vision equal to or poorer than 20/80 and equal to or better than 20/200 in the better eye with best correction available with respondent.

 $^{^{87}}$ Blindness refers to those with vision less than 20/200 in distance or could not count finger or perceive light.

⁸⁸ Body Mass Index (BMI) refers to weight in kilograms divided by height in meter square (kg/m²). BMI levels have been classified according to WHO classifications: underweight ≤ 18.4; normal=18.5 to 24.9; overweight=25.0 to 29.9; obese ≥30.0

⁸⁹ Metabolic complications: critical limit classification for high risk waist circumference for male is ≥102 cm and for female is ≥88cm.

⁹² Includes health post/sub centers, primary health center/urban health center, community health center, district/sub-district hospital, government/tertiary hospital or government AYUSH hospital.

⁹³ Includes private hospital/nursing home, private clinic (OPD based services), NGO/Charity/Trust/Church-run hospital/Private AYUSH hospital. It also includes health care services availed partially from either private or government or NGO.

⁹⁴ Among those who sought out-patient care in the past 12 months and this includes modern allopathic medicines, AYUSH medicines, traditional herbs or medicine, excluding any health supplements.

JAMMU & KASHMIR

Introduction

The Longitudinal Ageing Study in India (LASI) is a nationally and state representative longitudinal study of ageing and health. LASI is a national landmark, the largest in the world and, only of its kind in India. Its main goal is to provide valid, reliable and continuous scientific data on the health, social, mental and economic well-being of India's older adult (aged 45 and above) population. These data will help to monitor existing programmes and inform new national health and ageing policies. LASI is undertaken as a globally harmonized study carried out in more than 44 developed and developing countries worldwide; and the survey schedules, protocols and methodologies are harmonized across these countries. These are part of the Health and Retirement Study (HRS) family of longitudinal ageing and retirement surveys. Therefore, LASI data will also serve as an important public resource for national policy making and worldwide comparative research on ageing.

LASI is undertaken under the aegis of the Ministry of Health and Family Welfare (MoHFW), Government of India. The International Institute for Population Sciences (IIPS), Mumbai is the nodal institution for implementing LASI in collaboration with the Harvard T. H. Chan School of Public Health (HSPH) and the University of Southern California (USC).

A. LASI Objectives and Coverage:

The LASI wave-1 survey (2017-18) covers all 30 states and 6 Union Territories of India with a panel sample size of 72,250 older adults aged 45 years and above and their spouses regardless of age. LASI collects data on four major subject domains:

- 1. Health: Disease Burden & Risk Factors (Reported and Measured)
- 2. Health Care and Health Care Financing
- 3. Social: Family, Social Network and Social Welfare Programmes for the Elderly
- 4. Economic: Income, Wealth, Expenditure, Employment, Retirement and Pension

The long-term goal of LASI is to continue for the next 25 years, with respondents surveyed every two years.

LASI Survey Instruments:

The LASI survey instrument comprises three schedules:

- **1. Household Survey Schedule:** Administered to one per household, collects information from interviewing one or more adult member of household. Includes the following modules: Household Roster, Housing and Environment, Household Consumption, Household Assets and Debts, Household Income and Household Health Insurance.
- 2. Individual Survey Schedule: Administered to each respondent aged 45 years and above and their spouses (regardless of age) in the sampled households. Includes the following modules: Demographics, Work, Retirement and Pension, Health (Chronic Diseases and Health Conditions), Functional Health, Family Medical History, Mental Health (Cognition and Depression), Health Behavior and Food Security, Health Care Access and Utilization, Health Care Financing, Family and Social Network, Social Welfare Programmes and Experimental Modules on Time Use, Expectations, Social Connectedness and Vignettes.

In addition, LASI includes an individual module on measured biomarkers:

- Anthropometric Measurements: Height, Weight, Waist Circumference and Hip Circumference.
- Functional Health Markers: Blood Pressure and Pulse Rate, Lung Function Test (Spirometry) and Vision Test (Near and Distance Vision Impairment).

- **Performance Based Markers:** Grip Strength, Timed-Walk and Balance Tests.
- Collection of Dried Blood Spot (DBS) samples: To be tested for variety of molecular biomarkers.
- **3.** In addition, a Community Survey Schedule is administered at the community level (villages in rural areas and census enumeration blocks in urban areas) and is answered by several key informants. The community schedule includes the following sections: Population Characteristics, Infrastructure and Common Resource, Accessibility and Availability of Health Care Services and coverage of Health and Social Welfare Programmes.

Fact Sheet of Key Indicators for the Jammu and Kashmir

This fact sheet provides information on key indicators (weighted) for the Jammu & Kashmir. The fieldwork for Jammu & Kashmir was conducted from **May through September 2018**. Table-1 provides information about the number of households and individuals interviewed.

Table 1 Number of Households and Individuals interviewed for the Jammu & Kashmir, LASI Wave 1, 2018-19

Sr. No.	Coverage		Rural	Urban	Male	Female	Total
1.	Household roster completed		1041	394	na	na	1435
2.	Households interviewed (with age-eligible individuals) #		694	263	na	na	957
	Individuals	45-59 years and their spouses irrespective of age	633	249	329	553	882
3.	Interviewed	60 years and above	538	193	382	349	731
		All ages	1171	444	711	902	1613

na "not applicable"

[#] LASI age-eligible households are those with at least one individual in aged 45 years and above; age-eligible individuals are persons aged 45 years and above and their spouses (regardless of age) in the LASI sampled households.

Jammu & Kashmir -Key Indicators

Ho	usehold-Level Key Indicators	LASI-	Wave 1, 2	2018-19
Ho	usehold Population Profile ¹	Rural	Urban	Total
1	Mean Household Size	6.6	5.5	6.2

14	Households with improved sanitation (%) ⁴	82.3	79.0	81.3
15	Households practicing open defecation (%) ⁵	15.9	10.1	14.1
16	Households with water facility inside dwelling/own yard (%)	87.6	96.8	90.6
17	Households with improved drinking water source (%) ⁶	98.0	99.6	98.5
18	Households with electricity (%)	97.5	98.9	97.9
19	Households using clean cooking fuel (%) ⁷	55.7	91.6	67.2
20	Households exposed to indoor pollution (%) ⁸	1.0	2.0	1.3
21	Households with <i>pucca</i> house (%) ⁹	70.8	88.6	77.1
	Household Consumption			
22	Household Monthly Per Capita Consumption Expenditure (MPCE) in INR ¹⁰	4213	4916	4411
23	Household Per Capita Food Expenditure as a share of MPCE (%)	53.6	53.8	53.7
24	Household Per Capita Health Expenditure as a share of MPCE (%)	20.9	13.6	18.6

¹ Based on all households including LASI age-eligible and non-age-eligible households.

 $^{^{\}rm 2}$ Death rate is calculated based on deaths in the last two calendar years.

³ Based on LASI age-eligible households only.

⁴ Improved sanitation includes flush or pour flush toilet (which is flushed to piped sewer system/septic tank/ pit latrine), pit latrine, twin pit, composting toilet

⁵ Open defecation refers to the practice whereby people go out in fields, bushes, forests, open bodies of water, or other open spaces rather than using the toilet to defecate. This information was collected from eligible household respondent.

⁶ Improved drinking water source includes water from pipe, public tap/standpipe, tube well or bore well, dug well, spring water and rain water.

⁷ Clean cooking fuel includes LPG, Biogas and Electricity.

⁸ Indoor pollution refers to households using solid and unclean fuel (for cooking or any other purpose) inside the household and cooking in traditional *chullah/stove* or open fire without any ventilation. Unclean fuel refers to use of kerosene, charcoal, coal, crop residue, wood/shrub and dung cake.

⁹ Pucca house refers to a house whose roof, wall and floor is made up of pucca (concrete) material.

¹⁰ MPCE is defined as total monthly household consumption expenditure divided by household size. Includes household's per capita spending on food and non-food items including spending on health, education, utilities etc.

Hou	usehold-Level Key Indicators ³	Rural	Urban	Total

37	Households covered by medical reimbursement/health insurance from an employer (%)	[0.1]	[0.2]	[0.1]
38	Households covered by privately purchased commercial health insurance (%)	[0.3]	-	[0.2]

_

Any one or more motorized vehicle includes car, motor cycle, moped and scooter.

¹⁴ Wage/salary work refers to income from full-time, part-time, side-jobs odd jobs or other wages or salaries.

[&]quot;[]" based on fewer than 5 unweighted cases in the numerator or 25 unweighted cases in the denominator, "-" indicates less number of cases/ no cases.

¹² Per Capita Annual Household Income refers to total household income divided by household size. It includes income from all members of the household and from all sources such as agricultural work, non-agricultural work, self-employment, remittances/gifts, wages/salaries from employment, pension income and public/private transfers.

¹³ Based on income reported from household by that particular source.

¹⁵ Work related pension refers to income from central/state government pension, employer funded pension, privately purchased commercial pension and other state pension schemes.

¹⁶ Government/public transfers includes agriculture subsidies, non-agricultural government subsidies (LPG subsidy, scholarship for education, subsidy for building toilets, subsidy for setting up small scale industries, subsidy for solar panels, etc.), housing assistance, unemployment allowance, Janani Suraksha Yojana (JSY)/any other maternity compensation, compensation under any other health benefits program (other than JSY), Compensation for illness or accident, emergency or disaster relief (flood, earthquake, drought, etc.), debt waiver, compensation for re-settlement (due to slums, dams, road, etc.), assistance for self-employment (like Swarna Jayanti Gram Swarozgar Yojana/ National Rural Livelihood Mission), social security pension schemes (like Indira Gandhi National Old Age Pension Scheme, Indira Gandhi National Disability Pension Scheme) and other government transfers.

¹⁷ Includes different types of health insurance/benefits such as CGHS, ESIS, RSBY, other central/state government health insurance schemes or medical reimbursement from employer etc.

¹⁸ Allied schemes refers to state specific schemes which are based on Rashtriya Swasthya Bima Yojana (RSBY) model.

³⁷ Among those who are aware of concessions given by the government for elderly.

⁴⁰ Currently consuming tobacco refers to consumption of any smokeless tobacco product such as chewing tobacco, gutka or pan masala etc.

³⁸ The "Maintenance and Welfare of Parents and Senior Citizens Act" mandates legal obligation on children to financially maintain their parents/provide monthly allowances.

³⁹ Currently smoking tobacco refers to smoking any tobacco product such as cigarette, *bidi*, cigar, *hookah* and *cheroot* etc.

⁴¹ Heavy episodic drinking refers to those who reported consumption of at least 60 grams or more (10 grams = 1 standard drink) of pure alcohol on at least one occasion in the past 30 days.

⁴² Those who are either engaged in moderate physical activity (at least 150 minutes throughout the week) or vigorous physical activity (at least 75 minutes throughout the week) or an equivalent combination of moderate- and vigorous-intensity activity.

⁴³ Refers to yoga/meditation/asanas/pranayama etc. practicing daily or more than once a week.

⁴⁴ For all chronic conditions, the reference period is *ever diagnosed* and diagnosed by MBBS, BDS and AYUSH health professionals.

⁴⁵ Poor Self Rated Health (SRH) includes both poor and very poor self-assessed health status.

⁴⁶ Cardiovascular diseases include hypertension, heart disease and stroke (any one or more).

⁴⁷ Chronic lung diseases include chronic obstructive pulmonary disease (COPD), asthma and chronic bronchitis (any one or more).

⁴⁸ Bone /joint diseases include arthritis, rheumatism and osteoporosis (any one or more).

⁶¹ For prevalence of endemic diseases in India, the reference period is past 2 years (any one or more).

⁶² Any vector-borne disease includes malaria, dengue or chikungunya (any one or more).

⁶³ Any water-borne disease includes diarrhoea/gastroenteritis, typhoid, jaundice or hepatitis (any one or more).

⁶⁴ For symptom based prevalence of health conditions, the reference period is past 2 years.

⁶⁵ Angina pectoris refers to, "a chest pain or discomfort with all the following symptoms: (a) the pain must include either the sternum (any level) or the left arm and left anterior chest (defined as the anterior chest wall between the levels of clavicle and lower end of sternum), (b) pain must be provoked by either hurrying or walking uphill (or by walking on the level, for those who never attempt more), (c) when pain occurs on walking it must make the person either stop or slacken pace, (d) pain must disappear on a majority of occasions in 10 min or less from the time when the person stands still.

⁶⁶ Sleep problems refer to difficulty in falling asleep or staying asleep throughout the night and also feeling unrested during the day (any one or more).

⁶⁷ Reproductive health problems include hot flashes, irregular vaginal discharge, uterine prolapse, fibroids, cysts and vaginal dryness in the past 2 years (any one or more).

⁶⁸ The reference period for Pap Smear and Mammography is past 2 years.

⁶⁹ Biological family members include -father, mother, brother, sister, children and grandchildren.

⁷⁰ Refers to functional limitations lasting more than 3 months.

⁷¹ Activities of Daily Living (ADL) includes dressing, putting on *chappals* or shoes, walking across a room, bathing, eating difficulties, getting in or out of bed (any one or more).

⁷² Instrumental Activities of Daily Living (IADL) includes preparing a hot meal, shopping for groceries, making telephone calls, taking medications, doing work around the house or garden, managing money (paying bills and keeping track of expenses) and getting around or finding address in unfamiliar place (any one or more).

⁷³ Helper refers to any person/s assisting respondent in any ADL/IADL limitations.

⁷⁴ Aids or supportive devices include spectacles and dentures and devices to help you in moving or sitting (such as, walker, walking sticks, wheel chair, adjustable showers stools/commodes, back/neck collar, orthosis/prosthesis).

⁷⁵ Among those respondents who reported using any aid or supportive device(s) to assist them in the activities of daily living.

⁷⁶ Immediate word recall refers to total number of words recalled from the given list of 10 words immediately.

⁷⁷ Delayed word recall refers to total number of words recalled from the same given list of 10 words after some delay.

⁷⁸ Based on Composite International Diagnostic Interview-Short Form (CIDI-SF); respondent who reported that they felt sad, blue or depressed for two-weeks period during last 12 months for all the day long or most of the day.

⁷⁹ Prevalence of measured hypertension refers to those measured with systolic blood pressure of ≥ 140 mmHg or diastolic blood pressure of ≥ 90 mmHg or both

⁸⁰ Prevalence of undiagnosed hypertension refers to those undiagnosed by a health professional but whose measured systolic blood pressure was ≥ 140 mmHg or diastolic blood pressure was ≥ 90 mmHg or both.

⁸¹ Untreated hypertension refers to those who reported that they have been diagnosed with hypertension by a health professional and currently measured with hypertension but currently not taking treatment

⁸² Undertreated hypertension refers to those who reported that they have been diagnosed with hypertension by a health professional and currently measured with hypertension but currently taking treatment.

⁸³ Adequately treated hypertension refers to those reported that they have been diagnosed by health professional and currently taking treatment and whose measured systolic blood pressure was < 140 mmHg and diastolic blood pressure was < 90 mmHg.</p>

⁸⁴ Low vision refers to either low near vision or low distant vision in the better eye with best correction available with the respondent.

⁸⁵ Low near vision refers to near vision equal to or poorer than 20/80 and equal to or better than 20/400 in the better eye with best correction available with respondent.

⁸⁶ Low distance vision refers to distance vision equal to or poorer than 20/80 and equal to or better than 20/200 in the better eye with best correction available with respondent.

⁸⁷ Blindness refers to those with vision less than 20/200 in distance or could not count finger or perceive light.

⁹⁰ WHO criteria of classification of waist- hip ratio (WHR)

Male	Female	Risk level		
< 0.90	< 0.85	Low		
≥0.90	≥0.85	High		

⁹¹ Grip strength measures bodily muscle strength and is an overall marker of health among elderly population. Mean grip strength is an average of two readings for dominant hand.

⁸⁸ Body Mass Index (BMI) refers to weight in kilograms divided by height in meter square (kg/m²). BMI levels have been classified according to WHO classifications: underweight ≤ 18.4; normal=18.5 to 24.9; overweight=25.0 to 29.9; obese ≥30.0

 $^{^{89}}$ Metabolic complications: critical limit classification for high risk waist circumference for male is \geq 102 cm and for female is \geq 88cm.

⁹² Includes health post/sub centers, primary health center/urban health center, community health center, district/sub-district hospital, government/tertiary hospital or government AYUSH hospital.

⁹³ Includes private hospital/nursing home, private clinic (OPD based services), NGO/Charity/Trust/Church-run hospital/Private AYUSH hospital. It also includes health care services availed partially from either private or government or NGO.

⁹⁴ Among those who sought out-patient care in the past 12 months and this includes modern allopathic medicines, AYUSH medicines, traditional herbs or medicine, excluding any health supplements.

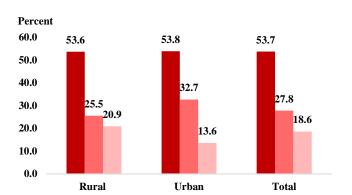

⁹⁵ The expenditure on last in-patient visit includes consultation charges, medicine charges, test/investigation charge, nursing home charges, surgery and related charges, transportation charges and any other charges.

JHARKHAND

Introduction

The Longitudinal Ageing Study in India (LASI) is a nationally and state representative longitudinal study of ageing and health. LASI is a national landmark, the largest in the world and, only of its kind in India. Its main goal is to provide valid, reliable and continuous scientific data on the health, social, mental and economic well-being of India's older adult (aged 45 and above) population. These data will help to monitor existing programmes and inform new national health and ageing policies. LASI is undertaken as a globally harmonized study carried out in more than 44 developed and developing countries worldwide; and the survey schedules, protocols and methodologies are harmonized across these countries. These are part of the Health and Retirement Study (HRS) family of longitudinal ageing and retirement surveys. Therefore, LASI data will also serve as an important public resource for national policy making and worldwide comparative research on ageing.

LASI is undertaken under the aegis of the Ministry of Health and Family Welfare (MoHFW), Government of India. The International Institute for Population Sciences (IIPS), Mumbai is the nodal institution for implementing LASI in collaboration with the Harvard T. H. Chan School of Public Health (HSPH) and the University of Southern California (USC).

A. LASI Objectives and Coverage:

The LASI wave-1 survey (2017-18) covers all 30 states and 6 Union Territories of India with a panel sample size of 72,250 older adults aged 45 years and above and their spouses regardless of age. LASI collects data on four major subject domains:

- 1. Health: Disease Burden & Risk Factors (Reported and Measured)
- 2. Health Care and Health Care Financing
- 3. Social: Family, Social Network and Social Welfare Programmes for the Elderly
- 4. Economic: Income, Wealth, Expenditure, Employment, Retirement and Pension

The long-term goal of LASI is to continue for the next 25 years, with respondents surveyed every two years.

LASI Survey Instruments:

The LASI survey instrument comprises three schedules:

- **1. Household Survey Schedule:** Administered to one per household, collects information from interviewing one or more adult member of household. Includes the following modules: Household Roster, Housing and Environment, Household Consumption, Household Assets and Debts, Household Income and Household Health Insurance.
- 2. Individual Survey Schedule: Administered to each respondent aged 45 years and above and their spouses (regardless of age) in the sampled households. Includes the following modules: Demographics, Work, Retirement and Pension, Health (Chronic Diseases and Health Conditions), Functional Health, Family Medical History, Mental Health (Cognition and Depression), Health Behavior and Food Security, Health Care Access and Utilization, Health Care Financing, Family and Social Network, Social Welfare Programmes and Experimental Modules on Time Use, Expectations, Social Connectedness and Vignettes.

In addition, LASI includes an individual module on measured biomarkers:

- Anthropometric Measurements: Height, Weight, Waist Circumference and Hip Circumference.
- Functional Health Markers: Blood Pressure and Pulse Rate, Lung Function Test (Spirometry) and Vision Test (Near and Distance Vision Impairment).

- **Performance Based Markers:** Grip Strength, Timed-Walk and Balance Tests.
- Collection of Dried Blood Spot (DBS) samples: To be tested for variety of molecular biomarkers.
- **3.** In addition, a Community Survey Schedule is administered at the community level (villages in rural areas and census enumeration blocks in urban areas) and is answered by several key informants. The community schedule includes the following sections: Population Characteristics, Infrastructure and Common Resource, Accessibility and Availability of Health Care Services and coverage of Health and Social Welfare Programmes.

Fact Sheet of Key Indicators for the State of Jharkhand

This fact sheet provides information on key indicators (weighted) for the state of Jharkhand. The fieldwork for Jharkhand was conducted from **August 2018 through February 2019**. Table-1 provides information about the number of households and individuals interviewed.

Table 1 Number of Households and Individuals interviewed for the state of Jharkhand, LASI Wave 1, 2018-19

Sr. No.		Coverage	Rural	Urban	Male	Female	Total
1.	Household roster completed		1759	477	na	na	2236
2.	Households interviewed (with age-eligible individuals) #		1123	285	na	na	1408
	Individuals Interviewed	45-59 years and their spouses irrespective of age	1019	277	458	838	1296
3.		60 years and above	929	239	585	583	1168
		All ages	1948	516	1043	1421	2464

na "not applicable"

[#] LASI age-eligible households are those with at least one individual in aged 45 years and above; age-eligible individuals are persons aged 45 years and above and their spouses (regardless of age) in the LASI sampled households.

Jharkhand - Key Indicators

Hou	Household-Level Key Indicators LASI-Wave 1, 2018					
Hou	sehold Population Profile ¹	Rural	Urban	Total		
1	Mean Household Size	6.1	5.8	6.1		
	Age Distribution in Years (%)

17	Households with improved drinking water source (%) ⁶	98.0	92.0	96.5		
18	Households with electricity (%)	87.8	98.8	90.6		
19	Households using clean cooking fuel (%) ⁷	15.0	79.1	31.2		
20	Households exposed to indoor pollution (%) ⁸	40.3	7.7	32.1		
21	Households with <i>pucca</i> house (%) ⁹	46.4	87.9	62.2		
	Household Consumption					
22	Household Monthly Per Capita Consumption Expenditure (MPCE) in INR ¹⁰	2067	3730	2475		
23	Household Per Capita Food Expenditure as a share of MPCE (%)	59.9	47.6	55.4		
24	Household Per Capita Health Expenditure as a share of MPCE (%)	11.8	9.7	11.0		

¹ Based on all households including LASI age-eligible and non-age-eligible households.

² Death rate is calculated based on deaths in the last two calendar years.

³ Based on LASI age-eligible households only.

⁴ Improved sanitation includes flush or pour flush toilet (which is flushed to piped sewer system/septic tank/ pit latrine), pit latrine, twin pit, composting toilet

⁵ Open defecation refers to the practice whereby people go out in fields, bushes, forests, open bodies of water, or other open spaces rather than using the toilet to defecate. This information was collected from eligible household respondent.

⁶ Improved drinking water source includes water from pipe, public tap/standpipe, tube well or bore well, dug well, spring water and rain water.

⁷ Clean cooking fuel includes LPG, Biogas and Electricity.

⁸ Indoor pollution refers to households using solid and unclean fuel (for cooking or any other purpose) inside the household and cooking in traditional chullah/stove or open fire without any ventilation. Unclean fuel refers to use of kerosene, charcoal, coal, crop residue, wood/shrub and dung cake.

⁹ *Pucca* house refers to a house whose roof, wall and floor is made up of *pucca* (concrete) material.

¹⁰ MPCE is defined as total monthly household consumption expenditure divided by household size. Includes household's per capita spending on food and non-food items including spending on health, education, utilities etc.

Hou	sehold-Level Key Indicators ³	Rural	Urban	Total

36	Households covered by Central Government Health Scheme (CGHS)/Employee State Insurance Scheme (ESIS) (%)	6.3	4.3	5.8
37	Households covered by medical reimbursement/health insurance from an employer (%)	0.4	[2.8]	1.0
38	Households covered by privately purchased commercial health insurance (%)	-	[1.4]	[0.3]

_

Any one or more motorized vehicle includes car, motor cycle, moped and scooter.

¹⁴ Wage/salary work refers to income from full-time, part-time, side-jobs odd jobs or other wages or salaries.

[&]quot;[]" based on fewer than 5 unweighted cases in the numerator or 25 unweighted cases in the denominator, "-" indicates less number of cases/ no cases.

¹² Per Capita Annual Household Income refers to total household income divided by household size. It includes income from all members of the household and from all sources such as agricultural work, non-agricultural work, self-employment, remittances/gifts, wages/salaries from employment, pension income and public/private transfers.

¹³ Based on income reported from household by that particular source.

¹⁵ Work related pension refers to income from central/state government pension, employer funded pension, privately purchased commercial pension and other state pension schemes.

¹⁶ Government/public transfers includes agriculture subsidies, non-agricultural government subsidies (LPG subsidy, scholarship for education, subsidy for building toilets, subsidy for setting up small scale industries, subsidy for solar panels, etc.), housing assistance, unemployment allowance, Janani Suraksha Yojana (JSY)/any other maternity compensation, compensation under any other health benefits program (other than JSY), Compensation for illness or accident, emergency or disaster relief (flood, earthquake, drought, etc.), debt waiver, compensation for re-settlement (due to slums, dams, road, etc.), assistance for self-employment (like Swarna Jayanti Gram Swarozgar Yojana/ National Rural Livelihood Mission), social security pension schemes (like Indira Gandhi National Old Age Pension Scheme, Indira Gandhi National Disability Pension Scheme) and other government transfers.

¹⁷ Includes different types of health insurance/benefits such as CGHS, ESIS, RSBY, other central/state government health insurance schemes or medical reimbursement from employer etc.

¹⁸ Allied schemes refers to state specific schemes which are based on Rashtriya Swasthya Bima Yojana (RSBY) model.

^{*} Including spouse irrespective of age, na "not applicable", "[]" based on fewer than 5 unweighted cases in the numerator or 25 unweighted cases in the denominator, "-" indicates less number of cases/ no cases.

³⁷ Among those who are aware of concessions given by the government for elderly.

⁴⁰ Currently consuming tobacco refers to consumption of any smokeless tobacco product such as chewing tobacco, *gutka* or *pan masala* etc.

³⁸ The "Maintenance and Welfare of Parents and Senior Citizens Act" mandates legal obligation on children to financially maintain their parents/provide monthly allowances.

³⁹ Currently smoking tobacco refers to smoking any tobacco product such as cigarette, bidi, cigar, hookah and cheroot etc.

⁴¹ Heavy episodic drinking refers to those who reported consumption of at least 60 grams or more (10 grams = 1 standard drink) of pure alcohol on at least one occasion in the past 30 days.

⁴² Those who are either engaged in moderate physical activity (at least 150 minutes throughout the week) or vigorous physical activity (at least 75 minutes throughout the week) or an equivalent combination of moderate- and vigorous-intensity activity.

⁴³ Refers to yoga/meditation/asanas/pranayama etc. practicing daily or more than once a week.

⁴⁴ For all chronic conditions, the reference period is *ever diagnosed* and diagnosed by MBBS, BDS and AYUSH health professionals.

⁴⁵ Poor Self Rated Health (SRH) includes both poor and very poor self-assessed health status.

⁴⁶ Cardiovascular diseases include hypertension, heart disease and stroke (any one or more).

⁴⁷ Chronic lung diseases include chronic obstructive pulmonary disease (COPD), asthma and chronic bronchitis (any one or more).

⁴⁸ Bone /joint diseases include arthritis, rheumatism and osteoporosis (any one or more).

* Including spouse irrespective of age, "[]" based on fewer than 5 unweighted cases in the numerator or 25 unweighted cases in the denominator,

[&]quot;-" indicates less number of cases/ no cases.

⁴⁹ Any neurological/psychiatric problem includes depression, alzheimer's disease, dementia or psychiatric problem or neurological problem (any one or more)

⁵⁰ Psychiatric problems include unipolar or bipolar disorder, schizophrenia etc. (any one or more).

⁵¹ Neurological problems include neuropathy, convulsion, migraine, Parkinson's etc. (any one or more).

⁵² Includes oral cancer, breast cancer, cervical cancer, lung cancer or cancer/malignant tumors originating in any other organs/ body parts (any one or more).

⁵³ Urogenital conditions include chronic renal failure, incontinence, kidney stone and Benign Prostate Hypertrophy-BPH (only among males) (any one or more)

⁵⁴ Eye or vision related conditions or problems include presbyopia, glaucoma, cataract, myopia, hypermetropia, other eyes problems such as conjunctivitis, eye injury, red eye etc. (any one or more).

⁵⁵ Refractive error includes presbyopia, myopia and hypermetropia with or without astigmatism.

⁵⁶ Common oral health problems include painful teeth, ulcer lasting more than two weeks, bleeding gums, swelling gums, loose teeth, dental cavity/dental caries & soreness or cracks in the corner of the mouth in past 12 months (any one or more).

⁵⁷ Periodontal diseases include bleeding gums, swelling gums or ulcers lasting more than two weeks (any one or more).

⁵⁸ Injury include injuries sustained due to any traffic accident, violence, animal attack or fall in the past 2 years (any one or more).

⁵⁹ Reference period for natural and man-made disaster is past 5 years.

⁶⁰ Health problems due to natural and man-made disaster refers to permanent physical disability, psychological and mental health problems or chronic illness (any one or more).

^{*} Including spouse irrespective of age, na "not applicable", "[]" based on fewer than 5 unweighted cases in the numerator or 25 unweighted cases in the denominator, "-" indicates less number of cases/ no cases.

⁶¹ For prevalence of endemic diseases in India, the reference period is past 2 years (any one or more).

⁶² Any vector-borne disease includes malaria, dengue or chikungunya (any one or more).

⁶³ Any water-borne disease includes diarrhoea/gastroenteritis, typhoid, jaundice or hepatitis (any one or more).

⁶⁴ For symptom based prevalence of health conditions, the reference period is past 2 years.

⁶⁵ Angina pectoris refers to, "a chest pain or discomfort with all the following symptoms: (a) the pain must include either the sternum (any level) or the left arm and left anterior chest (defined as the anterior chest wall between the levels of clavicle and lower end of sternum), (b) pain must be provoked by either hurrying or walking uphill (or by walking on the level, for those who never attempt more), (c) when pain occurs on walking it must make the person either stop or slacken pace, (d) pain must disappear on a majority of occasions in 10 min or less from the time when the person stands still.

⁶⁶ Sleep problems refer to difficulty in falling asleep or staying asleep throughout the night and also feeling unrested during the day (any one or more).

⁶⁷ Reproductive health problems include hot flashes, irregular vaginal discharge, uterine prolapse, fibroids, cysts and vaginal dryness in the past 2 years (any one or more).

⁶⁸ The reference period for Pap Smear and Mammography is past 2 years.

⁶⁹ Biological family members include -father, mother, brother, sister, children and grandchildren.

⁷⁰ Refers to functional limitations lasting more than 3 months.

⁷¹ Activities of Daily Living (ADL) includes dressing, putting on *chappals* or shoes, walking across a room, bathing, eating difficulties, getting in or out of bed (any one or more).

⁷² Instrumental Activities of Daily Living (IADL) includes preparing a hot meal, shopping for groceries, making telephone calls, taking medications, doing work around the house or garden, managing money (paying bills and keeping track of expenses) and getting around or finding address in unfamiliar place (any one or more).

* Including spouse irrespective of age, "[]" based on fewer than 5 unweighted cases in the numerator or 25 unweighted cases in the denominator.

⁷³ Helper refers to any person/s assisting respondent in any ADL/IADL limitations.

75 Among those respondents who reported using any aid or supportive device(s) to assist them in the activities of daily living.

⁸⁴ Low vision refers to either low near vision or low distant vision in the better eye with best correction available with the respondent.

⁷⁴ Aids or supportive devices include spectacles and dentures and devices to help you in moving or sitting (such as, walker, walking sticks, wheel chair, adjustable showers stools/commodes, back/neck collar, orthosis/prosthesis).

⁷⁶ Immediate word recall refers to total number of words recalled from the given list of 10 words immediately.

⁷⁷ Delayed word recall refers to total number of words recalled from the same given list of 10 words after some delay.

⁷⁸ Based on Composite International Diagnostic Interview-Short Form (CIDI-SF); respondent who reported that they felt sad, blue or depressed for two-weeks period during last 12 months for all the day long or most of the day.

 $^{^{79}}$ Prevalence of measured hypertension refers to those measured with systolic blood pressure of ≥ 140 mmHg or diastolic blood pressure of ≥ 90 mmHg or both.

 $^{^{80}}$ Prevalence of undiagnosed hypertension refers to those undiagnosed by a health professional but whose measured systolic blood pressure was ≥ 140 mmHg or diastolic blood pressure was ≥ 90 mmHg or both.

⁸¹ Untreated hypertension refers to those who reported that they have been diagnosed with hypertension by a health professional and currently measured with hypertension but currently not taking treatment

⁸² Undertreated hypertension refers to those who reported that they have been diagnosed with hypertension by a health professional and currently measured with hypertension but currently taking treatment.

⁸³ Adequately treated hypertension refers to those reported that they have been diagnosed by health professional and currently taking treatment and whose measured systolic blood pressure was < 140 mmHg and diastolic blood pressure was < 90 mmHg.</p>

⁸⁵ Low near vision refers to near vision equal to or poorer than 20/80 and equal to or better than 20/400 in the better eye with best correction available with respondent.

⁸⁶ Low distance vision refers to distance vision equal to or poorer than 20/80 and equal to or better than 20/200 in the better eye with best correction available with respondent.

⁸⁷ Blindness refers to those with vision less than 20/200 in distance or could not count finger or perceive light.

⁹⁰ WHO criteria of classification of waist- hip ratio (WHR)

Male	Female	Risk level
< 0.90	< 0.85	Low
≥0.90	≥0.85	High

⁹¹ Grip strength measures bodily muscle strength and is an overall marker of health among elderly population. Mean grip strength is an average of two readings for dominant hand.

⁸⁸ Body Mass Index (BMI) refers to weight in kilograms divided by height in meter square (kg/m²). BMI levels have been classified according to WHO classifications: underweight ≤ 18.4; normal=18.5 to 24.9; overweight=25.0 to 29.9; obese ≥30.0

⁸⁹ Metabolic complications: critical limit classification for high risk waist circumference for male is ≥102 cm and for female is ≥88cm.

⁹² Includes health post/sub centers, primary health center/urban health center, community health center, district/sub-district hospital, government/tertiary hospital or government AYUSH hospital.

⁹³ Includes private hospital/nursing home, private clinic (OPD based services), NGO/Charity/Trust/Church-run hospital/Private AYUSH hospital. It also includes health care services availed partially from either private or government or NGO.

⁹⁴ Among those who sought out-patient care in the past 12 months and this includes modern allopathic medicines, AYUSH medicines, traditional herbs or medicine, excluding any health supplements.

⁹⁵ The expenditure on last in-patient visit includes consultation charges, medicine charges, test/investigation charge, nursing home charges, surgery and related charges, transportation charges and any other charges.

KARNATAKA

Introduction

The Longitudinal Ageing Study in India (LASI) is a nationally and state representative longitudinal study of ageing and health. LASI is a national landmark, the largest in the world and, only of its kind in India. Its main goal is to provide valid, reliable and continuous scientific data on the health, social, mental and economic well-being of India's older adult (aged 45 and above) population. These data will help to monitor existing programmes and inform new national health and ageing policies. LASI is undertaken as a globally harmonized study carried out in more than 44 developed and developing countries worldwide; and the survey schedules, protocols and methodologies are harmonized across these countries. These are part of the Health and Retirement Study (HRS) family of longitudinal ageing and retirement surveys. Therefore, LASI data will also serve as an important public resource for national policy making and worldwide comparative research on ageing.

LASI is undertaken under the aegis of the Ministry of Health and Family Welfare (MoHFW), Government of India. The International Institute for Population Sciences (IIPS), Mumbai is the nodal institution for implementing LASI in collaboration with the Harvard T.H.Chan School of Public Health (HSPH) and the University of Southern California (USC).

A. LASI Objectives and Coverage:

The LASI wave-1 survey (2017-18) covers all 30 states and 6 Union Territories of India with a panel sample size of 72,250 older adults aged 45 years and above and their spouses regardless of age. LASI collects data on four major subject domains:

- 1. Health: Disease Burden & Risk Factors (Reported and Measured)
- 2. Health Care and Health Care Financing
- 3. Social: Family, Social Network and Social Welfare Programmes for the Elderly
- 4. Economic: Income, Wealth, Expenditure, Employment, Retirement and Pension

The long-term goal of LASI is to continue for the next 25 years, with respondents surveyed every two years.

LASI Survey Instruments:

The LASI survey instrument comprises three schedules:

- **1. Household Survey Schedule**: Administered to one per household, collects information from interviewing one or more adult member of household. Includes the following modules: Household Roster, Housing and Environment, Household Consumption, Household Assets and Debts, Household Income and Household Health Insurance.
- 2. Individual Survey Schedule: Administered to each respondent aged 45 years and above and their spouses (regardless of age) in the sampled households. Includes the following modules: Demographics, Work, Retirement and Pension, Health (Chronic Diseases and Health Conditions), Functional Health, Family Medical History, Mental Health (Cognition and Depression), Health Behavior and Food Security, Health Care Access and Utilization, Health Care Financing, Family and Social Network, Social Welfare Programmes and Experimental Modules on Time Use, Expectations, Social Connectedness and Vignettes.

In addition, LASI includes an individual module on measured biomarkers:

- Anthropometric Measurements: Height, Weight, Waist Circumference and Hip Circumference.
- **Functional Health Markers**: Blood Pressure and Pulse Rate, Lung Function Test (Spirometry) and Vision Test (Near and Distance Vision Impairment).

- **Performance Based Markers:** Grip Strength, Timed-Walk and Balance Tests.
- Collection of Dried Blood Spot (DBS) samples: To be tested for variety of molecular biomarkers.
- **3. In addition, a Community Survey Schedule** is administered at the community level (villages in rural areas and census enumeration blocks in urban areas) and is answered by several key informants. The community schedule includes the following sections: Population Characteristics, Infrastructure and Common Resource, Accessibility and Availability of Health Care Services and coverage of Health and Social Welfare Programmes.

Fact Sheet of Key Indicators for the State of Karnataka

This fact sheet provides information on key indicators (weighted) for the state of Karnataka. The fieldwork for Karnataka was conducted from **April through August 2017**. Table-1 provides information about the number of households and individuals interviewed.

Table 1 Number of Households and Individuals interviewed for the state of Karnataka, LASI Wave 1, 2017-18

 $^{^{\}rm l}$ Based on all households including LASI age-eligible and non-age-eligible households.

² Death rate is calculated based on deaths in the last two calendar years.

 $^{^{\}rm 3}$ Based on LASI age-eligible households only.

⁴ Improved sanitation includes flush or pour flush toilet (which is flushed to piped sewer system/septic tank/ pit latrine), pit latrine, twin pit, composting toilet.

⁵ Open defecation refers to the practice whereby people go out in fields, bushes, forests, open bodies of water, or other open spaces rather than using the toilet to defecate. This information was collected from eligible household respondent.

⁶ Improved drinking water source includes water from pipe, public tap/standpipe, tube well or bore well, dug well, spring water and rain water.

⁷ Clean cooking fuel includes LPG, Biogas and Electricity.

⁸ Indoor pollution refers to households using solid and unclean fuel (for cooking or any other purpose) inside the household and cooking in traditional *chullah/stove* or open fire without any ventilation. Unclean fuel refers to use of kerosene, charcoal, coal, crop residue, wood/shrub and dung cake.

⁹ *Pucca* house refers to a house whose roof, wall and floor is made up of *pucca* (concrete) material.

¹⁰ MPCE is defined as total monthly household consumption expenditure divided by household size. Includes household's per capita spending on food and non-food items including spending on health, education, utilities etc.

House	hold-Level Key Indicators ³	Rural	Urban	Total
	Household Assets and Debts

38	Households covered by privately purchased commercial health insurance (%)	[0.5]	0.5	0.5

Any one or more motorized vehicle includes car, motor cycle, moped and scooter.

¹⁴ Wage/salary work refers to income from full-time, part-time, side-jobs odd jobs or other wages or salaries.

[&]quot;[]" based on fewer than 5 unweighted cases in the numerator or 25 unweighted cases in the denominator.

11 Any one or more motorized vehicle in the

¹² Per Capita Annual Household Income refers to total household income divided by household size. It includes income from all members of the household and from all sources such as agricultural work, non-agricultural work, self-employment, remittances/gifts, wages/salaries from employment, pension income and public/private transfers.

¹³ Based on income reported from household by that particular source.

¹⁵ Work related pension refers to income from central/state government pension, employer funded pension, privately purchased commercial pension and other state pension schemes.

¹⁶ Government/public transfers includes agriculture subsidies, non-agricultural government subsidies (LPG subsidy, scholarship for education, subsidy for building toilets, subsidy for setting up small scale industries, subsidy for solar panels, etc.), housing assistance, unemployment allowance, Janani Suraksha Yojana (JSY)/any other maternity compensation, compensation under any other health benefits program (other than JSY), Compensation for illness or accident, emergency or disaster relief (flood, earthquake, drought, etc.), debt waiver, compensation for re-settlement (due to slums, dams, road, etc.), assistance for self-employment (like Swarna Jayanti Gram Swarozgar Yojana/ National Rural Livelihood Mission), social security pension schemes (like Indira Gandhi National Old Age Pension Scheme, Indira Gandhi National Widow Pension Scheme, Indira Gandhi National Disability Pension Scheme) and other government transfers.

¹⁷ Includes different types of health insurance/benefits such as CGHS, ESIS, RSBY, other central/state government health insurance schemes or medical reimbursement from employer etc.

¹⁸ Allied schemes refers to state specific schemes which are based on Rashtriya Swasthya Bima Yojana (RSBY) model.

^{*} Including spouse irrespective of age, na "not applicable", "[]" based on fewer than 5 unweighted cases in the numerator or 25 unweighted cases in the denominator, "-" indicates less number of cases/ no cases.

⁴⁰ Currently consuming tobacco refers to consumption of any smokeless tobacco product such as chewing tobacco, *gutka* or *pan masala* etc.

³⁶ Refers to discounts or concessions received for elderly in train/bus/air travel, telecommunication, special interest rates on bank accounts or loans, income tax benefits or others.

³⁷ Among those who are aware of concessions given by the government for elderly.

³⁸ The "Maintenance and Welfare of Parents and Senior Citizens Act" mandates legal obligation on children to financially maintain their parents/ provide monthly allowances.

³⁹ Currently smoking tobacco refers to smoking any tobacco product such as cigarette, *bidi*, cigar, *hookah* and *cheroot* etc.

⁴¹ Heavy episodic drinking refers to those who reported consumption of at least 60 grams or more (10 grams = 1 standard drink) of pure alcohol on at least one occasion in the past 30 days.

⁴² Those who are either engaged in moderate physical activity (at least 150 minutes throughout the week) or vigorous physical activity (at least 75 minutes throughout the week) or an equivalent combination of moderate- and vigorous-intensity activity.

⁴³ Refers to yoga/meditation/asanas/pranayama etc. practicing daily or more than once a week.

⁴⁴ For all chronic conditions, the reference period is *ever diagnosed* and diagnosed by MBBS, BDS and AYUSH health professionals.

⁴⁵ Poor Self Rated Health (SRH) includes both poor and very poor self-assessed health status.

⁴⁶ Cardiovascular diseases include hypertension, heart disease and stroke (any one or more).

⁴⁷ Chronic lung diseases include chronic obstructive pulmonary disease (COPD), asthma and chronic bronchitis (any one or more).

_

^{*} Including spouse irrespective of age, na "not applicable", "[]" based on fewer than 5 unweighted cases in the numerator or 25 unweighted cases in the denominator, "-" indicates less number of cases/ no cases.

 $^{^{\}rm 59}$ Reference period for natural and man-made disaster is past 5 years.

⁶⁰ Health problems due to natural and man-made disaster refers to permanent physical disability, psychological and mental health problems or chronic illness (any one or more).

⁶¹ For prevalence of endemic diseases in India, the reference period is past 2 years (any one or more).

⁶² Any vector-borne disease includes malaria, dengue or chikungunya (any one or more).

⁶³ Any water-borne disease includes diarrhoea/gastroenteritis, typhoid, jaundice or hepatitis (any one or more).

⁶⁴ For symptom based prevalence of health conditions, the reference period is past 2 years.

⁶⁵ Angina pectoris refers to, "a chest pain or discomfort with all the following symptoms: (a) the pain must include either the sternum (any level) or the left arm and left anterior chest (defined as the anterior chest wall between the levels of clavicle and lower end of sternum), (b) pain must be provoked by either hurrying or walking uphill (or by walking on the level, for those who never attempt more), (c) when pain occurs on walking it must make the person either stop or slacken pace, (d) pain must disappear on a majority of occasions in 10 min or less from the time when the person stands still.

⁶⁶ Sleep problems refer to difficulty in falling asleep or staying asleep throughout the night and also feeling unrested during the day (any one or more).

⁶⁷ Reproductive health problems include hot flashes, irregular vaginal discharge, uterine prolapse, fibroids, cysts and vaginal dryness in the past 2 years (any one or more).

⁶⁸ The reference period for Pap Smear and Mammography is past 2 years.

⁶⁹ Biological family members include -father, mother, brother, sister, children and grandchildren.

90 WHO criteria of classification of waist- hip ratio (WHR)

Male	Female	Risk level
< 0.90	< 0.85	Low
≥0.90	≥0.85	High

⁹¹ Grip strength measures bodily muscle strength and is an overall marker of health among elderly population. Mean grip strength is an average of two readings for dominant hand.

^{*} Including spouse irrespective of age, "[]" based on fewer than 5 unweighted cases in the numerator or 25 unweighted cases in the denominator.

⁸⁴ Low vision refers to either low near vision or low distant vision in the better eye with best correction available with the respondent.

⁸⁵ Low near vision refers to near vision equal to or poorer than 20/80 and equal to or better than 20/400 in the better eye with best correction available with respondent.

⁸⁶ Low distance vision refers to distance vision equal to or poorer than 20/80 and equal to or better than 20/200 in the better eye with best correction available with respondent.

⁸⁷ Blindness refers to those with vision less than 20/200 in distance or could not count finger or perceive light.

⁸⁸ Body Mass Index (BMI) refers to weight in kilograms divided by height in meter square (kg/m²). BMI levels have been classified according to WHO classifications: underweight ≤ 18.4; normal=18.5 to 24.9; overweight=25.0 to 29.9; obese ≥30.0

⁸⁹ Metabolic complications: critical limit classification for high risk waist circumference for male is ≥102 cm and for female is ≥88cm.

⁹² Includes health post/sub centers, primary health center/urban health center, community health center, district/sub-district hospital, government/tertiary hospital or government AYUSH hospital.

⁹³ Includes private hospital/nursing home, private clinic (OPD based services), NGO/Charity/Trust/Church-run hospital/Private AYUSH hospital. It also includes health care services availed partially from either private or government or NGO.

⁹⁴ Among those who sought out-patient care in the past 12 months and this includes modern allopathic medicines, AYUSH medicines, traditional herbs or medicine, excluding any health supplements.

KERALA

Introduction

The Longitudinal Ageing Study in India (LASI) is a nationally and state representative longitudinal study of ageing and health. LASI is a national landmark, the largest in the world and, only of its kind in India. Its main goal is to provide valid, reliable and continuous scientific data on the health, social, mental and economic well-being of India's older adult (aged 45 and above) population. These data will help to monitor existing programmes and inform new national health and ageing policies. LASI is undertaken as a globally harmonized study carried out in more than 44 developed and developing countries worldwide; and the survey schedules, protocols and methodologies are harmonized across these countries. These are part of the Health and Retirement Study (HRS) family of longitudinal ageing and retirement surveys. Therefore, LASI data will also serve as an important public resource for national policy making and worldwide comparative research on ageing.

LASI is undertaken under the aegis of the Ministry of Health and Family Welfare (MoHFW), Government of India. The International Institute for Population Sciences (IIPS), Mumbai is the nodal institution for implementing LASI in collaboration with the Harvard T.H.Chan School of Public Health (HSPH) and the University of Southern California (USC).

A. LASI Objectives and Coverage:

The LASI wave-1 survey (2017-18) covers all 30 states and 6 Union Territories of India with a panel sample size of 72,250 older adults aged 45 years and above and their spouses regardless of age. LASI collects data on four major subject domains:

- 1. Health: Disease Burden & Risk Factors (Reported and Measured)
- 2. Health Care and Health Care Financing
- 3. Social: Family, Social Network and Social Welfare Programmes for the Elderly
- 4. Economic: Income, Wealth, Expenditure, Employment, Retirement and Pension

The long-term goal of LASI is to continue for the next 25 years, with respondents surveyed every two years.

LASI Survey Instruments:

The LASI survey instrument comprises three schedules:

- **1. Household Survey Schedule**: Administered to one per household, collects information from interviewing one or more adult member of household. Includes the following modules: Household Roster, Housing and Environment, Household Consumption, Household Assets and Debts, Household Income and Household Health Insurance.
- 2. Individual Survey Schedule: Administered to each respondent aged 45 years and above and their spouses (regardless of age) in the sampled households. Includes the following modules: Demographics, Work, Retirement and Pension, Health (Chronic Diseases and Health Conditions), Functional Health, Family Medical History, Mental Health (Cognition and Depression), Health Behavior and Food Security, Health Care Access and Utilization, Health Care Financing, Family and Social Network, Social Welfare Programmes and Experimental Modules on Time Use, Expectations, Social Connectedness and Vignettes.

In addition, LASI includes an individual module on measured biomarkers:

- Anthropometric Measurements: Height, Weight, Waist Circumference and Hip Circumference.
- **Functional Health Markers**: Blood Pressure and Pulse Rate, Lung Function Test (Spirometry) and Vision Test (Near and Distance Vision Impairment).

- **Performance Based Markers:** Grip Strength, Timed-Walk and Balance Tests.
- Collection of Dried Blood Spot (DBS) samples: To be tested for variety of molecular biomarkers.
- **3.** In addition, a Community Survey Schedule is administered at the community level (villages in rural areas and census enumeration blocks in urban areas) and is answered by several key informants. The community schedule includes the following sections: Population Characteristics, Infrastructure and Common Resource, Accessibility and Availability of Health Care Services and coverage of Health and Social Welfare Programmes.

Fact Sheet of Key Indicators for the State of Kerala

This fact sheet provides information on key indicators (weighted) for the state of Kerala. The fieldwork for Kerala was conducted from **June through October 2017**. Table-1 provides information about the number of households and individuals interviewed.

Table 1 Number of households and individuals interviewed for the state of Kerala, LASI Wave 1, 2017-18

Sr. No.	C	Coverage		Urban	Male	Female	Total
1.	Household ro	ehold roster completed		958	na	na	1881
2.		Households interviewed (with age-eligible individuals) #		702	na	na	1411
3.	Individuals	45-59 years and their spouses irrespective of age	630	658	453	835	1288
	interviewed 60 years and above All ages		640	569	538	671	1209
		All ages	1270	1227	991	1506	2497

na "not applicable"

[#] LASI age-eligible households are those with at least one individual in aged 45 years and above; age-eligible individuals are persons aged 45 years and above and their spouses (regardless of age) in the LASI sampled households.

Kerala-Key Indicators

	old-Level Key Indicators		LASI-Wave	1, 2017-18
1	old Population Profile ¹	Rural	Urban	Total
	Mean Household Size	4.9	5.1	5.1
	Age Distribution in Years (%)

	60-74	16.3	13.8	14.8
	75+	4.4	4.9	4.7
	Sex Ratio (Females per 1000 Males)			
10	All ages	1130	1096	1113
11	60 + population	1216	1188	1203
	Death Rate (per thousand population) ²			
12	All ages	6.1	7.0	6.6
13	60 + population	21.2	25.6	23.2
Househo	old-Level Key Indicators ³	Rural	Urban	Total
	Housing and Environment			
14	Households with improved sanitation (%) ⁴	99.2	99.2	99.2
15	Households practicing open defecation (%) ⁵	0.8	0.6	0.7
16	Households with water facility inside dwelling/own yard (%)	93.7	91.8	92.7
17	Households with improved drinking water source (%) ⁶	97.8	99.7	98.7
18	Households with electricity (%)	99.3	99.8	99.5
19	Households using clean cooking fuel (%) ⁷	42.1	64.9	53.3
20	Households exposed to indoor pollution (%) ⁸	6.4	3.9	5.2
21	Households with <i>pucca</i> house (%) ⁹	74.0	75.3	74.6
	Household Consumption			
	Household Monthly Per Capita Consumption Expenditure	3331	2520	2425
22	(MPCE) in INR ¹⁰	3331	3539	3435
22	(MPCE) in INR ¹⁰ Household Per Capita Food Expenditure as a share of MPCE (%)	50.7	50.2	50.5

¹ Based on all households including LASI age-eligible and non-age-eligible households.

 $^{^{\}rm 2}$ Death rate is calculated based on deaths in the last two calendar years.

 $^{^{3}}$ Based on LASI age-eligible households only.

⁴ Improved sanitation includes flush or pour flush toilet (which is flushed to piped sewer system/septic tank/ pit latrine), pit latrine, twin pit, composting toilet.

⁵ Open defecation refers to the practice whereby people go out in fields, bushes, forests, open bodies of water, or other open spaces rather than using the toilet to defecate. This information was collected from eligible household respondent.

⁶ Improved drinking water source includes water from pipe, public tap/standpipe, tube well or bore well, dug well, spring water and rain water.

⁷ Clean cooking fuel includes LPG, Biogas and Electricity.

⁸ Indoor pollution refers to households using solid and unclean fuel (for cooking or any other purpose) inside the household and cooking in traditional *chullah/stove* or open fire without any ventilation. Unclean fuel refers to use of kerosene, charcoal, coal, crop residue, wood/shrub and dung cake.

⁹ *Pucca* house refers to a house whose roof, wall and floor is made up of *pucca* (concrete) material.

¹⁰ MPCE is defined as total monthly household consumption expenditure divided by household size. Includes household's per capita spending on food and non food items including spending on health, education, utilities etc.

House	hold-Level Key Indicators ³	Rural	Urban	Total
	Household Assets and Debts			
25	Households owning current residence (%)	87.8	83.6	85.7

32	Mean income from pension ¹⁵	9381	7606	8493
33	Mean income from government/public transfers ¹⁶	2818	1408	2113
	Household Insurance			
34	Households covered by any health insurance (%) ¹⁷	47.4	41.0	44.2
35	Households covered by Rashtriya Swasthya Bima Yojana (RSBY) & allied schemes (%) ¹⁸	42.9	28.1	35.7
36	Households covered by Central Government Health Scheme (CGHS)/Employee State Insurance Scheme (ESIS) (%)	3.1	4.6	3.8
37	Households covered by medical reimbursement/health insurance from an employer (%)	[0.4]	3.4	1.9
38	Households covered by privately purchased commercial health insurance (%)	2.9	7.8	5.3

[&]quot;[]" based on fewer than 5 unweighted cases in the numerator or 25 unweighted cases in the denominator. 11 Any one or more motorized vehicle includes car, motor cycle, moped and scooter.

¹² Per Capita Annual Household Income refers to total household income divided by household size. It includes income from all members of the household and from all sources such as agricultural work, non-agricultural work, self-employment, remittances/gifts, wages/salaries from employment, pension income and public/private transfers.

¹³ Based on income reported from household by that particular source.

¹⁴ Wage/salary work refers to income from full-time, part-time, side-jobs odd jobs or other wages or salaries.

¹⁵ Work related pension refers to income from central/state government pension, employer funded pension, privately purchased commercial pension and other state pension schemes.

¹⁶ Government/public transfers includes agriculture subsidies, non-agricultural government subsidies (LPG subsidy, scholarship for education, subsidy for building toilets, subsidy for setting up small scale industries, subsidy for solar panels, etc.), housing assistance, unemployment allowance, Janani Suraksha Yojana (JSY)/any other maternity compensation, compensation under any other health benefits program (other than JSY), Compensation for illness or accident, emergency or disaster relief (flood, earthquake, drought, etc.), debt waiver, compensation for re-settlement (due to slums, dams, road, etc.), assistance for self-employment (like Swarna Jayanti Gram Swarozgar Yojana/ National Rural Livelihood Mission), social security pension schemes (like Indira Gandhi National Old Age Pension Scheme, Indira Gandhi National Widow Pension Scheme, Indira Gandhi National Disability Pension Scheme) and other government transfers.

¹⁷ Includes different types of health insurance/benefits such as CGHS, ESIS, RSBY, other central/state government health insurance schemes or medical reimbursement from employer etc.

¹⁸ Allied schemes refers to state specific schemes which are based on Rashtriya Swasthya Bima Yojana (RSBY) model.

⁴⁰ Currently consuming tobacco refers to consumption of any smokeless tobacco product such as chewing tobacco, gutka or pan masala etc.

^{*} Including spouse irrespective of age, na "not applicable", "-" indicates less number of cases/ no cases.

³⁶ Refers to discounts or concessions received for elderly in train/bus/air travel, telecommunication, special interest rates on bank accounts or loans, income tax benefits or others.

³⁷ Among those who are aware of concessions given by the government for elderly.

³⁸ The "Maintenance and Welfare of Parents and Senior Citizens Act" mandates legal obligation on children to financially maintain their parents/ provide monthly allowances.

³⁹ Currently smoking tobacco refers to smoking any tobacco product such as cigarette, *bidi*, cigar, *hookah* and *cheroot* etc.

⁴¹ Heavy episodic drinking refers to those who reported consumption of at least 60 grams or more (10 grams = 1 standard drink) of pure alcohol on at least one occasion in the past 30 days.

⁴² Those who are either engaged in moderate physical activity (at least 150 minutes throughout the week) or vigorous physical activity (at least 75 minutes throughout the week) or an equivalent combination of moderate- and vigorous-intensity activity.

⁴³ Refers to yoga/meditation/asanas/pranayama etc. practicing daily or more than once a week.

⁴⁴ For all chronic conditions, the reference period is *ever diagnosed* and diagnosed by MBBS, BDS and AYUSH health professionals.

⁴⁵ Poor Self Rated Health (SRH) includes both poor and very poor self-assessed health status.

⁴⁶ Cardiovascular diseases include hypertension, heart disease and stroke (any one or more).

⁴⁷ Chronic lung diseases include chronic obstructive pulmonary disease (COPD), asthma and chronic bronchitis (any one or more).

⁴⁸ Bone /joint diseases include arthritis, rheumatism and osteoporosis (any one or more).

^{*} Including spouse irrespective of age, "[]" based on fewer than 5 unweighted cases in the numerator or 25 unweighted cases in the denominator,

[&]quot;-" indicates less number of cases/ no cases.

⁴⁹ Any neurological/psychiatric problem includes depression, alzheimer's disease, dementia or psychiatric problem or neurological problem (any one or

⁵⁰ Psychiatric problems include unipolar or bipolar disorder, schizophrenia etc. (any one or more).

⁵¹ Neurological problems include neuropathy, convulsion, migraine, Parkinson's etc. (any one or more).

⁵² Includes oral cancer, breast cancer, cervical cancer, lung cancer or cancer/malignant tumors originating in any other organs/ body parts (any one or more).

⁵³ Urogenital conditions include chronic renal failure, incontinence, kidney stone and Benign Prostate Hypertrophy-BPH (only among males) (any one

⁵⁴ Eye or vision related conditions or problems include presbyopia, glaucoma, cataract, myopia, hypermetropia, other eyes problems such as conjunctivitis, eye injury, red eye etc. (any one or more).

⁵⁵ Refractive error includes presbyopia, myopia and hypermetropia with or without astigmatism.

⁵⁶ Common oral health problems include painful teeth, ulcer lasting more than two weeks, bleeding gums, swelling gums, loose teeth, dental cavity/dental caries & soreness or cracks in the corner of the mouth in past 12 months (any one or more).

⁵⁷ Periodontal diseases include bleeding gums, swelling gums or ulcers lasting more than two weeks (any one or more).

⁵⁸ Injury include injuries sustained due to any traffic accident, violence, animal attack or fall in the past 2 years (any one or more).

⁵⁹ Reference period for natural and man-made disaster is past 5 years.

⁶⁰ Health problems due to natural and man-made disaster refers to permanent physical disability, psychological and mental health problems or chronic illness (any one or more).

* Including spouse irrespective of age, na "not applicable", "[]" based on fewer than 5 unweighted cases in the numerator or 25 unweighted cases in the denominator, "-" indicates less number of cases/ no cases.

⁶² Any vector-borne disease includes malaria, dengue or chikungunya (any one or more).

⁶⁴ For symptom based prevalence of health conditions, the reference period is past 2 years.

⁶¹ For prevalence of endemic diseases in India, the reference period is past 2 years (any one or more).

⁶³ Any water-borne disease includes diarrhoea/gastroenteritis, typhoid, jaundice or hepatitis (any one or more).

⁶⁵ Angina pectoris refers to, "a chest pain or discomfort with all the following symptoms: (a) the pain must include either the sternum (any level) or the left arm and left anterior chest (defined as the anterior chest wall between the levels of clavicle and lower end of sternum), (b) pain must be provoked by either hurrying or walking uphill (or by walking on the level, for those who never attempt more), (c) when pain occurs on walking it must makes the person either stop or slacken pace, (d) pain must disappear on a majority of occasions in 10 min or less from the time when the person stands still.

⁶⁶ Sleep problems refer to difficulty in falling asleep or staying asleep throughout the night and also feeling unrested during the day (any one or more).

⁶⁷ Reproductive health problems include hot flashes, irregular vaginal discharge, uterine prolapse, fibroids, cysts and vaginal dryness in the past 2 years (any one or more).

⁶⁸ The reference period for Pap Smear and Mammography is past 2 years.

⁶⁹ Biological family members include- father, mother, brother, sister, children and grandchildren.

⁷⁰ Refers to functional limitations lasting more than 3 months.

⁷¹ Activities of Daily Living (ADL) includes dressing, putting on *chappals* or shoes, walking across a room, bathing, eating difficulties, getting in or out of bed (any one or more).

* Including spouse irrespective of age, "[]" based on fewer than 5 unweighted cases in the numerator or 25 unweighted cases in the denominator.

⁷³ Helper refers to any person/s assisting respondent in any ADL/IADL limitations.

⁷⁷ Delayed word recall refers to total number of words recalled from the same given list of 10 words after some delay.

⁸⁴ Low vision refers to either low near vision or low distant vision in the better eye with best correction available with the respondent.

⁷² Instrumental Activities of Daily Living (IADL) includes preparing a hot meal, shopping for groceries, making telephone calls, taking medications, doing work around the house or garden, managing money (paying bills and keeping track of expenses) and getting around or finding address in unfamiliar place (any one or more).

⁷⁴ Aids or supportive devices include spectacles and dentures and devices to help you in moving or sitting (such as, walker, walking sticks, wheel chair, adjustable showers stools/commodes, back/neck collar, orthosis/prosthesis).

⁷⁵ Among those respondents who reported using any aid or supportive device(s) to assist them in the activities of daily living.

⁷⁶ Immediate word recall refers to total number of words recalled from the given list of 10 words immediately.

⁷⁸ Based on Composite International Diagnostic Interview-Short Form (CIDI-SF); respondent who reported that they felt sad, blue or depressed for two-weeks period during last 12 months for all the day long or most of the day.

⁷⁹ Prevalence of measured hypertension refers to those measured with systolic blood pressure of ≥ 140 mmHg or diastolic blood pressure of ≥ 90 mmHg or both.

⁸⁰ Prevalence of undiagnosed hypertension refers to those undiagnosed by a health professional but whose measured systolic blood pressure was ≥ 140 mmHg or diastolic blood pressure was ≥ 90 mmHg or both.

⁸¹ Untreated hypertension refers to those who reported that they have been diagnosed with hypertension by a health professional and currently measured with hypertension but currently not taking treatment

⁸² Undertreated hypertension refers to those who reported that they have been diagnosed with hypertension by a health professional and currently measured with hypertension but currently taking treatment.

⁸³ Adequately treated hypertension refers to those reported that they have been diagnosed by health professional and currently taking treatment and whose measured systolic blood pressure was < 140 mmHg and diastolic blood pressure was < 90 mmHg.</p>

⁸⁵ Low near vision refers to near vision equal to or poorer than 20/80 and equal to or better than 20/400 in the better eye with best correction available with respondent.

⁸⁶ Low distance vision refers to distance vision equal to or poorer than 20/80 and equal to or better than 20/200 in the better eye with best correction available with respondent

LAKSHADWEEP

Introduction

The Longitudinal Ageing Study in India (LASI) is a nationally and state representative longitudinal study of ageing and health. LASI is a national landmark, the largest in the world and, only of its kind in India. Its main goal is to provide valid, reliable and continuous scientific data on the health, social, mental and economic well-being of India's older adult (aged 45 and above) population. These data will help to monitor existing programmes and inform new national health and ageing policies. LASI is undertaken as a globally harmonized study carried out in more than 44 developed and developing countries worldwide; and the survey schedules, protocols and methodologies are harmonized across these countries. These are part of the Health and Retirement Study (HRS) family of longitudinal ageing and retirement surveys. Therefore, LASI data will also serve as an important public resource for national policy making and worldwide comparative research on ageing.

LASI is undertaken under the aegis of the Ministry of Health and Family Welfare (MoHFW), Government of India. The International Institute for Population Sciences (IIPS), Mumbai is the nodal institution for implementing LASI in collaboration with the Harvard T.H.Chan School of Public Health (HSPH) and the University of Southern California (USC).

A. LASI Objectives and Coverage:

The LASI wave-1 survey (2017-18) covers all 30 states and 6 Union Territories of India with a panel sample size of 72,250 older adults aged 45 years and above and their spouses regardless of age. LASI collects data on four major subject domains:

- 1. Health: Disease Burden & Risk Factors (Reported and Measured)
- 2. Health Care and Health Care Financing
- 3. Social: Family, Social Network and Social Welfare Programmes for the Elderly
- 4. Economic: Income, Wealth, Expenditure, Employment, Retirement and Pension

The long-term goal of LASI is to continue for the next 25 years, with respondents surveyed every two years.

LASI Survey Instruments:

The LASI survey instrument comprises three schedules:

- **1. Household Survey Schedule**: Administered to one per household, collects information from interviewing one or more adult member of household. Includes the following modules: Household Roster, Housing and Environment, Household Consumption, Household Assets and Debts, Household Income and Household Health Insurance.
- 2. Individual Survey Schedule: Administered to each respondent aged 45 years and above and their spouses (regardless of age) in the sampled households. Includes the following modules: Demographics, Work, Retirement and Pension, Health (Chronic Diseases and Health Conditions), Functional Health, Family Medical History, Mental Health (Cognition and Depression), Health Behavior and Food Security, Health Care Access and Utilization, Health Care Financing, Family and Social Network, Social Welfare Programmes and Experimental Modules on Time Use, Expectations, Social Connectedness and Vignettes.

In addition, LASI includes an individual module on measured biomarkers:

- Anthropometric Measurements: Height, Weight, Waist Circumference and Hip Circumference.
- **Functional Health Markers**: Blood Pressure and Pulse Rate, Lung Function Test (Spirometry) and Vision Test (Near and Distance Vision Impairment).

- **Performance Based Markers:** Grip Strength, Timed-Walk and Balance Tests.
- Collection of Dried Blood Spot (DBS) samples: To be tested for variety of molecular biomarkers.
- **3. In addition, a Community Survey Schedule** is administered at the community level (villages in rural areas and census enumeration blocks in urban areas) and is answered by several key informants. The community schedule includes the following sections: Population Characteristics, Infrastructure and Common Resource, Accessibility and Availability of Health Care Services and coverage of Health and Social Welfare Programmes.

Fact Sheet of Key Indicators for the Union Territory of Lakshadweep

This fact sheet provides information on key indicators (weighted) for the union territory of Lakshadweep. The fieldwork for Lakshadweep was conducted from **September through December 2017**. Table-1 provides information about the number of households and individuals interviewed.

Table 1 Number of Households and Individuals interviewed for the union territory of Lakshadweep, LASI Wave 1, 2017-18

Sr. No.	Coverage		Rural	Urban	Male	Female	Total
1.	Household roster completed		204	693	na	na	897
2.	Households interviewed (with age-eligible individuals) #		132	495	na	na	627
2	Individuals Interviewed	45-59 years and their spouses irrespective of age	167	470	206	431	637
3.		60 years and above	99	403	240	262	502
		All ages	266	873	446	693	1139

na "not applicable"

[#] LASI age-eligible households are those with at least one individual in aged 45 years and above; age-eligible individuals are persons aged 45 years and above and their spouses (regardless of age) in the LASI sampled households.

24	Household Per Capita Health Expenditure as a share of MPCE (%)	14.1	9.1	9.6

[&]quot;-" indicates less number of cases/ no cases.

 $^{^{\}rm l}$ Based on all households including LASI age-eligible and non-age-eligible households.

 $^{^{\}rm 2}$ Death rate is calculated based on deaths in the last two calendar years.

³ Based on LASI age-eligible households only.

⁴ Improved sanitation includes flush or pour flush toilet (which is flushed to piped sewer system/septic tank/ pit latrine), pit latrine, twin pit, composting toilet

⁵ Open defecation refers to the practice whereby people go out in fields, bushes, forests, open bodies of water, or other open spaces rather than using the toilet to defecate. This information was collected from eligible household respondent.

⁶ Improved drinking water source includes water from pipe, public tap/standpipe, tube well or bore well, dug well, spring water and rain water.

⁷ Clean cooking fuel includes LPG, Biogas and Electricity.

⁸ Indoor pollution refers to households using solid and unclean fuel (for cooking or any other purpose) inside the household and cooking in traditional *chullah/stove* or open fire without any ventilation. Unclean fuel refers to use of kerosene, charcoal, coal, crop residue, wood/shrub and dung cake.

⁹ *Pucca* house refers to a house whose roof, wall and floor is made up of *pucca* (concrete) material.

¹⁰ MPCE is defined as total monthly household consumption expenditure divided by household size. Includes household's per capita spending on food and non-food items including spending on health, education, utilities etc.

House	hold-Level Key Indicators ³	Rural	Urban	Total				
	Household Assets and Debts							
25	Households owning current residence (%)	86.2	91.7	91.0				
26	Households owning television, refrigerator, mobile phone and any motorized vehicle (%) ¹¹	15.4	44.4	40.8				
27	Households who had taken any loan (%)	0.6	3.2	2.9				
	Household Income							
28	Per Capita Annual Household Income (in INR) ¹²	47955	43933	44432

35	Households covered by Rashtriya Swasthya Bima Yojana (RSBY) & allied schemes (%) ¹⁸	9.8	7.3	7.6				
36	Households covered by Central Government Health Scheme (CGHS)/Employee State Insurance Scheme (ESIS) (%)	4.8	4.6	4.7				
37	Households covered by medical reimbursement/health insurance from an employer (%)	-	[0.4]	[0.3]				
38	Households covered by privately purchased commercial health insurance (%)	[2.4]	1.9	2.0				

_

[&]quot;[]" based on fewer than 5 unweighted cases in the numerator or 25 unweighted cases in the denominator, "-" indicates less number of cases/ no cases.

11 Any one or more motorized vehicle includes car, motor cycle, moped and scooter.

¹² Per Capita Annual Household Income refers to total household income divided by household size. It includes income from all members of the household and from all sources such as agricultural work, non-agricultural work, self-employment, remittances/gifts, wages/salaries from employment, pension income and public/private transfers.

¹³ Based on income reported from household by that particular source.

¹⁴ Wage/salary work refers to income from full-time, part-time, side-jobs odd jobs or other wages or salaries.

¹⁵ Work related pension refers to income from central/state government pension, employer funded pension, privately purchased commercial pension and other state pension schemes.

¹⁶ Government/public transfers includes agriculture subsidies, non-agricultural government subsidies (LPG subsidy, scholarship for education, subsidy for building toilets, subsidy for setting up small scale industries, subsidy for solar panels, etc.), housing assistance, unemployment allowance, Janani Suraksha Yojana (JSY)/any other maternity compensation, compensation under any other health benefits program (other than JSY), Compensation for illness or accident, emergency or disaster relief (flood, earthquake, drought, etc.), debt waiver, compensation for re-settlement (due to slums, dams, road, etc.), assistance for self-employment (like Swarna Jayanti Gram Swarozgar Yojana/ National Rural Livelihood Mission), social security pension schemes (like Indira Gandhi National Old Age Pension Scheme, Indira Gandhi National Widow Pension Scheme, Indira Gandhi National Disability Pension Scheme) and other government transfers.

¹⁷ Includes different types of health insurance/benefits such as CGHS, ESIS, RSBY, other central/state government health insurance schemes or medical reimbursement from employer etc.

¹⁸ Allied schemes refers to state specific schemes which are based on Rashtriya Swasthya Bima Yojana (RSBY) model.

124	Chronic illness (%)	[0.03]	[0.05]	[0.07]	[0.03]	[0.36]	-	[0.04]		

^{*} Including spouse irrespective of age, "[]" based on fewer than 5 unweighted cases in the numerator or 25 unweighted cases in the denominator, "-" indicates less number of cases/ no cases.

⁴⁹ Any neurological/psychiatric problem includes depression, alzheimer's disease, dementia or psychiatric problem or neurological problem (any one or

⁵⁰ Psychiatric problems include unipolar or bipolar disorder, schizophrenia etc. (any one or more).

⁵¹ Neurological problems include neuropathy, convulsion, migraine, Parkinson's etc. (any one or more).

⁵² Includes oral cancer, breast cancer, cervical cancer, lung cancer or cancer/malignant tumors originating in any other organs/ body parts (any one or more).

⁵³ Urogenital conditions include chronic renal failure, incontinence, kidney stone and Benign Prostate Hypertrophy-BPH (only among males) (any one or more).

⁵⁴ Eye or vision related conditions or problems include presbyopia, glaucoma, cataract, myopia, hypermetropia, other eyes problems such as conjunctivitis, eye injury, red eye etc. (any one or more).

⁵⁵ Refractive error includes presbyopia, myopia and hypermetropia with or without astigmatism.

⁵⁶ Common oral health problems include painful teeth, ulcer lasting more than two weeks, bleeding gums, swelling gums, loose teeth, dental cavity/dental caries & soreness or cracks in the corner of the mouth in past 12 months (any one or more).

⁵⁷ Periodontal diseases include bleeding gums, swelling gums or ulcers lasting more than two weeks (any one or more).

⁵⁸ Injury include injuries sustained due to any traffic accident, violence, animal attack or fall in the past 2 years (any one or more).

⁵⁹ Reference period for natural and man-made disaster is past 5 years.

⁶⁰ Health problems due to natural and man-made disaster refers to permanent physical disability, psychological and mental health problems or chronic illness (any one or more).

_

^{*} Including spouse irrespective of age, na "not applicable", "[]" based on fewer than 5 unweighted cases in the numerator or 25 unweighted cases in the denominator, "-" indicates less number of cases/ no cases.

⁶¹ For prevalence of endemic diseases in India, the reference period is past 2 years (any one or more).

⁶² Any vector-borne disease includes malaria, dengue or chikungunya (any one or more).

⁶³ Any water-borne disease includes diarrhoea/gastroenteritis, typhoid, jaundice or hepatitis (any one or more).

⁶⁴ For symptom based prevalence of health conditions, the reference period is past 2 years.

⁶⁵ Angina pectoris refers to, "a chest pain or discomfort with all the following symptoms: (a) the pain must include either the sternum (any level) or the left arm and left anterior chest (defined as the anterior chest wall between the levels of clavicle and lower end of sternum), (b) pain must be provoked by either hurrying or walking uphill (or by walking on the level, for those who never attempt more), (c) when pain occurs on walking it must make the person either stop or slacken pace, (d) pain must disappear on a majority of occasions in 10 min or less from the time when the person stands still.

⁶⁶ Sleep problems refer to difficulty in falling asleep or staying asleep throughout the night and also feeling unrested during the day (any one or more).

⁶⁷ Reproductive health problems include hot flashes, irregular vaginal discharge, uterine prolapse, fibroids, cysts and vaginal dryness in the past 12 months (any one or more).

⁶⁸ The reference period for Pap Smear and Mammography is past 2 years.

⁶⁹ Biological family members include -father, mother, brother, sister, children and grandchildren.

⁷⁰ Refers to functional limitations lasting more than 3 months.

⁷¹ Activities of Daily Living (ADL) includes dressing, putting on *chappals* or shoes, walking across a room, bathing, eating difficulties, getting in or out of bed (any one or more).

⁷² Instrumental Activities of Daily Living (IADL) includes preparing a hot meal, shopping for groceries, making telephone calls, taking medications, doing work around the house or garden, managing money (paying bills and keeping track of expenses) and getting around or finding address in unfamiliar place (any one or more).

⁷³ Helper refers to any person/s assisting respondent in any ADL/IADL limitations.

⁷⁴ Aids or supportive devices include spectacles and dentures and devices to help you in moving or sitting (such as, walker, walking sticks, wheel chair, adjustable showers stools/commodes, back/neck collar, orthosis/prosthesis).

⁷⁵ Among those respondents who reported using any aid or supportive device(s) to assist them in the activities of daily living.

⁷⁶ Immediate word recall refers to total number of words recalled from the given list of 10 words immediately.

⁷⁷ Delayed word recall refers to total number of words recalled from the same given list of 10 words after some delay.

⁷⁸ Based on Composite International Diagnostic Interview-Short Form (CIDI-SF); respondent who reported that they felt sad, blue or depressed for two-weeks period during last 12 months for all the day long or most of the day.

⁷⁹ Prevalence of measured hypertension refers to those measured with systolic blood pressure of ≥ 140 mmHg or diastolic blood pressure of ≥ 90 mmHg or both

⁸⁰ Prevalence of undiagnosed hypertension refers to those undiagnosed by a health professional but whose measured systolic blood pressure was ≥ 140 mmHg or diastolic blood pressure was ≥ 90 mmHg or both.

⁸¹ Untreated hypertension refers to those who reported that they have been diagnosed with hypertension by a health professional and currently measured with hypertension but currently not taking treatment

⁸² Undertreated hypertension refers to those who reported that they have been diagnosed with hypertension by a health professional and currently measured with hypertension but currently taking treatment.

⁸³ Adequately treated hypertension refers to those reported that they have been diagnosed by health professional and currently taking treatment and whose measured systolic blood pressure was < 140 mmHg and diastolic blood pressure was < 90 mmHg.</p>

⁸⁴ Low vision refers to either low near vision or low distant vision in the better eye with best correction available with the respondent.

⁸⁵ Low near vision refers to near vision equal to or poorer than 20/80 and equal to or better than 20/400 in the better eye with best correction available with respondent.

⁸⁶ Low distance vision refers to distance vision equal to or poorer than 20/80 and equal to or better than 20/200 in the better eye with best correction available with respondent.

⁸⁷ Blindness refers to those with vision less than 20/200 in distance or could not count finger or perceive light.

MADHYA PRADESH

Introduction

The Longitudinal Ageing Study in India (LASI) is a nationally and state representative longitudinal study of ageing and health. LASI is a national landmark, the largest in the world and, only of its kind in India. Its main goal is to provide valid, reliable and continuous scientific data on the health, social, mental and economic well-being of India's older adult (aged 45 and above) population. These data will help to monitor existing programmes and inform new national health and ageing policies. LASI is undertaken as a globally harmonized study carried out in more than 44 developed and developing countries worldwide; and the survey schedules, protocols and methodologies are harmonized across these countries. These are part of the Health and Retirement Study (HRS) family of longitudinal ageing and retirement surveys. Therefore, LASI data will also serve as an important public resource for national policy making and worldwide comparative research on ageing.

LASI is undertaken under the aegis of the Ministry of Health and Family Welfare (MoHFW), Government of India. The International Institute for Population Sciences (IIPS), Mumbai is the nodal institution for implementing LASI in collaboration with the Harvard T.H.Chan School of Public Health (HSPH) and the University of Southern California (USC).

A. LASI Objectives and Coverage:

The LASI wave-1 survey (2017-18) covers all 30 states and 6 union territories of India with a panel sample size of 72,250 older adults aged 45 years and above and their spouses regardless of age. LASI collects data on four major subject domains:

- 1. Health: Disease Burden & Risk Factors (Reported and Measured)
- 2. Health Care and Health Care Financing
- 3. Social: Family, Social Network and Social Welfare Programmes for the Elderly
- 4. Economic: Income, Wealth, Expenditure, Employment, Retirement and Pension

The long-term goal of LASI is to continue for the next 25 years, with respondents surveyed every two years.

LASI Survey Instruments:

The LASI survey instrument comprises three schedules:

- **1. Household Survey Schedule**: Administered to one per household, collects information from interviewing one or more adult member of household. Includes the following modules: Household Roster, Housing and Environment, Household Consumption, Household Assets and Debts, Household Income and Household Health Insurance.
- 2. Individual Survey Schedule: Administered to each respondent aged 45 years and above and their spouses (regardless of age) in the sampled households. Includes the following modules: Demographics, Work, Retirement and Pension, Health (Chronic Diseases and Health Conditions), Functional Health, Family Medical History, Mental Health (Cognition and Depression), Health Behavior and Food Security, Health Care Access and Utilization, Health Care Financing, Family and Social Network, Social Welfare Programmes and Experimental Modules on Time Use, Expectations, Social Connectedness and Vignettes.

In addition, LASI includes an individual module on measured biomarkers:

- Anthropometric Measurements: Height, Weight, Waist Circumference and Hip Circumference.
- **Functional Health Markers**: Blood Pressure and Pulse Rate, Lung Function Test (Spirometry) and Vision Test (Near and Distance Vision Impairment).

- **Performance Based Markers:** Grip Strength, Timed-Walk and Balance Tests.
- Collection of Dried Blood Spot (DBS) samples: To be tested for variety of molecular biomarkers.
- **3. In addition, a Community Survey Schedule** is administered at the community level (villages in rural areas and census enumeration blocks in urban areas) and is answered by several key informants. The community schedule includes the following sections: Population Characteristics, Infrastructure and Common Resource, Accessibility and Availability of Health Care Services and coverage of Health and Social Welfare Programmes.

Fact Sheet of Key Indicators for the State of Madhya Pradesh

This fact sheet provides information on key indicators (weighted) for the state of Madhya Pradesh. The fieldwork for Madhya Pradesh was conducted from **April through August 2017**. Table-1 provides information about the number of households and individuals interviewed.

Table 1 Number of households and individuals interviewed for the state of Madhya Pradesh, LASI Wave 1, 2017-18

24	Household Per Capita Health Expenditure as a share of MPCE (%)	13.7	9.9	12.2			

¹ Based on all households including LASI age-eligible and non-age-eligible households.

² Death rate is calculated based on deaths in the last two calendar years.

³ Based on LASI age-eligible households only.

⁴ Improved sanitation includes flush or pour flush toilet (which is flushed to piped sewer system/septic tank/ pit latrine), pit latrine, twin pit, composting toilet.

⁵ Open defecation refers to the practice whereby people go out in fields, bushes, forests, open bodies of water, or other open spaces rather than using the toilet to defecate. This information was collected from eligible household respondent.

⁶ Improved drinking water source includes water from pipe, public tap/standpipe, tube well or bore well, dug well, spring water and rain water.

⁷ Clean cooking fuel includes LPG, Biogas and Electricity.

⁸ Indoor pollution refers to households using solid and unclean fuel (for cooking or any other purpose) inside the household and cooking in traditional *chullah/stove* or open fire without any ventilation. Unclean fuel refers to use of kerosene, charcoal, coal, crop residue, wood/shrub and dung cake.

⁹Pucca house refers to a house whose roof, wall and floor is made up of pucca (concrete) material.

¹⁰ MPCE is defined as total monthly household consumption expenditure divided by household size. Includes household's per capita spending on food and non-food items including spending on health, education, utilities etc.

House	hold-Level Key Indicators ³	Rural	Urban	Total			
	Household Assets and Debts

38	Households covered by privately purchased commercial health insurance (%)	[1.6]	1.8	1.7			

Any one or more motorized vehicle includes car, motor cycle, moped and scooter.

¹⁴ Wage/salary work refers to income from full-time, part-time, side-jobs odd jobs or other wages or salaries.

[&]quot;[]" based on fewer than 5 unweighted cases in the numerator or 25 unweighted cases in the denominator.

¹² Per Capita Annual Household Income refers to total household income divided by household size. It includes income from all members of the household and from all sources such as agricultural work, non-agricultural work, self-employment, remittances/gifts, wages/salaries from employment, pension income and public/private transfers.

¹³ Based on income reported from household by that particular source.

¹⁵ Work related pension refers to income from central/state government pension, employer funded pension, privately purchased commercial pension and other state pension schemes.

¹⁶ Government/public transfers includes agriculture subsidies, non-agricultural government subsidies (LPG subsidy, scholarship for education, subsidy for building toilets, subsidy for setting up small scale industries, subsidy for solar panels, etc.), housing assistance, unemployment allowance, Janani Suraksha Yojana (JSY)/any other maternity compensation, compensation under any other health benefits program (other than JSY), Compensation for illness or accident, emergency or disaster relief (flood, earthquake, drought, etc.), debt waiver, compensation for re-settlement (due to slums, dams, road, etc.), assistance for self-employment (like Swarna Jayanti Gram Swarozgar Yojana/ National Rural Livelihood Mission), social security pension schemes (like Indira Gandhi National Old Age Pension Scheme, Indira Gandhi National Widow Pension Scheme, Indira Gandhi National Disability Pension Scheme) and other government transfers.

¹⁷ Includes different types of health insurance/benefits such as CGHS, ESIS, RSBY, other central/state government health insurance schemes or medical reimbursement from employer etc.

¹⁸ Allied schemes refers to state specific schemes which are based on Rashtriya Swasthya Bima Yojana (RSBY) model.

^{*} Including spouse irrespective of age, na "not applicable".

⁶¹ For prevalence of endemic diseases in India, the reference period is past 2 years (any one or more).

⁶² Any vector-borne disease includes malaria, dengue or chikungunya (any one or more).

⁶³ Any water-borne disease includes diarrhoea/gastroenteritis, typhoid, jaundice or hepatitis (any one or more).

⁶⁴ For symptom based prevalence of health conditions, the reference period is past 2 years.

⁶⁵ Angina pectoris refers to, "a chest pain or discomfort with all the following symptoms: (a) the pain must include either the sternum (any level) or the left arm and left anterior chest (defined as the anterior chest wall between the levels of clavicle and lower end of sternum), (b) pain must be provoked by either hurrying or walking uphill (or by walking on the level, for those who never attempt more), (c) when pain occurs on walking it must make the person either stop or slacken pace, (d) pain must disappear on a majority of occasions in 10 min or less from the time when the person stands still.

⁶⁶ Sleep problems refer to difficulty in falling asleep or staying asleep throughout the night and also feeling unrested during the day (any one or more).

⁶⁷ Reproductive health problems include hot flashes, irregular vaginal discharge, uterine prolapse, fibroids, cysts and vaginal dryness in the past 2 years (any one or more).

 $^{^{68}}$ The reference period for Pap Smear and Mammography is past 2 years.

⁶⁹ Biological family members include -father, mother, brother, sister, children and grandchildren.

⁷⁰ Refers to functional limitations lasting more than 3 months.

⁷¹ Activities of Daily Living (ADL) includes dressing, putting on *chappals* or shoes, walking across a room, bathing, eating difficulties, getting in or out of bed (any one or more).

* Including spouse irrespective of age, "[]" based on fewer than 5 unweighted cases in the numerator or 25 unweighted cases in the denominator.

73 Helper refers to any person/s assisting respondent in any ADL/IADL limitations.

84 Low vision refers to either low near vision or low distant vision in the better eye with best correction available with the respondent.

⁷² Instrumental Activities of Daily Living (IADL) includes preparing a hot meal, shopping for groceries, making telephone calls, taking medications, doing work around the house or garden, managing money (paying bills and keeping track of expenses) and getting around or finding address in unfamiliar place (any one or more).

⁷⁴ Aids or supportive devices include spectacles and dentures and devices to help you in moving or sitting (such as, walker, walking sticks, wheel chair, adjustable showers stools/commodes, back/neck collar, orthosis/prosthesis).

⁷⁵ Among those respondents who reported using any aid or supportive device(s) to assist them in the activities of daily living.

 $^{^{76}}$ Immediate word recall refers to total number of words recalled from the given list of 10 words immediately.

⁷⁷ Delayed word recall refers to total number of words recalled from the same given list of 10 words after some delay.

⁷⁸ Based on Composite International Diagnostic Interview-Short Form (CIDI-SF); respondent who reported that they felt sad, blue or depressed for two-weeks period during last 12 months for all the day long or most of the day.

⁷⁹ Prevalence of measured hypertension refers to those measured with systolic blood pressure of ≥ 140 mmHg or diastolic blood pressure of ≥ 90 mmHg or both.

⁸⁰ Prevalence of undiagnosed hypertension refers to those undiagnosed by a health professional but whose measured systolic blood pressure was ≥ 140 mmHg or diastolic blood pressure was ≥ 90 mmHg or both.

⁸¹ Untreated hypertension refers to those who reported that they have been diagnosed with hypertension by a health professional and currently measured with hypertension but currently not taking treatment

⁸² Undertreated hypertension refers to those who reported that they have been diagnosed with hypertension by a health professional and currently measured with hypertension but currently taking treatment.

⁸³ Adequately treated hypertension refers to those reported that they have been diagnosed by health professional and currently taking treatment and whose measured systolic blood pressure was < 140 mmHg and diastolic blood pressure was < 90 mmHg.

⁸⁵ Low near vision refers to near vision equal to or poorer than 20/80 and equal to or better than 20/400 in the better eye with best correction available with respondent.

⁸⁶ Low distance vision refers to distance vision equal to or poorer than 20/80 and equal to or better than 20/200 in the better eye with best correction available with respondent.

* Including spouse irrespective of age.

⁸⁷ Blindness refers to those with vision less than 20/200 in distance or could not count finger or perceive light.

⁹⁰ WHO criteria of classification of waist- hip ratio (WHR)

 Male	Female	Risk level
< 0.90	< 0.85	Low
>0.90	>0.85	High

⁹¹ Grip strength measures bodily muscle strength and is an overall marker of health among elderly population. Mean grip strength is an average of two readings for dominant hand.

⁸⁸ Body Mass Index (BMI) refers to weight in kilograms divided by height in meter square (kg/m²). BMI levels have been classified according to WHO classifications: underweight \leq 18.4; normal=18.5 to 24.9; overweight=25.0 to 29.9; obese \geq 30.0

⁸⁹ Metabolic complications: critical limit classification for high risk waist circumference for male is ≥102 cm and for female is ≥88cm.

⁹² Includes health post/sub centers, primary health center/urban health center, community health center, district/sub-district hospital, government/tertiary hospital or government AYUSH hospital.

⁹³ Includes private hospital/nursing home, private clinic (OPD based services), NGO/Charity/Trust/Church-run hospital/Private AYUSH hospital. It also includes health care services availed partially from either private or government or NGO.

⁹⁴ Among those who sought out-patient care in the past 12 months and this includes modern allopathic medicines, AYUSH medicines, traditional herbs or medicine, excluding any health supplements.

⁹⁵ The expenditure on last in-patient visit includes consultation charges, medicine charges, test/investigation charge, nursing home charges, surgery and related charges, transportation charges and any other charges.

MAHARASHTRA

Introduction

The Longitudinal Ageing Study in India (LASI) is a nationally and state representative longitudinal study of ageing and health. LASI is a national landmark, the largest in the world and, only of its kind in India. Its main goal is to provide valid, reliable and continuous scientific data on the health, social, mental and economic well-being of India's older adult (aged 45 and above) population. These data will help to monitor existing programmes and inform new national health and ageing policies. LASI is undertaken as a globally harmonized study carried out in more than 44 developed and developing countries worldwide; and the survey schedules, protocols and methodologies are harmonized across these countries. These are part of the Health and Retirement Study (HRS) family of longitudinal ageing and retirement surveys. Therefore, LASI data will also serve as an important public resource for national policy making and worldwide comparative research on ageing.

LASI is undertaken under the aegis of the Ministry of Health and Family Welfare (MoHFW), Government of India. The International Institute for Population Sciences (IIPS), Mumbai is the nodal institution for implementing LASI in collaboration with the Harvard T.H.Chan School of Public Health (HSPH) and the University of Southern California (USC).

A. LASI Objectives and Coverage:

The LASI wave-1 survey (2017-18) covers all 30 states and 6 union territories of India with a panel sample size of 72,250 older adults aged 45 years and above and their spouses regardless of age. LASI collects data on four major subject domains:

- 1. Health: Disease Burden & Risk Factors (Reported and Measured)
- 2. Health Care and Health Care Financing
- 3. Social: Family, Social Network and Social Welfare Programmes for the Elderly
- 4. Economic: Income, Wealth, Expenditure, Employment, Retirement and Pension

The long-term goal of LASI is to continue for the next 25 years, with respondents surveyed every two years.

LASI Survey Instruments:

The LASI survey instrument comprises three schedules:

- **1. Household Survey Schedule:** Administered to one per household, collects information from interviewing one or more adult member of household. Includes the following modules: Household Roster, Housing and Environment, Household Consumption, Household Assets and Debts, Household Income and Household Health Insurance.
- 2. Individual Survey Schedule: Administered to each respondent aged 45 years and above and their spouses (regardless of age) in the sampled households. Includes the following modules: Demographics, Work, Retirement and Pension, Health (Chronic Diseases and Health Conditions), Functional Health, Family Medical History, Mental Health (Cognition and Depression), Health Behavior and Food Security, Health Care Access and Utilization, Health Care Financing, Family and Social Network, Social Welfare Programmes and Experimental Modules on Time Use, Expectations, Social Connectedness and Vignettes.

In addition, LASI includes an individual module on measured biomarkers:

- Anthropometric Measurements: Height, Weight, Waist Circumference and Hip Circumference.
- Functional Health Markers: Blood Pressure and Pulse Rate, Lung Function Test (Spirometry) and Vision Test (Near and Distance Vision Impairment).

- **Performance Based Markers:** Grip Strength, Timed-Walk and Balance Tests.
- Collection of Dried Blood Spot (DBS) samples: To be tested for variety of molecular biomarkers.
- **3.** In addition, a Community Survey Schedule is administered at the community level (villages in rural areas and census enumeration blocks in urban areas) and is answered by several key informants. The community schedule includes the following sections: Population Characteristics, Infrastructure and Common Resource, Accessibility and Availability of Health Care Services and coverage of Health and Social Welfare Programmes.

Fact Sheet of Key Indicators for the State of Maharashtra

This fact sheet provides information on key indicators (weighted) for the state of Maharashtra. The fieldwork for Maharashtra was conducted from **August 2018 through April 2019**. Table-1 provides information about the number of households and individuals interviewed.

Table 1 Number of households and individuals interviewed for the state of Maharashtra, LASI Wave 1, 2018-19

15	Households practicing open defecation (%) ⁵	26.5	2.3	15.4
16	Households with water facility inside dwelling/own yard (%)	60.7	90.7	74.5
17	Households with improved drinking water source (%) ⁶	92.5	96.7	94.4
18	Households with electricity (%)	94.3	99.3	96.6
19	Households using clean cooking fuel (%) ⁷	50.4	96.9	71.8
20	Households exposed to indoor pollution (%) ⁸	9.0	1.4	5.5
21	Households with <i>pucca</i> house (%) ⁹	56.3	84.2	69.7
	Household Consumption			
22	Household Monthly Per Capita Consumption Expenditure (MPCE) in INR ¹⁰	2932	3687	3279
23	Household Per Capita Food Expenditure as a share of MPCE (%)	41.2	44.5	42.9
24	Household Per Capita Health Expenditure as a share of MPCE (%)	16.3	12.8	14.5

 $^{^{\}rm I}$ Based on all households including LASI age-eligible and non-age-eligible households.

² Death rate is calculated based on deaths in the last two calendar years.

³ Based on LASI age-eligible households only.

⁴ Improved sanitation includes flush or pour flush toilet (which is flushed to piped sewer system/septic tank/ pit latrine), pit latrine, twin pit, composting toilet.

⁵ Open defecation refers to the practice whereby people go out in fields, bushes, forests, open bodies of water, or other open spaces rather than using the toilet to defecate. This information was collected from eligible household respondent.

⁶ Improved drinking water source includes water from pipe, public tap/standpipe, tube well or bore well, dug well, spring water and rain water.

⁷ Clean cooking fuel includes LPG, Biogas and Electricity.

⁸ Indoor pollution refers to households using solid and unclean fuel (for cooking or any other purpose) inside the household and cooking in traditional *chullah/stove* or open fire without any ventilation. Unclean fuel refers to use of kerosene, charcoal, coal, crop residue, wood/shrub and dung cake.

⁹Pucca house refers to a house whose roof, wall and floor is made up of pucca (concrete) material.

¹⁰ MPCE is defined as total monthly household consumption expenditure divided by household size. Includes household's per capita spending on food and non-food items including spending on health, education, utilities etc.

_

⁶¹ For prevalence of endemic diseases in India, the reference period is past 2 years (any one or more).

⁶² Any vector-borne disease includes malaria, dengue or chikungunya (any one or more).

⁶³ Any water-borne disease includes diarrhoea/gastroenteritis, typhoid, jaundice or hepatitis (any one or more).

⁶⁴ For symptom based prevalence of health conditions, the reference period is past 2 years.

⁶⁵ Angina pectoris refers to, "a chest pain or discomfort with all the following symptoms: (a) the pain must include either the sternum (any level) or the left arm and left anterior chest (defined as the anterior chest wall between the levels of clavicle and lower end of sternum), (b) pain must be provoked by either hurrying or walking uphill (or by walking on the level, for those who never attempt more), (c) when pain occurs on walking it must make the person either stop or slacken pace, (d) pain must disappear on a majority of occasions in 10 min or less from the time when the person stands still.

⁶⁶ Sleep problems refer to difficulty in falling asleep or staying asleep throughout the night and also feeling unrested during the day (any one or more).

⁶⁷ Reproductive health problems include hot flashes, irregular vaginal discharge, uterine prolapse, fibroids, cysts and vaginal dryness in the past 2 years (any one or more).

⁶⁸ The reference period for Pap Smear and Mammography is past 2 years.

⁶⁹ Biological family members include -father, mother, brother, sister, children and grandchildren.

 $^{^{70}}$ Refers to functional limitations lasting more than 3 months.

⁷¹ Activities of Daily Living (ADL) includes dressing, putting on *chappals* or shoes, walking across a room, bathing, eating difficulties, getting in or out of bed (any one or more).

⁷² Instrumental Activities of Daily Living (IADL) includes preparing a hot meal, shopping for groceries, making telephone calls, taking medications, doing work around the house or garden, managing money (paying bills and keeping track of expenses) and getting around or finding address in unfamiliar place (any one or more).

* Including spouse irrespective of age, "[]" based on fewer than 5 unweighted cases in the numerator or 25 unweighted cases in the denominator.

⁸⁴ Low vision refers to either low near vision or low distant vision in the better eye with best correction available with the respondent.

⁷³ Helper refers to any person/s assisting respondent in any ADL/IADL limitations.

⁷⁴ Aids or supportive devices include spectacles and dentures and devices to help you in moving or sitting (such as, walker, walking sticks, wheel chair, adjustable showers stools/commodes, back/neck collar, orthosis/prosthesis).

⁷⁵ Among those respondents who reported using any aid or supportive device(s) to assist them in the activities of daily living.

⁷⁶ Immediate word recall refers to total number of words recalled from the given list of 10 words immediately.

⁷⁷ Delayed word recall refers to total number of words recalled from the same given list of 10 words after some delay.

⁷⁸ Based on Composite International Diagnostic Interview-Short Form (CIDI-SF); respondent who reported that they felt sad, blue or depressed for two-weeks period during last 12 months for all the day long or most of the day.

⁷⁹ Prevalence of measured hypertension refers to those measured with systolic blood pressure of ≥ 140 mmHg or diastolic blood pressure of ≥ 90 mmHg or both.

⁸⁰ Prevalence of undiagnosed hypertension refers to those undiagnosed by a health professional but whose measured systolic blood pressure was ≥ 140 mmHg or diastolic blood pressure was ≥ 90 mmHg or both.

⁸¹ Untreated hypertension refers to those who reported that they have been diagnosed with hypertension by a health professional and currently measured with hypertension but currently not taking treatment

⁸² Undertreated hypertension refers to those who reported that they have been diagnosed with hypertension by a health professional and currently measured with hypertension but currently taking treatment.

⁸³ Adequately treated hypertension refers to those reported that they have been diagnosed by health professional and currently taking treatment and whose measured systolic blood pressure was < 140 mmHg and diastolic blood pressure was < 90 mmHg.</p>

⁸⁵ Low near vision refers to near vision equal to or poorer than 20/80 and equal to or better than 20/400 in the better eye with best correction available with respondent.

⁸⁶ Low distance vision refers to distance vision equal to or poorer than 20/80 and equal to or better than 20/200 in the better eye with best correction available with respondent.

⁸⁷ Blindness refers to those with vision less than 20/200 in distance or could not count finger or perceive light.

MANIPUR

Introduction

The Longitudinal Ageing Study in India (LASI) is a nationally and state representative longitudinal study of ageing and health. LASI is a national landmark, the largest in the world and, only of its kind in India. Its main goal is to provide valid, reliable and continuous scientific data on the health, social, mental and economic well-being of India's older adult (aged 45 and above) population. These data will help to monitor existing programmes and inform new national health and ageing policies. LASI is undertaken as a globally harmonized study carried out in more than 44 developed and developing countries worldwide; and the survey schedules, protocols and methodologies are harmonized across these countries. These are part of the Health and Retirement Study (HRS) family of longitudinal ageing and retirement surveys. Therefore, LASI data will also serve as an important public resource for national policy making and worldwide comparative research on ageing.

LASI is undertaken under the aegis of the Ministry of Health and Family Welfare (MoHFW), Government of India. The International Institute for Population Sciences (IIPS), Mumbai is the nodal institution for implementing LASI in collaboration with the Harvard T.H.Chan School of Public Health (HSPH) and the University of Southern California (USC).

A. LASI Objectives and Coverage:

The LASI wave-1 survey (2017-18) covers all 30 states and 6 Union Territories of India with a panel sample size of 72,250 older adults aged 45 years and above and their spouses regardless of age. LASI collects data on four major subject domains:

- 1. Health: Disease Burden & Risk Factors (Reported and Measured)
- 2. Health Care and Health Care Financing
- 3. Social: Family, Social Network and Social Welfare Programmes for the Elderly
- 4. Economic: Income, Wealth, Expenditure, Employment, Retirement and Pension

The long-term goal of LASI is to continue for the next 25 years, with respondents surveyed every two years.

LASI Survey Instruments:

The LASI survey instrument comprises three schedules:

- 1. Household Survey Schedule: Administered to one per household, collects information from interviewing one or more adult member of household. Includes the following modules: Household Roster, Housing and Environment, Household Consumption, Household Assets and Debts, Household Income and Household Health Insurance.
- 2. Individual Survey Schedule: Administered to each respondent aged 45 years and above and their spouses (regardless of age) in the sampled households. Includes the following modules: Demographics, Work, Retirement and Pension, Health (Chronic Diseases and Health Conditions), Functional Health, Family Medical History, Mental Health (Cognition and Depression), Health Behavior and Food Security, Health Care Access and Utilization, Health Care Financing, Family and Social Network, Social Welfare Programmes and Experimental Modules on Time Use, Expectations, Social Connectedness and Vignettes.

In addition, LASI includes an individual module on measured biomarkers:

- Anthropometric Measurements: Height, Weight, Waist Circumference and Hip Circumference.
- Functional Health Markers: Blood Pressure and Pulse Rate, Lung Function Test (Spirometry) and Vision Test (Near and Distance Vision Impairment).

- **Performance Based Markers:** Grip Strength, Timed-Walk and Balance Tests.
- Collection of Dried Blood Spot (DBS) samples: To be tested for variety of molecular biomarkers.
- **3.** In addition, a Community Survey Schedule is administered at the community level (villages in rural areas and census enumeration blocks in urban areas) and is answered by several key informants. The community schedule includes the following sections: Population Characteristics, Infrastructure and Common Resource, Accessibility and Availability of Health Care Services and coverage of Health and Social Welfare Programmes.

Fact Sheet of Key Indicators for the State of Manipur

This fact sheet provides information on key indicators (weighted) for the state of Manipur. The fieldwork for Manipur was conducted from **April through September 2018**. Table-1 provides information about the number of households and individuals interviewed.

Table 1 Number of Households and Individuals interviewed for the state of Manipur, LASI-Wave 1, 2018-19

Sr. No.	Coverage		Rural	Urban	Male	Female	Total
1.	Household roster completed Households interviewed (with age-eligible individuals)#		812	368	na	na	1180
2.			574	286	na	na	860
	Individuals Interviewed	45-59 years and their spouses irrespective of age	518	245	320	443	763
3.		60 years and above	403	203	261	345	606
		All ages	921	448	581	788	1369

na "not applicable"

[#] LASI age-eligible households are those with at least one individual in aged 45 years and above; age-eligible individuals are persons aged 45 years and above and their spouses (regardless of age) in the LASI sampled households.

21	Households with <i>pucca</i> house (%) ⁹	10.9	45.0	27.8
	Household Consumption			
22	Household Monthly Per Capita Consumption Expenditure (MPCE) in INR ¹⁰	3578	4659	3990
23	Household Per Capita Food Expenditure as a share of MPCE (%)	51.6	45.2	48.7
24	Household Per Capita Health Expenditure as a share of MPCE (%)	13.1	16.1	14.4

[&]quot;[]" based on fewer than 5 unweighted cases in the numerator or 25 unweighted cases in the denominator.

¹ Based on all households including LASI age-eligible and non-age-eligible households.

² Death rate is calculated based on deaths in the last two calendar years.

³ Based on LASI age-eligible households only.

⁴ Improved sanitation includes flush or pour flush toilet (which is flushed to piped sewer system/septic tank/ pit latrine), pit latrine, twin pit, composting toilet

⁵ Open defecation refers to the practice whereby people go out in fields, bushes, forests, open bodies of water, or other open spaces rather than using the toilet to defecate. This information was collected from eligible household respondent.

⁶ Improved drinking water source includes water from pipe, public tap/standpipe, tube well or bore well, dug well, spring water and rain water.

⁷ Clean cooking fuel includes LPG, Biogas and Electricity.

⁸ Indoor pollution refers to households using solid and unclean fuel (for cooking or any other purpose) inside the household and cooking in traditional *chullah/stove* or open fire without any ventilation. Unclean fuel refers to use of kerosene, charcoal, coal, crop residue, wood/shrub and dung cake.

⁹ Pucca house refers to a house whose roof, wall and floor is made up of pucca (concrete) material.

¹⁰ MPCE is defined as total monthly household consumption expenditure divided by household size. Includes household's per capita spending on food and non-food items including spending on health, education, utilities etc.

Hou	sehold-Level Key Indicators ³	Rural	Urban	Total
	Household Assets and Debts			
25	Households owning current residence (%)	92.9	91.5	92.4

36	Households covered by Central Government Health Scheme (CGHS)/Employee State Insurance Scheme (ESIS) (%)	[0.3]	[1.6]	0.8
37	Households covered by medical reimbursement/health insurance from an employer (%)	[0.3]	[0.6]	[0.4]
38	Households covered by privately purchased commercial health insurance (%)	-	[0.2]	[0.1]

_

[&]quot;[]" based on fewer than 5 unweighted cases in the numerator or 25 unweighted cases in the denominator, "-" indicates less number of cases/ no cases.

11 Any one or more motorized vehicle includes car, motor cycle, moped and scooter.

¹² Per Capita Annual Household Income refers to total household income divided by household size. It includes income from all members of the household and from all sources such as agricultural work, non-agricultural work, self-employment, remittances/gifts, wages/salaries from employment, pension income and public/private transfers.

¹³ Based on income reported from household by that particular source.

¹⁴ Wage/salary work refers to income from full-time, part-time, side-jobs odd jobs or other wages or salaries.

¹⁵ Work related pension refers to income from central/state government pension, employer funded pension, privately purchased commercial pension and other state pension schemes.

Government/public transfers includes agriculture subsidies, non-agricultural government subsidies (LPG subsidy, scholarship for education, subsidy for building toilets, subsidy for setting up small scale industries, subsidy for solar panels, etc.), housing assistance, unemployment allowance, Janani Suraksha Yojana (JSY)/any other maternity compensation, compensation under any other health benefits program (other than JSY), Compensation for illness or accident, emergency or disaster relief (flood, earthquake, drought, etc.), debt waiver, compensation for re-settlement (due to slums, dams, road, etc.), assistance for self-employment (like Swarna Jayanti Gram Swarozgar Yojana/ National Rural Livelihood Mission), social security pension schemes (like Indira Gandhi National Old Age Pension Scheme, Indira Gandhi National Disability Pension Scheme) and other government transfers.

¹⁷ Includes different types of health insurance/benefits such as CGHS, ESIS, RSBY, other central/state government health insurance schemes or medical reimbursement from employer etc.

¹⁸ Allied schemes refers to state specific schemes which are based on Rashtriya Swasthya Bima Yojana (RSBY) model.

* Including spouse irrespective of age, "[]" based on fewer than 5 unweighted cases in the numerator or 25 unweighted cases in the denominator.

⁷³ Helper refers to any person/s assisting respondent in any ADL/IADL limitations.

Immediate word recall refers to total number of words recalled from the given list of 10 words immediately.
 Delayed word recall refers to total number of words recalled from the same given list of 10 words after some delay.

⁸⁴ Low vision refers to either low near vision or low distant vision in the better eye with best correction available with the respondent.

⁷² Instrumental Activities of Daily Living (IADL) includes preparing a hot meal, shopping for groceries, making telephone calls, taking medications, doing work around the house or garden, managing money (paying bills and keeping track of expenses) and getting around or finding address in unfamiliar place (any one or more).

⁷⁴ Aids or supportive devices include spectacles and dentures and devices to help you in moving or sitting (such as, walker, walking sticks, wheel chair, adjustable showers stools/commodes, back/neck collar, orthosis/prosthesis).

⁷⁵ Among those respondents who reported using any aid or supportive device(s) to assist them in the activities of daily living.

⁷⁸ Based on Composite International Diagnostic Interview-Short Form (CIDI-SF); respondent who reported that they felt sad, blue or depressed for two-weeks period during last 12 months for all the day long or most of the day.

⁷⁹ Prevalence of measured hypertension refers to those measured with systolic blood pressure of \geq 140 mmHg or diastolic blood pressure of \geq 90 mmHg or both.

⁸⁰ Prevalence of undiagnosed hypertension refers to those undiagnosed by a health professional but whose measured systolic blood pressure was ≥ 140 mmHg or diastolic blood pressure was ≥ 90 mmHg or both.

Untreated hypertension refers to those who reported that they have been diagnosed with hypertension by a health professional and currently measured with hypertension but currently not taking treatment

⁸² Undertreated hypertension refers to those who reported that they have been diagnosed with hypertension by a health professional and currently measured with hypertension but currently taking treatment.

⁸³ Adequately treated hypertension refers to those reported that they have been diagnosed by health professional and currently taking treatment and whose measured systolic blood pressure was < 140 mmHg and diastolic blood pressure was < 90 mmHg.</p>

⁸⁵ Low near vision refers to near vision equal to or poorer than 20/80 and equal to or better than 20/200 in the better eye with best correction available with respondent.

* Including spouse irrespective of age, "[]" based on fewer than 5 unweighted cases in the numerator or 25 unweighted cases in the denominator.

⁸⁷ Blindness refers to those with vision less than 20/200 in distance or could not count finger or perceive light.

90 WHO criteria of classification of waist- hip ratio (WHR)

Male	Female	Risk level		
< 0.90	< 0.85	Low		
≥0.90	≥0.85	High		

⁹¹ Grip strength measures bodily muscle strength and is an overall marker of health among elderly population. Mean grip strength is an average of two readings for dominant hand.

⁸⁶ Low distance vision refers to distance vision equal to or poorer than 20/80 and equal to or better than 20/200 in the better eye with best correction available with respondent.

⁸⁸ Body Mass Index (BMI) refers to weight in kilograms divided by height in meter square (kg/m²). BMI levels have been classified according to WHO classifications: underweight ≤ 18.4; normal=18.5 to 24.9; overweight=25.0 to 29.9; obese ≥30.0

⁸⁹ Metabolic complications: critical limit classification for high risk waist circumference for male is \ge 102 cm and for female is \ge 88cm.

⁹² Includes health post/sub centers, primary health center/urban health center, community health center, district/sub-district hospital, government/tertiary hospital or government AYUSH hospital.

⁹³ Includes private hospital/nursing home, private clinic (OPD based services), NGO/Charity/Trust/Church-run hospital/Private AYUSH hospital. It also includes health care services availed partially from either private or government or NGO.

⁹⁴ Among those who sought out-patient care in the past 12 months and this includes modern allopathic medicines, AYUSH medicines, traditional herbs or medicine, excluding any health supplements.

⁹⁵ The expenditure on last in-patient visit includes consultation charges, medicine charges, test/investigation charge, nursing home charges, surgery and related charges, transportation charges and any other charges.

MEGHALAYA

Introduction

The Longitudinal Ageing Study in India (LASI) is a nationally and state representative longitudinal study of ageing and health. LASI is a national landmark, the largest in the world and, only of its kind in India. Its main goal is to provide valid, reliable and continuous scientific data on the health, social, mental and economic well-being of India's older adult (aged 45 and above) population. These data will help to monitor existing programmes and inform new national health and ageing policies. LASI is undertaken as a globally harmonized study carried out in more than 44 developed and developing countries worldwide; and the survey schedules, protocols and methodologies are harmonized across these countries. These are part of the Health and Retirement Study (HRS) family of longitudinal ageing and retirement surveys. Therefore, LASI data will also serve as an important public resource for national policy making and worldwide comparative research on ageing.

LASI is undertaken under the aegis of the Ministry of Health and Family Welfare (MoHFW), Government of India. The International Institute for Population Sciences (IIPS), Mumbai is the nodal institution for implementing LASI in collaboration with the Harvard T.H.Chan School of Public Health (HSPH) and the University of Southern California (USC).

A. LASI Objectives and Coverage:

The LASI wave-1 survey (2017-18) covers all 30 states and 6 Union Territories of India with a panel sample size of 72,250 older adults aged 45 years and above and their spouses regardless of age. LASI collects data on four major subject domains:

- 1. Health: Disease Burden & Risk Factors (Reported and Measured)
- 2. Health Care and Health Care Financing
- 3. Social: Family, Social Network and Social Welfare Programmes for the Elderly
- 4. Economic: Income, Wealth, Expenditure, Employment, Retirement and Pension

The long-term goal of LASI is to continue for the next 25 years, with respondents surveyed every two years.

LASI Survey Instruments:

The LASI survey instrument comprises three schedules:

- **1. Household Survey Schedule:** Administered to one per household, collects information from interviewing one or more adult member of household. Includes the following modules: Household Roster, Housing and Environment, Household Consumption, Household Assets and Debts, Household Income and Household Health Insurance.
- 2. Individual Survey Schedule: Administered to each respondent aged 45 years and above and their spouses (regardless of age) in the sampled households. Includes the following modules: Demographics, Work, Retirement and Pension, Health (Chronic Diseases and Health Conditions), Functional Health, Family Medical History, Mental Health (Cognition and Depression), Health Behavior and Food Security, Health Care Access and Utilization, Health Care Financing, Family and Social Network, Social Welfare Programmes and Experimental Modules on Time Use, Expectations, Social Connectedness and Vignettes.

In addition, LASI includes an individual module on measured biomarkers:

- Anthropometric Measurements: Height, Weight, Waist Circumference and Hip Circumference.
- Functional Health Markers: Blood Pressure and Pulse Rate, Lung Function Test (Spirometry) and Vision Test (Near and Distance Vision Impairment).

- **Performance Based Markers:** Grip Strength, Timed-Walk and Balance Tests.
- Collection of Dried Blood Spot (DBS) samples: To be tested for variety of molecular biomarkers.
- **3.** In addition, a Community Survey Schedule is administered at the community level (villages in rural areas and census enumeration blocks in urban areas) and is answered by several key informants. The community schedule includes the following sections: Population Characteristics, Infrastructure and Common Resource, Accessibility and Availability of Health Care Services and coverage of Health and Social Welfare Programmes.

Fact Sheet of Key Indicators for the State of Meghalaya

This fact sheet provides information on key indicators (weighted) for the state of Meghalaya. The fieldwork for Meghalaya was conducted from **July through December 2019**. Table-1 provides information about the number of households and individuals interviewed.

Table 1 Number of Households and Individuals interviewed for the state of Meghalaya, LASI Wave 1, 2017-18

Sr. No.	Coverage		Rural	Urban	Male	Female	Total
1.	Household ros	ter completed	885	181	na	na	1066

23	Household Per Capita Food Expenditure as a share of MPCE (%)	59.0	51.0	56.2	
24	Household Per Capita Health Expenditure as a share of MPCE (%)	8.9	14.0	10.7	

[&]quot;-" indicates less number of cases/ no cases.

¹ Based on all households including LASI age-eligible and non-age-eligible households.

² Death rate is calculated based on deaths in the last two calendar years.

 $^{^{\}rm 3}$ Based on LASI age-eligible households only.

⁴ Improved sanitation includes flush or pour flush toilet (which is flushed to piped sewer system/septic tank/ pit latrine), pit latrine, twin pit, composting toilet.

⁵ Open defecation refers to the practice whereby people go out in fields, bushes, forests, open bodies of water, or other open spaces rather than using the toilet to defecate. This information was collected from eligible household respondent.

⁶ Improved drinking water source includes water from pipe, public tap/standpipe, tube well or bore well, dug well, spring water and rain water.

⁷ Clean cooking fuel includes LPG, Biogas and Electricity.

⁸ Indoor pollution refers to households using solid and unclean fuel (for cooking or any other purpose) inside the household and cooking in traditional *chullah/stove* or open fire without any ventilation. Unclean fuel refers to use of kerosene, charcoal, coal, crop residue, wood/shrub and dung cake.

⁹ *Pucca* house refers to a house whose roof, wall and floor is made up of *pucca* (concrete) material.

¹⁰ MPCE is defined as total monthly household consumption expenditure divided by household size. Includes household's per capita spending on food and non-food items including spending on health, education, utilities etc.

House	ehold-Level Key Indicators ³	Rural	Urban	Total
	Household Assets and Debts			
25	Households owning current residence (%)	91.5	66.9	85.9

28	Per Capita Annual Household Income (in INR) ¹²	21789	59634	29461
	Per Capita Annual Household Income by Source (in INR) ¹³			
29	Mean income from agricultural and allied activities	4211	1077	3753
30	Mean income from non-agricultural business or self-employed activities	1912	18659	4839
31	Mean income from wages/salaries ¹⁴	14232	33191	17985
32	Mean income from pension ¹⁵	633	7613	1941
33	Mean income from government/public transfers ¹⁶	222	185	219
	Household Insurance			
34	Households covered by any health insurance (%) ¹⁷	53.6	60.6	55.2
35	Households covered by Rashtriya Swasthya Bima Yojana (RSBY) & allied schemes (%) ¹⁸	53.3	56.5	54.0
36	Households covered by Central Government Health Scheme (CGHS)/Employee State Insurance Scheme (ESIS) (%)	[0.7]	[3.7]	1.4
37	Households covered by medical reimbursement/health insurance from an employer (%)	[0.3]	[3.2]	0.9
38	Households covered by privately purchased commercial health insurance (%)	[0.2]	-	[0.1]

Any one or more motorized vehicle includes car, motor cycle, moped and scooter.

¹⁴ Wage/salary work refers to income from full-time, part-time, side-jobs odd jobs or other wages or salaries.

[&]quot;[]" based on fewer than 5 unweighted cases in the numerator or 25 unweighted cases in the denominator, "-" indicates less number of cases/ no cases.

11 Any one or more motorized vehicle includes one matter in the case in the denominator, "-" indicates less number of cases/ no cases.

¹² Per Capita Annual Household Income refers to total household income divided by household size. It includes income from all members of the household and from all sources such as agricultural work, non-agricultural work, self-employment, remittances/gifts, wages/salaries from employment, pension income and public/private transfers.

¹³ Based on income reported from household by that particular source.

¹⁵ Work related pension refers to income from central state government pension, employer funded pension, privately purchased commercial pension and other state pension schemes.

¹⁶ Government/public transfers includes agriculture subsidies, non-agricultural government subsidies (LPG subsidy, scholarship for education, subsidy for building toilets, subsidy for setting up small scale industries, subsidy for solar panels, etc.), housing assistance, unemployment allowance, Janani Suraksha Yojana (JSY)/any other maternity compensation, compensation under any other health benefits program (other than JSY), Compensation for illness or accident, emergency or disaster relief (flood, earthquake, drought, etc.), debt waiver, compensation for re-settlement (due to slums, dams, road, etc.), assistance for self-employment (like Swarna Jayanti Gram Swarozgar Yojana/ National Rural Livelihood Mission), social security pension schemes (like Indira Gandhi National Old Age Pension Scheme, Indira Gandhi National Widow Pension Scheme, Indira Gandhi National Disability Pension Scheme) and other government transfers.

¹⁷ Includes different types of health insurance/benefits such as CGHS, ESIS, RSBY, other central/state government health insurance schemes or medical reimbursement from employer etc.

¹⁸ Allied schemes refers to state specific schemes which are based on Rashtriya Swasthya Bima Yojana (RSBY) model.

³⁷ Among those who are aware of concessions given by the government for elderly.

³⁹ Currently smoking tobacco refers to smoking any tobacco product such as cigarette, *bidi*, cigar, *hookah* and *cheroot* etc.

⁴³ Refers to yoga/meditation/asanas/pranayama etc. practicing daily or more than once a week.

^{*} Including spouse irrespective of age, na "not applicable", "[]" based on fewer than 5 unweighted cases in the numerator or 25 unweighted cases in the denominator, "-" indicates less number of cases/ no cases.

³⁸ The "Maintenance and Welfare of Parents and Senior Citizens Act" mandates legal obligation on children to financially maintain their parents/provide monthly allowances.

 ⁴⁰ Currently consuming tobacco refers to consumption of any smokeless tobacco product such as chewing tobacco, *gutka* or *pan masala* etc.
 41 Heavy episodic drinking refers to those who reported consumption of at least 60 grams or more (10 grams = 1 standard drink) of pure alcohol on at least one occasion in the past 30 days.

⁴² Those who are either engaged in moderate physical activity (at least 150 minutes throughout the week) or vigorous physical activity (at least 75 minutes throughout the week) or an equivalent combination of moderate- and vigorous-intensity activity.

⁴⁴ For all chronic conditions, the reference period is *ever diagnosed* and diagnosed by MBBS, BDS and AYUSH health professionals.

⁴⁵ Poor Self Rated Health (SRH) includes both poor and very poor self-assessed health status.

⁴⁶ Cardiovascular diseases include hypertension, heart disease and stroke (any one or more).

⁴⁷ Chronic lung diseases include chronic obstructive pulmonary disease (COPD), asthma and chronic bronchitis (any one or more).

⁴⁸ Bone /joint diseases include arthritis, rheumatism and osteoporosis (any one or more).

^{*} Including spouse irrespective of age, na "not applicable", "[]" based on fewer than 5 unweighted cases in the numerator or 25 unweighted cases in the denominator, "-" indicates less number of cases/ no cases.

⁶¹ For prevalence of endemic diseases in India, the reference period is past 2 years (any one or more).

⁶² Any vector-borne disease includes malaria, dengue or chikungunya (any one or more).

⁶³ Any water-borne disease includes diarrhoea/gastroenteritis, typhoid, jaundice or hepatitis (any one or more).

⁶⁴ For symptom based prevalence of health conditions, the reference period is past 2 years.

⁶⁵ Angina pectoris refers to, "a chest pain or discomfort with all the following symptoms: (a) the pain must include either the sternum (any level) or the left arm and left anterior chest (defined as the anterior chest wall between the levels of clavicle and lower end of sternum), (b) pain must be provoked by either hurrying or walking uphill (or by walking on the level, for those who never attempt more), (c) when pain occurs on walking it must make the person either stop or slacken pace, (d) pain must disappear on a majority of occasions in 10 min or less from the time when the person stands still.

⁶⁶ Sleep problems refer to difficulty in falling asleep or staying asleep throughout the night and also feeling unrested during the day (any one or more).

⁶⁷ Reproductive health problems include hot flashes, irregular vaginal discharge, uterine prolapse, fibroids, cysts and vaginal dryness in the past 2 years (any one or more).

⁶⁸ The reference period for Pap Smear and Mammography is past 2 years.

⁶⁹ Biological family members include -father, mother, brother, sister, children and grandchildren.

⁷⁰ Refers to functional limitations lasting more than 3 months.

⁷¹ Activities of Daily Living (ADL) includes dressing, putting on *chappals* or shoes, walking across a room, bathing, eating difficulties, getting in or out of bed (any one or more).

⁷² Instrumental Activities of Daily Living (IADL) includes preparing a hot meal, shopping for groceries, making telephone calls, taking medications, doing work around the house or garden, managing money (paying bills and keeping track of expenses) and getting around or finding address in unfamiliar place (any one or more).

⁷³ Helper refers to any person/s assisting respondent in any ADL/IADL limitations.

⁷⁶ Immediate word recall refers to total number of words recalled from the given list of 10 words immediately.

84 Low vision refers to either low near vision or low distant vision in the better eye with best correction available with the respondent.

⁷⁴ Aids or supportive devices include spectacles and dentures and devices to help you in moving or sitting (such as, walker, walking sticks, wheel chair, adjustable showers stools/commodes, back/neck collar, orthosis/prosthesis).

⁷⁵ Among those respondents who reported using any aid or supportive device(s) to assist them in the activities of daily living.

⁷⁷ Delayed word recall refers to total number of words recalled from the same given list of 10 words after some delay.

⁷⁸ Based on Composite International Diagnostic Interview-Short Form (CIDI-SF); respondent who reported that they felt sad, blue or depressed for two-weeks period during last 12 months for all the day long or most of the day.

⁷⁹ Prevalence of measured hypertension refers to those measured with systolic blood pressure of \geq 140 mmHg or diastolic blood pressure of \geq 90 mmHg or both.

⁸⁰ Prevalence of undiagnosed hypertension refers to those undiagnosed by a health professional but whose measured systolic blood pressure was ≥ 140 mmHg or diastolic blood pressure was ≥ 90 mmHg or both.

⁸¹ Untreated hypertension refers to those who reported that they have been diagnosed with hypertension by a health professional and currently measured with hypertension but currently not taking treatment

⁸² Undertreated hypertension refers to those who reported that they have been diagnosed with hypertension by a health professional and currently measured with hypertension but currently taking treatment.

⁸³ Adequately treated hypertension refers to those reported that they have been diagnosed by health professional and currently taking treatment and whose measured systolic blood pressure was < 140 mmHg and diastolic blood pressure was < 90 mmHg.</p>

⁸⁵ Low near vision refers to near vision equal to or poorer than 20/80 and equal to or better than 20/400 in the better eye with best correction available with respondent.

⁸⁶ Low distance vision refers to distance vision equal to or poorer than 20/80 and equal to or better than 20/200 in the better eye with best correction available with respondent.

⁸⁷ Blindness refers to those with vision less than 20/200 in distance or could not count finger or perceive light.

MIZORAM

Introduction

The Longitudinal Ageing Study in India (LASI) is a nationally and state representative longitudinal study of ageing and health. LASI is a national landmark, the largest in the world and, only of its kind in India. Its main goal is to provide valid, reliable and continuous scientific data on the health, social, mental and economic well-being of India's older adult (aged 45 and above) population. These data will help to monitor existing programmes and inform new national health and ageing policies. LASI is undertaken as a globally harmonized study carried out in more than 44 developed and developing countries worldwide; and the survey schedules, protocols and methodologies are harmonized across these countries. These are part of the Health and Retirement Study (HRS) family of longitudinal ageing and retirement surveys. Therefore, LASI data will also serve as an important public resource for national policy making and worldwide comparative research on ageing.

LASI is undertaken under the aegis of the Ministry of Health and Family Welfare (MoHFW), Government of India. The International Institute for Population Sciences (IIPS), Mumbai is the nodal institution for implementing LASI in collaboration with the Harvard T.H.Chan School of Public Health (HSPH) and the University of Southern California (USC).

A. LASI Objectives and Coverage:

The LASI wave-1 survey (2017-18) covers all 30 states and 6 Union Territories of India with a panel sample size of 72,250 older adults aged 45 years and above and their spouses regardless of age. LASI collects data on four major subject domains:

- 1. Health: Disease Burden & Risk Factors (Reported and Measured)
- 2. Health Care and Health Care Financing
- 3. Social: Family, Social Network and Social Welfare Programmes for the Elderly
- 4. Economic: Income, Wealth, Expenditure, Employment, Retirement and Pension

The long-term goal of LASI is to continue for the next 25 years, with respondents surveyed every two years.

LASI Survey Instruments:

The LASI survey instrument comprises three schedules:

- **1. Household Survey Schedule:** Administered to one per household, collects information from interviewing one or more adult member of household. Includes the following modules: Household Roster, Housing and Environment, Household Consumption, Household Assets and Debts, Household Income and Household Health Insurance.
- 2. Individual Survey Schedule: Administered to each respondent aged 45 years and above and their spouses (regardless of age) in the sampled households. Includes the following modules: Demographics, Work, Retirement and Pension, Health (Chronic Diseases and Health Conditions), Functional Health, Family Medical History, Mental Health (Cognition and Depression), Health Behavior and Food Security, Health Care Access and Utilization, Health Care Financing, Family and Social Network, Social Welfare Programmes and Experimental Modules on Time Use, Expectations, Social Connectedness and Vignettes.

In addition, LASI includes an individual module on measured biomarkers:

- Anthropometric Measurements: Height, Weight, Waist Circumference and Hip Circumference.
- Functional Health Markers: Blood Pressure and Pulse Rate, Lung Function Test (Spirometry) and Vision Test (Near and Distance Vision Impairment).

- **Performance Based Markers:** Grip Strength, Timed-Walk and Balance Tests.
- Collection of Dried Blood Spot (DBS) samples: To be tested for variety of molecular biomarkers.
- **3.** In addition, a Community Survey Schedule is administered at the community level (villages in rural areas and census enumeration blocks in urban areas) and is answered by several key informants. The community schedule includes the following sections: Population Characteristics, Infrastructure and Common Resource, Accessibility and Availability of Health Care Services and coverage of Health and Social Welfare Programmes.

Fact sheet of Key Indicators for the state of Mizoram

This fact sheet provides information on key indicators (weighted) for the state of Mizoram. The fieldwork for Mizoram was conducted from **April through September 2018**. Table-1 provides information about the number of households and individuals interviewed.

Table 1 Number of households and individuals interviewed for the state of Mizoram, LASI Wave 1, 2018-19

Sr. No.	Coverage		Rural	Urban	Male	Female	Total
1.	Household ro	oster completed	553	635	na	na	1188
2.	Households interviewed (with age-eligible individuals)#		360	372	na	na	732
		45-59 years and their spouses irrespective of age	343	372	298	417	715
3.	Individuals Interviewed	60 years and	260	265	266	531	
		All ages	614	632	563	683	1246

na "not applicable"

[#] LASI age-eligible households are those with at least one individual in aged 45 years and above; age-eligible individuals are persons aged 45 years and above and their spouses (regardless of age) in the LASI sampled households.

24	Household Per Capita Health Expenditure as a share of MPCE (%)	9.0	10.3	9.9

[&]quot;-" indicates less number of cases/ no cases.

 $^{^{\}rm I}$ Based on all households including LASI age-eligible and non-age-eligible households.

 $^{^{\}rm 2}$ Death rate is calculated based on deaths in the last two calendar years.

³ Based on LASI age-eligible households only.

⁴ Improved sanitation includes flush or pour flush toilet (which is flushed to piped sewer system/septic tank/ pit latrine), pit latrine, twin pit, composting toilet

⁵ Open defecation refers to the practice whereby people go out in fields, bushes, forests, open bodies of water, or other open spaces rather than using the toilet to defecate. This information was collected from eligible household respondent.

⁶ Improved drinking water source includes water from pipe, public tap/standpipe, tube well or bore well, dug well, spring water and rain water.

⁷ Clean cooking fuel includes LPG, Biogas and Electricity.

⁸ Indoor pollution refers to households using solid and unclean fuel (for cooking or any other purpose) inside the household and cooking in traditional *chullah/stove* or open fire without any ventilation. Unclean fuel refers to use of kerosene, charcoal, coal, crop residue, wood/shrub and dung cake.

⁹ Pucca house refers to a house whose roof, wall and floor is made up of pucca (concrete) material.

¹⁰ MPCE is defined as total monthly household consumption expenditure divided by household size. Includes household's per capita spending on food and non-food items including spending on health, education, utilities etc.

Hou	usehold-Level Key Indicators ³	Rural	Urban	Total

37	Households covered by medical reimbursement/health insurance from an employer (%)	1.2	2.1	1.7
38	Households covered by privately purchased commercial health insurance (%)	[0.6]	[1.0]	0.8

_

[&]quot;[]" based on fewer than 5 unweighted cases in the numerator or 25 unweighted cases in the denominator, "-" indicates less number of cases/ no cases.

11 Any one or more motorized vehicle includes car, motor cycle, moped and scooter.

¹² Per Capita Annual Household Income refers to total household income divided by household size. It includes income from all members of the household and from all sources such as agricultural work, non-agricultural work, self-employment, remittances/gifts, wages/salaries from employment, pension income and public/private transfers.

¹³ Based on income reported from household by that particular source.

¹⁴ Wage/salary work refers to income from full-time, part-time, side-jobs odd jobs or other wages or salaries.

¹⁵ Work related pension refers to income from central/state government pension, employer funded pension, privately purchased commercial pension and other state pension schemes.

¹⁶ Government/public transfers includes agriculture subsidies, non-agricultural government subsidies (LPG subsidy, scholarship for education, subsidy for building toilets, subsidy for setting up small scale industries, subsidy for solar panels, etc.), housing assistance, unemployment allowance, Janani Suraksha Yojana (JSY)/any other maternity compensation, compensation under any other health benefits program (other than JSY), Compensation for illness or accident, emergency or disaster relief (flood, earthquake, drought, etc.), debt waiver, compensation for re-settlement (due to slums, dams, road, etc.), assistance for self-employment (like Swarna Jayanti Gram Swarozgar Yojana/ National Rural Livelihood Mission), social security pension schemes (like Indira Gandhi National Old Age Pension Scheme, Indira Gandhi National Widow Pension Scheme, Indira Gandhi National Disability Pension Scheme) and other government transfers.

¹⁷ Includes different types of health insurance/benefits such as CGHS, ESIS, RSBY, other central/state government health insurance schemes or medical reimbursement from employer etc.

¹⁸ Allied schemes refers to state specific schemes which are based on Rashtriya Swasthya Bima Yojana (RSBY) model.

³⁷ Among those who are aware of concessions given by the government for elderly.

³⁹ Currently smoking tobacco refers to smoking any tobacco product such as cigarette, bidi, cigar, hookah and cheroot etc.

³⁸ The "Maintenance and Welfare of Parents and Senior Citizens Act" mandates legal obligation on children to financially maintain their parents/provide monthly allowances.

 ⁴⁰ Currently consuming tobacco refers to consumption of any smokeless tobacco product such as chewing tobacco, *gutka* or *pan masala* etc.
 41 Heavy episodic drinking refers to those who reported consumption of at least 60 grams or more (10 grams = 1 standard drink) of pure alcohol on at least one occasion in the past 30 days.

⁴² Those who are either engaged in moderate physical activity (at least 150 minutes throughout the week) or vigorous physical activity (at least 75 minutes throughout the week) or an equivalent combination of moderate- and vigorous-intensity activity.

⁴³ Refers to yoga/meditation/asanas/pranayama etc. practicing daily or more than once a week.

⁴⁴ For all chronic conditions, the reference period is *ever diagnosed* and diagnosed by MBBS, BDS and AYUSH health professionals.

⁴⁵ Poor Self Rated Health (SRH) includes both poor and very poor self-assessed health status.

⁴⁶ Cardiovascular diseases include hypertension, heart disease and stroke (any one or more).

⁴⁷ Chronic lung diseases include chronic obstructive pulmonary disease (COPD), asthma and chronic bronchitis (any one or more).

⁴⁸ Bone /joint diseases include arthritis, rheumatism and osteoporosis (any one or more).

^{*} Including spouse irrespective of age, "[]" based on fewer than 5 unweighted cases in the numerator or 25 unweighted cases in the denominator,

[&]quot;-" indicates less number of cases/ no cases.

⁴⁹ Any neurological/psychiatric problem includes depression, alzheimer's disease, dementia or psychiatric problem or neurological problem (any one or

⁵⁰ Psychiatric problems include unipolar or bipolar disorder, schizophrenia etc. (any one or more).

⁵¹ Neurological problems include neuropathy, convulsion, migraine, Parkinson's etc. (any one or more).

⁵² Includes oral cancer, breast cancer, cervical cancer, lung cancer or cancer/malignant tumors originating in any other organs/ body parts (any one or

⁵³ Urogenital conditions include chronic renal failure, incontinence, kidney stone and Benign Prostate Hypertrophy-BPH (only among males) (any one or more).

⁵⁴ Eye or vision related conditions or problems include presbyopia, glaucoma, cataract, myopia, hypermetropia, other eyes problems such as conjunctivitis, eye injury, red eye etc. (any one or more).

⁵⁵ Refractive error includes presbyopia, myopia and hypermetropia with or without astigmatism.

⁵⁶ Common oral health problems include painful teeth, ulcer lasting more than two weeks, bleeding gums, swelling gums, loose teeth, dental cavity/dental caries & soreness or cracks in the corner of the mouth in past 12 months (any one or more).

⁵⁷ Periodontal diseases include bleeding gums, swelling gums or ulcers lasting more than two weeks (any one or more).

⁵⁸ Injury include injuries sustained due to any traffic accident, violence, animal attack or fall in the past 2 years (any one or more).

⁵⁹ Reference period for natural and man-made disaster is past 5 years.

⁶⁰ Health problems due to natural and man-made disaster refers to permanent physical disability, psychological and mental health problems or chronic illness (any one or more).

^{*} Including spouse irrespective of age, na "not applicable", "[]" based on fewer than 5 unweighted cases in the numerator or 25 unweighted cases in the denominator, "-" indicates less number of cases/ no cases.

⁶¹ For prevalence of endemic diseases in India, the reference period is past 2 years (any one or more).

⁶² Any vector-borne disease includes malaria, dengue or chikungunya (any one or more).

⁶³ Any water-borne disease includes diarrhoea/gastroenteritis, typhoid, jaundice or hepatitis (any one or more).

⁶⁴ For symptom based prevalence of health conditions, the reference period is past 2 years.

⁶⁵ Angina pectoris refers to, "a chest pain or discomfort with all the following symptoms: (a) the pain must include either the sternum (any level) or the left arm and left anterior chest (defined as the anterior chest wall between the levels of clavicle and lower end of sternum), (b) pain must be provoked by either hurrying or walking uphill (or by walking on the level, for those who never attempt more), (c) when pain occurs on walking it must make the person either stop or slacken pace, (d) pain must disappear on a majority of occasions in 10 min or less from the time when the person stands still.

⁶⁶ Sleep problems refer to difficulty in falling asleep or staying asleep throughout the night and also feeling unrested during the day (any one or more).

⁶⁷ Reproductive health problems include hot flashes, irregular vaginal discharge, uterine prolapse, fibroids, cysts and vaginal dryness in the past 2 years (any one or more).

⁶⁸ The reference period for Pap Smear and Mammography is past 2 years.

⁶⁹ Biological family members include -father, mother, brother, sister, children and grandchildren.

⁷⁰ Refers to functional limitations lasting more than 3 months.

⁷¹ Activities of Daily Living (ADL) includes dressing, putting on *chappals* or shoes, walking across a room, bathing, eating difficulties, getting in or out of bed (any one or more).

⁷² Instrumental Activities of Daily Living (IADL) includes preparing a hot meal, shopping for groceries, making telephone calls, taking medications, doing work around the house or garden, managing money (paying bills and keeping track of expenses) and getting around or finding address in unfamiliar place (any one or more).

* Including spouse irrespective of age, "[]" based on fewer than 5 unweighted cases in the numerator or 25 unweighted cases in the denominator, "-" indicates less number of cases/ no cases.

⁷³ Helper refers to any person/s assisting respondent in any ADL/IADL limitations.

75 Among those respondents who reported using any aid or supportive device(s) to assist them in the activities of daily living.

⁷⁶ Immediate word recall refers to total number of words recalled from the given list of 10 words immediately.
 ⁷⁷ Delayed word recall refers to total number of words recalled from the same given list of 10 words after some delay.

⁸⁴ Low vision refers to either low near vision or low distant vision in the better eye with best correction available with the respondent.

⁷⁴ Aids or supportive devices include spectacles and dentures and devices to help you in moving or sitting (such as, walker, walking sticks, wheel chair, adjustable showers stools/commodes, back/neck collar, orthosis/prosthesis).

⁷⁸ Based on Composite International Diagnostic Interview-Short Form (CIDI-SF); respondent who reported that they felt sad, blue or depressed for two-weeks period during last 12 months for all the day long or most of the day.

 $^{^{79}}$ Prevalence of measured hypertension refers to those measured with systolic blood pressure of ≥ 140 mmHg or diastolic blood pressure of ≥ 90 mmHg or both.

⁸⁰ Prevalence of undiagnosed hypertension refers to those undiagnosed by a health professional but whose measured systolic blood pressure was ≥ 140 mmHg or diastolic blood pressure was ≥ 90 mmHg or both.

⁸¹ Untreated hypertension refers to those who reported that they have been diagnosed with hypertension by a health professional and currently measured with hypertension but currently not taking treatment

⁸² Undertreated hypertension refers to those who reported that they have been diagnosed with hypertension by a health professional and currently measured with hypertension but currently taking treatment.

⁸³ Adequately treated hypertension refers to those reported that they have been diagnosed by health professional and currently taking treatment and whose measured systolic blood pressure was < 140 mmHg and diastolic blood pressure was < 90 mmHg.</p>

⁸⁵ Low near vision refers to near vision equal to or poorer than 20/80 and equal to or better than 20/400 in the better eye with best correction available with respondent.

⁸⁶ Low distance vision refers to distance vision equal to or poorer than 20/80 and equal to or better than 20/200 in the better eye with best correction available with respondent.

⁸⁷ Blindness refers to those with vision less than 20/200 in distance or could not count finger or perceive light.

NAGALAND

Introduction

The Longitudinal Ageing Study in India (LASI) is a nationally and state representative longitudinal study of ageing and health. LASI is a national landmark, the largest in the world and, only of its kind in India. Its main goal is to provide valid, reliable and continuous scientific data on the health, social, mental and economic well-being of India's older adult (aged 45 and above) population. These data will help to monitor existing programmes and inform new national health and ageing policies. LASI is undertaken as a globally harmonized study carried out in more than 44 developed and developing countries worldwide; and the survey schedules, protocols and methodologies are harmonized across these countries. These are part of the Health and Retirement Study (HRS) family of longitudinal ageing and retirement surveys. Therefore, LASI data will also serve as an important public resource for national policy making and worldwide comparative research on ageing.

LASI is undertaken under the aegis of the Ministry of Health and Family Welfare (MoHFW), Government of India. The International Institute for Population Sciences (IIPS), Mumbai is the nodal institution for implementing LASI in collaboration with the Harvard T. H. Chan School of Public Health (HSPH) and the University of Southern California (USC).

A. LASI Objectives and Coverage:

The LASI wave-1 survey (2017-18) covers all 30 states and 6 Union Territories of India with a panel sample size of 72,250 older adults aged 45 years and above and their spouses regardless of age. LASI collects data on four major subject domains:

- 1. Health: Disease Burden & Risk Factors (Reported and Measured)
- 2. Health Care and Health Care Financing
- 3. Social: Family, Social Network and Social Welfare Programmes for the Elderly
- 4. Economic: Income, Wealth, Expenditure, Employment, Retirement and Pension

The long-term goal of LASI is to continue for the next 25 years, with respondents surveyed every two years.

LASI Survey Instruments:

The LASI survey instrument comprises three schedules:

- 1. Household Survey Schedule: Administered to one per household, collects information from interviewing one or more adult member of household. Includes the following modules: Household Roster, Housing and Environment, Household Consumption, Household Assets and Debts, Household Income and Household Health Insurance.
- 2. Individual Survey Schedule: Administered to each respondent aged 45 years and above and their spouses (regardless of age) in the sampled households. Includes the following modules: Demographics, Work, Retirement and Pension, Health (Chronic Diseases and Health Conditions), Functional Health, Family Medical History, Mental Health (Cognition and Depression), Health Behavior and Food Security, Health Care Access and Utilization, Health Care Financing, Family and Social Network, Social Welfare Programmes and Experimental Modules on Time Use, Expectations, Social Connectedness and Vignettes.

In addition, LASI includes an individual module on measured biomarkers:

- Anthropometric Measurements: Height, Weight, Waist Circumference and Hip Circumference.
- Functional Health Markers: Blood Pressure and Pulse Rate, Lung Function Test (Spirometry) and Vision Test (Near and Distance Vision Impairment).

- **Performance Based Markers:** Grip Strength, Timed-Walk and Balance Tests.
- Collection of Dried Blood Spot (DBS) samples: To be tested for variety of molecular biomarkers.
- **3.** In addition, a Community Survey Schedule is administered at the community level (villages in rural areas and census enumeration blocks in urban areas) and is answered by several key informants. The community schedule includes the following sections: Population Characteristics, Infrastructure and Common Resource, Accessibility and Availability of Health Care Services and coverage of Health and Social Welfare Programmes.

Fact Sheet of Key Indicators for the State of Nagaland

This fact sheet provides information on key indicators (weighted) for the state of Nagaland. The fieldwork for Nagaland was conducted from **April through September 2018**. Table-1 provides information about the number of households and individuals interviewed.

Table 1 Number of Households and Individuals interviewed for the state of Nagaland, LASI Wave 1, 2017-18

Sr. No.	Coverage		Rural	Urban	Male	Female	Total
1.	Household roster completed		821	386	na	na	1207
2.	Households interviewed (with age-eligible individuals)#		569	230	na	na	799
	Individuals Interviewed	45-59 years and their spouses irrespective of age	487	221	288	420	708
3.		60 years and above	452	156	301	307	608
		All ages	939	377	589	727	1316

na "not applicable"

[#] LASI age-eligible households are those with at least one individual in aged 45 years and above; age-eligible individuals are persons aged 45 years and above and their spouses (regardless of age) in the LASI sampled households.

[&]quot;-" indicates less number of cases/ no cases.

¹ Based on all households including LASI age-eligible and non-age-eligible households.

² Death rate is calculated based on deaths in the last two calendar years.

³ Based on LASI age-eligible households only.

⁴ Improved sanitation includes flush or pour flush toilet (which is flushed to piped sewer system/septic tank/ pit latrine), pit latrine, twin pit, composting toilet

⁵ Open defecation refers to the practice whereby people go out in fields, bushes, forests, open bodies of water, or other open spaces rather than using the toilet to defecate. This information was collected from eligible household respondent.

⁶ Improved drinking water source includes water from pipe, public tap/standpipe, tube well or bore well, dug well, spring water and rain water.

⁷ Clean cooking fuel includes LPG, Biogas and Electricity.

⁸ Indoor pollution refers to households using solid and unclean fuel (for cooking or any other purpose) inside the household and cooking in traditional *chullah/stove* or open fire without any ventilation. Unclean fuel refers to use of kerosene, charcoal, coal, crop residue, wood/shrub and dung cake.

⁹ Pucca house refers to a house whose roof, wall and floor is made up of pucca (concrete) material.

¹⁰ MPCE is defined as total monthly household consumption expenditure divided by household size. Includes household's per capita spending on food and non-food items including spending on health, education, utilities etc.

_

Any one or more motorized vehicle includes car, motor cycle, moped and scooter.

¹⁴ Wage/salary work refers to income from full-time, part-time, side-jobs odd jobs or other wages or salaries.

15 Work related pension refers to income from central/state government pension, employer funded pension, privately purchased commercial pension and other state pension schemes.

[&]quot;[]" based on fewer than 5 unweighted cases in the numerator or 25 unweighted cases in the denominator, "-" indicates less number of cases/ no cases.

¹² Per Capita Annual Household Income refers to total household income divided by household size. It includes income from all members of the household and from all sources such as agricultural work, non-agricultural work, self-employment, remittances/gifts, wages/salaries from employment, pension income and public/private transfers.

¹³ Based on income reported from household by that particular source.

¹⁶ Government/public transfers includes agriculture subsidies, non-agricultural government subsidies (LPG subsidy, scholarship for education, subsidy for building toilets, subsidy for setting up small scale industries, subsidy for solar panels, etc.), housing assistance, unemployment allowance, Janani Suraksha Yojana (JSY)/any other maternity compensation, compensation under any other health benefits program (other than JSY), Compensation for illness or accident, emergency or disaster relief (flood, earthquake, drought, etc.), debt waiver, compensation for re-settlement (due to slums, dams, road, etc.), assistance for self-employment (like Swarna Jayanti Gram Swarozgar Yojana/ National Rural Livelihood Mission), social security pension schemes (like Indira Gandhi National Old Age Pension Scheme, Indira Gandhi National Widow Pension Scheme, Indira Gandhi National Disability Pension Scheme) and other government transfers.

¹⁷ Includes different types of health insurance/benefits such as CGHS, ESIS, RSBY, other central/state government health insurance schemes or medical reimbursement from employer etc.

¹⁸ Allied schemes refers to state specific schemes which are based on Rashtriya Swasthya Bima Yojana (RSBY) model.

⁴⁰ Currently consuming tobacco refers to consumption of any smokeless tobacco product such as chewing tobacco, *gutka* or *pan masala* etc.

^{*} Including spouse irrespective of age, na "not applicable", "[]" based on fewer than 5 unweighted cases in the numerator or 25 unweighted cases in the denominator, "-" indicates less number of cases/ no cases.

 $^{^{\}rm 37}$ Among those who are aware about the concessions given by the government for elderly.

³⁸ The "Maintenance and Welfare of Parents and Senior Citizens Act" mandates legal obligation on children to financially maintain their parents/provide monthly allowances.

³⁹ Currently smoking tobacco refers to smoking any tobacco product such as cigarette, bidi, cigar, hookah and cheroot etc.

⁴¹ Heavy episodic drinking refers to those who reported consumption of at least 60 grams or more (10 grams = 1 standard drink) of pure alcohol on at least one occasion in the past 30 days.

⁴² Those who are either engaged in moderate physical activity (at least 150 minutes throughout the week) or vigorous physical activity (at least 75 minutes throughout the week) or an equivalent combination of moderate- and vigorous-intensity activity.

⁴³ Refers to yoga/meditation/asanas/pranayama etc. practicing daily or more than once a week.

⁴⁴ For all chronic conditions, the reference period is *ever diagnosed* and diagnosed by MBBS, BDS and AYUSH health professionals.

⁴⁵ Poor Self Rated Health (SRH) includes both poor and very poor self-assessed health status.

⁴⁶ Cardiovascular diseases include hypertension, heart disease and stroke (any one or more).

⁴⁷ Chronic lung diseases include chronic obstructive pulmonary disease (COPD), asthma and chronic bronchitis (any one or more).

⁴⁸ Bone /joint diseases include arthritis, rheumatism and osteoporosis (any one or more).

⁶¹ For prevalence of endemic diseases in India, the reference period is past 2 years (any one or more).

⁶² Any vector-borne disease includes malaria, dengue or chikungunya (any one or more).

⁶³ Any water-borne disease includes diarrhoea/gastroenteritis, typhoid, jaundice or hepatitis (any one or more).

 $^{^{64}}$ For symptom based prevalence of health conditions, the reference period is past 2 years.

⁶⁵ Angina pectoris refers to, "a chest pain or discomfort with all the following symptoms: (a) the pain must include either the sternum (any level) or the left arm and left anterior chest (defined as the anterior chest wall between the levels of clavicle and lower end of sternum), (b) pain must be provoked by either hurrying or walking uphill (or by walking on the level, for those who never attempt more), (c) when pain occurs on walking it must make the person either stop or slacken pace, (d) pain must disappear on a majority of occasions in 10 min or less from the time when the person stands still.

⁶⁶ Sleep problems refer to difficulty in falling asleep or staying asleep throughout the night and also feeling unrested during the day (anyone or more).

⁶⁷ Reproductive health problems include hot flashes, irregular vaginal discharge, uterine prolapse, fibroids, cysts and vaginal dryness in the past 2 years (any one or more).

⁶⁸ The reference period for Pap Smear and Mammography is past 2 years.

⁶⁹ Biological family members include -father, mother, brother, sister, children and grandchildren.

⁷⁰ Refers to functional limitations lasting more than 3 months.

⁷¹ Activities of Daily Living (ADL) includes dressing, putting on *chappals* or shoes, walking across a room, bathing, eating difficulties, getting in or out of bed (any one or more).

⁷² Instrumental Activities of Daily Living (IADL) includes preparing a hot meal, shopping for groceries, making telephone calls, taking medications, doing work around the house or garden, managing money (paying bills and keeping track of expenses) and getting around or finding address in unfamiliar place (any one or more).

⁷³ Helper refers to any person/s assisting respondent in any ADL/IADL limitations.

⁷⁶ Immediate word recall refers to total number of words recalled from the given list of 10 words immediately.

⁸⁴ Low vision refers to either low near vision or low distant vision in the better eye with best correction available with the respondent.

Aids or supportive devices include spectacles and dentures and devices to help you in moving or sitting (such as, walker, walking sticks, wheel chair, adjustable showers stools/commodes, back/neck collar, orthosis/prosthesis).

⁷⁵ Among those respondents who reported using any aid or supportive device(s) to assist them in the activities of daily living.

⁷⁷ Delayed word recall refers to total number of words recalled from the same given list of 10 words after some delay.

⁷⁸ Based on Composite International Diagnostic Interview-Short Form (CIDI-SF); respondent who reported that they felt sad, blue or depressed for two-weeks period during last 12 months for all the day long or most of the day.

⁷⁹ Prevalence of measured hypertension refers to those measured with systolic blood pressure of ≥ 140 mmHg or diastolic blood pressure of ≥ 90 mmHg or both.

⁸⁰ Prevalence of undiagnosed hypertension refers to those undiagnosed by a health professional but whose measured systolic blood pressure was ≥ 140 mmHg or diastolic blood pressure was ≥ 90 mmHg or both.

⁸¹ Untreated hypertension refers to those who reported that they have been diagnosed with hypertension by a health professional and currently measured with hypertension but currently not taking treatment

⁸² Undertreated hypertension refers to those who reported that they have been diagnosed with hypertension by a health professional and currently measured with hypertension but currently taking treatment.

⁸³ Adequately treated hypertension refers to those reported that they have been diagnosed by health professional and currently taking treatment and whose measured systolic blood pressure was < 140 mmHg and diastolic blood pressure was < 90 mmHg.</p>

⁸⁵ Low near vision refers to near vision equal to or poorer than 20/80 and equal to or better than 20/400 in the better eye with best correction available with respondent.

⁸⁶ Low distance vision refers to distance vision equal to or poorer than 20/80 and equal to or better than 20/200 in the better eye with best correction available with respondent.

⁸⁷ Blindness refers to those with vision less than 20/200 in distance or could not count finger or perceive light.

⁹⁰ WHO criteria of classification of waist- hip ratio (WHR)

Male	Female	Risk level
< 0.90	< 0.85	Low
≥0.90	≥0.85	High

⁹¹ Grip strength measures bodily muscle strength and is an overall marker of health among elderly population. Mean grip strength is an average of two readings for dominant hand.

⁸⁸ Body Mass Index (BMI) refers to weight in kilograms divided by height in meter square (kg/m²). BMI levels have been classified according to WHO classifications: underweight ≤ 18.4; normal=18.5 to 24.9; overweight=25.0 to 29.9; obese ≥30.0

⁸⁹ Metabolic complications: critical limit classification for high risk waist circumference for male is ≥102 cm and for female is ≥88cm.

⁹² Includes health post/sub centers, primary health center/urban health center, community health center, district/sub-district hospital, government/tertiary hospital or government AYUSH hospital.

⁹³ Includes private hospital/nursing home, private clinic (OPD based services), NGO/Charity/Trust/Church-run hospital/Private AYUSH hospital. It also includes health care services availed partially from either private or government or NGO.

⁹⁴ Among those who sought out-patient care in the past 12 months and this includes modern allopathic medicines, AYUSH medicines, traditional herbs or medicine, excluding any health supplements.

⁹⁵ The expenditure on last in-patient visit includes consultation charges, medicine charges, test/investigation charge, nursing home charges, surgery and related charges, transportation charges and any other charges.

⁹⁶ Income includes personal income as well as income from any of the household members.

ODISHA

Introduction

The Longitudinal Ageing Study in India (LASI) is a nationally and state representative longitudinal study of ageing and health. LASI is a national landmark, the largest in the world and, only of its kind in India. Its main goal is to provide valid, reliable and continuous scientific data on the health, social, mental and economic well-being of India's older adult (aged 45 and above) population. These data will help to monitor existing programmes and inform new national health and ageing policies. LASI is undertaken as a globally harmonized study carried out in more than 44 developed and developing countries worldwide; and the survey schedules, protocols and methodologies are harmonized across these countries. These are part of the Health and Retirement Study (HRS) family of longitudinal ageing and retirement surveys. Therefore, LASI data will also serve as an important public resource for national policy making and worldwide comparative research on ageing.

LASI is undertaken under the aegis of the Ministry of Health and Family Welfare (MoHFW), Government of India. The International Institute for Population Sciences (IIPS), Mumbai is the nodal institution for implementing LASI in collaboration with the Harvard T.H.Chan School of Public Health (HSPH) and the University of Southern California (USC).

A. LASI Objectives and Coverage:

The LASI wave-1 survey (2017-18) covers all 30 states and 6 Union Territories of India with a panel sample size of 72,250 older adults aged 45 years and above and their spouses regardless of age. LASI collects data on four major subject domains:

- 1. Health: Disease Burden & Risk Factors (Reported and Measured)
- 2. Health Care and Health Care Financing
- 3. Social: Family, Social Network and Social Welfare Programmes for the Elderly
- 4. Economic: Income, Wealth, Expenditure, Employment, Retirement and Pension

The long-term goal of LASI is to continue for the next 25 years, with respondents surveyed every two years.

LASI Survey Instruments:

The LASI survey instrument comprises three schedules:

- **1. Household Survey Schedule:** Administered to one per household, collects information from interviewing one or more adult member of household. Includes the following modules: Household Roster, Housing and Environment, Household Consumption, Household Assets and Debts, Household Income and Household Health Insurance.
- 2. Individual Survey Schedule: Administered to each respondent aged 45 years and above and their spouses (regardless of age) in the sampled households. Includes the following modules: Demographics, Work, Retirement and Pension, Health (Chronic Diseases and Health Conditions), Functional Health, Family Medical History, Mental Health (Cognition and Depression), Health Behavior and Food Security, Health Care Access and Utilization, Health Care Financing, Family and Social Network, Social Welfare Programmes and Experimental Modules on Time Use, Expectations, Social Connectedness and Vignettes.

In addition, LASI includes an individual module on measured biomarkers:

- Anthropometric Measurements: Height, Weight, Waist Circumference and Hip Circumference.
- Functional Health Markers: Blood Pressure and Pulse Rate, Lung Function Test (Spirometry) and Vision Test (Near and Distance Vision Impairment).

- **Performance Based Markers:** Grip Strength, Timed-Walk and Balance Tests.
- Collection of Dried Blood Spot (DBS) samples: To be tested for variety of molecular biomarkers.
- **3.** In addition, a Community Survey Schedule is administered at the community level (villages in rural areas and census enumeration blocks in urban areas) and is answered by several key informants. The community schedule includes the following sections: Population Characteristics, Infrastructure and Common Resource, Accessibility and Availability of Health Care Services and coverage of Health and Social Welfare Programmes.

Fact Sheet of Key Indicators for the State of Odisha

This fact sheet provides information on key indicators (weighted) for the state of Odisha. The fieldwork for Odisha was conducted from **August through December 2018**. Table-1 provides information about the number of households and individuals interviewed.

Table 1 Number of Households and Individuals interviewed for the state of Odisha, LASI Wave 1, 2017-18

Sr. No.	C	overage	Rural	Urban	Male	Female	Total
1.	Household roster completed		1943	368	na	na	2311

	Sex Ratio (Females per 1000 Males)			
10	All ages	1073	1080	1074
11	60 + population	1055	1130	1067
	Death Rate (per thousand population) ²			
12	All ages	9.5	3.7	8.3
13	60 + population	40.6	25.8	37.5
House	hold-Level Key Indicators ³	Rural	Urban	Total
	Housing and Environment			
14	Households with improved sanitation (%) ⁴	50.1	86.1	56.2
15	Households practicing open defecation (%) ⁵	49.9	13.4	43.8
16	Households with water facility inside dwelling/own yard (%)	34.9	79.8	42.5
17	Households with improved drinking water source (%) ⁶	99.9	99.4	99.8
18	Households with electricity (%)	87.3	96.8	88.9
19	Households using clean cooking fuel (%) ⁷	16.4	78.6	26.8
20	Households exposed to indoor pollution (%) ⁸	11.8	6.8	11.0
21	Households with <i>pucca</i> house (%) ⁹	68.1	89.1	72.8
	Household Consumption			
22	Household Monthly Per Capita Consumption Expenditure (MPCE) in INR ¹⁰	2067	3330	2316
23	Household Per Capita Food Expenditure as a share of MPCE (%)	58.6	44.8	54.7
24	Household Per Capita Health Expenditure as a share of MPCE (%)	13.1	13.0	13.1

 $^{^{\}rm l}$ Based on all households including LASI age-eligible and non-age-eligible households.

² Death rate is calculated based on deaths in the last two calendar years.

³ Based on LASI age-eligible households only.

⁴ Improved sanitation includes flush or pour flush toilet (which is flushed to piped sewer system/septic tank/ pit latrine), pit latrine, twin pit, composting toilet

⁵ Open defecation refers to the practice whereby people go out in fields, bushes, forests, open bodies of water, or other open spaces rather than using the toilet to defecate. This information was collected from eligible household respondent.

⁶ Improved drinking water source includes water from pipe, public tap/standpipe, tube well or bore well, dug well, spring water and rain water.

⁷ Clean cooking fuel includes LPG, Biogas and Electricity.

⁸ Indoor pollution refers to households using solid and unclean fuel (for cooking or any other purpose) inside the household and cooking in traditional *chullah/stove* or open fire without any ventilation. Unclean fuel refers to use of kerosene, charcoal, coal, crop residue, wood/shrub and dung cake.

⁹ *Pucca* house refers to a house whose roof, wall and floor is made up of *pucca* (concrete) material.

¹⁰ MPCE is defined as total monthly household consumption expenditure divided by household size. Includes household's per capita spending on food and non-food items including spending on health, education, utilities etc.

House	hold-Level Key Indicators ³	Rural	Urban	Total
	Household Assets and Debts			
25	Households owning current residence (%)	97.9	82.8	95.4
26	Households owning television, refrigerator, mobile phone and any motorized vehicle (%) ¹¹		48.6	15.8
27	Households who had taken any loan (%)	41.6	36.7	40.7
	Household Income			
28	Per Capita Annual Household Income (in INR) ¹²	32314	64761	38697

29	Mean income from agricultural and allied activities	8639	1837	7308
30	Mean income from non-agricultural business or self- employed activities	3771	22887	7519
31	Mean income from wages/salaries ¹⁴		24922	14021
32	Mean income from pension ¹⁵	2235	11080	3970
33	Mean income from government/public transfers ¹⁶	2310	1427	2137
	Household Insurance			
34	Households covered by any health insurance (%) ¹⁷	69.9	22.6	62.0
35	Households covered by Rashtriya Swasthya Bima Yojana (RSBY) & allied schemes (%) ¹⁸	70.0	19.1	61.6
36	Households covered by Central Government Health Scheme (CGHS)/Employee State Insurance Scheme (ESIS) (%)	0.3	[1.4]	0.4
37	Households covered by medical reimbursement/health insurance from an employer (%)	[0.1]	[0.3]	[0.2]
38	Households covered by privately purchased commercial health insurance (%)	[0.2]	[2.0]	0.5

Any one or more motorized vehicle includes car, motor cycle, moped and scooter.

¹⁴ Wage/salary work refers to income from full-time, part-time, side-jobs odd jobs or other wages or salaries.

[&]quot;[]" based on fewer than 5 unweighted cases in the numerator or 25 unweighted cases in the denominator.

¹² Per Capita Annual Household Income refers to total household income divided by household size. It includes income from all members of the household and from all sources such as agricultural work, non-agricultural work, self-employment, remittances/gifts, wages/salaries from employment, pension income and public/private transfers.

¹³ Based on income reported from household by that particular source.

¹⁵ Work related pension refers to income from central/state government pension, employer funded pension, privately purchased commercial pension and other state pension schemes.

¹⁶ Government/public transfers includes agriculture subsidies, non-agricultural government subsidies (LPG subsidy, scholarship for education, subsidy for building toilets, subsidy for setting up small scale industries, subsidy for solar panels, etc.), housing assistance, unemployment allowance, Janani Suraksha Yojana (JSY)/any other maternity compensation, compensation under any other health benefits program (other than JSY), Compensation for illness or accident, emergency or disaster relief (flood, earthquake, drought, etc.), debt waiver, compensation for re-settlement (due to slums, dams, road, etc.), assistance for self-employment (like Swarna Jayanti Gram Swarozgar Yojana/ National Rural Livelihood Mission), social security pension schemes (like Indira Gandhi National Old Age Pension Scheme, Indira Gandhi National Widow Pension Scheme, Indira Gandhi National Disability Pension Scheme) and other government transfers.

¹⁷ Includes different types of health insurance/benefits such as CGHS, ESIS, RSBY, other central/state government health insurance schemes or medical reimbursement from employer etc.

¹⁸ Allied schemes refers to state specific schemes which are based on Rashtriya Swasthya Bima Yojana (RSBY) model.

* Including spouse irrespective of age, "[]" based on fewer than 5 unweighted cases in the numerator or 25 unweighted cases in the denominator,

[&]quot;-" indicates less number of cases/ no cases.

⁴⁹ Any neurological/psychiatric problem includes depression, alzheimer's disease, dementia or psychiatric problem or neurological problem (any one or more).

⁵⁰ Psychiatric problems include unipolar or bipolar disorder, schizophrenia etc. (any one or more).

⁵¹ Neurological problems include neuropathy, convulsion, migraine, Parkinson's etc. (any one or more).

⁵² Includes oral cancer, breast cancer, cervical cancer, lung cancer or cancer/malignant tumors originating in any other organs/ body parts (any one or more).

⁵³ Urogenital conditions include chronic renal failure, incontinence, kidney stone and Benign Prostate Hypertrophy-BPH (only among males) (any one or more).

⁵⁴ Eye or vision related conditions or problems include presbyopia, glaucoma, cataract, myopia, hypermetropia, other eyes problems such as conjunctivitis, eye injury, red eye etc. (any one or more).

⁵⁵ Refractive error includes presbyopia, myopia and hypermetropia with or without astigmatism.

⁵⁶ Common oral health problems include painful teeth, ulcer lasting more than two weeks, bleeding gums, swelling gums, loose teeth, dental cavity/dental caries & soreness or cracks in the corner of the mouth in past 12 months (any one or more).

⁵⁷ Periodontal diseases include bleeding gums, swelling gums or ulcers lasting more than two weeks (any one or more).

⁵⁸ Injury include injuries sustained due to any traffic accident, violence, animal attack or fall in the past 2 years (any one or more).

⁵⁹ Reference period for natural and man-made disaster is past 5 years.

⁶⁰ Health problems due to natural and man-made disaster refers to permanent physical disability, psychological and mental health problems or chronic illness (any one or more).

^{*} Including spouse irrespective of age, na "not applicable", "[]" based on fewer than 5 unweighted cases in the numerator or 25 unweighted cases in the denominator, "-" indicates less number of cases/ no cases.

⁶¹ For prevalence of endemic diseases in India, the reference period is past 2 years (any one or more).

⁶² Any vector-borne disease includes malaria, dengue or chikungunya (any one or more).

⁶³ Any water-borne disease includes diarrhoea/gastroenteritis, typhoid, jaundice or hepatitis (any one or more).

⁶⁴ For symptom based prevalence of health conditions, the reference period is past 2 years.

⁶⁵ Angina pectoris refers to, "a chest pain or discomfort with all the following symptoms: (a) the pain must include either the sternum (any level) or the left arm and left anterior chest (defined as the anterior chest wall between the levels of clavicle and lower end of sternum), (b) pain must be provoked by either hurrying or walking uphill (or by walking on the level, for those who never attempt more), (c) when pain occurs on walking it must make the person either stop or slacken pace, (d) pain must disappear on a majority of occasions in 10 min or less from the time when the person stands still.

⁶⁶ Sleep problems refer to difficulty in falling asleep or staying asleep throughout the night and also feeling unrested during the day (any one or more).

⁶⁷ Reproductive health problems include hot flashes, irregular vaginal discharge, uterine prolapse, fibroids, cysts and vaginal dryness in the past 12 months (any one or more).

⁶⁸ The reference period for Pap Smear and Mammography is past 2 years.

⁶⁹ Biological family members include -father, mother, brother, sister, children and grandchildren.

⁷⁰ Refers to functional limitations lasting more than 3 months.

⁷¹ Activities of Daily Living (ADL) includes dressing, putting on *chappals* or shoes, walking across a room, bathing, eating difficulties, getting in or out of bed (any one or more).

⁷² Instrumental Activities of Daily Living (IADL) includes preparing a hot meal, shopping for groceries, making telephone calls, taking medications, doing work around the house or garden, managing money (paying bills and keeping track of expenses) and getting around or finding address in unfamiliar place (any one or more).

* Including spouse irrespective of age, "[]" based on fewer than 5 unweighted cases in the numerator or 25 unweighted cases in the denominator.

⁷³ Helper refers to any person/s assisting respondent in any ADL/IADL limitations.

⁷⁵ Among those respondents who reported using any aid or supportive device(s) to assist them in the activities of daily living.

⁷⁷ Delayed word recall refers to total number of words recalled from the same given list of 10 words after some delay.

⁸⁴ Low vision refers to either low near vision or low distant vision in the better eye with best correction available with the respondent.

⁷⁴ Aids or supportive devices include spectacles and dentures and devices to help you in moving or sitting (such as, walker, walking sticks, wheel chair, adjustable showers stools/commodes, back/neck collar, orthosis/prosthesis).

⁷⁶ Immediate word recall refers to total number of words recalled from the given list of 10 words immediately.

⁷⁸ Based on Composite International Diagnostic Interview-Short Form (CIDI-SF); respondent who reported that they felt sad, blue or depressed for two-weeks period during last 12 months for all the day long or most of the day.

⁷⁹ Prevalence of measured hypertension refers to those measured with systolic blood pressure of \geq 140 mmHg or diastolic blood pressure of \geq 90 mmHg or both.

⁸⁰ Prevalence of undiagnosed hypertension refers to those undiagnosed by a health professional but whose measured systolic blood pressure was ≥ 140 mmHg or diastolic blood pressure was ≥ 90 mmHg or both.

⁸¹ Untreated hypertension refers to those who reported that they have been diagnosed with hypertension by a health professional and currently measured with hypertension but currently not taking treatment

⁸² Undertreated hypertension refers to those who reported that they have been diagnosed with hypertension by a health professional and currently measured with hypertension but currently taking treatment.

⁸³ Adequately treated hypertension refers to those reported that they have been diagnosed by health professional and currently taking treatment and whose measured systolic blood pressure was < 140 mmHg and diastolic blood pressure was < 90 mmHg.

⁸⁵ Low near vision refers to near vision equal to or poorer than 20/80 and equal to or better than 20/400 in the better eye with best correction available with respondent.

⁸⁶ Low distance vision refers to distance vision equal to or poorer than 20/80 and equal to or better than 20/200 in the better eye with best correction available with respondent.

⁸⁷ Blindness refers to those with vision less than 20/200 in distance or could not count finger or perceive light.

Introduction

The Longitudinal Ageing Study in India (LASI) is a nationally and state representative longitudinal study of ageing and health. LASI is a national landmark, the largest in the world and, only of its kind in India. Its main goal is to provide valid, reliable and continuous scientific data on the health, social, mental and economic well-being of India's older adult (aged 45 and above) population. These data will help to monitor existing programmes and inform new national health and ageing policies. LASI is undertaken as a globally harmonized study carried out in more than 44 developed and developing countries worldwide; and the survey schedules, protocols and methodologies are harmonized across these countries. These are part of the Health and Retirement Study (HRS) family of longitudinal ageing and retirement surveys. Therefore, LASI data will also serve as an important public resource for national policy making and worldwide comparative research on ageing.

LASI is undertaken under the aegis of the Ministry of Health and Family Welfare (MoHFW), Government of India. The International Institute for Population Sciences (IIPS), Mumbai is the nodal institution for implementing LASI in collaboration with the Harvard T.H.Chan School of Public Health (HSPH) and the University of Southern California (USC).

A. LASI Objectives and Coverage:

The LASI wave-1 survey (2017-18) covers all 30 states and 6 Union Territories of India with a panel sample size of 72,250 older adults aged 45 years and above and their spouses regardless of age. LASI collects data on four major subject domains:

- 1. Health: Disease Burden & Risk Factors (Reported and Measured)
- 2. Health Care and Health Care Financing
- 3. Social: Family, Social Network and Social Welfare Programmes for the Elderly
- 4. Economic: Income, Wealth, Expenditure, Employment, Retirement and Pension

The long-term goal of LASI is to continue for the next 25 years, with respondents surveyed every two years.

LASI Survey Instruments:

The LASI survey instrument comprises three schedules:

- **1. Household Survey Schedule**: Administered to one per household, collects information from interviewing one or more adult member of household. Includes the following modules: Household Roster, Housing and Environment, Household Consumption, Household Assets and Debts, Household Income and Household Health Insurance.
- 2. Individual Survey Schedule: Administered to each respondent aged 45 years and above and their spouses (regardless of age) in the sampled households. Includes the following modules: Demographics, Work, Retirement and Pension, Health (Chronic Diseases and Health Conditions), Functional Health, Family Medical History, Mental Health (Cognition and Depression), Health Behavior and Food Security, Health Care Access and Utilization, Health Care Financing, Family and Social Network, Social Welfare Programmes and Experimental Modules on Time Use, Expectations, Social Connectedness and Vignettes.

In addition, LASI includes an individual module on measured biomarkers:

- Anthropometric Measurements: Height, Weight, Waist Circumference and Hip Circumference.
- **Functional Health Markers**: Blood Pressure and Pulse Rate, Lung Function Test (Spirometry) and Vision Test (Near and Distance Vision Impairment).

- **Performance Based Markers:** Grip Strength, Timed-Walk and Balance Tests.
- Collection of Dried Blood Spot (DBS) samples: To be tested for variety of molecular biomarkers.
- **3.** In addition, a Community Survey Schedule is administered at the community level (villages in rural areas and census enumeration blocks in urban areas) and is answered by several key informants. The community schedule includes the following sections: Population Characteristics, Infrastructure and Common Resource, Accessibility and Availability of Health Care Services and coverage of Health and Social Welfare Programmes.

Fact Sheet of Key Indicators for the Union Territory of Puducherry

This fact sheet provides information on key indicators (weighted) for the union territory of Puducherry. The fieldwork for Puducherry was conducted from **September through December 2017**. Table-1 provides information about the number of households and individuals interviewed.

Table 1 Number of Households and Individuals interviewed for the union territory of Puducherry, LASI Wave 1, 2017-18

¹ Based on all households including LASI age-eligible and non-age-eligible households.

 $^{^{\}rm 2}$ Death rate is calculated based on deaths in the last two calendar years.

³ Based on LASI age-eligible households only.

⁴ Improved sanitation includes flush or pour flush toilet (which is flushed to piped sewer system/septic tank/ pit latrine), pit latrine, twin pit, composting toilet.

⁵ Open defecation refers to the practice whereby people go out in fields, bushes, forests, open bodies of water, or other open spaces rather than using the toilet to defecate. This information was collected from eligible household respondent.

⁶ Improved drinking water source includes water from pipe, public tap/standpipe, tube well or bore well, dug well, spring water and rain water.

⁷ Clean cooking fuel includes LPG, Biogas and Electricity.

⁸ Indoor pollution refers to households using solid and unclean fuel (for cooking or any other purpose) inside the household and cooking in traditional *chullah/stove* or open fire without any ventilation. Unclean fuel refers to use of kerosene, charcoal, coal, crop residue, wood/shrub and dung cake.

⁹ *Pucca* house refers to a house whose roof, wall and floor is made up of *pucca* (concrete) material.

¹⁰ MPCE is defined as total monthly household consumption expenditure divided by household size. Includes household's per capita spending on food and non-food items including spending on health, education, utilities etc.

_

Any one or more motorized vehicle includes car, motor cycle, moped and scooter.

¹⁴ Wage/salary work refers to income from full-time, part-time, side-jobs odd jobs or other wages or salaries.

[&]quot;[]" based on fewer than 5 unweighted cases in the numerator or 25 unweighted cases in the denominator, "-" indicates less number of cases/ no cases.

¹² Per Capita Annual Household Income refers to total household income divided by household size. It includes income from all members of the household and from all sources such as agricultural work, non-agricultural work, self-employment, remittances/gifts, wages/salaries from employment, pension income and public/private transfers.

¹³ Based on income reported from household by that particular source.

¹⁵ Work related pension refers to income from central/state government pension, employer funded pension, privately purchased commercial pension and other state pension schemes.

¹⁶ Government/public transfers includes agriculture subsidies, non-agricultural government subsidies (LPG subsidy, scholarship for education, subsidy for building toilets, subsidy for setting up small scale industries, subsidy for solar panels, etc.), housing assistance, unemployment allowance, Janani Suraksha Yojana (JSY)/any other maternity compensation, compensation under any other health benefits program (other than JSY), Compensation for illness or accident, emergency or disaster relief (flood, earthquake, drought, etc.), debt waiver, compensation for re-settlement (due to slums, dams, road, etc.), assistance for self-employment (like Swarna Jayanti Gram Swarozgar Yojana/ National Rural Livelihood Mission), social security pension schemes (like Indira Gandhi National Old Age Pension Scheme, Indira Gandhi National Widow Pension Scheme, Indira Gandhi National Disability Pension Scheme) and other government transfers.

¹⁷ Includes different types of health insurance/benefits such as CGHS, ESIS, RSBY, other central/state government health insurance schemes or medical reimbursement from employer etc.

¹⁸ Allied schemes refers to state specific schemes which are based on Rashtriya Swasthya Bima Yojana (RSBY) model.

⁵⁴ Eye or vision related conditions or problems include presbyopia, glaucoma, cataract, myopia, hypermetropia, other eyes problems such as conjunctivitis, eye injury, red eye etc. (any one or more).

⁵⁵ Refractive error includes presbyopia, myopia and hypermetropia with or without astigmatism.

⁵⁶ Common oral health problems include painful teeth, ulcer lasting more than two weeks, bleeding gums, swelling gums, loose teeth, dental cavity/dental caries & soreness or cracks in the corner of the mouth in past 12 months (any one or more).

⁵⁷ Periodontal diseases include bleeding gums, swelling gums or ulcers lasting more than two weeks (any one or more).

⁵⁸ Injury include injuries sustained due to any traffic accident, violence, animal attack or fall in the past 2 years (any one or more).

⁵⁹ Reference period for natural and man-made disaster is past 5 years.

⁶² Any vector-borne disease includes malaria, dengue or chikungunya (any one or more).

⁶⁴ For symptom based prevalence of health conditions, the reference period is past 2 years.

^{*} Including spouse irrespective of age, na "not applicable", "[]" based on fewer than 5 unweighted cases in the numerator or 25 unweighted cases in the denominator, "-" indicates less number of cases/ no cases.

⁶⁰ Health problems due to natural and man-made disaster refers to permanent physical disability, psychological and mental health problems or chronic illness (any one or more).

⁶¹ For prevalence of endemic diseases in India, the reference period is past 2 years (any one or more).

⁶³ Any water-borne disease includes diarrhoea/gastroenteritis, typhoid, jaundice or hepatitis (any one or more).

⁶⁵ Angina pectoris refers to, "a chest pain or discomfort with all the following symptoms: (a) the pain must include either the sternum (any level) or the left arm and left anterior chest (defined as the anterior chest wall between the levels of clavicle and lower end of sternum), (b) pain must be provoked by either hurrying or walking uphill (or by walking on the level, for those who never attempt more), (c) when pain occurs on walking it must make the person either stop or slacken pace, (d) pain must disappear on a majority of occasions in 10 min or less from the time when the person stands still.

⁶⁶ Sleep problems refer to difficulty in falling asleep or staying asleep throughout the night and also feeling unrested during the day (any one or more).

⁶⁷ Reproductive health problems include hot flashes, irregular vaginal discharge, uterine prolapse, fibroids, cysts and vaginal dryness in the past 12 months (any one or more).

⁶⁸ The reference period for Pap Smear and Mammography is past 2 years.

⁶⁹ Biological family members include -father, mother, brother, sister, children and grandchildren.

* Including spouse irrespective of age, "[]" based on fewer than 5 unweighted cases in the numerator or 25 unweighted cases in the denominator, "-" indicates less number of cases/ no cases.

⁷¹ Activities of Daily Living (ADL) includes dressing, putting on *chappals* or shoes, walking across a room, bathing, eating difficulties, getting in or out of bed (any one or more).

⁷³ Helper refers to any person/s assisting respondent in any ADL/IADL limitations.

⁷⁶ Immediate word recall refers to total number of words recalled from the given list of 10 words immediately.

⁷⁰ Refers to functional limitations lasting more than 3 months.

⁷² Instrumental Activities of Daily Living (IADL) includes preparing a hot meal, shopping for groceries, making telephone calls, taking medications, doing work around the house or garden, managing money (paying bills and keeping track of expenses) and getting around or finding address in unfamiliar place (any one or more).

⁷⁴ Aids or supportive devices include spectacles and dentures and devices to help you in moving or sitting (such as, walker, walking sticks, wheel chair, adjustable showers stools/ commodes, back/neck collar, orthosis/prosthesis).

⁷⁵ Among those respondents who reported using any aid or supportive device(s) to assist them in the activities of daily living.

 $^{^{77}}$ Delayed word recall refers to total number of words recalled from the same given list of 10 words after some delay.

⁷⁸ Based on Composite International Diagnostic Interview-Short Form (CIDI-SF); respondent who reported that they felt sad, blue or depressed for two-weeks period during last 12 months for all the day long or most of the day.

⁷⁹ Prevalence of measured hypertension refers to those measured with systolic blood pressure of ≥ 140 mmHg or diastolic blood pressure of ≥ 90 mmHg or both

⁸⁰ Prevalence of undiagnosed hypertension refers to those undiagnosed by a health professional but whose measured systolic blood pressure was ≥ 140 mmHg or diastolic blood pressure was ≥ 90 mmHg or both.

⁸¹ Untreated hypertension refers to those who reported that they have been diagnosed with hypertension by a health professional and currently measured with hypertension but currently not taking treatment

⁸² Undertreated hypertension refers to those who reported that they have been diagnosed with hypertension by a health professional and currently measured with hypertension but currently taking treatment.

⁸³ Adequately treated hypertension refers to those reported that they have been diagnosed by health professional and currently taking treatment and whose measured systolic blood pressure was < 140 mmHg and diastolic blood pressure was < 90 mmHg.</p>

* Including spouse irrespective of age, "[]" based on fewer than 5 unweighted cases in the numerator or 25 unweighted cases in the denominator.

⁸⁷ Blindness refers to those with vision less than 20/200 in distance or could not count finger or perceive light.

⁹⁰ WHO criteria of classification of waist- hip ratio (WHR)

Male	Female	Risk level
< 0.90	< 0.85	Low
≥0.90	≥0.85	High

⁹¹ Grip strength measures bodily muscle strength and is an overall marker of health among elderly population. Mean grip strength is an average of two readings for dominant hand.

⁸⁴ Low vision refers to either low near vision or low distant vision in the better eye with best correction available with the respondent.

⁸⁵ Low near vision refers to near vision equal to or poorer than 20/80 and equal to or better than 20/400 in the better eye with best correction available with respondent.

⁸⁶ Low distance vision refers to distance vision equal to or poorer than 20/80 and equal to or better than 20/200 in the better eye with best correction available with respondent.

⁸⁸ Body Mass Index (BMI) refers to weight in kilograms divided by height in meter square (kg/m²). BMI levels have been classified according to WHO classifications: underweight ≤ 18.4; normal=18.5 to 24.9; overweight=25.0 to 29.9; obese ≥30.0

⁸⁹ Metabolic complications: critical limit classification for high risk waist circumference for male is \ge 102 cm and for female is \ge 88cm.

⁹² Includes health post/sub centers, primary health center/urban health center, community health center, district/sub-district hospital, government/tertiary hospital or government AYUSH hospital.

⁹³ Includes private hospital/nursing home, private clinic (OPD based services), NGO/Charity/Trust/Church-run hospital/Private AYUSH hospital. It also includes health care services availed partially from either private or government or NGO.

⁹⁴ Among those who sought out-patient care in the past 12 months and this includes modern allopathic medicines, AYUSH medicines, traditional herbs or medicine, excluding any health supplements.

PUNJAB

Introduction

The Longitudinal Ageing Study in India (LASI) is a nationally and state representative longitudinal study of ageing and health. LASI is a national landmark, the largest in the world and, only of its kind in India. Its main goal is to provide valid, reliable and continuous scientific data on the health, social, mental and economic well-being of India's older adult (aged 45 and above) population. These data will help to monitor existing programmes and inform new national health and ageing policies. LASI is undertaken as a globally harmonized study carried out in more than 44 developed and developing countries worldwide; and the survey schedules, protocols and methodologies are harmonized across these countries. These are part of the Health and Retirement Study (HRS) family of longitudinal ageing and retirement surveys. Therefore, LASI data will also serve as an important public resource for national policy making and worldwide comparative research on ageing.

LASI is undertaken under the aegis of the Ministry of Health and Family Welfare (MoHFW), Government of India. The International Institute for Population Sciences (IIPS), Mumbai is the nodal institution for implementing LASI in collaboration with the Harvard T.H.Chan School of Public Health (HSPH) and the University of Southern California (USC).

A. LASI Objectives and Coverage:

The LASI wave-1 survey (2017-18) covers all 30 states and 6 Union Territories of India with a panel sample size of 72,250 older adults aged 45 years and above and their spouses regardless of age. LASI collects data on four major subject domains:

- 1. Health: Disease Burden & Risk Factors (Reported and Measured)
- 2. Health Care and Health Care Financing
- 3. Social: Family, Social Network and Social Welfare Programmes for the Elderly
- 4. Economic: Income, Wealth, Expenditure, Employment, Retirement and Pension

The long-term goal of LASI is to continue for the next 25 years, with respondents surveyed every two years.

LASI Survey Instruments:

The LASI survey instrument comprises three schedules:

- 1. Household Survey Schedule: Administered to one per household, collects information from interviewing one or more adult member of household. Includes the following modules: Household Roster, Housing and Environment, Household Consumption, Household Assets and Debts, Household Income and Household Health Insurance.
- 2. Individual Survey Schedule: Administered to each respondent aged 45 years and above and their spouses (regardless of age) in the sampled households. Includes the following modules: Demographics, Work, Retirement and Pension, Health (Chronic Diseases and Health Conditions), Functional Health, Family Medical History, Mental Health (Cognition and Depression), Health Behavior and Food Security, Health Care Access and Utilization, Health Care Financing, Family and Social Network, Social Welfare Programmes and Experimental Modules on Time Use, Expectations, Social Connectedness and Vignettes.

In addition, LASI includes an individual module on measured biomarkers:

- Anthropometric Measurements: Height, Weight, Waist Circumference and Hip Circumference.
- Functional Health Markers: Blood Pressure and Pulse Rate, Lung Function Test (Spirometry) and Vision Test (Near and Distance Vision Impairment).

- **Performance Based Markers:** Grip Strength, Timed-Walk and Balance Tests.
- Collection of Dried Blood Spot (DBS) samples: To be tested for variety of molecular biomarkers.
- **3.** In addition, a Community Survey Schedule is administered at the community level (villages in rural areas and census enumeration blocks in urban areas) and is answered by several key informants. The community schedule includes the following sections: Population Characteristics, Infrastructure and Common Resource, Accessibility and Availability of Health Care Services and coverage of Health and Social Welfare Programmes.

Fact Sheet of Key Indicators for the State of Punjab

This fact sheet provides information on key indicators (weighted) for the state of Punjab. The fieldwork for Punjab was conducted from **May 2018 through February 2019**. Table-1 provides information about the number of households and individuals interviewed.

Table 1 Number of households and individuals interviewed for the state of Punjab, LASI Wave 1, 2018-19

Sr. No.	Coverage		Rural	Urban	Male	Female	Total
1.	Household roster completed		1191	578	na	na	1769
2.	Households interviewed (with age-eligible individuals)#		871	871 363		na	1234
	Individuals Interviewed	45-59 years and their spouses irrespective of age	793	327	426	694	1120

 $^{^{\}rm 1}$ Based on all households including LASI age-eligible and non-age-eligible households.

² Death rate is calculated based on deaths in the last two calendar years.

³ Based on LASI age-eligible households only.

⁴ Improved sanitation includes flush or pour flush toilet (which is flushed to piped sewer system/septic tank/ pit latrine), pit latrine, twin pit, composting toilet

⁵ Open defecation refers to the practice whereby people go out in fields, bushes, forests, open bodies of water, or other open spaces rather than using the toilet to defecate. This information was collected from eligible household respondent.

⁶ Improved drinking water source includes water from pipe, public tap/standpipe, tube well or bore well, dug well, spring water and rain water.

⁷ Clean cooking fuel includes LPG, Biogas and Electricity.

⁸ Indoor pollution refers to households using solid and unclean fuel (for cooking or any other purpose) inside the household and cooking in traditional *chullah/stove* or open fire without any ventilation. Unclean fuel refers to use of kerosene, charcoal, coal, crop residue, wood/shrub and dung cake.

 $^{^9}$ *Pucca* house refers to a house whose roof, wall and floor is made up of pucca (concrete) material.

¹⁰ MPCE is defined as total monthly household consumption expenditure divided by household size. Includes household's per capita spending on food and non-food items including spending on health, education, utilities etc.

Any one or more motorized vehicle includes car, motor cycle, moped and scooter.

[&]quot;[]" based on fewer than 5 unweighted cases in the numerator or 25 unweighted cases in the denominator.

¹² Per Capita Annual Household Income refers to total household income divided by household size. It includes income from all members of the household and from all sources such as agricultural work, non-agricultural work, self-employment, remittances/gifts, wages/salaries from employment, pension income and public/private transfers.

¹³ Based on income reported from household by that particular source.

¹⁴ Wage/salary work refers to income from full-time, part-time, side-jobs odd jobs or other wages or salaries.

¹⁵ Work related pension refers to income from central/state government pension, employer funded pension, privately purchased commercial pension and other state pension schemes.

¹⁶ Government/public transfers includes agriculture subsidies, non-agricultural government subsidies (LPG subsidy, scholarship for education, subsidy for building toilets, subsidy for setting up small scale industries, subsidy for solar panels, etc.), housing assistance, unemployment allowance, Janani Suraksha Yojana (JSY)/any other maternity compensation, compensation under any other health benefits program (other than JSY), Compensation for illness or accident, emergency or disaster relief (flood, earthquake, drought, etc.), debt waiver, compensation for re-settlement (due to slums, dams, road, etc.), assistance for self-employment (like Swarna Jayanti Gram Swarozgar Yojana/ National Rural Livelihood Mission), social security pension schemes (like Indira Gandhi National Old Age Pension Scheme, Indira Gandhi National Widow Pension Scheme, Indira Gandhi National Disability Pension Scheme) and other government transfers.

¹⁷ Includes different types of health insurance/benefits such as CGHS, ESIS, RSBY, other central/state government health insurance schemes or medical reimbursement from employer etc.

¹⁸ Allied schemes refers to state specific schemes which are based on Rashtriya Swasthya Bima Yojana (RSBY) model.

* Including spouse irrespective of age, na "not applicable", "[]" based on fewer than 5 unweighted cases in the numerator or 25 unweighted cases in the denominator, "-" indicates less number of cases/ no cases.

⁶¹ For prevalence of endemic diseases, the reference period is past 2 years (any one or more).

⁶² Any vector-borne disease includes malaria, dengue or chikungunya (any one or more).

⁶³ Any water-borne disease includes diarrhoea/gastroenteritis, typhoid, jaundice or hepatitis (any one or more).

⁶⁴ For symptom based prevalence of health conditions, the reference period is past 2 years.

⁶⁵ Angina pectoris refers to, "a chest pain or discomfort with all the following symptoms: (a) the pain must include either the sternum (any level) or the left arm and left anterior chest (defined as the anterior chest wall between the levels of clavicle and lower end of sternum), (b) pain must be provoked by either hurrying or walking uphill (or by walking on the level, for those who never attempt more), (c) when pain occurs on walking it must make the person either stop or slacken pace, (d) pain must disappear on a majority of occasions in 10 min or less from the time when the person stands still.

⁶⁶ Sleep problems refer to difficulty in falling asleep or staying asleep throughout the night and also feeling unrested during the day (any one or more).

⁶⁷ Reproductive health problems include hot flashes, irregular vaginal discharge, uterine prolapse, fibroids, cysts and vaginal dryness in the past 2 years (any one or more).

⁶⁸ The reference period for Pap Smear and Mammography is past 2 years.

⁶⁹ Biological family members include -father, mother, brother, sister, children and grandchildren.

⁷⁰ Refers to functional limitations lasting more than 3 months.

⁷¹ Activities of Daily Living (ADL) includes dressing, putting on *chappals* or shoes, walking across a room, bathing, eating difficulties, getting in or out of bed (any one or more).

* Including spouse irrespective of age, "[]" based on fewer than 5 unweighted cases in the numerator or 25 unweighted cases in the denominator.

⁷² Instrumental Activities of Daily Living (IADL) includes preparing a hot meal, shopping for groceries, making telephone calls, taking medications, doing work around the house or garden, managing money (paying bills and keeping track of expenses) and getting around or finding address in unfamiliar place (any one or more).

⁷³ Helper refers to any person/s assisting respondent in any ADL/IADL limitations.

⁷⁴ Aids or supportive devices include spectacles and dentures and devices to help you in moving or sitting (such as, walker, walking sticks, wheel chair, adjustable showers stools/commodes, back/neck collar, orthosis/prosthesis).

⁷⁵ Among those respondents who reported using any aid or supportive device(s) to assist them in the activities of daily living.

⁷⁶ Immediate word recall refers to total number of words recalled from the given list of 10 words immediately.

⁷⁷ Delayed word recall refers to total number of words recalled from the same given list of 10 words after some delay.

⁷⁸ Based on Composite International Diagnostic Interview-Short Form (CIDI-SF); respondent who reported that they felt sad, blue or depressed for two-weeks period during last 12 months for all the day long or most of the day.

⁷⁹ Prevalence of measured hypertension refers to those measured with systolic blood pressure of ≥ 140 mmHg or diastolic blood pressure of ≥ 90 mmHg or both.

⁸⁰ Prevalence of undiagnosed hypertension refers to those undiagnosed by a health professional but whose measured systolic blood pressure was ≥ 140 mmHg or diastolic blood pressure was ≥ 90 mmHg or both.

⁸¹ Untreated hypertension refers to those who reported that they have been diagnosed with hypertension by a health professional and currently measured with hypertension but currently not taking treatment

⁸² Undertreated hypertension refers to those who reported that they have been diagnosed with hypertension by a health professional and currently measured with hypertension but currently taking treatment.

⁸³ Adequately treated hypertension refers to those reported that they have been diagnosed by health professional and currently taking treatment and whose measured systolic blood pressure was < 140 mmHg and diastolic blood pressure was < 90 mmHg.

⁸⁴ Low vision refers to either low near vision or low distant vision in the better eye with best correction available with the respondent.

⁸⁵ Low near vision refers to near vision equal to or poorer than 20/80 and equal to or better than 20/400 in the better eye with best correction available with respondent.

⁸⁷ Blindness refers to those with vision less than 20/200 in distance or could not count finger or perceive light.

90 WHO criteria of classification of waist- hip ratio (WHR)

Male	Female	Risk level
< 0.90	< 0.85	Low
≥0.90	≥0.85	High

⁹¹ Grip strength measures bodily muscle strength and is an overall marker of health among elderly population. Mean grip strength is an average of two readings each for dominant and non-dominant hand.

⁸⁶ Low distance vision refers to distance vision equal to or poorer than 20/80 and equal to or better than 20/200 in the better eye with best correction available with respondent.

⁸⁸ Body Mass Index (BMI) refers to weight in kilograms divided by height in meter square (kg/m²). BMI levels have been classified according to WHO classifications: underweight ≤ 18.4; normal=18.5 to 24.9; overweight=25.0 to 29.9; obese ≥30.0

⁸⁹ Metabolic complications: critical limit classification for high risk waist circumference for male is ≥102 cm and for female is ≥88cm.

⁹² Includes health post/sub centers, primary health center/urban health center, community health center, district/sub-district hospital, government/tertiary hospital or government AYUSH hospital.

⁹³ Includes private hospital/nursing home, private clinic (OPD based services), NGO/Charity/Trust/Church-run hospital/Private AYUSH hospital. It also includes health care services availed partially from either private or government or NGO.

⁹⁴ Among those who sought out-patient care in the past 12 months and this includes modern allopathic medicines, AYUSH medicines, traditional herbs or medicine, excluding any health supplements.

⁹⁵ The expenditure on last in-patient visit includes consultation charges, medicine charges, test/investigation charge, nursing home charges, surgery and related charges, transportation charges and any other charges.

RAJASTHAN

Introduction

The Longitudinal Ageing Study in India (LASI) is a nationally and state representative longitudinal study of ageing and health. LASI is a national landmark, the largest in the world and, only of its kind in India. Its main goal is to provide valid, reliable and continuous scientific data on the health, social, mental and economic well-being of India's older adult (aged 45 and above) population. These data will help to monitor existing programmes and inform new national health and ageing policies. LASI is undertaken as a globally harmonized study carried out in more than 44 developed and developing countries worldwide; and the survey schedules, protocols and methodologies are harmonized across these countries. These are part of the Health and Retirement Study (HRS) family of longitudinal ageing and retirement surveys. Therefore, LASI data will also serve as an important public resource for national policy making and worldwide comparative research on ageing.

LASI is undertaken under the aegis of the Ministry of Health and Family Welfare (MoHFW), Government of India. The International Institute for Population Sciences (IIPS), Mumbai is the nodal institution for implementing LASI in collaboration with the Harvard T. H. Chan School of Public Health (HSPH) and the University of Southern California (USC).

A. LASI Objectives and Coverage:

The LASI wave-1 survey (2017-18) covers all 30 states and 6 Union Territories of India with a panel sample size of 72,250 older adults aged 45 years and above and their spouses regardless of age. LASI collects data on four major subject domains:

- 1. Health: Disease Burden & Risk Factors (Reported and Measured)
- 2. Health Care and Health Care Financing
- 3. Social: Family, Social Network and Social Welfare Programmes for the Elderly
- 4. Economic: Income, Wealth, Expenditure, Employment, Retirement and Pension

The long-term goal of LASI is to continue for the next 25 years, with respondents surveyed every two years.

LASI Survey Instruments:

The LASI survey instrument comprises three schedules:

- **1. Household Survey Schedule**: Administered to one per household, collects information from interviewing one or more adult member of household. Includes the following modules: Household Roster, Housing and Environment, Household Consumption, Household Assets and Debts, Household Income and Household Health Insurance.
- 2. Individual Survey Schedule: Administered to each respondent aged 45 years and above and their spouses (regardless of age) in the sampled households. Includes the following modules: Demographics, Work, Retirement and Pension, Health (Chronic Diseases and Health Conditions), Functional Health, Family Medical History, Mental Health (Cognition and Depression), Health Behavior and Food Security, Health Care Access and Utilization, Health Care Financing, Family and Social Network, Social Welfare Programmes and Experimental Modules on Time Use, Expectations, Social Connectedness and Vignettes.

In addition, LASI includes an individual module on measured biomarkers:

- Anthropometric Measurements: Height, Weight, Waist Circumference and Hip Circumference.
- Functional Health Markers: Blood Pressure and Pulse Rate, Lung Function Test (Spirometry) and Vision Test (Near and Distance Vision Impairment).

- **Performance Based Markers:** Grip Strength, Timed-Walk and Balance Tests.
- Collection of Dried Blood Spot (DBS) samples: To be tested for variety of molecular biomarkers.
- **3.** In addition, a Community Survey Schedule is administered at the community level (villages in rural areas and census enumeration blocks in urban areas) and is answered by several key informants. The community schedule includes the following sections: Population Characteristics, Infrastructure and Common Resource, Accessibility and Availability of Health Care Services and coverage of Health and Social Welfare Programmes.

Fact Sheet of Key Indicators for the State of Rajasthan

This fact sheet provides information on key indicators (weighted) for the state of Rajasthan. The fieldwork for Rajasthan was conducted from **April through August 2017**. Table-1 provides information about the number of households and individuals interviewed.

Table 1 Number of Households and Individuals interviewed for the state of Rajasthan, LASI Wave 1, 2017-18

24	Household Per Capita Health Expenditure as a share of MPCE (%)	12.5	10.5	11.8

 $^{^{1}}$ Based on all households including LASI age-eligible and non-age-eligible households.

² Death rate is calculated based on deaths in the last two calendar years.

³ Based on LASI age-eligible households only.

⁴ Improved sanitation includes flush or pour flush toilet (which is flushed to piped sewer system/septic tank/ pit latrine), pit latrine, twin pit, composting toilet

⁵ Open defecation refers to the practice whereby people go out in fields, bushes, forests, open bodies of water, or other open spaces rather than using the toilet to defecate. This information was collected from eligible household respondent.

⁶ Improved drinking water source includes water from pipe, public tap/standpipe, tube well or bore well, dug well, spring water and rain water.

⁷ Clean cooking fuel includes LPG, Biogas and Electricity.

⁸ Indoor pollution refers to households using solid and unclean fuel (for cooking or any other purpose) inside the household and cooking in traditional *chullah/stove* or open fire without any ventilation. Unclean fuel refers to use of kerosene, charcoal, coal, crop residue, wood/shrub and dung cake.

⁹ *Pucca* house refers to a house whose roof, wall and floor is made up of *pucca* (concrete) material.

¹⁰ MPCE is defined as total monthly household consumption expenditure divided by household size. Includes household's per capita spending on food and non-food items including spending on health, education, utilities etc.

Hou	sehold-Level Key Indicators ³	Rural	Urban	Total

Any one or more motorized vehicle includes car, motor cycle, moped and scooter.

¹⁴ Wage/salary work refers to income from full-time, part-time, side-jobs odd jobs or other wages or salaries.

[&]quot;[]" based on fewer than 5 unweighted cases in the numerator or 25 unweighted cases in the denominator.

¹² Per Capita Annual Household Income refers to total household income divided by household size. It includes income from all members of the household and from all sources such as agricultural work, non-agricultural work, self-employment, remittances/gifts, wages/salaries from employment, pension income and public/private transfers.

¹³ Based on income reported from household by that particular source.

¹⁵ Work related pension refers to income from central/state government pension, employer funded pension, privately purchased commercial pension and other state pension schemes.

¹⁶ Government/public transfers includes agriculture subsidies, non-agricultural government subsidies (LPG subsidy, scholarship for education, subsidy for building toilets, subsidy for setting up small scale industries, subsidy for solar panels, etc.), housing assistance, unemployment allowance, Janani Suraksha Yojana (JSY)/any other maternity compensation, compensation under any other health benefits program (other than JSY), Compensation for illness or accident, emergency or disaster relief (flood, earthquake, drought, etc.), debt waiver, compensation for re-settlement (due to slums, dams, road, etc.), assistance for self-employment (like Swarna Jayanti Gram Swarozgar Yojana/ National Rural Livelihood Mission), social security pension schemes (like Indira Gandhi National Old Age Pension Scheme, Indira Gandhi National Widow Pension Scheme, Indira Gandhi National Disability Pension Scheme) and other government transfers.

¹⁷ Includes different types of health insurance/benefits such as CGHS, ESIS, RSBY, other central/state government health insurance schemes or medical reimbursement from employer etc.

¹⁸ Allied schemes refers to state specific schemes which are based on Rashtriya Swasthya Bima Yojana (RSBY) model.

⁴⁹ Any neurological/psychiatric problem includes depression, alzheimer's disease, dementia or psychiatric problem or neurological problem (any one or more)

⁵⁰ Psychiatric problems include unipolar or bipolar disorder, schizophrenia etc. (any one or more).

⁵¹ Neurological problems include neuropathy, convulsion, migraine, Parkinson's etc. (any one or more).

⁵² Includes oral cancer, breast cancer, cervical cancer, lung cancer or cancer/malignant tumors originating in any other organs/ body parts (any one or more).

⁵³ Urogenital conditions include chronic renal failure, incontinence, kidney stone and Benign Prostate Hypertrophy-BPH (only among males) (any one or more)

⁵⁴ Eye or vision related conditions or problems include presbyopia, glaucoma, cataract, myopia, hypermetropia, other eyes problems such as conjunctivitis, eye injury, red eye etc. (any one or more).

 $^{^{55}}$ Refractive error includes presbyopia, myopia and hypermetropia with or without astigmatism.

⁵⁶ Common oral health problems include painful teeth, ulcer lasting more than two weeks, bleeding gums, swelling gums, loose teeth, dental cavity/dental caries & soreness or cracks in the corner of the mouth in past 12 months (any one or more).

⁵⁷ Periodontal diseases include bleeding gums, swelling gums or ulcers lasting more than two weeks (any one or more).

⁵⁸ Injury include injuries sustained due to any traffic accident, violence, animal attack or fall in the past 2 years (any one or more).

⁵⁹ Reference period for natural and man-made disaster is past 5 years.

⁶⁰ Health problems due to natural and man-made disaster refers to permanent physical disability, psychological and mental health problems or chronic illness (any one or more).

^{*} Including spouse irrespective of age, na "not applicable", "[]" based on fewer than 5 unweighted cases in the numerator or 25 unweighted cases in the denominator, "-" indicates less number of cases/ no cases.

⁶¹ For prevalence of endemic diseases in India, the reference period is past 2 years (any one or more).

⁶² Any vector-borne disease includes malaria, dengue or chikungunya (any one or more).

⁶³ Any water-borne disease includes diarrhoea/gastroenteritis, typhoid, jaundice or hepatitis (any one or more).

⁶⁴ For symptom based prevalence of health conditions, the reference period is past 2 years.

⁶⁵ Angina pectoris refers to, "a chest pain or discomfort with all the following symptoms: (a) the pain must include either the sternum (any level) or the left arm and left anterior chest (defined as the anterior chest wall between the levels of clavicle and lower end of sternum), (b) pain must be provoked by either hurrying or walking uphill (or by walking on the level, for those who never attempt more), (c) when pain occurs on walking it must make the person either stop or slacken pace, (d) pain must disappear on a majority of occasions in 10 min or less from the time when the person stands still.

⁶⁶ Sleep problems refer to difficulty in falling asleep or staying asleep throughout the night and also feeling unrested during the day (any one or more).

⁶⁷ Reproductive health problems include hot flashes, irregular vaginal discharge, uterine prolapse, fibroids, cysts and vaginal dryness in the past 2 years (any one or more).

 $^{^{68}}$ The reference period for Pap Smear and Mammography is past 2 years.

⁶⁹ Biological family members include -father, mother, brother, sister, children and grandchildren.

⁷⁰ Refers to functional limitations lasting more than 3 months.

⁷¹ Activities of Daily Living (ADL) includes dressing, putting on *chappals* or shoes, walking across a room, bathing, eating difficulties, getting in or out of bed (any one or more).

166	Blindness (%) ⁸⁷	0.76	5.7	2.8	3.5	3.2	3.3	3.2

* Including spouse irrespective of age.

⁷³ Helper refers to any person/s assisting respondent in any ADL/IADL limitations.

75 Among those respondents who reported using any aid or supportive device(s) to assist them in the activities of daily living.

Delayed word recall refers to total number of words recalled from the same given list of 10 words after some delay.

⁸⁴ Low vision refers to either low near vision or low distant vision in the better eye with best correction available with the respondent.

⁷² Instrumental Activities of Daily Living (IADL) includes preparing a hot meal, shopping for groceries, making telephone calls, taking medications, doing work around the house or garden, managing money (paying bills and keeping track of expenses) and getting around or finding address in unfamiliar place (any one or more).

⁷⁴ Aids or supportive devices include spectacles and dentures and devices to help you in moving or sitting (such as, walker, walking sticks, wheel chair, adjustable showers stools/commodes, back/neck collar, orthosis/prosthesis).

⁷⁶ Immediate word recall refers to total number of words recalled from the given list of 10 words immediately.

⁷⁸ Based on Composite International Diagnostic Interview-Short Form (CIDI-SF); respondent who reported that they felt sad, blue or depressed for two-weeks period during last 12 months for all the day long or most of the day.

⁷⁹ Prevalence of measured hypertension refers to those measured with systolic blood pressure of \geq 140 mmHg or diastolic blood pressure of \geq 90 mmHg or both.

 ⁸⁰ Prevalence of undiagnosed hypertension refers to those undiagnosed by a health professional but whose measured systolic blood pressure was ≥ 140 mmHg or diastolic blood pressure was ≥ 90 mmHg or both.
 81 Untreated hypertension refers to those who reported that they have been diagnosed with hypertension by a health professional and currently measured

with hypertension but currently not taking treatment

82 Undertreated hypertension refers to those who reported that they have been diagnosed with hypertension by a health professional and currently measured

⁸² Undertreated hypertension refers to those who reported that they have been diagnosed with hypertension by a health professional and currently measured with hypertension but currently taking treatment.

⁸³ Adequately treated hypertension refers to those reported that they have been diagnosed by health professional and currently taking treatment and whose measured systolic blood pressure was < 140 mmHg and diastolic blood pressure was < 90 mmHg.</p>

⁸⁵ Low near vision refers to near vision equal to or poorer than 20/80 and equal to or better than 20/400 in the better eye with best correction available with respondent.

⁸⁶ Low distance vision refers to distance vision equal to or poorer than 20/80 and equal to or better than 20/200 in the better eye with best correction available with respondent.

* Including spouse irrespective of age.

⁹⁰ WHO criteria of classification of waist- hip ratio (WHR)

Male	Female	Risk level
< 0.90	< 0.85	Low
≥0.90	≥0.85	High

⁹¹ Grip strength measures bodily muscle strength and is an overall marker of health among elderly population. Mean grip strength is an average of two readings for dominant hand.

⁸⁷ Blindness refers to those with vision less than 20/200 in distance or could not count finger or perceive light.

⁸⁸ Body Mass Index (BMI) refers to weight in kilograms divided by height in meter square (kg/m²). BMI levels have been classified according to WHO classifications: underweight ≤ 18.4; normal=18.5 to 24.9; overweight=25.0 to 29.9; obese ≥30.0

⁸⁹ Metabolic complications: critical limit classification for high risk waist circumference for male is ≥102 cm and for female is ≥88cm.

⁹² Includes health post/sub centers, primary health center/urban health center, community health center, district/sub-district hospital, government/tertiary hospital or government AYUSH hospital.

⁹³ Includes private hospital/nursing home, private clinic (OPD based services), NGO/Charity/Trust/Church-run hospital/Private AYUSH hospital. It also includes health care services availed partially from either private or government or NGO.

⁹⁴ Among those who sought out-patient care in the past 12 months and this includes modern allopathic medicines, AYUSH medicines, traditional herbs or medicine, excluding any health supplements.

⁹⁵ The expenditure on last in-patient visit includes consultation charges, medicine charges, test/investigation charge, nursing home charges, surgery and related charges, transportation charges and any other charges.

TAMIL NADU

Introduction

The Longitudinal Ageing Study in India (LASI) is a nationally and state representative longitudinal study of ageing and health. LASI is a national landmark, the largest in the world and, only of its kind in India. Its main goal is to provide valid, reliable and continuous scientific data on the health, social, mental and economic well-being of India's older adult (aged 45 and above) population. These data will help to monitor existing programmes and inform new national health and ageing policies. LASI is undertaken as a globally harmonized study carried out in more than 44 developed and developing countries worldwide; and the survey schedules, protocols and methodologies are harmonized across these countries. These are part of the Health and Retirement Study (HRS) family of longitudinal ageing and retirement surveys. Therefore, LASI data will also serve as an important public resource for national policy making and worldwide comparative research on ageing.

LASI is undertaken under the aegis of the Ministry of Health and Family Welfare (MoHFW), Government of India. The International Institute for Population Sciences (IIPS), Mumbai is the nodal institution for implementing LASI in collaboration with the Harvard T. H. Chan School of Public Health (HSPH) and the University of Southern California (USC).

A. LASI Objectives and Coverage:

The LASI wave-1 survey (2017-18) covers all 30 states and 6 Union Territories of India with a panel sample size of 72,250 older adults aged 45 years and above and their spouses regardless of age. LASI collects data on four major subject domains:

- 1. Health: Disease Burden & Risk Factors (Reported and Measured)
- 2. Health Care and Health Care Financing
- 3. Social: Family, Social Network and Social Welfare Programmes for the Elderly
- 4. Economic: Income, Wealth, Expenditure, Employment, Retirement and Pension

The long-term goal of LASI is to continue for the next 25 years, with respondents surveyed every two years.

LASI Survey Instruments:

The LASI survey instrument comprises three schedules:

- **1. Household Survey Schedule**: Administered to one per household, collects information from interviewing one or more adult member of household. Includes the following modules: Household Roster, Housing and Environment, Household Consumption, Household Assets and Debts, Household Income and Household Health Insurance.
- 2. Individual Survey Schedule: Administered to each respondent aged 45 years and above and their spouses (regardless of age) in the sampled households. Includes the following modules: Demographics, Work, Retirement and Pension, Health (Chronic Diseases and Health Conditions), Functional Health, Family Medical History, Mental Health (Cognition and Depression), Health Behavior and Food Security, Health Care Access and Utilization, Health Care Financing, Family and Social Network, Social Welfare Programmes and Experimental Modules on Time Use, Expectations, Social Connectedness and Vignettes.

In addition, LASI includes an individual module on measured biomarkers:

- Anthropometric Measurements: Height, Weight, Waist Circumference and Hip Circumference.
- **Functional Health Markers**: Blood Pressure and Pulse Rate, Lung Function Test (Spirometry) and Vision Test (Near and Distance Vision Impairment).

- **Performance Based Markers:** Grip Strength, Timed-Walk and Balance Tests.
- Collection of Dried Blood Spot (DBS) samples: To be tested for variety of molecular biomarkers.
- **3.** In addition, a Community Survey Schedule is administered at the community level (villages in rural areas and census enumeration blocks in urban areas) and is answered by several key informants. The community schedule includes the following sections: Population Characteristics, Infrastructure and Common Resource, Accessibility and Availability of Health Care Services and coverage of Health and Social Welfare Programmes.

Fact Sheet of Key Indicators for the State of Tamil Nadu

This fact sheet provides information on key indicators (weighted) for the state of Tamil Nadu. The fieldwork for Tamil Nadu was conducted from **July through December 2017**. Table-1 provides information about the number of households and individuals interviewed.

Table 1 Number of Households and Individuals interviewed for the state of Tamil Nadu, LASI Wave 1, 2017-18

Sr. No.	Coverage		Rural	Urban	Male	Female	Total
1.	Household ro	ster completed	1234	2013	na	na	3247
2.	Households interviewed (with age-eligible individuals) #		891	1259	na	na	2150
	Individuals	45-59 years and their spouses irrespective of age	791	1205	709	1287	1996
3.	Interviewed	60 years and above	663	871	685	849	1534
		All ages	1454	2076	1394	2136	3530

na "not applicable"

[#] LASI age-eligible households are those with at least one individual in aged 45 years and above; age-eligible individuals are persons aged 45 years and above and their spouses (regardless of age) in the LASI sampled households.

21	Households with <i>pucca</i> house (%) ⁹	48.1	70.4	59.9
	Household Consumption			
22	Household Monthly Per Capita Consumption Expenditure (MPCE) in INR ¹⁰	2604	3436	3036
	Household Per Capita Food Expenditure as a share of MPCE	57.4	51.6	54.0
23	(%)			

¹ Based on all households including LASI age-eligible and non-age-eligible households.

² Death rate is calculated based on deaths in the last two calendar years.

³ Based on LASI age-eligible households only.

⁴ Improved sanitation includes flush or pour flush toilet (which is flushed to piped sewer system/septic tank/ pit latrine), pit latrine, twin pit, composting toilet

⁵ Open defecation refers to the practice whereby people go out in fields, bushes, forests, open bodies of water, or other open spaces rather than using the toilet to defecate. This information was collected from eligible household respondent.

⁶ Improved drinking water source includes water from pipe, public tap/standpipe, tube well or bore well, dug well, spring water and rain water.

⁷ Clean cooking fuel includes LPG, Biogas and Electricity.

⁸ Indoor pollution refers to households using solid and unclean fuel (for cooking or any other purpose) inside the household and cooking in traditional *chullah/stove* or open fire without any ventilation. Unclean fuel refers to use of kerosene, charcoal, coal, crop residue, wood/shrub and dung cake.

⁹ *Pucca* house refers to a house whose roof, wall and floor is made up of *pucca* (concrete) material.

¹⁰ MPCE is defined as total monthly household consumption expenditure divided by household size. Includes household's per capita spending on food and non-food items including spending on health, education, utilities etc.

House	hold-Level Key Indicators ³	Rural	Urban	Total

^{*} Including spouse irrespective of age, na "not applicable", "[]" based on fewer than 5 unweighted cases in the numerator or 25 unweighted cases in the denominator

⁶¹ For prevalence of endemic diseases in India, the reference period is past 2 years (any one or more).

⁶² Any vector-borne disease includes malaria, dengue or chikungunya (any one or more).

⁶³ Any water-borne disease includes diarrhoea/gastroenteritis, typhoid, jaundice or hepatitis (any one or more).

⁶⁴ For symptom based prevalence of health conditions, the reference period is past 2 years.

⁶⁵ Angina pectoris refers to, "a chest pain or discomfort with all the following symptoms: (a) the pain must include either the sternum (any level) or the left arm and left anterior chest (defined as the anterior chest wall between the levels of clavicle and lower end of sternum), (b) pain must be provoked by either hurrying or walking uphill (or by walking on the level, for those who never attempt more), (c) when pain occurs on walking it must make the person either stop or slacken pace, (d) pain must disappear on a majority of occasions in 10 min or less from the time when the person stands still.

⁶⁶ Sleep problems refer to difficulty in falling asleep or staying asleep throughout the night and also feeling unrested during the day (any one or more).

⁶⁷ Reproductive health problems include hot flashes, irregular vaginal discharge, uterine prolapse, fibroids, cysts and vaginal dryness in the past 2 years (any one or more).

 $^{^{68}}$ The reference period for Pap Smear and Mammography is past 2 years.

⁶⁹ Biological family members include -father, mother, brother, sister, children and grandchildren.

 $^{^{70}}$ Refers to the functional limitation lasting more than 3 months.

⁷¹ Activities of Daily Living (ADL) includes dressing, putting on *chappals* or shoes, walking across a room, bathing, eating difficulties, getting in or out of bed (any one or more).

* Including spouse irrespective of age, "-" indicates less number of cases/ no cases.

⁷³ Helper refers to any person/s assisting respondent in any ADL/IADL limitations.

⁷⁵ Among those respondents who reported using any aid or supportive device(s) to assist them in the activities of daily living.

⁷⁶ Immediate word recall refers to total number of words recalled from the given list of 10 words immediately.

⁷⁷ Delayed word recall refers to total number of words recalled from the same given list of 10 words after some delay.

⁷⁹ Prevalence of measured hypertension refers to those measured with systolic blood pressure of \geq 140 mmHg or diastolic blood pressure of \geq 90 mmHg or both.

80 Prevalence of undiagnosed hypertension refers to those undiagnosed by a health professional but whose measured systolic blood pressure was ≥ 140 mmHg or diastolic blood pressure was ≥ 90 mmHg or both.

81 Untreated hypertension refers to those who reported that they have been diagnosed with hypertension by a health professional and currently measured with hypertension but currently not taking treatment

82 Undertreated hypertension refers to those who reported that they have been diagnosed with hypertension by a health professional and currently measured with hypertension but currently taking treatment.

83 Adequately treated hypertension refers to those reported that they have been diagnosed by health professional and currently taking treatment and whose measured systolic blood pressure was < 140 mmHg and diastolic blood pressure was < 90 mmHg.</p>

⁸⁴ Low vision refers to either low near vision or low distant vision in the better eye with best correction available with the respondent.

85 Low near vision refers to near vision equal to or poorer than 20/80 and equal to or better than 20/400 in the better eye with best correction available with respondent.

⁸⁶ Low distance vision refers to distance vision equal to or poorer than 20/80 and equal to or better than 20/200 in the better eye with best correction available with respondent.

⁷² Instrumental Activities of Daily Living (IADL) includes preparing a hot meal, shopping for groceries, making telephone calls, taking medications, doing work around the house or garden, managing money (paying bills and keeping track of expenses) and getting around or finding address in unfamiliar place (any one or more).

⁷⁴ Aids or supportive devices include spectacles and dentures and devices to help you in moving or sitting (such as, walker, walking sticks, wheel chair, adjustable showers stools/commodes, back/neck collar, orthosis/prosthesis).

⁷⁸ Based on Composite International Diagnostic Interview-Short Form (CIDI-SF); respondent who reported that they felt sad, blue or depressed for two-weeks period during last 12 months for all the day long or most of the day.

TELANGANA

Introduction

The Longitudinal Ageing Study in India (LASI) is a nationally and state representative longitudinal study of ageing and health. LASI is a national landmark, the largest in the world and, only of its kind in India. Its main goal is to provide valid, reliable and continuous scientific data on the health, social, mental and economic well-being of India's older adult (aged 45 and above) population. These data will help to monitor existing programmes and inform new national health and ageing policies. LASI is undertaken as a globally harmonized study carried out in more than 44 developed and developing countries worldwide; and the survey schedules, protocols and methodologies are harmonized across these countries. These are part of the Health and Retirement Study (HRS) family of longitudinal aging and retirement surveys. Therefore, LASI data will also serve as an important public resource for national policy making and worldwide comparative research on ageing.

LASI is undertaken under the aegis of the Ministry of Health and Family Welfare (MoHFW), Government of India. The International Institute for Population Sciences (IIPS), Mumbai is the nodal institution for implementing LASI in collaboration with the Harvard T.H.Chan School of Public Health (HSPH) and the University of Southern California (USC).

A. LASI Objectives and Coverage:

The LASI wave-1 survey (2017-18) covers all 30 states and 6 Union Territories of India with a panel sample size of 72,250 older adults aged 45 years and above and their spouses regardless of age. LASI collects data on four major subject domains:

- 1. Health: Disease Burden & Risk Factors (Reported and Measured)
- 2. Health Care and Health Care Financing
- 3. Social: Family, Social Network and Social Welfare Programmes for the Elderly
- 4. Economic: Income, Wealth, Expenditure, Employment, Retirement and Pension

The long-term goal of LASI is to continue for the next 25 years, with respondents surveyed every two years.

LASI Survey Instruments:

The LASI survey instrument comprises three schedules:

- **1. Household Survey Schedule:** Administered to one per household, collects information from interviewing one or more adult member of household. Includes the following modules: Household Roster, Housing and Environment, Household Consumption, Household Assets and Debts, Household Income and Household Health Insurance.
- 2. Individual Survey Schedule: Administered to each respondent aged 45 years and above and their spouses (regardless of age) in the sampled households. Includes the following modules: Demographics, Work, Retirement and Pension, Health (Chronic Diseases and Health Conditions), Functional Health, Family Medical History, Mental Health (Cognition and Depression), Health Behavior and Food Security, Health Care Access and Utilization, Health Care Financing, Family and Social Network, Social Welfare Programmes and Experimental Modules on Time Use, Expectations, Social Connectedness and Vignettes.

In addition, LASI includes an individual module on measured biomarkers:

- Anthropometric Measurements: Height, Weight, Waist Circumference and Hip Circumference.
- Functional Health Markers: Blood Pressure and Pulse Rate, Lung Function Test (Spirometry) and Vision Test (Near and Distance Vision Impairment).

- **Performance Based Markers:** Grip Strength, Timed-Walk and Balance Tests.
- Collection of Dried Blood Spot (DBS) samples: To be tested for variety of molecular biomarkers.
- **3.** In addition, a Community Survey Schedule is administered at the community level (villages in rural areas and census enumeration blocks in urban areas) and is answered by several key informants. The community schedule includes the following sections: Population Characteristics, Infrastructure and Common Resource, Accessibility and Availability of Health Care Services and coverage of Health and Social Welfare Programmes.

Fact Sheet of Key Indicators for the State of Telangana

This fact sheet provides information on key indicators (weighted) for the state of Telangana. The fieldwork for Telangana was conducted from **July through November 2018**. Table-1 provides information about the number of households and individuals interviewed.

Table 1 Number of Households and Individuals interviewed for the state of Telangana, LASI Wave 1, 2017-18

Sr. No.	Coverage		Rural	Urban	Male	Female	Total
1.	Household roster completed		1424	847	na	na	2271
2.	Households interviewed (with age-eligible individuals) #		972	446	na	na	1418
	Individuals	45-59 years and their spouses irrespective of age	936	478	506	908	1414
3.	Interviewed	60 years and above	729	332	502	559	1061
		All ages	1665	810	1008	1467	2475

na "not applicable"

[#] LASI age-eligible households are those with at least one individual in aged 45 years and above; age-eligible individuals are persons aged 45 years and above and their spouses (regardless of age) in the LASI sampled households.

Telangana-Key Indicators

Household-Level Key Indicators LASI-Wave 1, 2017-					
House	hold Population Profile ¹	Rural	Urban	Total	
1	Mean Household Size	5.1	5.0	5.1

8	60-74	12.0	9.0	11.0	
9	75+	2.9	2.2	2.7	
	Sex Ratio (Females per 1000 Males)				
10	All ages	1069	959	1025	
11	60 + population	1082	1088	1084	
	Death Rate (per thousand population) ²				
12	All ages	8.8	5.8	7.5	
13	60 + population	35.7	32.2	34.3	
House	hold-Level Key Indicators ³	Rural	Urban	Total	
	Housing and Environment				
14	Households with improved sanitation (%) ⁴	68.3	96.9	78.6	
15	Households practicing open defecation (%) ⁵	31.7	[0.5]	20.5	
16	Households with water facility inside dwelling/own yard (%)	47.2	66.4	54.1	
17	Households with improved drinking water source (%) ⁶	76.6	70.4	74.4	
18	Households with electricity (%)	97.3	99.3	98.0	
19	Households using clean cooking fuel (%) ⁷	79.0	98.5	86.0	
20	Households exposed to indoor pollution (%) ⁸	12.3	1.8	8.5	
21	Households with <i>pucca</i> house (%) ⁹	42.3	82.8	57.2	
	Household Consumption				
22	Household Monthly Per Capita Consumption Expenditure (MPCE) in INR ¹⁰	2901	4142	3379	
23	Household Per Capita Food Expenditure as a share of MPCE (%)	52.1	44.6	48.6	
24	Household Per Capita Health Expenditure as a share of MPCE (%)	17.5	10.8	14.4	

[&]quot;[]" based on fewer than 5 unweighted cases in the numerator or 25 unweighted cases in the denominator ¹ Based on all households including LASI age-eligible and non-age-eligible households.

² Death rate is calculated based on deaths in the last two calendar years.

³ Based on LASI age-eligible households only.

⁴ Improved sanitation includes flush or pour flush toilet (which is flushed to piped sewer system/septic tank/ pit latrine), pit latrine, twin pit, composting

⁵ Open defecation refers to the practice whereby people go out in fields, bushes, forests, open bodies of water, or other open spaces rather than using the toilet to defecate. This information was collected from eligible household respondent.

⁶ Improved drinking water source includes water from pipe, public tap/standpipe, tube well or bore well, dug well, spring water and rain water.

⁷ Clean cooking fuel includes LPG, Biogas and Electricity.

⁸ Indoor pollution refers to households using solid and unclean fuel (for cooking or any other purpose) inside the household and cooking in traditional chullah/stove or open fire without any ventilation. Unclean fuel refers to use of kerosene, charcoal, coal, crop residue, wood/shrub and dung cake.

⁹ Pucca house refers to a house whose roof, wall and floor is made up of pucca (concrete) material.

¹⁰ MPCE is defined as total monthly household consumption expenditure divided by household size. Includes household's per capita spending on food and non-food items including spending on health, education, utilities etc.

House	hold-Level Key Indicators ³	Rural	Urban	Total			
	Household Assets and Debts						
25	Households owning current residence (%)	93.0	63.2	82.2

36	Households covered by Central Government Health Scheme (CGHS)/Employee State Insurance Scheme (ESIS) (%)	3.4	12.4	6.5			
37	Households covered by medical reimbursement/health insurance from an employer (%)	2.4	2.0	2.3			
38	Households covered by privately purchased commercial health insurance (%)	[0.2]	1.7	0.7			

¹¹ Any one or more motorized vehicle includes car, motor cycle, moped and scooter.

[&]quot;[]" based on fewer than 5 unweighted cases in the numerator or 25 unweighted cases in the denominator.

¹² Per Capita Annual Household Income refers to total household income divided by household size. It includes income from all members of the household and from all sources such as agricultural work, non-agricultural work, self-employment, remittances/gifts, wages/salaries from employment, pension income and public/private transfers.

¹³ Based on income reported from household by that particular source.

¹⁴ Wage/salary work refers to income from full-time, part-time, side-jobs odd jobs or other wages or salaries.

¹⁵ Work related pension refers to income from central/state government pension, employer funded pension, privately purchased commercial pension and other state pension schemes.

¹⁶ Government/public transfers includes agriculture subsidies, non-agricultural government subsidies (LPG subsidy, scholarship for education, subsidy for building toilets, subsidy for setting up small scale industries, subsidy for solar panels, etc.), housing assistance, unemployment allowance, Janani Suraksha Yojana (JSY)/any other maternity compensation, compensation under any other health benefits program (other than JSY), Compensation for illness or accident, emergency or disaster relief (flood, earthquake, drought, etc.), debt waiver, compensation for re-settlement (due to slums, dams, road, etc.), assistance for self-employment (like Swarna Jayanti Gram Swarozgar Yojana/ National Rural Livelihood Mission), social security pension schemes (like Indira Gandhi National Old Age Pension Scheme, Indira Gandhi National Widow Pension Scheme, Indira Gandhi National Disability Pension Scheme) and other government transfers.

¹⁷ Includes different types of health insurance/benefits such as CGHS, ESIS, RSBY, other central/state government health insurance schemes or medical reimbursement from employer etc.

¹⁸ Allied schemes refers to state specific schemes which are based on Rashtriya Swasthya Bima Yojana (RSBY) model.

⁶¹ For prevalence of endemic diseases in India, the reference period is past 2 years (any one or more).

⁶² Any vector-borne disease includes malaria, dengue or chikungunya (any one or more).

⁶³ Any water-borne disease includes diarrhoea/gastroenteritis, typhoid, jaundice or hepatitis (any one or more).

⁶⁴ For symptom based prevalence of health conditions, the reference period is past 2 years.

⁶⁵ Angina pectoris refers to, "a chest pain or discomfort with all the following symptoms: (a) the pain must include either the sternum (any level) or the left arm and left anterior chest (defined as the anterior chest wall between the levels of clavicle and lower end of sternum), (b) pain must be provoked by either hurrying or walking uphill (or by walking on the level, for those who never attempt more), (c) when pain occurs on walking it must make the person either stop or slacken pace, (d) pain must disappear on a majority of occasions in 10 min or less from the time when the person stands still.

⁶⁶ Sleep problems refer to difficulty in falling asleep or staying asleep throughout the night and also feeling unrested during the day (any one or more).

⁶⁷ Reproductive health problems include hot flashes, irregular vaginal discharge, uterine prolapse, fibroids, cysts and vaginal dryness in the past 2 years (any one or more).

⁶⁸ The reference period for Pap Smear and Mammography is past 2 years.

⁶⁹ Biological family members include -father, mother, brother, sister, children and grandchildren.

⁷⁰ Refers to functional limitations lasting more than 3 months.

⁷¹ Activities of Daily Living (ADL) includes dressing, putting on *chappals* or shoes, walking across a room, bathing, eating difficulties, getting in or out of bed (any one or more).

⁷² Instrumental Activities of Daily Living (IADL) includes preparing a hot meal, shopping for groceries, making telephone calls, taking medications, doing work around the house or garden, managing money (paying bills and keeping track of expenses) and getting around or finding address in unfamiliar place (any one or more).

* Including spouse irrespective of age, "[]" based on fewer than 5 unweighted cases in the numerator or 25 unweighted cases in the denominator, "-" indicates less number of cases/ no cases.

⁷³ Helper refers to any person/s assisting respondent in any ADL/IADL limitations.

⁸⁴ Low vision refers to either low near vision or low distant vision in the better eye with best correction available with the respondent.

⁷⁴ Aids or supportive devices include spectacles and dentures and devices to help you in moving or sitting (such as, walker, walking sticks, wheel chair, adjustable showers stools/commodes, back/neck collar, orthosis/prosthesis).

⁷⁵ Among those respondents who reported using any aid or supportive device(s) to assist them in the activities of daily living.

⁷⁶ Immediate word recall refers to total number of words recalled from the given list of 10 words immediately.

⁷⁷ Delayed word recall refers to total number of words recalled from the same given list of 10 words after some delay.

⁷⁸ Based on Composite International Diagnostic Interview-Short Form (CIDI-SF); respondent who reported that they felt sad, blue or depressed for two-weeks period during last 12 months for all the day long or most of the day.

⁷⁹ Prevalence of measured hypertension refers to those measured with systolic blood pressure of ≥ 140 mmHg or diastolic blood pressure of ≥ 90 mmHg or both

⁸⁰ Prevalence of undiagnosed hypertension refers to those undiagnosed by a health professional but whose measured systolic blood pressure was ≥ 140 mmHg or diastolic blood pressure was ≥ 90 mmHg or both.

⁸¹ Untreated hypertension refers to those who reported that they have been diagnosed with hypertension by a health professional and currently measured with hypertension but currently not taking treatment

⁸² Undertreated hypertension refers to those who reported that they have been diagnosed with hypertension by a health professional and currently measured with hypertension but currently taking treatment.

⁸³ Adequately treated hypertension refers to those reported that they have been diagnosed by health professional and currently taking treatment and whose measured systolic blood pressure was < 140 mmHg and diastolic blood pressure was < 90 mmHg.</p>

⁸⁵ Low near vision refers to near vision equal to or poorer than 20/80 and equal to or better than 20/400 in the better eye with best correction available with respondent.

⁸⁶ Low distance vision refers to distance vision equal to or poorer than 20/80 and equal to or better than 20/200 in the better eye with best correction available with respondent.

⁸⁷ Blindness refers to those with vision less than 20/200 in distance or could not count finger or perceive light.

90 WHO criteria of classification of waist- hip ratio (WHR)

Male	Female	Risk level		
< 0.90	< 0.85	Low		
≥0.90	≥0.85	High		

⁹¹ Grip strength measures bodily muscle strength and is an overall marker of health among elderly population. Mean grip strength is an average of two readings for dominant hand.

⁸⁸ Body Mass Index (BMI) refers to weight in kilograms divided by height in meter square (kg/m²). BMI levels have been classified according to WHO classifications: underweight ≤ 18.4; normal=18.5 to 24.9; overweight=25.0 to 29.9; obese ≥30.0

⁸⁹ Metabolic complications: critical limit classification for high risk waist circumference for male is ≥102 cm and for female is ≥88cm.

⁹² Includes health post/sub centers, primary health center/urban health center, community health center, district/sub-district hospital, government/tertiary hospital or government AYUSH hospital.

⁹³ Includes private hospital/nursing home, private clinic (OPD based services), NGO/Charity/Trust/Church-run hospital/Private AYUSH hospital. It also includes health care services availed partially from either private or government or NGO.

⁹⁴ Among those who sought out-patient care in the past 12 months and this includes modern allopathic medicines, AYUSH medicines, traditional herbs or medicine, excluding any health supplements.

⁹⁵ The expenditure on last in-patient visit includes consultation charges, medicine charges, test/investigation charge, nursing home charges, surgery and related charges, transportation charges and any other charges.

⁹⁶ Income includes personal income as well as income from any of the household members.

TRIPURA

Introduction

The Longitudinal Ageing Study in India (LASI) is a nationally and state representative longitudinal study of ageing and health. LASI is a national landmark, the largest in the world and, only of its kind in India. Its main goal is to provide valid, reliable and continuous scientific data on the health, social, mental and economic well-being of India's older adult (aged 45 and above) population. These data will help to monitor existing programmes and inform new national health and ageing policies. LASI is undertaken as a globally harmonized study carried out in more than 44 developed and developing countries worldwide; and the survey schedules, protocols and methodologies are harmonized across these countries. These are part of the Health and Retirement Study (HRS) family of longitudinal ageing and retirement surveys. Therefore, LASI data will also serve as an important public resource for national policy making and worldwide comparative research on ageing.

LASI is undertaken under the aegis of the Ministry of Health and Family Welfare (MoHFW), Government of India. The International Institute for Population Sciences (IIPS), Mumbai is the nodal institution for implementing LASI in collaboration with the Harvard T.H.Chan School of Public Health (HSPH) and the University of Southern California (USC).

A. LASI Objectives and Coverage:

The LASI wave-1 survey (2017-18) covers all 30 states and 6 union territories of India with a panel sample size of 72,250 older adults aged 45 years and above and their spouses regardless of age. LASI collects data on four major subject domains:

- 1. Health: Disease Burden & Risk Factors (Reported and Measured)
- 2. Health Care and Health Care Financing
- 3. Social: Family, Social Network and Social Welfare Programmes for the Elderly
- 4. Economic: Income, Wealth, Expenditure, Employment, Retirement and Pension

The long-term goal of LASI is to continue for the next 25 years, with respondents surveyed every two years.

LASI Survey Instruments:

The LASI survey instrument comprises three schedules:

- **1. Household Survey Schedule:** Administered to one per household, collects information from interviewing one or more adult member of household. Includes the following modules: Household Roster, Housing and Environment, Household Consumption, Household Assets and Debts, Household Income and Household Health Insurance.
- 2. Individual Survey Schedule: Administered to each respondent aged 45 years and above and their spouses (regardless of age) in the sampled households. Includes the following modules: Demographics, Work, Retirement and Pension, Health (Chronic Diseases and Health Conditions), Functional Health, Family Medical History, Mental Health (Cognition and Depression), Health Behavior and Food Security, Health Care Access and Utilization, Health Care Financing, Family and Social Network, Social Welfare Programmes and Experimental Modules on Time Use, Expectations, Social Connectedness and Vignettes.

In addition, LASI includes an individual module on measured biomarkers:

- Anthropometric Measurements: Height, Weight, Waist Circumference and Hip Circumference.
- Functional Health Markers: Blood Pressure and Pulse Rate, Lung Function Test (Spirometry) and Vision Test (Near and Distance Vision Impairment).

- **Performance Based Markers:** Grip Strength, Timed-Walk and Balance Tests.
- Collection of Dried Blood Spot (DBS) samples: To be tested for variety of molecular biomarkers.
- **3.** In addition, a Community Survey Schedule is administered at the community level (villages in rural areas and census enumeration blocks in urban areas) and is answered by several key informants. The community schedule includes the following sections: Population Characteristics, Infrastructure and Common Resource, Accessibility and Availability of Health Care Services and coverage of Health and Social Welfare Programmes.

Fact Sheet of Key Indicators for the State of Tripura

This fact sheet provides information on key indicators (weighted) for the state of Tripura. The fieldwork for Tripura was conducted from **August 2018 through January 2019**. Table-1 provides information about the number of households and individuals interviewed.

Table 1 Number of households and individuals interviewed for the state of Tripura, LASI Wave 1, 2017-18

Sr. No.	C	Coverage	Rural	Urban	Male	Female	Total
1.	Household roster completed		831	266	na	na	1097
2.	Households interviewed (with age-eligible individuals) #		555	166	na	na	721
	Individuals	45-59 years and their spouses irrespective of age	547	187	264	470	734
3.	Interviewed	60 years and above	364	97	227	234	461
		All ages	911	284	491	704	1195

na "not applicable"

[#] LASI age-eligible households are those with at least one individual in aged 45 years and above; age-eligible individuals are persons aged 45 years and above and their spouses (regardless of age) in the LASI sampled households.

[&]quot;-" indicates less number of cases/ no cases.

¹ Based on all households including LASI age-eligible and non-age-eligible households.

² Death rate is calculated based on deaths in the last two calendar years.

³ Based on LASI age-eligible households only.

⁴ Improved sanitation includes flush or pour flush toilet (which is flushed to piped sewer system/septic tank/ pit latrine), pit latrine, twin pit, composting toilet.

⁵ Open defecation refers to the practice whereby people go out in fields, bushes, forests, open bodies of water, or other open spaces rather than using the toilet to defecate. This information was collected from eligible household respondent.

⁶ Improved drinking water source includes water from pipe, public tap/standpipe, tube well or bore well, dug well, spring water and rain water.

⁷ Clean cooking fuel includes LPG, Biogas and Electricity.

⁸ Indoor pollution refers to households using solid and unclean fuel (for cooking or any other purpose) inside the household and cooking in traditional chullah/stove or open fire without any ventilation. Unclean fuel refers to use of kerosene, charcoal, coal, crop residue, wood/shrub and dung cake.
9Pucca house refers to a house whose roof, wall and floor is made up of pucca (concrete) material.

¹⁰ MPCE is defined as total monthly household consumption expenditure divided by household size. Includes household's per capita spending on food and non-food items including spending on health, education, utilities etc.

House	hold-Level Key Indicators ³	Rural	Urban	Total
	Household Assets and Debts			
25	Households owning current residence (%)	89.8	83.0	87.6
26	Households owning television, refrigerator, mobile phone and any motorized vehicle (%) ¹¹	8.3	30.3	15.3
27	Households who had taken any loan (%)	34.0	36.0	34.6

28	Per Capita Annual Household Income (in INR) ¹²	37906	61811	45916
	Per Capita Annual Household Income by Source (in INR) ¹³			
29	Mean income from agricultural and allied activities	5857	633	4103
30	Mean income from non-agricultural business or self-employed activities	2569	10750	5303
31	Mean income from wages/salaries ¹⁴	20754	37144	26243
32	Mean income from pension ¹⁵	1022	5188	2415
33	Mean income from government/public transfers ¹⁶	1698	2559	1987
	Household Insurance			
34	Households covered by any health insurance (%) ¹⁷	46.6	21.9	38.7
35	Households covered by Rashtriya Swasthya Bima Yojana (RSBY) & allied schemes (%) ¹⁸	46.8	19.9	38.4
36	Households covered by Central Government Health Scheme (CGHS)/Employee State Insurance Scheme (ESIS) (%)	[0.4]	[0.5]	[0.4]
37	Households covered by medical reimbursement/health insurance from an employer (%)	-	[2.1]	[0.7]
38	Households covered by privately purchased commercial health insurance (%)	[0.2]	-	[0.2]

Any one or more motorized vehicle includes car, motor cycle, moped and scooter.

¹⁴ Wage/salary work refers to income from full-time, part-time, side-jobs odd jobs or other wages or salaries.

[&]quot;[]" based on fewer than 5 unweighted cases in the numerator or 25 unweighted cases in the denominator, "-" indicates less number of cases/ no cases.

¹² Per Capita Annual Household Income refers to total household income divided by household size. It includes income from all members of the household and from all sources such as agricultural work, non-agricultural work, self-employment, remittances/gifts, wages/salaries from employment, pension income and public/private transfers.

¹³ Based on income reported from household by that particular source.

¹⁵ Work related pension refers to income from central/state government pension, employer funded pension, privately purchased commercial pension and other state pension schemes.

¹⁶ Government/public transfers includes agriculture subsidies, non-agricultural government subsidies (LPG subsidy, scholarship for education, subsidy for building toilets, subsidy for setting up small scale industries, subsidy for solar panels, etc.), housing assistance, unemployment allowance, Janani Suraksha Yojana (JSY)/any other maternity compensation, compensation under any other health benefits program (other than JSY), Compensation for illness or accident, emergency or disaster relief (flood, earthquake, drought, etc.), debt waiver, compensation for re-settlement (due to slums, dams, road, etc.), assistance for self-employment (like Swarna Jayanti Gram Swarozgar Yojana/ National Rural Livelihood Mission), social security pension schemes (like Indira Gandhi National Old Age Pension Scheme, Indira Gandhi National Widow Pension Scheme, Indira Gandhi National Disability Pension Scheme) and other government transfers.

¹⁷ Includes different types of health insurance/benefits such as CGHS, ESIS, RSBY, other central/state government health insurance schemes or medical reimbursement from employer etc.

¹⁸ Allied schemes refers to state specific schemes which are based on Rashtriya Swasthya Bima Yojana (RSBY) model.

* Including spouse irrespective of age, "[]" based on fewer than 5 unweighted cases in the numerator or 25 unweighted cases in the denominator.

⁷³ Helper refers to any person/s assisting respondent in any ADL/IADL limitations.

⁷⁴ Aids or supportive devices include spectacles and dentures and devices to help you in moving or sitting (such as, walker, walking sticks, wheel chair, adjustable showers stools/commodes, back/neck collar, orthosis/prosthesis).

⁷⁵ Among those respondents who reported using any aid or supportive device(s) to assist them in the activities of daily living.

⁷⁶ Immediate word recall refers to total number of words recalled from the given list of 10 words immediately.

⁷⁷ Delayed word recall refers to total number of words recalled from the same given list of 10 words after some delay.

⁷⁸ Based on Composite International Diagnostic Interview-Short Form (CIDI-SF); respondent who reported that they felt sad, blue or depressed for two-weeks period during last 12 months for all the day long or most of the day.

⁷⁹ Prevalence of measured hypertension refers to those measured with systolic blood pressure of ≥ 140 mmHg or diastolic blood pressure of ≥ 90 mmHg or both.

⁸⁰ Prevalence of undiagnosed hypertension refers to those undiagnosed by a health professional but whose measured systolic blood pressure was ≥ 140 mmHg or diastolic blood pressure was ≥ 90 mmHg or both.

⁸¹ Untreated hypertension refers to those who reported that they have been diagnosed with hypertension by a health professional and currently measured with hypertension but currently not taking treatment

⁸² Undertreated hypertension refers to those who reported that they have been diagnosed with hypertension by a health professional and currently measured with hypertension but currently taking treatment.

⁸³ Adequately treated hypertension refers to those reported that they have been diagnosed by health professional and currently taking treatment and whose measured systolic blood pressure was < 140 mmHg and diastolic blood pressure was < 90 mmHg.</p>

⁸⁴ Low vision refers to either low near vision or low distant vision in the better eye with best correction available with the respondent.

⁸⁵ Low near vision refers to near vision equal to or poorer than 20/80 and equal to or better than 20/400 in the better eye with best correction available with respondent.

⁸⁶ Low distance vision refers to distance vision equal to or poorer than 20/80 and equal to or better than 20/200 in the better eye with best correction available with respondent.

⁸⁷ Blindness refers to those with vision less than 20/200 in distance or could not count finger or perceive light.

UTTAR PRADESH

Introduction

The Longitudinal Ageing Study in India (LASI) is a nationally and state representative longitudinal study of ageing and health. LASI is a national landmark, the largest in the world and, only of its kind in India. Its main goal is to provide valid, reliable and continuous scientific data on the health, social, mental and economic well-being of India's older adult (aged 45 and above) population. These data will help to monitor existing programmes and inform new national health and ageing policies. LASI is undertaken as a globally harmonized study carried out in more than 44 developed and developing countries worldwide; and the survey schedules, protocols and methodologies are harmonized across these countries. These are part of the Health and Retirement Study (HRS) family of longitudinal aging and retirement surveys. Therefore, LASI data will also serve as an important public resource for national policy making and worldwide comparative research on ageing.

LASI is undertaken under the aegis of the Ministry of Health and Family Welfare (MoHFW), Government of India. The International Institute for Population Sciences (IIPS), Mumbai is the nodal institution for implementing LASI in collaboration with the Harvard T.H.Chan School of Public Health (HSPH) and the University of Southern California (USC).

A. LASI Objectives and Coverage:

The LASI wave-1 survey (2017-18) covers all 30 states and 6 Union Territories of India with a panel sample size of 72,250 older adults aged 45 years and above and their spouses regardless of age. LASI collects data on four major subject domains:

- 1. Health: Disease Burden & Risk Factors (Reported and Measured)
- 2. Health Care and Health Care Financing
- 3. Social: Family, Social Network and Social Welfare Programmes for the Elderly
- 4. Economic: Income, Wealth, Expenditure, Employment, Retirement and Pension

The long-term goal of LASI is to continue for the next 25 years, with respondents surveyed every two years.

LASI Survey Instruments:

The LASI survey instrument comprises three schedules:

- **1. Household Survey Schedule**: Administered to one per household, collects information from interviewing one or more adult member of household. Includes the following modules: Household Roster, Housing and Environment, Household Consumption, Household Assets and Debts, Household Income and Household Health Insurance.
- 2. Individual Survey Schedule: Administered to each respondent aged 45 years and above and their spouses (regardless of age) in the sampled households. Includes the following modules: Demographics, Work, Retirement and Pension, Health (Chronic Diseases and Health Conditions), Functional Health, Family Medical History, Mental Health (Cognition and Depression), Health Behavior and Food Security, Health Care Access and Utilization, Health Care Financing, Family and Social Network, Social Welfare Programmes and Experimental Modules on Time Use, Expectations, Social Connectedness and Vignettes.

In addition, LASI includes an individual module on measured biomarkers:

- Anthropometric Measurements: Height, Weight, Waist Circumference and Hip Circumference.
- **Functional Health Markers**: Blood Pressure and Pulse Rate, Lung Function Test (Spirometry) and Vision Test (Near and Distance Vision Impairment).

- **Performance Based Markers:** Grip Strength, Timed-Walk and Balance Tests.
- Collection of Dried Blood Spot (DBS) samples: To be tested for variety of molecular biomarkers.
- **3. In addition, a Community Survey Schedule** is administered at the community level (villages in rural areas and census enumeration blocks in urban areas) and is answered by several key informants. The community schedule includes the following sections: Population Characteristics, Infrastructure and Common Resource, Accessibility and Availability of Health Care Services and coverage of Health and Social Welfare Programmes.

Fact Sheet of Key Indicators for the State of Uttar Pradesh

This fact sheet provides information on key indicators (weighted) for the state of Uttar Pradesh. The fieldwork for Uttar Pradesh was conducted from **April through September 2017**. Table-1 provides information about the number of households and individuals interviewed.

Table 1 Number of Households and Individuals interviewed for the state of Uttar Pradesh, LASI Wave 1, 2017-18

Sr. No.	(Coverage	Rural	Urban	Male	Female	Total
1.	Household roster completed		3651	1066	na	na	4717

15	Households practicing open defecation (%) ⁵	63.0	5.1	50.3
16	Households with water facility inside dwelling/own yard (%)	76.8	88.6	79.4
17	Households with improved drinking water source (%) ⁶	99.6	97.9	99.2
18	Households with electricity (%)	69.6	96.8	75.6
19	Households using clean cooking fuel (%) ⁷	31.5	91.0	44.6
20	Households exposed to indoor pollution (%) ⁸	38.0	6.0	30.9
21	Households with <i>pucca</i> house (%) ⁹	50.3	93.6	60.8
	Household Consumption			
22	Household Monthly Per Capita Consumption Expenditure (MPCE) in INR ¹⁰	2216	2856	2348
23	Household Per Capita Food Expenditure as a share of MPCE	53.0	48.4	51.8
	(%)			

¹ Based on all households including LASI age-eligible and non-age-eligible households.

² Death rate is calculated based on deaths in the last two calendar years.

³ Based on LASI age-eligible households only.

⁴ Improved sanitation includes flush or pour flush toilet (which is flushed to piped sewer system/septic tank/ pit latrine), pit latrine, twin pit, composting toilet.

⁵ Open defecation refers to the practice whereby people go out in fields, bushes, forests, open bodies of water, or other open spaces rather than using the toilet to defecate. This information was collected from eligible household respondent.

⁶ Improved drinking water source includes water from pipe, public tap/standpipe, tube well or bore well, dug well, spring water and rain water.

⁷ Clean cooking fuel includes LPG, Biogas and Electricity.

⁸ Indoor pollution refers to households using solid and unclean fuel (for cooking or any other purpose) inside the household and cooking in traditional *chullah/stove* or open fire without any ventilation. Unclean fuel refers to use of kerosene, charcoal, coal, crop residue, wood/shrub and dung cake.

⁹ *Pucca* house refers to a house whose roof, wall and floor is made up of *pucca* (concrete) material.

¹⁰ MPCE is defined as total monthly household consumption expenditure divided by household size. Includes household's per capita spending on food and non-food items including spending on health, education, utilities etc.

House	hold-Level Key Indicators ³	Rural	Urban	Total
	Household Assets and Debts			
25	Households owning current residence (%)	98.2	89.1	96.2
26	Households owning television, refrigerator, mobile phone and any motorized vehicle (%) ¹¹	12.5	47.7	20.3
27	Households who had taken any loan (%)	28.5	9.8	24.3
	Household Income			
28	Per Capita Annual Household Income (in INR) ¹²	24660	42504	28331
	Per Capita Annual Household Income by Source (in INR) ¹³			
29	Mean income from agricultural and allied activities	9744	2007	8155
30	Mean income from non-agricultural business or self- employed activities	1578	8345	2967
31	Mean income from wages/salaries ¹⁴	8550	22313	11380
32	Mean income from pension ¹⁵	1798	7320	2933
33	Mean income from government/public transfers ¹⁶	662	490	627
	Household Insurance			
34	Households covered by any health insurance (%) ¹⁷	3.1	3.4	3.2
35	Households covered by Rashtriya Swasthya Bima Yojana (RSBY) & allied schemes (%) ¹⁸	0.7	[0.2]	0.6
36	Households covered by Central Government Health Scheme (CGHS)/Employee State Insurance Scheme (ESIS) (%)	0.9	4.6	1.7
37	Households covered by medical reimbursement/health insurance from an employer (%)	-	[0.2]	-
38	Households covered by privately purchased commercial health insurance (%)	[0.1]	2.5	0.6

[&]quot;[]" based on fewer than 5 unweighted cases in the numerator or 25 unweighted cases in the denominator, "-" indicates less number of cases/ no cases.

11 Any one or more motorized vehicle includes car, motor cycle, moped and scooter.

¹² Per Capita Annual Household Income refers to total household income divided by household size. It includes income from all members of the household and from all sources such as agricultural work, non-agricultural work, self-employment, remittances/gifts, wages/salaries from employment, pension income and public/private transfers.

¹³ Based on income reported from household by that particular source.

¹⁴ Wage/salary work refers to income from full-time, part-time, side-jobs odd jobs or other wages or salaries.

¹⁵ Work related pension refers to income from central/state government pension, employer funded pension, privately purchased commercial pension and

¹⁶ Government/public transfers includes agriculture subsidies, non-agricultural government subsidies (LPG subsidy, scholarship for education, subsidy for building toilets, subsidy for setting up small scale industries, subsidy for solar panels, etc.), housing assistance, unemployment allowance, Janani Suraksha Yojana (JSY)/any other maternity compensation, compensation under any other health benefits program (other than JSY), Compensation for illness or accident, emergency or disaster relief (flood, earthquake, drought, etc.), debt waiver, compensation for re-settlement (due to slums, dams, road, etc.), assistance for self-employment (like Swarna Jayanti Gram Swarozgar Yojana/ National Rural Livelihood Mission), social security pension schemes (like Indira Gandhi National Old Age Pension Scheme, Indira Gandhi National Widow Pension Scheme, Indira Gandhi National Disability Pension Scheme) and other government transfers.

¹⁷ Includes different types of health insurance/benefits such as CGHS, ESIS, RSBY, other central/state government health insurance schemes or medical reimbursement from employer etc.

¹⁸ Allied schemes refers to state specific schemes which are based on Rashtriya Swasthya Bima Yojana (RSBY) model.

⁴⁰ Currently consuming tobacco refers to consumption of any smokeless tobacco product such as chewing tobacco, *gutka* or *pan masala* etc.

³⁶ Refers to discounts or concessions received for elderly in train/bus/air travel, telecommunication, special interest rates on bank accounts or loans, income tax benefits or others.

 $^{^{\}rm 37}$ Among those who are aware of concessions given by the government for elderly.

³⁸ The "Maintenance and Welfare of Parents and Senior Citizens Act" mandates legal obligation on children to financially maintain their parents/ provide monthly allowances.

³⁹ Currently smoking tobacco refers to smoking any tobacco product such as cigarette, bidi, cigar, hookah and cheroot etc.

⁴¹ Heavy episodic drinking refers to those who reported consumption of at least 60 grams or more (10 grams = 1 standard drink) of pure alcohol on at least one occasion in the past 30 days.

⁴² Those who are either engaged in moderate physical activity (at least 150 minutes throughout the week) or vigorous physical activity (at least 75 minutes throughout the week) or an equivalent combination of moderate- and vigorous-intensity activity.

⁴³ Refers to yoga/meditation/asanas/pranayama etc. practicing daily or more than once a week.

⁴⁴ For all chronic conditions, the reference period is *ever diagnosed* and diagnosed by MBBS, BDS and AYUSH health professionals.

⁴⁵ Poor Self Rated Health (SRH) includes both poor and very poor self-assessed health status.

⁴⁶ Cardiovascular diseases include hypertension, heart disease and stroke (any one or more).

⁴⁷ Chronic lung diseases include chronic obstructive pulmonary disease (COPD), asthma and chronic bronchitis (any one or more).

⁴⁸ Bone /joint diseases include arthritis, rheumatism and osteoporosis (any one or more).

^{*} Including spouse irrespective of age, na "not applicable", "[]" based on fewer than 5 unweighted cases in the numerator or 25 unweighted cases in the denominator.

⁶¹ For prevalence of endemic diseases in India, the reference period is past 2 years (any one or more).

⁶² Any vector-borne disease includes malaria, dengue or chikungunya (any one or more).

⁶³ Any water-borne disease includes diarrhoea/gastroenteritis, typhoid, jaundice or hepatitis (any one or more).

 $^{^{64}}$ For symptom based prevalence of health conditions, the reference period is past 2 years.

⁶⁵ Angina pectoris refers to, "a chest pain or discomfort with all the following symptoms: (a) the pain must include either the sternum (any level) or the left arm and left anterior chest (defined as the anterior chest wall between the levels of clavicle and lower end of sternum), (b) pain must be provoked by either hurrying or walking uphill (or by walking on the level, for those who never attempt more), (c) when pain occurs on walking it must make the person either stop or slacken pace, (d) pain must disappear on a majority of occasions in 10 min or less from the time when the person stands still.

 ⁶⁶ Sleep problems refer to difficulty in falling asleep or staying asleep throughout the night and also feeling unrested during the day (any one or more).
 67 Reproductive health problems include hot flashes, irregular vaginal discharge, uterine prolapse, fibroids, cysts and vaginal dryness in the past 2 years

⁽any one or more). 68 The reference period for Pap Smear and Mammography is past 2 years.

⁶⁹ Biological family members include -father, mother, brother, sister, children and grandchildren.

⁷⁰ Refers to functional limitations lasting more than 3 months.

⁷¹ Activities of Daily Living (ADL) includes dressing, putting on *chappals* or shoes, walking across a room, bathing, eating difficulties, getting in or out of bed (any one or more).

⁷² Instrumental Activities of Daily Living (IADL) includes preparing a hot meal, shopping for groceries, making telephone calls, taking medications, doing work around the house or garden, managing money (paying bills and keeping track of expenses) and getting around or finding address in unfamiliar place (any one or more).

* Including spouse irrespective of age, "[]" based on fewer than 5 unweighted cases in the numerator or 25 unweighted cases in the denominator.

⁷³ Helper refers to any person/s assisting respondent in any ADL/IADL limitations.

⁷⁴ Aids or supportive devices include spectacles and dentures and devices to help you in moving or sitting (such as, walker, walking sticks, wheel chair, adjustable showers stools/commodes, back/neck collar, orthosis/prosthesis).

⁷⁵ Among those respondents who reported using any aid or supportive device(s) to assist them in the activities of daily living.

⁷⁶ Immediate word recall refers to total number of words recalled from the given list of 10 words immediately.

⁷⁷ Delayed word recall refers to total number of words recalled from the same given list of 10 words after some delay.

⁷⁸ Based on Composite International Diagnostic Interview-Short Form (CIDI-SF); respondent who reported that they felt sad, blue or depressed for two-weeks period during last 12 months for all the day long or most of the day.

⁷⁹ Prevalence of measured hypertension refers to those measured with systolic blood pressure of ≥ 140 mmHg or diastolic blood pressure of ≥ 90 mmHg or both.

⁸⁰ Prevalence of undiagnosed hypertension refers to those undiagnosed by a health professional but whose measured systolic blood pressure was ≥ 140 mmHg or diastolic blood pressure was ≥ 90 mmHg or both.

⁸¹ Untreated hypertension refers to those who reported that they have been diagnosed with hypertension by a health professional and currently measured with hypertension but currently not taking treatment

⁸² Undertreated hypertension refers to those who reported that they have been diagnosed with hypertension by a health professional and currently measured with hypertension but currently taking treatment.

⁸³ Adequately treated hypertension refers to those reported that they have been diagnosed by health professional and currently taking treatment and whose measured systolic blood pressure was < 140 mmHg and diastolic blood pressure was < 90 mmHg.</p>

⁸⁴ Low vision refers to either low near vision or low distant vision in the better eye with best correction available with the respondent.

⁸⁵ Low near vision refers to near vision equal to or poorer than 20/80 and equal to or better than 20/400 in the better eye with best correction available with respondent.

⁸⁶ Low distance vision refers to distance vision equal to or poorer than 20/80 and equal to or better than 20/200 in the better eye with best correction available with respondent.

⁸⁷ Blindness refers to those with vision less than 20/200 in distance or could not count finger or perceive light.

⁸⁸ Body Mass Index (BMI) refers to weight in kilograms divided by height in meter square (kg/m²). BMI levels have been classified according to WHO classifications: underweight ≤ 18.4; normal=18.5 to 24.9; overweight=25.0 to 29.9; obese ≥30.0

UTTARAKHAND

Introduction

The Longitudinal Ageing Study in India (LASI) is a nationally and state representative longitudinal study of ageing and health. LASI is a national landmark, the largest in the world and, only of its kind in India. Its main goal is to provide valid, reliable and continuous scientific data on the health, social, mental and economic well-being of India's older adult (aged 45 and above) population. These data will help to monitor existing programmes and inform new national health and ageing policies. LASI is undertaken as a globally harmonized study carried out in more than 44 developed and developing countries worldwide; and the survey schedules, protocols and methodologies are harmonized across these countries. These are part of the Health and Retirement Study (HRS) family of longitudinal ageing and retirement surveys. Therefore, LASI data will also serve as an important public resource for national policy making and worldwide comparative research on ageing.

LASI is undertaken under the aegis of the Ministry of Health and Family Welfare (MoHFW), Government of India. The International Institute for Population Sciences (IIPS), Mumbai is the nodal institution for implementing LASI in collaboration with the Harvard T.H.Chan School of Public Health (HSPH) and the University of Southern California (USC).

A. LASI Objectives and Coverage:

The LASI wave-1 survey (2017-18) covers all 30 states and 6 Union Territories of India with a panel sample size of 72,250 older adults aged 45 years and above and their spouses regardless of age. LASI collects data on four major subject domains:

- 1. Health: Disease Burden & Risk Factors (Reported and Measured)
- 2. Health Care and Health Care Financing
- 3. Social: Family, Social Network and Social Welfare Programmes for the Elderly
- 4. Economic: Income, Wealth, Expenditure, Employment, Retirement and Pension

The long-term goal of LASI is to continue for the next 25 years, with respondents surveyed every two years.

LASI Survey Instruments:

The LASI survey instrument comprises three schedules:

- **1. Household Survey Schedule:** Administered to one per household, collects information from interviewing one or more adult member of household. Includes the following modules: Household Roster, Housing and Environment, Household Consumption, Household Assets and Debts, Household Income and Household Health Insurance.
- 2. Individual Survey Schedule: Administered to each respondent aged 45 years and above and their spouses (regardless of age) in the sampled households. Includes the following modules: Demographics, Work, Retirement and Pension, Health (Chronic Diseases and Health Conditions), Functional Health, Family Medical History, Mental Health (Cognition and Depression), Health Behavior and Food Security, Health Care Access and Utilization, Health Care Financing, Family and Social Network, Social Welfare Programmes and Experimental Modules on Time Use, Expectations, Social Connectedness and Vignettes.

In addition, LASI includes an individual module on measured biomarkers:

- Anthropometric Measurements: Height, Weight, Waist Circumference and Hip Circumference.
- **Functional Health Markers:** Blood Pressure and Pulse Rate, Lung Function Test (Spirometry) and Vision Test (Near and Distance Vision Impairment).

- **Performance Based Markers:** Grip Strength, Timed-Walk and Balance Tests.
- Collection of Dried Blood Spot (DBS) samples: To be tested for variety of molecular biomarkers.
- **3.** In addition, a Community Survey Schedule is administered at the community level (villages in rural areas and census enumeration blocks in urban areas) and is answered by several key informants. The community schedule includes the following sections: Population Characteristics, Infrastructure and Common Resource, Accessibility and Availability of Health Care Services and coverage of Health and Social Welfare Programmes.

Fact Sheet of Key Indicators for the State of Uttarakhand

This fact sheet provides information on key indicators (weighted) for the state of Uttarakhand. The fieldwork for Uttarakhand was conducted from **December 2017 through February 2018**. Table-1 provides information about the number of households and individuals interviewed.

Table 1 Number of Households and Individuals interviewed for the state of Uttarakhand, LASI Wave 1, 2017-18

Sr. No.	Coverage		Rural	Urban	Male	Female	Total
1.	Household roster completed		887	368	na	na	1255
2.	Households interviewed (with age- eligible individuals) #		618	245	na	na	863
2	Individuals Interviewed	45-59 years and their spouses irrespective of age	489	228	253	464	717
3.		60 years and above	492	149	303	338	641
		All ages	981	377	556	802	1358

na "not applicable"

[#] LASI age-eligible households are those with at least one individual in aged 45 years and above; age-eligible individuals are persons aged 45 years and above and their spouses (regardless of age) in the LASI sampled households.

[&]quot;[]" based on fewer than 5 unweighted cases in the numerator or 25 unweighted cases in the denominator. 1 Based on all households including LASI age-eligible and non-age-eligible households.

² Death rate is calculated based on deaths in the last two calendar years.

³ Based on LASI age-eligible households only.

⁴ Improved sanitation includes flush or pour flush toilet (which is flushed to piped sewer system/septic tank/ pit latrine), pit latrine, twin pit, composting toilet.

⁵ Open defecation refers to the practice whereby people go out in fields, bushes, forests, open bodies of water, or other open spaces rather than using the toilet to defecate. This information was collected from eligible household respondent.

⁶ Improved drinking water source includes water from pipe, public tap/standpipe, tube well or bore well, dug well, spring water and rain water.

⁷ Clean cooking fuel includes LPG, Biogas and Electricity.

⁸ Indoor pollution refers to households using solid and unclean fuel (for cooking or any other purpose) inside the household and cooking in traditional chullah/stove or open fire without any ventilation. Unclean fuel refers to use of kerosene, charcoal, coal, crop residue, wood/shrub and dung cake.

⁹ *Pucca* house refers to a house whose roof, wall and floor is made up of *pucca* (concrete) material.

¹⁰ MPCE is defined as total monthly household consumption expenditure divided by household size. Includes household's per capita spending on food and non-food items including spending on health, education, utilities etc.

Any one or more motorized vehicle includes car, motor cycle, moped and scooter.

[&]quot;[]" based on fewer than 5 unweighted cases in the numerator or 25 unweighted cases in the denominator.

11 Any one or more materized valuable in the second cases in the numerator or 25 unweighted cases in the denominator.

¹² Per Capita Annual Household Income refers to total household income divided by household size. It includes income from all members of the household and from all sources such as agricultural work, non-agricultural work, self-employment, remittances/gifts, wages/salaries from employment, pension income and public/private transfers.

¹³ Based on income reported from household by that particular source.

¹⁴ Wage/salary work refers to income from full-time, part-time, side-jobs odd jobs or other wages or salaries.

¹⁵ Work related pension refers to income from central/state government pension, employer funded pension, privately purchased commercial pension and other state pension schemes.

¹⁶ Government/public transfers includes agriculture subsidies, non-agricultural government subsidies (LPG subsidy, scholarship for education, subsidy for building toilets, subsidy for setting up small scale industries, subsidy for solar panels, etc.), housing assistance, unemployment allowance, Janani Suraksha Yojana (JSY)/any other maternity compensation, compensation under any other health benefits program (other than JSY), Compensation for illness or accident, emergency or disaster relief (flood, earthquake, drought, etc.), debt waiver, compensation for re-settlement (due to slums, dams, road, etc.), assistance for self-employment (like Swarna Jayanti Gram Swarozgar Yojana/ National Rural Livelihood Mission), social security pension schemes (like Indira Gandhi National Old Age Pension Scheme, Indira Gandhi National Widow Pension Scheme, Indira Gandhi National Disability Pension Scheme) and other government transfers.

¹⁷ Includes different types of health insurance/benefits such as CGHS, ESIS, RSBY, other central/state government health insurance schemes or medical reimbursement from employer etc.

¹⁸ Allied schemes refer to state specific schemes which are based on Rashtriya Swasthya Bima Yojana (RSBY) model.

³⁷ Among those who are aware of concessions given by the government for elderly.

³⁸ The "Maintenance and Welfare of Parents and Senior Citizens Act" mandates legal obligation on children to financially maintain their parents/ provide monthly allowances.

³⁹ Currently smoking tobacco refers to smoking any tobacco product such as cigarette, *bidi*, cigar, *hookah* and *cheroot* etc.

⁴⁰ Currently consuming tobacco refers to consumption of any smokeless tobacco product such as chewing tobacco, *gutka* or *pan masala* etc.

⁴¹ Heavy episodic drinking refers to those who reported consumption of at least 60 grams or more (10 grams = 1 standard drink) of pure alcohol on at least one occasion in the past 30 days.

⁴² Those who are either engaged in moderate physical activity (at least 150 minutes throughout the week) or vigorous physical activity (at least 75 minutes throughout the week) or an equivalent combination of moderate- and vigorous-intensity activity.

⁴³ Refers to yoga/meditation/asanas/pranayama etc. practicing daily or more than once a week.

⁴⁴ For all chronic conditions, the reference period is *ever diagnosed* and diagnosed by MBBS, BDS and AYUSH health professionals.

⁴⁵ Poor Self Rated Health (SRH) includes both poor and very poor self-assessed health status.

⁴⁶ Cardiovascular diseases include hypertension, heart disease and stroke (any one or more).

⁴⁷ Chronic lung diseases include chronic obstructive pulmonary disease (COPD), asthma and chronic bronchitis (any one or more).

⁴⁸ Bone /joint diseases include arthritis, rheumatism and osteoporosis (any one or more).

^{*} Including spouse irrespective of age, "[]" based on fewer than 5 unweighted cases in the numerator or 25 unweighted cases in the denominator,

[&]quot;-" indicates less number of cases/ no cases.

⁴⁹ Any neurological/psychiatric problem includes depression, alzheimer's disease, dementia or psychiatric problem or neurological problem (any one or

⁵⁰ Psychiatric problems include unipolar or bipolar disorder, schizophrenia etc. (any one or more).

⁵¹ Neurological problems include neuropathy, convulsion, migraine, Parkinson's etc. (any one or more). ⁵² Includes oral cancer, breast cancer, cervical cancer, lung cancer or cancer/malignant tumors originating in any other organs/ body parts (any one or

⁵³ Urogenital conditions include chronic renal failure, incontinence, kidney stone and Benign Prostate Hypertrophy-BPH (only among males)

⁽any one or more). ⁵⁴ Eye or vision related conditions or problems include presbyopia, glaucoma, cataract, myopia, hypermetropia, other eyes problems such as conjunctivitis, eye injury, red eye etc. (any one or more).

⁵⁵ Refractive error includes presbyopia, myopia and hypermetropia with or without astigmatism.

⁵⁶ Common oral health problems include painful teeth, ulcer lasting more than two weeks, bleeding gums, swelling gums, loose teeth, dental cavity/dental caries & soreness or cracks in the corner of the mouth in past 12 months (any one or more).

⁵⁷ Periodontal diseases include bleeding gums, swelling gums or ulcers lasting more than two weeks (any one or more).

⁵⁸ Injury include injuries sustained due to any traffic accident, violence, animal attack or fall in the past 2 years (any one or more).

⁵⁹ Reference period for natural and man-made disaster is past 5 years.

⁶⁰ Health problems due to natural and man-made disaster refers to permanent physical disability, psychological and mental health problems or chronic illness (any one or more).

^{*} Including spouse irrespective of age, na "not applicable", "[]" based on fewer than 5 unweighted cases in the numerator or 25 unweighted cases in the denominator, "-" indicates less number of cases/ no cases.

⁶¹ For prevalence of endemic diseases in India, the reference period is past 2 years (any one or more).

⁶² Any vector-borne disease includes malaria, dengue or chikungunya (any one or more).

⁶³ Any water-borne disease includes diarrhoea/gastroenteritis, typhoid, jaundice or hepatitis (any one or more).

⁶⁴ For symptom based prevalence of health conditions, the reference period is past 2 years.

⁶⁵ Angina pectoris refers to, "a chest pain or discomfort with all the following symptoms: (a) the pain must include either the sternum (any level) or the left arm and left anterior chest (defined as the anterior chest wall between the levels of clavicle and lower end of sternum), (b) pain must be provoked by either hurrying or walking uphill (or by walking on the level, for those who never attempt more), (c) when pain occurs on walking it must make the person either stop or slacken pace, (d) pain must disappear on a majority of occasions in 10 min or less from the time when the person stands still.

⁶⁶ Sleep problems refer to difficulty in falling asleep or staying asleep throughout the night and also feeling unrested during the day (any one or more).

⁶⁷ Reproductive health problems include hot flashes, irregular vaginal discharge, uterine prolapse, fibroids, cysts and vaginal dryness in the past 2 years (any one or more).

⁶⁸ The reference period for Pap Smear and Mammography is past 2 years.

⁶⁹ Biological family members include -father, mother, brother, sister, children and grandchildren.

⁷⁰ Refers to functional limitations lasting more than 3 months.

⁷¹ Activities of Daily Living (ADL) includes dressing, putting on *chappals* or shoes, walking across a room, bathing, eating difficulties, getting in or out of bed (any one or more).

⁷² Instrumental Activities of Daily Living (IADL) includes preparing a hot meal, shopping for groceries, making telephone calls, taking medications, doing work around the house or garden, managing money (paying bills and keeping track of expenses) and getting around or finding address in unfamiliar place (any one or more).

* Including spouse irrespective of age, "[]" based on fewer than 5 unweighted cases in the numerator or 25 unweighted cases in the denominator.

⁷³ Helper refers to any person/s assisting respondent in any ADL/IADL limitations.

⁷⁴ Aids or supportive devices include spectacles and dentures and devices to help you in moving or sitting (such as, walker, walking sticks, wheel chair, adjustable showers stools/commodes, back/neck collar, orthosis/prosthesis).

⁷⁵ Among those respondents who reported using any aid or supportive device(s) to assist them in the activities of daily living.

⁷⁶ Immediate word recall refers to total number of words recalled from the given list of 10 words immediately.

⁷⁷ Delayed word recall refers to total number of words recalled from the same given list of 10 words after some delay.

⁷⁸ Based on Composite International Diagnostic Interview-Short Form (CIDI-SF); respondent who reported that they felt sad, blue or depressed for two-weeks period during last 12 months for all the day long or most of the day.

⁷⁹ Prevalence of measured hypertension refers to those measured with systolic blood pressure of ≥ 140 mmHg or diastolic blood pressure of ≥ 90 mmHg or both

⁸⁰ Prevalence of undiagnosed hypertension refers to those undiagnosed by a health professional but whose measured systolic blood pressure was ≥ 140 mmHg or diastolic blood pressure was ≥ 90 mmHg or both.

⁸¹ Untreated hypertension refers to those who reported that they have been diagnosed with hypertension by a health professional and currently measured with hypertension but currently not taking treatment

⁸² Undertreated hypertension refers to those who reported that they have been diagnosed with hypertension by a health professional and currently measured with hypertension but currently taking treatment.

⁸³ Adequately treated hypertension refers to those reported that they have been diagnosed by health professional and currently taking treatment and whose measured systolic blood pressure was < 140 mmHg and diastolic blood pressure was < 90 mmHg.</p>

⁸⁴ Low vision refers to either low near vision or low distant vision in the better eye with best correction available with the respondent.

⁸⁵ Low near vision refers to near vision equal to or poorer than 20/80 and equal to or better than 20/400 in the better eye with best correction available with respondent.

⁸⁶ Low distance vision refers to distance vision equal to or poorer than 20/80 and equal to or better than 20/200 in the better eye with best correction available with respondent.

⁹⁰ WHO criteria of classification of waist- hip ratio (WHR)

Male	Female	Risk level
< 0.90	< 0.85	Low
≥0.90	≥0.85	High

⁹¹ Grip strength measures bodily muscle strength and is an overall marker of health among elderly population. Mean grip strength is an average of two readings for dominant hand.

⁸⁷ Blindness refers to those with vision less than 20/200 in distance or could not count finger or perceive light.

⁸⁸ Body Mass Index (BMI) refers to weight in kilograms divided by height in meter square (kg/m²). BMI levels have been classified according to WHO classifications: underweight ≤ 18.4; normal=18.5 to 24.9; overweight=25.0 to 29.9; obese ≥30.0

⁸⁹ Metabolic complications: critical limit classification for high risk waist circumference for male is ≥102 cm and for female is ≥88cm.

⁹² Includes health post/sub centers, primary health center/urban health center, community health center, district/sub-district hospital, government/tertiary hospital or government AYUSH hospital.

⁹³ Includes private hospital/nursing home, private clinic (OPD based services), NGO/Charity/Trust/Church-run hospital/Private AYUSH hospital. It also includes health care services availed partially from either private or government or NGO.

⁹⁴ Among those who sought out-patient care in the past 12 months and this includes modern allopathic medicines, AYUSH medicines, traditional herbs or medicine, excluding any health supplements.

⁹⁵ The expenditure on last in-patient visit includes consultation charges, medicine charges, test/investigation charge, nursing home charges, surgery and related charges, transportation charges and any other charges.

WEST BENGAL

Introduction

The Longitudinal Ageing Study in India (LASI) is a nationally and state representative longitudinal study of ageing and health. LASI is a national landmark, the largest in the world and, only of its kind in India. Its main goal is to provide valid, reliable and continuous scientific data on the health, social, mental and economic well-being of India's older adult (aged 45 and above) population. These data will help to monitor existing programmes and inform new national health and ageing policies. LASI is undertaken as a globally harmonized study carried out in more than 44 developed and developing countries worldwide; and the survey schedules, protocols and methodologies are harmonized across these countries. These are part of the Health and Retirement Study (HRS) family of longitudinal ageing and retirement surveys. Therefore, LASI data will also serve as an important public resource for national policy making and worldwide comparative research on ageing.

LASI is undertaken under the aegis of the Ministry of Health and Family Welfare (MoHFW), Government of India. The International Institute for Population Sciences (IIPS), Mumbai is the nodal institution for implementing LASI in collaboration with the Harvard T.H.Chan School of Public Health (HSPH) and the University of Southern California (USC).

A. LASI Objectives and Coverage:

The LASI wave-1 survey (2017-18) covers all 30 states and 6 Union Territories of India with a panel sample size of 72,250 older adults aged 45 years and above and their spouses regardless of age. LASI collects data on four major subject domains:

- 1. Health: Disease Burden & Risk Factors (Reported and Measured)
- 2. Health Care and Health Care Financing
- 3. Social: Family, Social Network and Social Welfare Programmes for the Elderly
- 4. Economic: Income, Wealth, Expenditure, Employment, Retirement and Pension

The long-term goal of LASI is to continue for the next 25 years, with respondents surveyed every two years.

LASI Survey Instruments:

The LASI survey instrument comprises three schedules:

- **1. Household Survey Schedule:** Administered to one per household, collects information from interviewing one or more adult member of household. Includes the following modules: Household Roster, Housing and Environment, Household Consumption, Household Assets and Debts, Household Income and Household Health Insurance.
- 2. Individual Survey Schedule: Administered to each respondent aged 45 years and above and their spouses (regardless of age) in the sampled households. Includes the following modules: Demographics, Work, Retirement and Pension, Health (Chronic Diseases and Health Conditions), Functional Health, Family Medical History, Mental Health (Cognition and Depression), Health Behavior and Food Security, Health Care Access and Utilization, Health Care Financing, Family and Social Network, Social Welfare Programmes and Experimental Modules on Time Use, Expectations, Social Connectedness and Vignettes.

In addition, LASI includes an individual module on measured biomarkers:

- Anthropometric Measurements: Height, Weight, Waist Circumference and Hip Circumference.
- Functional Health Markers: Blood Pressure and Pulse Rate, Lung Function Test (Spirometry) and Vision Test (Near and Distance Vision Impairment).

- **Performance Based Markers:** Grip Strength, Timed-Walk and Balance Tests.
- Collection of Dried Blood Spot (DBS) samples: To be tested for variety of molecular biomarkers.
- **3.** In addition, a Community Survey Schedule is administered at the community level (villages in rural areas and census enumeration blocks in urban areas) and is answered by several key informants. The community schedule includes the following sections: Population Characteristics, Infrastructure and Common Resource, Accessibility and Availability of Health Care Services and coverage of Health and Social Welfare Programmes.

Fact Sheet of Key Indicators for the State of West Bengal

This fact sheet provides information on key indicators (weighted) for the state of West Bengal. The fieldwork for West Bengal was conducted from **July 2018 through January 2019**. Table-1 provides information about the number of households and individuals interviewed.

Table 1 Number of Households and Individuals interviewed for the state of West Bengal, LASI Wave 1, 2017-18

Sr. No.	Coverage		Rural	Urban	Male	Female	Total
1.	Household roster completed		1685	1517	na	na	3202
2.	Households interviewed (with age-eligible individuals) #		1148	1131	na	na	2279
2	Individuals	45-59 years and their spouses irrespective of age	1202	1187	868	1521	2389
3.	Interviewed	60 years and above	769	775	752	792	1544
		All ages	1971	1962	1620	2313	3933

na "not applicable"

[#] LASI age-eligible households are those with at least one individual in aged 45 years and above; age-eligible individuals are persons aged 45 years and above and their spouses (regardless of age) in the LASI sampled households.

⁻

 $^{^{\}rm I}$ Based on all households including LASI age-eligible and non-age-eligible households.

² Death rate is calculated based on deaths in the last two calendar years.

³ Based on LASI age-eligible households only.

⁴ Improved sanitation includes flush or pour flush toilet (which is flushed to piped sewer system/septic tank/ pit latrine), pit latrine, twin pit, composting toilet.

⁵ Open defecation refers to the practice whereby people go out in fields, bushes, forests, open bodies of water, or other open spaces rather than using the toilet to defecate. This information was collected from eligible household respondent.

⁶ Improved drinking water source includes water from pipe, public tap/standpipe, tube well or bore well, dug well, spring water and rain water.

⁷ Clean cooking fuel includes LPG, Biogas and Electricity.

⁸ Indoor pollution refers to households using solid and unclean fuel (for cooking or any other purpose) inside the household and cooking in traditional *chullah/stove* or open fire without any ventilation. Unclean fuel refers to use of kerosene, charcoal, coal, crop residue, wood/shrub and dung cake.

⁹ *Pucca* house refers to a house whose roof, wall and floor is made up of *pucca* (concrete) material.

MPCE is defined as total monthly household consumption expenditure divided by household size. Includes household's per capita spending on food and non-food items including spending on health, education, utilities etc.

37	Households covered by medical reimbursement/health insurance from an employer (%)	0.5	1.9	1.0
38	Households covered by privately purchased commercial health insurance (%)	[0.2]	5.9	2.2

Any one or more motorized vehicle includes car, motor cycle, moped and scooter.

¹⁴ Wage/salary work refers to income from full-time, part-time, side-jobs odd jobs or other wages or salaries.

[&]quot;[]" based on fewer than 5 unweighted cases in the numerator or 25 unweighted cases in the denominator.

11 Any one or more motorized visited that 1

¹² Per Capita Annual Household Income refers to total household income divided by household size. It includes income from all members of the household and from all sources such as agricultural work, non-agricultural work, self-employment, remittances/gifts, wages/salaries from employment, pension income and public/private transfers.

¹³ Based on income reported from household by that particular source.

¹⁵ Work related pension refers to income from central state government pension, employer funded pension, privately purchased commercial pension and other state pension schemes.

¹⁶ Government/public transfers includes agriculture subsidies, non-agricultural government subsidies (LPG subsidy, scholarship for education, subsidy for building toilets, subsidy for setting up small scale industries, subsidy for solar panels, etc.), housing assistance, unemployment allowance, Janani Suraksha Yojana (JSY)/any other maternity compensation, compensation under any other health benefits program (other than JSY), Compensation for illness or accident, emergency or disaster relief (flood, earthquake, drought, etc.), debt waiver, compensation for re-settlement (due to slums, dams, road, etc.), assistance for self-employment (like Swarna Jayanti Gram Swarozgar Yojana/ National Rural Livelihood Mission), social security pension schemes (like Indira Gandhi National Old Age Pension Scheme, Indira Gandhi National Widow Pension Scheme, Indira Gandhi National Disability Pension Scheme) and other government transfers.

¹⁷ Includes different types of health insurance/benefits such as CGHS, ESIS, RSBY, other central/state government health insurance schemes or medical reimbursement from employer etc.

¹⁸ Allied schemes refers to state specific schemes which are based on Rashtriya Swasthya Bima Yojana (RSBY) model.

166	Blindness (%) ⁸⁷	0.32	3.4	1.1	1.9	1.9	0.92	1.6	

^{*} Including spouse irrespective of age, "[]" based on fewer than 5 unweighted cases in the numerator or 25 unweighted cases in the denominator.

⁷³ Helper refers to any person/s assisting respondent in any ADL/IADL limitations.

⁷⁴ Aids or supportive devices include spectacles and dentures and devices to help you in moving or sitting (such as, walker, walking sticks, wheel chair, adjustable showers stools/ commodes, back/neck collar, orthosis/prosthesis).

⁷⁵ Among those respondents who reported using any aid or supportive device(s) to assist them in the activities of daily living.

⁷⁶ Immediate word recall refers to total number of words recalled from the given list of 10 words immediately. ⁷⁷ Delayed word recall refers to total number of words recalled from the same given list of 10 words after some delay.

⁷⁸ Based on Composite International Diagnostic Interview-Short Form (CIDI-SF); respondent who reported that they felt sad, blue or depressed for twoweeks period during last 12 months for all the day long or most of the day.

⁷⁹ Prevalence of measured hypertension refers to those measured with systolic blood pressure of \geq 140 mmHg or diastolic blood pressure of \geq 90 mmHg

 $^{^{80}}$ Prevalence of undiagnosed hypertension refers to those undiagnosed by a health professional but whose measured systolic blood pressure was ≥ 140 mmHg or diastolic blood pressure was \geq 90 mmHg or both.

⁸¹ Untreated hypertension refers to those who reported that they have been diagnosed with hypertension by a health professional and currently measured with hypertension but currently not taking treatment

⁸² Undertreated hypertension refers to those who reported that they have been diagnosed with hypertension by a health professional and currently measured with hypertension but currently taking treatment.

⁸³ Adequately treated hypertension refers to those reported that they have been diagnosed by health professional and currently taking treatment and whose measured systolic blood pressure was < 140 mmHg and diastolic blood pressure was < 90 mmHg.

⁸⁴ Low vision refers to either low near vision or low distant vision in the better eye with best correction available with the respondent.

⁸⁵ Low near vision refers to near vision equal to or poorer than 20/80 and equal to or better than 20/400 in the better eye with best correction available with respondent.

⁸⁶ Low distance vision refers to distance vision equal to or poorer than 20/80 and equal to or better than 20/200 in the better eye with best correction available with respondent.

⁸⁷ Blindness refers to those with vision less than 20/200 in distance or could not count finger or perceive light.

182	Mean expenditure on last hospitalization (Private Facility)	30863	47199	37399	38601	25658	52986	38019

⁹⁰ WHO criteria of classification of waist- hip ratio (WHR)

Male	Female	Risk level
< 0.90	< 0.85	Low
≥0.90	≥0.85	High

⁹¹ Grip strength measures bodily muscle strength and is an overall marker of health among elderly population. Mean grip strength is an average of two readings for dominant hand.

^{*} Including spouse irrespective of age.

⁸⁸ Body Mass Index (BMI) refers to weight in kilograms divided by height in meter square (kg/m²). BMI levels have been classified according to WHO classifications: underweight ≤ 18.4; normal=18.5 to 24.9; overweight=25.0 to 29.9; obese ≥30.0

⁸⁹ Metabolic complications: critical limit classification for high risk waist circumference for male is ≥102 cm and for female is ≥88cm.

⁹² Includes health post/sub centers, primary health center/urban health center, community health center, district/sub-district hospital, government/tertiary hospital or government AYUSH hospital.

⁹³ Includes private hospital/nursing home, private clinic (OPD based services), NGO/Charity/Trust/Church-run hospital/Private AYUSH hospital. It also includes health care services availed partially from either private or government or NGO.

⁹⁴ Among those who sought out-patient care in the past 12 months and this includes modern allopathic medicines, AYUSH medicines, traditional herbs or medicine, excluding any health supplements.

⁹⁵ The expenditure on last in-patient visit includes consultation charges, medicine charges, test/investigation charge, nursing home charges, surgery and related charges, transportation charges and any other charges.

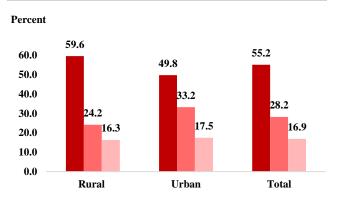

Individual-Level Key Indicators		Age		Sex		Residence		
		45-59 years*	60 years & above	Male	Female	Rural	Urban	Total
	Sources of Finance for Health Care Services during the Last Hospitalization
